THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. V—No. 1

JULY, 1904

Price Three Cents

The **LABOUR GAZETTE** wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA.

OTTAWA, July 15th, 1904.

During June, His Honour Judge Winchester who was appointed by the Dominion government on May 23rd as a special commissioner to investigate the alleged employment of aliens by the Grand Trunk Railway Company, held a number of sessions of the commission, witnesses being examined at Montreal, Ottawa, North Bay, Fort William, Winnipeg and Edmonton. A brief statement as to the progress of the inquiry up to the end of June appears in the present issue.

On the 30th of June a second Commission was issued to Judge Winchester, on the recommendation of the Honourable the Minister of Labour, to inquire into the circumstances attending the importation of Italian labour into Canada by way of the city of Montreal. During the opening week of the month and the month preceding considerable congestion in the labour market was caused by the large influx of Italian

immigrants. An investigation was made by the Deputy Minister of Labour and a report presented to the government on the subject, after which the Commission was issued.

Special measures have been taken by the government to prevent fraudulent representations being made to persons abroad in reference to opportunities of employment in Canada. An account of the action of the government in this connection is given in the present issue.

The changes in wage schedules effected during the spring months of the present year, though less extensive than in 1903 and 1902, represent on the whole an appreciable improvement in the conditions of employment of skilled labour in Canada. A tabular statement with as full details as were obtainable with regard to every change of which the department received notice, appears in the present issue, together with an article in which the different changes are described in detail, this being the regular quarterly statement issued by the department. The period covered by the statement is the three spring months of the present calendar year.

Special articles relating to the agreement between the Toronto Railway Company and its employees which was arrived at as the result of the appointment of a committee of conciliation during June, and to an increase in the staff and jurisdiction of factory inspectors in Ontario authorized by the provincial government, are included in the present issue.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JUNE, 1904.

I.—GENERAL SUMMARY.

AS will be seen from the nature of local correspondents to the *Labour Gazette*, industrial and labour conditions in Canada during June showed on the whole an improvement over May. This was most pronounced in the province of Ontario, where the cities of Toronto, Guelph, Niagara Falls, St. Catharines, Stratford and London, presented particularly favourable reports. The remaining reports for Ontario and the eastern provinces generally were favourable, the only notable exceptions being in the case of Sydney, N.S., on account of the strike of the Dominion Iron and Steel Company's employees there,* and at Sault Ste. Marie, Ont., where the shut-down in the Lake Superior Company's establishments continues. At Winnipeg, Man., in spite of the extensive developments in progress some congestion in the skilled labour market has occurred as a result of the influx of immigrants, but at Brandon and elsewhere throughout the west, the general tone is that of exceptional activity of employment. In British Columbia alone, among the provinces, conditions may be stated to have declined since May, Vancouver and Nanaimo reporting dullness, with a tendency in the same direction at Victoria, and though Rossland and New Westminster report more favourable conditions, the general tone is considerably less buoyant than a month ago.

The Cost of Living.

An important change affecting the cost of living during the month was a reduction of 2½ cents a gallon in the price of various grades of coal oil, which followed the decrease in the duty announced in the budget speech of the Honourable the Minister of Finance. The reduction, which applied to gasoline and naphtha as well, took effect immediately over a large area, the province of

Ontario being chiefly affected, though, at Winnipeg and elsewhere in western Canada prices were similarly reduced. At various points in Ontario, on the other hand, the prices of fresh meats were advanced, especially for the better class of steaks and roasts. At Hamilton the advance amounted to 3 cents per lb., on the choice cuts, at Ottawa to from 3 cents to 4 cents a pound, at Toronto to 2 cents, and at several other points to from 2 cents to 3 cents. The reason given for the advance was the alleged difficulty of the butchers in disposing of the cheaper cuts, as well as the scarcity of butchers' cattle following the opening of navigation, and the good prices prevailing in the British market. The situation, it is expected, will be in a measure relieved when the grass-fed cattle come on the market. Another feature of the month affecting cost of living over an extensive area was the continued scarcity of dwellings reported at several points in Ontario, notably at Toronto, Toronto Junction, Guelph, Hamilton, Brantford, Berlin, Waterloo and other important centres. The scarcity is particularly felt in the class of houses occupied by mechanics, and the increase in rents, which has accompanied it, has led in some cases to inconvenience and overcrowding.

Changes in Rates of Wages and Hours of Labour.

A number of changes in the rates of wages and hours of labour were reported to the department during June, representing for the most part improved conditions for labour, though the movement in this direction was less active than a month ago, or in June, 1903. The most important change of the month was that which went into effect in the Printing and Allied Trades at Toronto, Ont., by which printers, pressmen, feeders, bookbinders, stereotypers and electrotypers, numbering in the aggregate 1,010 male and 400 female work-people had their wages

* A special article dealing with this dispute appears on another page of the present issue of the *Gazette*.

raised on June 1. The amount of the increase vary, according to class, amounting approximately to from \$1.25 to \$2 per day, the hours of labour remaining as before.† A second important increase of the month was that allowed to employees of the Toronto Railway Company, as arranged by a conciliation committee composed of representatives of the men and of the company.* A brief statement of the other changes reported in June is as follows :

At *Montreal, Que.*, cloakmakers to the number of twenty-five, had their wages materially increased. *Granite cutters* in the same city also had their wages slightly increased in some instances. At *Hamilton, Ont.*, finishers on cement walks and other civic employees had their wages increased. *Electrical workers* at *Toronto, Ont.*, had their wages increased 2 cents an hour to a minimum of 27 cents, about 150 to 200 men being affected by the change, and *brewery workers* received an improved schedule. At *Brantford, Ont.*, twelve plasterers had their wages increased on June 1st. At *London, Ont.*, unskilled labour was in some cases advanced from \$1.50 to \$1.60 per day, and at *St. Thomas, Ont.*, twelve cigarmakers had their wages advanced by from 50 cents to \$1.00 per thousand cigars according to classification. At *Winnipeg, Man.*, unskilled labour is receiving unusually low wages owing to the over-stocking of the market, 15 cents an hour being the rate in effect during June. On July 1st a new schedule for the employees of the *British Columbia Electrical Railway Co.*, will go into effect, the new scale ranging from 20 cents to 27 cents per hour according to the length of service, the latter rate obtaining after the tenth year. Previous to July 1st, 1902, the rates for this employment were 20, 21 and 22 cents per hour. Last year they were increased to 20, 22, 23 and 25 cents, the last named rate being paid to men who had been over five

years in the service. At *Victoria, B.C.*, seventeen patrol men employed by the corporation received an increase of \$2.50 per month in salary dating from July 1st. Several reductions in salary in the offices of the Department of the Interior at *Dawson, Y.T.*, were announced for July 1st, the change affecting several janitors, messengers, clerks, etc.

Various early closing arrangements were arrived at in June, retail clerks and barbers being the classes chiefly affected. In many cases also a weekly half-holiday was granted. Thus, at *St. Catharines* ninety grocery clerks were granted a half-holiday on Wednesday, to date from June 15th to September 1st. In *Guelph* also all stores will close on Thursday afternoons during July and August, except in weeks in which a public holiday occurs.

Interruptions to Industry.

Apart from the strike at Sydney no serious interruptions to industry in any one locality in Canada resulted during June from trade disputes, the record for the month showing twenty-three disputes in existence as against twenty-one in May, and forty-one a year ago. The settlement of the difficulty between the Lake Carriers' Association and the Master and Pilots' Association on the great lakes, which had interfered more or less seriously with several Canadian ports and transportation companies during May, caused an immediate improvement in the movements of freight, though a heavy decline in the tonnage passed through the Sault Ste. Marie canals to date has resulted. Another serious interruption to industry was the temporary closing down of several leading cotton companies, among them the Montreal Cotton Co., the Dominion Cotton Co., the Merchants Cotton Co., and the Canadian Coloured Mills alleged to be owing to unsatisfactory conditions prevailing in the raw material market, and to a decline in orders. Montreal, Que., Marysville, N.B., St. Stephen, N.B., Moncton, N.B., Halifax, N.S., and other points were affected.

† Full particulars of this change will be found in the report of the Toronto correspondent of the *Gazette* in the present issue.

* A special article dealing with that agreement will be found on another page of the present issue.

Among industrial establishments destroyed by fire during the month, the following may be mentioned. A carriage factory at Halifax, N.S., loss from \$5,000 to \$6,000; a planing mill station house and freight sheds at Doaktown, N.B.; a flour and grist mill and coal shed at St. John, N.B., loss \$30,000; a woodworking establishment at St. Hyacinthe, Que., loss \$50,000; a lumber yard at Point St. Charles, Que.; several houses, stables and dwellings at Wakefield, Ont.; a planing mill and saw-mill at Cornwall, Ont., loss \$40,000; a pump and wind-mill establishment employing 25 men at Peterborough, Ont.; a saw-mill at Bridgenorth, Ont., employing 25 men; a saw-mill at Huntsville, Ont., loss \$12,000; a box factory at Toronto, Ont.; a box factory at St. Catharines, Ont.; loss \$30,000; a planing mill at Mitchell, Ont.; a planing mill and dwellings at Rat Portage, Ont., in which one hundred and fifty men were employed, loss \$100,000; pithead works at Nanaimo, B.C., loss \$75,000 (May 29th).

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada as indicated by the reports of correspondents to the *Labour Gazette* for June and by information received at the department from other sources, may be briefly summarized as follows:—

Agriculture.

Exceptionally favourable weather and excellent crop conditions were reported by the *Labour Gazette* correspondents from nearly every section of Canada. The hay crop in particular will be heavy, especially in eastern Ontario and Quebec, and in several localities is already being harvested. The other crops are now all in the ground, and are reported as showing excellent growth, though in one or two localities the weather proved on the whole somewhat cool and wet for rapid vegetation. The tobacco crop in Essex county, Ont., for example, is reported as suffering

from the backward season. In western Canada, however, though no official crop bulletin had been issued, it was learned from the crop reports of the Canadian Pacific and Canada Northern Railway Companies, and from the North-west Grain Dealers' Association and other private sources, that conditions were most favourable, growth having been particularly active in the southern sections of Manitoba and the Territories owing to the frequent and widely extended rains.

The estimated area under crop in Manitoba and the North-west Territories, according to these authorities is as follows:

	1903.	1904.	Inc.
	Acres.	Acres.	p.c.
Wheat.....	3,123,633	3,420,411	9½
Oats.....	1,101,333	1,205,960	9½
Barley.....	381,135	392,569	3
Flax.....	64,630	46,540	Dec. 28

The outlook for *fruit* is promising in the Maritime provinces and although a diminution in the yield is anticipated in Ontario, the quality is expected to be better than last year. A bulletin issued by the Department of Agriculture, Ottawa, on June 14th, based upon the appearance of fruit buds and the general condition of trees and plants, shows that apples in Ontario suffered considerably from the frosts of last winter, though a medium to full crop is promised. Pears also promised well. The peach crop, however, will be very light, many orchards having been permanently damaged during the past winter. Only the more hardy varieties of plum trees also are expected to yield. Small fruits, especially strawberries and raspberries, likewise suffered severely from winter-killing. Insect pests, however, were reported less destructive than usual.

In the *dairying* branches conditions remained on the whole unfavourable as compared with last year, though some improvement was noted towards the close of the month, and the output of cheese and but-

ter, in spite of the lower prices offering, has been heavy.

At a session held by the Railway Commission at Toronto, Ont., several agricultural associations, among them the Ontario Fruit-Growers' Association, the Niagara Fruit-Growers' Association, the Dominion Grange, the Dominion Cattle Dealers' Association and various breeders' associations made representations on the subject of freight rates charged by the different railway companies on agricultural products. Canadians, it was stated, were discriminated against both in rates and in service. It was asked that such rates should be allowed as would give a reasonable return on railway property and no more. The President of the Ontario Fruit-Growers' Association specified instances of reforms needed in the service of fruit, drawing attention particularly to the need of ventilated cars and more prompt deliveries. A reply was made from the standpoint of the railway companies.

Meetings of a special committee of the House of Commons, appointed to inquire into the Act for the inspection of grain, were held at Ottawa during the month.

The Canadian Seed Growers' Association was organized at Ottawa on June 16th, at a meeting at which delegates were in attendance from every province in the Dominion except British Columbia. The object of the association is to encourage the production and use of the best seeds for farm production. Dr. James W. Robertson, Ottawa, was elected president.

The Farm Labour Supply.

The inadequacy of the supply of farm labour was a subject of almost universal complaint throughout Ontario and many sections of Quebec during June. At an early date in the month over five thousand applications for labourers had been received from farmers at the Provincial Colonization Bureau, Toronto, the appeals coming from all sections of the country. Between 2,500 and 3,000 men were supplied from the Bureau, but the stringency notwithstanding,

was reported as continuing very prevalent, farmers in some localities being forced to co-operate with each other for the harvesting of the hay crop. There were some instances also of dairy farmers having to abandon the production of milk and go into stock feeding as requiring less assistance. Wages reached an unusually high level, though it was stated by Canadian immigrant agents in Great Britain that the inducements offered by Canadian farmers were still too low to attract British immigrants.

As evidence of the widespread and insistent nature of the demand, the following extracts from Bulletin No. 85, issued by the Ontario Department of Agriculture and containing reports received from all over the province on the question of the labour supply, may be given:

Aldborough, Elgin: Farm help is very scarce. In fact, good help is almost an unknown quality. Farmers are depending more on machinery and less on hired help to get their work done.

Charlottetown, Norfolk: Most farmers will not pay the wages that men and boys ask. Some have their wives out harrowing and cultivating.

Grey, Huron: There is practically no farm help to be had. You cannot get men to work on farms in this neighborhood; they all go to the towns and villages. They would rather work in a livery barn for nothing than on the farm at excellent wages.

Derby, Grey: The scarcity of help is having a hurtful effect upon the dairy industry.

Gwillimbury, W., Simcoe: Competent farm hands are scarce, and a number of incapables have to be employed. The scarcity of farm hands restricts the farmer in production, and many lines of agriculture have to be either neglected or abandoned.

Dorchester, N., Middlesex: Farm help is very scarce and hard to get at any price, from \$20.00 to \$30.00 a month, with board and washing, and this in face of the fact that dairy products are very low compared with prices prevailing a year ago.

Dumfries, N., Waterloo: Farmers have got tired looking for help, for they know it cannot be got. A number are seeding down more land, and are pasturing there.

Georgina, York: There is a scarcity of farm help, but by changing work our farmers are being able to get in their crops.

Hawkesbury, E., Prescott: Farm help is not to be had here at present. The labourers have all gone into the towns and cities, and the houses that they used to occupy on the farms are everywhere standing empty.

Westmeath, Renfrew: We are very short of farm help and would gladly accept some of those immigrants who are being brought into the country, and would pay them good wages.

Fishing.

Activity prevailed in the Atlantic fisheries, with fair catches of cod and lobster, though conditions were somewhat less favourable at the close of the month. On the great lakes business was quiet. In British Columbia preparations were completed for the run of sockeye salmon which is not expected to be exceptionally heavy. Fair catches of spring salmon, however, were reported, but halibut fishing was somewhat dull. Traps for the taking of salmon have been erected off the coast of Vancouver Island.

Conferences were held during June between the Dominion government and representatives of different provincial governments with regard to the better definition of federal and provincial authority in the matter of the fisheries.

Lumbering.

Very successful drives were reported throughout Ontario and Quebec, and saw-milling in consequence is assured of a busy season. The mills in nearly all localities are now working to their utmost capacity. Some logs are reported as being hung up on the St. John river, N.B., and the decline in lumber prices in the British market is being taken into consideration in that province in forecasting the prospects for activity in the woods during the coming season. In British Columbia dullness, with local exceptions, continues, and among loggers in particular the outlook is unfavourable. With regard to the latter, it was announced about the middle of the month that all camps would shortly close down indefinitely, in which case a large body of men would be thrown out of employment, and a monthly turnover of about ployment, and a heavy monthly turnover brought to a close. The complaint of the loggers was that the prohibition by the provincial government of the exportation of logs to the United States, in view of the small prices paid by the mills of British Columbia, did not enable the camps to be conducted so as to meet expenses. A peti-

tion for the removal of the prohibition was addressed to the provincial government on June 16th.

The provincial government of Ontario recently approved of regulations which will be inserted in future in all agreements with railway companies building railways through the newer districts of Ontario, to effectually safeguard the forest wealth of the province from fire. Lines of railway being constructed through lands, whether covered by license or not, must be guarded at the expense of the company by a staff of fire rangers for the protection of the timber.

Mining.

Coal mining in Nova Scotia was somewhat hampered by the lack of transportation facilities resulting from the late opening of navigation. This was especially embarrassing in view of the increased output of the mines, which during May was 63,642 tons heavier than a year ago in the Dominion Coal Company's collieries alone. Asbestos and mica mining in Quebec were active, and in eastern Ontario also activity prevails. In the Algoma district the month showed on the whole a falling off from May, though extensive development work is in progress. At Rossland, B.C., the number of men employed is still below the normal, and at other points in the province the work in progress consisted largely of assessment operations. A very profitable strike of natural gas was reported at Medicine Hat, N.W.T.

Manufacturing.

Generally busy conditions prevail. At Sydney, N.S., as above stated, the strike of the Dominion Iron and Steel Employees caused local depression, and at Sault Ste. Marie, the fact that the reorganized Lake Superior Company had not reopened the shops at the close of the month, though directors had been appointed and financial arrangements determined upon, kept a number of idle men on the market. Some dullness was also experienced in the manufacture of cotton goods, several mills

closing down. With these exceptions, however, and that of one or two localities in which a slight diminution in activity for temporary or local causes as compared with May was noted, generally satisfactory conditions were reported throughout Ontario and Quebec, the demand for products from the western market proving especially stimulating. At Winnipeg and elsewhere in the west, also, manufacturing conditions were characterized by exceptional activity. A number of canning factories also reopened for the season during June.

Transport.

Though railway construction is not fully started as yet, conditions were generally active in Ontario, especially in the neighbourhood of Brantford, Guelph and London, and on the work in connection with the Sudbury-Toronto branch of the Canadian Pacific Railway. The contract was also let during June by the Temiscamingue Railway Commission for the construction of the road from New Liskeard, nearly one hundred miles in length, of which twenty-five miles must be finished during the present season. In western Canada also very active conditions prevail, and there is a keen demand for additional labour.

Railway employment was active during June, the reopening of the tourist season being felt.

At the annual meeting of the Quebec Central Railway Co., the gross earnings for 1903 were reported the largest in the history of the company, amounting to \$682,757. The working expenses also showed an increase, owing to the advance in wages, high price of coal, and enhanced cost of raw materials. The sum of \$14,730 for renewals and ballasting was charged against revenue.

Street railway earnings were generally heavy during the month. On Victoria Day the traffic receipts of the Toronto Railway Co. were the largest for any 24th of May in the history of the company, amounting to \$10,882.95 as against \$9,670.25 last year,

the total number carried being 225,554 as against 225,071.

An additional issue of \$1,000,000 second mortgage bonds was authorized by the shareholders of the Toronto, Hamilton and Buffalo Railway Co., to be expended in improvements to the road, about \$200,000 of this amount to be spent during the present year.

The Railway Commission, as above noted, held a number of sessions at Toronto as well as at Ottawa during June, this being the first occasion on which the commission sat in the former city. The session was held for the purpose of investigating locally into complaints with regard to freight rates, crossings and other matters.

The Transportation Commission.

The special commission on transportation held a number of sittings during June, the subject under inquiry being, in the main, the condition and requirements of the St. Lawrence route in connection with the transportation of western grain to the sea-board. The opening session began at Montreal on June 6th, where several witnesses were heard as to the different methods of improving Montreal harbour and increasing the value of the canal service. Arguments were heard in favour of free ports for Canada, and much specific information adduced as to the need of elevators, dry docks, elevated tracks, &c. Following the sittings at Montreal, the commission inspected the channel of the St. Lawrence between that city and Quebec, inspecting the harbour of Sorel en route, and receiving several deputations as to the need of particular improvements. At Quebec, the harbour was inspected and witnesses examined as to improvements needed therein, as well as with regard to a fast Atlantic service, and better railway communication with the interior. At Ottawa later in the month the commission held meetings to consider the proposition for a twenty-foot water-way from the great lakes to the Atlantic, via the French and

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

Conditions in the Trades.

In the various trades, conditions on the whole are much the same as in May. The *building trades* have become more active with the advance of the season and correspondents with scarcely an exception report very busy conditions. Unskilled labour is also more actively employed than in May, any changes noted by correspondents being uniformly in the direction of busier conditions. In the remaining branches improvement has been less uniform. The *metal and shipbuilding trades*, though more active in some localities, show a decline in others. With the *woodworking branches*, apart from *saw-milling*, which is very active in eastern Canada, conditions are little changed from those of May. The *clothing branches* have shown on the whole a slight decline. Improved weather conditions resulted in increased orders for *boots and shoes*, though the spring turnover was disappointing. *Printing*, however, is if anything improved, and the *leather and miscellaneous trades* are quite as active as in May.

Notes of the Month.

The by-law to abolish the *smoke nuisance* in Toronto will come into force on July 1st.

The first *brass rolling mill* in Canada will shortly be established at New Toronto.

The by-law to raise \$17,000 for the installation of a *municipal system of water-works* was carried by a majority of forty-two at Creemore, Ont.

The Board of Education of Hamilton, Ont., decided to continue the teaching of *domestic science* in the public schools by the establishment of two classes.

On June 6th, the final assent was given to forty Acts passed during the present

session of the Dominion parliament. Of these twenty-eight had to do directly with transportation companies.

The rate of increase in the number of *branch banking offices* in Canada which during 1901, 1902 and 1903 amounted on an average to about one hundred offices per annum, is reported to have been continued into 1904.

The *Canadian Electrical Association* held its 14th annual convention at Hamilton, Ont., beginning on June 15th. Among the subjects discussed were: the development of storage batteries, the steam turbine, Niagara power development, etc.

The *Penny Bank of Toronto* received a charter of incorporation from the Dominion government. At a meeting held in Toronto on June 18th, the raising of a guarantee fund of \$30,000 and of an annual fund for three years to meet current expenses of \$3,000, was authorized.

At the annual meeting of the eastern district of Ontario Retail Furniture Dealers' Association of Canada at Ottawa, Ont., F. W. Lord, Ottawa, was elected president, and T. W. Currier, secretary-treasurer. The maritime district of the Retail Furniture Dealers' Association of Canada was organized at St. John on June 23rd. Mr. Charles S. Everette, St. John, was appointed secretary-treasurer.

A school for the teaching of *telegraphy, stenography and typewriting* has been established in Montreal by the Canadian Pacific Railway Company for the benefit of its employees, and in all positions pertaining to the operation of the road, henceforth men with a knowledge of telegraphy will be preferred. Three teachers have been employed and classes held five evenings each week. A fee of \$2 per month, to be returned if the pupil completes the course in six months, is charged. Twelve hundred employees have enrolled in the classes since they were opened.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions, owing to the strike of the Sydney steel workers, have been unsettled throughout June. All of the trades have suffered more or less through the cessation of work at the steel plant, and business has been very depressed. The wholesale trade of Sydney is fairly active, but the retail trade is very dull at present.*

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—It is reported that the crops are suffering for the want of rain.

Fishing.—This industry has been active around the coast during the month. The Cowie experiment has been so far a success.

Mining.—The Dominion Coal Company has been forced to keep its collieries idle by night, partly because the steel company's contract does not need to be delivered, and partly because of the rapid increase in the output, and the inability at Montreal to handle such large quantities of coal. The number of men employed at the Glace Bay machine shops has been reduced, to curtail expenditure. The coal output of nearly every colliery in Nova Scotia has been excellent, showing large increases over the previous month, and exceeding that of the corresponding month of last year. Work was begun on the Cochrane lake coal areas, with the view of developing them at an early date. The slopes at Big Glace Bay are well under way, a splendid seam, 8 feet thick, showing at the outcrop. The Joggins mine has been unwatered, and work begun on the lower lift. The workmen have not yet received their back wages, as the affairs of the company seem to be still unsettled. The new shafts of the Acadia Coal Company, after passing through a gravel

bed, which caused delay and much difficulty, are now down 120 feet.

Railroad construction and employment.—Work on the electric tramway between New Glasgow and Stellarton is being rapidly pushed to completion.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are fairly busy. Carpenters and joiners, lathers and plasterers are all actively employed. Plumbers and builders' labourers are busy.

Metal, engineering and shipbuilding.—Iron moulders, iron workers and coremakers are on strike. Steam engineers, electrical workers and linemen, blacksmiths and horseshoers are busily employed.

Woodworking and furnishing trades.—All engaged in the woodworking industry were active.

Printing and allied trades.—Printers and pressmen were busily employed.

Clothing trades.—Journeymen tailors are all busy. Garment workers are very busy.

Miscellaneous.—Barbers are active. Clerks and stenographers find business comparatively dull.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen, railroad switchmen, railroad trackmen and freight handlers are not busy, but steamboatmen and steamboat firemen are active. Ship-labourers and longshoremen are busy. Street railway employees were also busy.

Unskilled labour.—This class of labour is at present dull.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during the past month has not shown much change from May, and demand and supply is fairly well balanced. In the building trades nearly all branches

* A account of this strike is given in the present issue of the *Gazette*.

are busy, though builders' labourers have not found work very plentiful during the past month. Carpenters, painters, bricklayers and masons are enjoying much activity, while printers are a trifle busier than they were last month. Commercial activity continues as in the previous month, and in the tourist trade passenger boats are more active. The wholesale and retail trades are enjoying a good season, which is likely to be prolonged. The labour field throughout the province continues free from unrest, the only exception being at Sydney. This, however, is not felt in Halifax to any appreciable extent. The Nova Scotia branch of the Manufacturers' Association met in this city during the closing week of June. Among the matters discussed were the coal duties. Several other questions concerning industrial matters, which are of much concern to the province, were also considered.

CONDITION OF LOCAL INDUSTRIES.

Agriculture—The splendid weather during the past month has placed this industry in an excellent position. Crops will be good, particularly hay, which promises to be the best crop in years.

Fishing.—This industry has been fairly active during the past month. Shore fishermen, however, report the season not generally favourable, though some branches have been fair.

Railroad construction.—This branch of industry continues to afford considerable employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and stonecutters are all busy. Plumbers are normally active. Builders' labourers find work only fair.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, electrical workers, linemen, shipwrights and caulkers and boilermakers report work fairly good, while some of these branches are fairly active.

Woodworking and furnishing trades.—Employment is fairly good. Upholsterers are fairly busy.

Printers and allied trades.—Printers report work a little better than in May, but trade is dull. Pressmen are fairly busy.

Clothing trades.—Tailors are busy. Boot and shoe workers are fairly well employed.

Leather trades.—Harnessmakers report plenty of work.

Miscellaneous.—Barbers, clerks, delivery employees and hotel and laundry workers are busy.

Transport.—All branches of railroad and steamboat work are active. Street railway men and longshoremen report work normal.

Unskilled labour is well employed.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June was in a better condition than in May. Work was more plentiful, and the supply was equal to the demand in the majority of departments, though farmers in some localities complained of a scarcity of help. Building operations were active, though not to the same extent as last year, a scarcity of lumber being a handicap. The drop in the price of farm produce decreased shipments, which were exceptionally heavy during May, but commercial activity remained practically unaffected. Banks report a good month's business, and no complaints have come from wholesale and retail dealers. There were no changes in the rates of wages or hours of labour, and harmonious relations between employer and employees continue.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The close of June saw all the crops in the ground, with the exception of turnips in some localities. Though backward at first, vegetation advanced with satisfactory weather rapidly during

the month, and the crops promise well. There is a good show of fruit of all kinds. The first cheese on the market for the season was boarded the latter part of the month, but the low price was discouraging.

Fishing.—Cod fishing continued good until the latter part of the month, when the fish moved off into deeper water. The lobster factories on the whole have had an average catch, though poor towards the close of the month.

Lumbering.—There is practically no lumbering done during the month of June. The few saw-mills were kept busy, turning out material for lobster cases. Nearly all the timber used has to be imported.

Manufacturing.—The few factories on the island were busy, conditions being about as usual for this period of the year.

Railroad construction and employment.—Good progress was made with the grading of the branch line from Murray River to Murray Harbour, towards the completion of the road from Southport to Murray river and the straightening of the curve at Curtis' creek. These works give employment to about 400 men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were fairly busy. Carpenters and joiners, lathers and plasterers, and paperhangers were busy. Plumbers had a quiet month. Builders' labourers had steady work.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers were busy. Blacksmiths had a good month.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers, car builders and coopers were busy.

Printing and allied trades.—Printers and bookbinders had steady employment.

Clothing trades.—Journeyman tailors, garment workers, boot and shoe workers, were busy.

Food and tobacco preparation.—Bakers, confectioners and tobacco workers had a good month.

Miscellaneous.—Barbers, clerk sad laundry workers had steady employment.

Transport.—Railroad conductors, locomotive engineers, firemen, railroad trainmen, freight-handlers, steamboatmen, longshoremen and truckmen were busy.

Unskilled labour.—The supply of unskilled labour was slightly in excess of the demand.

ST, JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued to improve during the month of June, and the building trades are now generally well employed. Preparations are being made for the erection of several new buildings, and during July masons and bricklayers will be kept busy. Work on the harbour front improved considerably, a number of steamers and sailing vessels having arrived. Messrs. A. C. Smith & Co., St. John West, will begin the erection of a new warehouse, to take the place of the one recently destroyed by fire. It is expected that the Maritime Nail Works will be in operation again in about a month, when vigorous efforts will be made to regain any business that may have been lost as a result of the recent fire.

The St. John Street Railway Company has purchased a large tract of land in Lancaster, a suburb of the city, for the purpose of a park, and expects to have its new line running thereto on July 1. A new engine and generator have been installed to supply power for the street cars. The cables to supply the power will cross the falls on brackets attached to the bridge cables. The transportation companies were well patronized during the Champlain tercentenary celebrations.

Bank clearings for the five weeks ending June 30 were \$4,792,888, and for the corresponding period last year \$4,833,320, being \$40,432 less than in 1903. Wholesale dealers report business active.

No strikes have been reported, during the month, but the strike of the journey-men tailors is still on. Only four of the strikers remain out, the others having received employment.

Under authority of an Act passed at the last session of the legislature, the local government has appointed the following as a factory commission: John Palmer, Mayor of Fredericton, chairman; Kilgour Shives, Campbellton; Charles McDonald, manager of St. John Iron Works, St. John; Michael J. Kelly, secretary Longshoremens' Association, St. John; Mrs. E. S. Fiske, St. John, and James G. Stevens, St. Stephens, secretary.

The customs revenue for the fiscal year just ended was \$1,184,909.37, against \$1,121,805.92 for the previous fiscal year, showing an increase of \$63,103.45 in favour of the present fiscal year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers report crops growing finely, but say rain is needed.

Fishing.—Fishermen have been doing a good trade, especially in salmon. Retail prices are: Salmon, 14 to 20 cents a pound; cod and haddock, 5 cents a pound; shad, 15 to 20 cents each; mackerel, 15 cents each; smelts, 8 to 10 cents per pound.

Railroad construction and employment.—Arrangements have been made whereby the New Brunswick Coal and Railway Company's line will be permanently operated. All indebtedness will be wiped out, and the employees to whom wages are due will be the first to be paid.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers are well employed. Painters and decorators are busy. Plumbers, steam and gas-fitters report work active. Stonecutters find trade fair, and builders' labourers are well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers and

steam engineers report work plentiful. Electrical workers and linemen are extra busy. Blacksmiths and boilermakers continue active. Sheet metal workers and horseshoers are busy.

Woodworking and furnishing trades.—Woodworkers are steadily employed, and shingle weavers are busily employed.

Printing and allied trades.—Printers and pressmen are not so well employed as last month. Bookbinders are well employed.

Clothing trades.—Journéymen tailors report work active, and only four men idle.

Food and tobacco preparation.—Bakers and confectioners are kept busy. Cigar-makers report an improvement over last month.

Miscellaneous.—Broom and brush makers are doing a good business.

Transport.—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, switchmen, trackmen and freight-handlers report work plentiful. Steamboatmen and firemen are kept busy. Ship labourers report work fair. Street railway employees are busily employed, the extension of the line to Fairville and Lancaster making it necessary to increase the number of motormen and conductors. Teamsters and expressmen are well employed.

Unskilled labour.—This class of labour is fully employed.

DISTRICT NOTES.

Grand Anse.—The station house of the Caraquet Railway was totally destroyed by fire, with its contents, on June 22. The loss was about \$1,000, without insurance.

McAdam.—The machniists who went on strike at the Canadian Pacific Railway shops returned to work on June 6, the man who was told his services would not be required after June 10, being reinstated.

Nashwaaksis.—The blacksmith shop and iron works in connection with George McFarlane's wagon works were destroyed by fire on June 29. Nearly all the machinery and plant was lost. The loss will amount to about \$3,000, with no insurance on the machinery, and \$200 on the buildings.

St. Stephen.—The New Brunswick Telephone Company is asking for tenders for the erection of a two-story brick building, with brown stone front.

Springhill.—The waterworks are being rushed.

The *Londonderry* Iron Company, shortened their force in some of the leading departments.

Moncton, N.B.—A charter has been granted to a local company of brickmakers at Louisville. The new company will install modern machinery and otherwise improve the existing plant. Employment will be given to between twenty and thirty hands.

Construction will be begun at once on the new oil refinery at *Memramcook* for the New Brunswick Petroleum Company.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment was active during June, but without excess either in demand for or supply of labour. The building trades were particularly active, but there are plenty of men to meet all requirements of the situation. No new disturbances in the labour market occurred. Carpenters and joiners, however, are still out on strike, though few men are now affected. Two of the shops which did not take back their hands have as yet been only partially successful in replacing them. Two minor difficulties occurred in the shipping trades, though neither affected business seriously, being the means merely, of retarding in each case a steamship for a few hours. In one case a captain and crew refused to assist a vessel out of dock, the vessel having employed non-union labour in loading. The other case was a refusal to handle cargo carried in a batteau manned by non-union labour.

The first section of the cribwork foundation for the concrete blocks which are to be used in the extension of the breakwater has been successfully placed in position.

The contractors expect to have the second crib sunk at the next spring tides.

The work of laying the foundation for the new facade at the archbishop's palace is making rapid progress. The facade will be 96 feet in width.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding operations are now terminated, much delay having been caused by the wet weather.

Lumbering.—The drive is now over, and has proved most successful, many logs which were hung up last season having been floated, as well as the cut of last winter. Nearly all of the large saw-mills have started, and the season gives promise of being an exceptionally active one, several of the mills having already sufficient logs available to keep them cutting at full speed for the balance of the season.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, painters and builders' labourers had a good month. Lathers and plasterers were somewhat dull.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and engineers had a good month. Electrical workers and linemen also report good conditions, but boilermakers were slack.

Printing and allied trades.—The prorogation of the provincial legislature caused some falling off in the printing trades. Bookbinders had a good month.

Clothing trades.—Boot and shoe workers had a slack month, and a couple of factories are reported in financial difficulties, so that the outlook for the balance of the summer season is not bright. Quietness, however, is usual at this time of the year, and conditions compare favourably with June, 1903.

Food and tobacco preparation.—Ice delivery men were busy. Cigarmakers had a fair month.

Miscellaneous.—Hotel and restaurant employees, laundry workers, &c., were ac-

tive during the closing weeks of the month, owing to the opening of the tourist season.

Transport.—Railway and steamboat traffic has been very heavy. Ship labourers and longshoremen, however, had a somewhat quiet month. Cab drivers and carters report improved conditions with the opening of the tourist season.

Unskilled labour.—A very good month was reported.

DISTRICT NOTES.

Construction on the new machine shops of the Intercolonial Railway at *Rivière du Loup* has been begun, a large number of men being employed in laying the foundations.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during June, and the demand compares favourably with that of the previous month. All branches of industry were well employed, and there was no necessity for any one to be idle. The demand for unskilled labour was especially active, and on several occasions during the month there were calls from points in the district for this class of workers, as high as \$30 a month and board being offered in some cases. The machine shops and building trades are very busy, and the various factories and industrial concerns are working up to their full capacity. As showing the increased prosperity of the district, the Eastern Townships Bank will open an office in Waterville and Cookshire in the near future, to accommodate the people in that section. Wholesale and retail trade has been very good during the month, and shows a considerable advance over May. The citizens of Sherbrooke will have an opportunity to vote, in a few weeks, on a by-law to raise \$200,000 to purchase or install an electric light plant to supply the city and citizens with electric light. The city council will proceed with the lay-

ing of a granolithic sidewalk on the east side of Wellington street; the cost will amount to several thousand dollars. At the annual meeting of the People's Telephone Company it was reported that during the year over \$20,000 had been spent in improving the system. The school rate in Sherbrooke has been raised from 4 to 5 mills, by mutual consent of the school boards. There have been no changes in wages reported during the month. The only unrest reported was that of the employees of the Royal Paper Company, at East Angus. There were about 300 affected in the paper, pulp and saw mills. They made a demand that their wages be paid every fortnight, instead of monthly; they also presented a grievance against the superintendent. After two meetings with the management the matter was amicably settled by the company agreeing to start fortnightly payment of wages two months hence; the grievance against the superintendent was also settled satisfactorily to both sides.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects for a large crop, especially of hay, are very promising. Farmers state that conditions are considerably above the average. Their great complaint is scarcity of help. During the first part of the month the price for butter and cheese was very low, but towards the end there was an increase of about two cents at the Sherbrooke Dairymen's Exchange.

Lumbering.—The Brompton Pulp and Paper Company has a drive of about 14,000,000 feet on the way down the river St. Francis, and, if the water keeps as high as it is at present, the firm expects it to reach the mill by the middle of July. The various saw-mills in the district are working to their full capacity.

Manufacturing.—The woollen mills and other manufacturing industries are working to their full capacity.

Mining.—Business at the various asbestos mines at Black Lake and Thetford is ac-

tive. The asbestos mills are running overtime.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very busy. Bricklayers, masons, carpenters, joiners, painters, decorators, plumbers and builders' labourers are well employed.

Metal, engineering and shipbuilding trades.—All branches of this industry in Sherbrooke are busy.

Woodworking and furnishing trades.—Upholsterers, varnishers, pattern makers, carriage and wagon makers report a good month's business.

Printing and allied trades.—Printers have been well employed during the month.

Clothing trades.—There has been a good demand for journeymen tailors during the month, due to increased activity in the retail trade.

Food and tobacco preparation.—Bakers and confectioners have had a busy month, as have had butchers and ice handlers. Cigarmakers report business good.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, and hotel employees have been in good demand. The laundry work here increased considerably this month.

Transport.—Railway employees have been well employed, and hackmen and carters find plenty to do.

Unskilled labour.—There is a keen demand for this class of labour.

DISTRICT NOTES.

The stonecutters' strike at *Crookston* is not yet settled. The men are holding out for semi-monthly pay. Formerly they were paid monthly. Mr. Gibson, the operator of the quarry, has offered the men the privilege of drawing their pay at any time they wish, but will not consent to regular semi-monthly payments.

Uninterrupted progress is being made in the work of reconstructing the old Missisquoi Valley Railway under the direction

of Henry O. Cleveland, of the O. M. R. *Bolton Centre*, has assumed an activity unknown since the building of the line over a quarter of a century ago. About 100 Italians are at work and besides these there are mechanics, bushmen and teamsters. Farm houses are filled with boarders, and there is a good local market for produce of all kinds. The road is being built east of the village, the new line leaving the old roadway half a mile above and joining it again about half a mile below the village. The old line will be kept up as a freight siding to the mills.

Weedon.—Fire destroyed Tanguay's mill and three dwelling houses on June 19. The loss is considerable, being partly covered by insurance.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is fully employed in this city and district, all classes of labourers being busy at good wages. New buildings are not so numerous as last year, but many are undergoing repairs, especially in the centre of the city. Wages are the same as last year, with a ten-hour day, and no Saturday half-holiday. Wholesale and retail merchants, although complaining of slackness in the early part of the month, are now doing a prosperous business. Vessels are arriving, and there is plenty of activity in shipping circles. There were no strikes during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the heavy rains in May last, up to the 8th of June appearances were anything but satisfactory for farming, but fine weather subsequently set in, and farmers have been able to make up for lost time. Sowing has been completed, and all crops look well, hay especially so.

Lumbering.—Operations are very active. The mills have commenced sawing. The

drive has been favourable owing to high water, and all mills will be kept busy until next fall.

Manufacturing.—All factories are running with full staffs.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all employed at good wages. Carpenters and joiners are all employed, and it is very difficult to secure men for small jobs. Painters are still busy, but work is falling off a little. Plumbers are fairly well employed. Builders' labourers have considerable work.

Metal, engineering and shipbuilding trades.—Bicycle workers are very busy.

Woodworking and furnishing trades.—Carriage and wagon makers have had plenty of work. More money is made selling Ontario carriages and sleighs, &c., than in manufacturing here.

Printing and allied trades.—All engaged in these trades were well employed. Photo-engravers have much work on hand.

Clothing trades.—Journeymen tailors are all working full time at good wages. Glove makers and boot and shoe workers have been busy.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat cutters, cigar-makers and tobacco workers are all kept busy.

Leather trades.—Work-people engaged in these trades are doing well.

Miscellaneous.—Hotel and restaurant employees are fully employed. A few more restaurants have opened up since the 1st of June. Laundry workers have more than they can do.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been generally well employed during June, with the exception of

the boot and shoe workers of the Ames & Holden factory, who were idle three weeks while stock was being taken. The factory resumed operations on the 22nd with the exception of the fitting department, which will only begin working about the 1st of July.

The corset factory reopened on the 13th of the month. The directors state that more work will be done than before. Nearly all the old employees have been reinstated in their former positions.

On Friday, the 24th, a sash and door factory was destroyed by fire, together with a saw-mill. About 60 employees were thrown out of work, losing all their tools—a great loss for these workmen. The owners of the factory and saw-mill have already ordered new machinery to be installed in a temporary shop, so as to fill the most pressing orders until the new buildings they propose to erect have been completed.

There are several new buildings in course of erection, such as hotels, private residences, and particularly the building for the Dairy Industrial School. The contract for this building has been awarded to Messrs. Pageot and Dussault, of Quebec; the woodwork has been given to Messrs. L. V. Morin & Son, of St. Hyacinthe. The main building will be of 100 feet frontage by 44 feet in depth, with two wings 80 by 40 feet each. The machinery room will be 28 by 24 feet, with a chimney 80 feet in height. The stone to be used in the construction will come from the St. Dominique quarries, and delivered on the grounds will cost \$15 the ton of 30,000 pounds. The brick to be used will be manufactured at the local yards, and will cost \$7.50 per thousand. Lime will cost \$1.30 the barrel of 400 pounds, and sand 25 cents per barrel. The wages to be paid to stonemasons will be 30 cents an hour, bricklayers 40 cents per hour, and ordinary labourers \$1.25 per day, or 12½ cents per hour. The plans show that this building will consist of two storeys. Its principal apartments will be the cheese department,

butter department, laboratory, study room, &c. The cost will be from \$80,000 to \$90,000. There are several workmen at work on the foundations, which are well advanced.

Business has not been so active as usual.

No changes in hours nor wages have taken place during the month, and the relations between employers and employees have been cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers say that there will be an abundant crop if the weather continues favourable.

Manufacturing.—Local manufactories have in general been well employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been well employed. Carpenters and joiners report good conditions. Painters, paperhangers and plumbers have been very busy.

Metal and engineering trades.—With these classes work has been sufficient, and all have had regular employment. Blacksmiths state that work is plentiful.

Woodworking and furnishing trades.—Those engaged in these trades have had a good month, especially carriage workers.

Printing and allied trades.—Printers have been very busy.

Clothing trades.—With the Eastern Clothing Company there is plenty of work; as also with the garment workers. Boot and shoe workers have not been busy during the month, but prospects with them are encouraging. Bakers find business good. Ice deliverers and cigarmakers are very busy.

Leather trades.—Tanners and curriers are regularly at work.

Miscellaneous.—Barbers, clerks, &c., state that business has been fairly good.

Transport.—In this branch all employees have made a good month, especially those handling baggage, in view of the vaca-

tions of the pupils in the different scholastic institutions, and their return to their families.

Unskilled labour.—Labourers have been well employed during the month.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during June were favourable, and promise to be more so in July. Permits were issued by the building inspector for the construction of several large edifices, viz., the Metropolitan, Montreal, Sovereign, and Toronto Banks' buildings, a large store for Corestine & Co., and numerous private dwellings.

Business in general is very active since the opening of navigation. The vegetable and fruit market is active. The Grocers' Association is complaining of the itinerant dealers who are selling fruits from door to door at low prices, and will try to prevent this damage to their business.

A new by-law has been passed to prevent the distributing of bread without a special basket; a fine will be imposed on those who will not comply with the regulation of the Board of Health, for the sanitary delivery of bread within the city.

In addition to the strikes which were continued from the month of May, the glove makers also went on strike on the 16th, for an increase of wages. The strikes of the stonecutters, plumbers, and marble cutters remain unchanged from last month, as no final settlement was reached, but the majority of the stonecutters and plumbers are employed. The granite cutters' strike, which began on April 1, was terminated on the 16th instant, about 40 men returning to work. These men demanded the recognition of their union, and an increase in wages; the first demand was refused by the employers, the second being partially granted. Forty-eight men who quit work on the Bank of Montreal building resumed on the 11th, under new conditions. They are

to receive union rate of wages, 40 cents an hour and work 8 hours per day.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—This industry is fairly active, and all are satisfactorily employed.

Manufacturing.—Manufacturing in general is active.

Railroad construction and employment.—Railroad construction and repair work to existing lines and sidings is extensively under way, and the class of labour usually employed is busy.

CONDITION OF PARTICULAR TRADES.

Building trades.—All workers in these trades are busy, including the stonecutters who were on strike. Only 50 or 75 plumbers are reported on strike at the present time.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, and coremakers report quiet conditions. Metal polishers, brass workers, boilermakers and tool sharpeners say conditions are fair. Electrical workers, blacksmiths, horseshoers, jewellers and watch case makers were active.

Woodworking and furnishing trades.—All men engaged in these trades report activity prevailing.

Printing and allied trades.—Printers and all engaged in allied crafts are well employed.

Clothing trades.—Journeyman tailors and garment workers report trade quiet. Hat and glove makers are busy. Boot and shoe workers are generally active.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers are reported active. Ice handlers are in the midst of their busy season. Butchers and meat cutters are also reported busy.

Leather trades.—Tanners and curriers, leather workers and saddlers are fairly employed. Trunk and bag makers are well employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, and laundry

workers are active, while furriers are fairly so.

Transport.—All engaged in the transportation business are reported well employed.

Unskilled labour.—Activity prevails in this class of labour, notwithstanding the arrival of large numbers of Italians.

MONTREAL, QUE., AND DISTRICT.

Mr. Thos. J. Griffith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment of labour was generally active during June. The clothing trades and iron moulders report work dull, but the building trades and transportation branches show marked activity. Building permits issued are not as numerous or for so large amounts as last month, but greater activity on construction work prevailed during June, owing to the very favourable weather. Work is now progressing on the new McGill College Y. M. C. A. building, five storeys high, costing approximately \$70,000. Work is also progressing on the new power house of the Colonial Bleaching Company's building, at St. Henri. The City and District Savings Bank, and the Merchants Bank of Canada are both erecting fine new branch buildings on St. Catherine street, east.

Of the several strikes of the season, five remain unsettled, viz., the plumbers and steamfitters, stonecutters, marble workers, bookbinders and glove cutters. The glove cutters employed by M. Galibert went on strike on June 16, owing to the foreman increasing the amount of work without changing the piece-work price. The strike of the Garment Workers' International Union (No. 38) in the Colonial Cloak Company's factory, which began on May 30, was settled on June 4, by the firm conceding increases on several lines, and promising better treatment in future. The granite cutters returned to work on June 16, under the same conditions that existed before the strike, the employers, however, giving increases in individual cases.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Generally active conditions prevailed, though the industries engaged in the manufacturing of cotton goods are experiencing dullness.

Railroad construction and employment was very active.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches are exceptionally busy at present.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and core workers report work quiet. Machinists, tool sharpeners and engineers are fairly active. Electrical workers and linemen are busy. Metal polishers, buffers, platers and brass workers are all well employed. Blacksmiths and horseshoers were active. Boilermakers are quiet.

Woodworking and furnishing trades.—All branches are fairly active.

Printing and allied trades.—These trades are well employed.

Clothing trades.—Journeymen tailors and garment makers find trade rather dull at this time. Hat and glove makers are busy. Boot and shoe workers are very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were very busy. Cigarmakers and tobacco workers were active.

Leather trades.—Trunk and bag makers were busy.

Miscellaneous.—Barbers, broom-makers, clerks, stenographers and delivery employees were busy. Hotel and restaurant employees and laundry workers were all well employed.

Transport.—All engaged in transportation business were fully employed.

Unskilled labour.—There is an abundance of work. Italian labour is largely employed.

DISTRICT NOTES.

The Canadian Pacific Railway Company is rapidly completing its Angus shops at Rosemount, and large gangs of labourers and mechanics are employed.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in this city depends considerably on conditions in Ottawa. The building trades are at present quiet in Hull, following the similar condition in Ottawa. The few men that are working at their trades are employed in Ottawa, either by the Hull contractors or by Ottawa firms. The market at large, although in a healthy state, is somewhat quieter than in June two years ago, and on about the same level as June last year. There are no idle work-people, and wages remain stationary. Busy conditions prevail at the factories of the Walters Bros. (axe factory), Matthews Bros. (pork factory), Hanson's woollen mills, E. B. Eddy's, &c.

There were no changes in wages or hours of labour recorded in any branch of industry and no strikes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Good news is daily received of the crops. Both farm and garden products are progressing favourably.

Lumbering returns will not come up to what was expected in the early spring, according to the proprietors' point of view. Sawing operations are active, employing the usual number of hands, but the yards are getting overstocked on account of the poor shipping facilities. This is also depriving some of the rivermen and dock hands of their usual work. Bushmen are coming down from the shanties well satisfied with the successful floating down of the logs, and with the wages conditions prevailing. Their arrival always causes a short period of exceptional activity among the ready-made clothing merchants. It also marks the settlement of back accounts with grocers and other dealers who have provided the family during the winter and spring months. Trade accordingly has been active recently.

Manufacturing.—A couple of small wood-working shops are kept busy in Hull, but

they have little or no bearing on the general condition of labour in the city. One, however, which has a great influence on the local conditions of labour, although it is not yet in full operation, is the cement works. Hundreds of people are looking forward to the near completion of these factories for permanent employment. This will likely happen in a couple of months from now. In the meanwhile building operations are being proceeded with with all possible celerity. Good wages are paid the workmen by the company.

Mining.—Mining operations in the county of Ottawa are fair, being neither better nor worse than in past years. A new mine, on Brown's property, in the township of Hull, is now being worked, and 40 men are employed. Fortin and Gravel's mine is also being operated, but less actively than usual. The trimming of mica in Hull is consequently affected, and fewer girls are working. The commercial product is delivered in Ottawa to the electric company, which uses it, and employs a number of hands, both men and girls, from this city. The chrome mine, at Buckingham, and the white mica mine in Templeton, are busy, as in Wallingford's mica mine. Wages are uniform in all those mines. Men get between \$1.25 and \$1.50 per ten-hour day and board.

CONDITION OF PARTICULAR TRADES.

Building trades.—Joiners and carpenters are paid from \$1.50 to \$1.75 per day; plasterers from \$2.50 to \$2.75 for non-union men, and \$3 and \$3.25 for unionists; masons and stonecutters are paid the union wages prevailing in Ottawa. A young man of this city sued his employers in Ottawa, who were paying him 7 cents per hour as an apprentice mason, and got 20 cents per hour allowed to him by the court. Other cases of a similar nature, it is said, will be brought before the courts. Builders' labourers get \$1.50 per day, and common labour from \$1.25 to \$1.50.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

For all classes of labour, with the possible exception of the clothing and transport trades, June was a satisfactory month. There seemed to be an abundance of work in all departments, and common labourers were scarce. The month was much better than May, and there was a distinctively improved tone along nearly every line. Conditions with the building trades were considerably brighter, and the balance of the season gives promise of an average supply of work. The scarcity in the supply of farm help in the district, was relieved by the Dominion immigration officials placing a number of immigrants who were brought over by steamship companies and were unable to proceed further west than Ottawa. Employers of common labour complain of the difficulty of procuring a sufficient number of men, owing to the higher wages paid by the city, which was paying \$1.65 to \$1.75 a day, while the current rates among private employers was from \$1.25 to \$1.50 a day. At this season the city employs from 250 to 400 men. Merchants reported summer trade good, and wholesale orders for the fall trade were large, owing to the bright prospects for a bountiful harvest. The railway companies enjoyed a fair measure of activity in freight transportation, although the Canada Atlantic Railway Company suffered severely from the tie-up in lake traffic on account of the strike of the masters and pilots.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumbering was active and the exceptionally high water greatly facilitated the work of bringing the drives to the mills. On the other hand, however, it militated against the shipment of lumber by water, and for a while the barges were completely tied up, the water being level with the docks. It was estimated at the end of the month that there were between two and three million logs in the booms on the Upper Ottawa river. It was announced during the month that Mr. J. R. Booth would erect a paper mill to use

the products of his new pulp mill, which has a capacity of 75 tons a day. The contract for part of the work has been let.

Mining.—A new mica factory, and a stove foundry are among the industries for which buildings are being erected at the Chaudière, and everything points to an industrial revival in that district.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades had a busier month than during May. Work was started towards the end of the month on the erection of a large departmental store at the corner of Sussex and Rideau streets.

Metal, engineering and shipbuilding trades.—The different iron trades were fairly active, and added interest was given by the announcement that Butterworth & Co. had let the contract for the erection of a stove foundry in the Chaudière district. Electrical workers were busy, some of the larger establishments having extensive contracts at outside points in which local labour was employed. Bicycle workers were very busy, this branch of industry being a constantly growing one in Ottawa.

Woodworking and furnishing trades.—These trades were well employed, upholsterers, varnishers and polishers being rushed with work.

Printing and allied trades.—There were no idle printers or pressmen, the supply in the various branches of the printing trades not being any greater than the demand. The manager of a job printing establishment said he could keep all his hands employed if he did not receive another order for three months. The bookbinders were also unusually busy.

Clothing trades.—The clothing trades were quieter, owing to the rush of spring trade being over.

Leather trades.—In the leather working trades, saddlers and harness makers were busy, as were the trunk makers. Ottawa manufacturers in these lines seem to be

getting a good share of the western trade.

Railroad construction and employment.—All classes of railroad men, except those in the repair and car shops, were steadily employed. Water transport has been unusually dull, shipments in lumber having fallen off owing to conditions in the English market. Several barges have been lying idle.

Miscellaneous.—Waiters, hotel and restaurant employees formed a union.

DISTRICT NOTES.

Sand Point.—The stove factory recently destroyed by fire is being rebuilt.

Cornwall.—A sash and door factory and dressed lumber mill was destroyed by fire at Cornwall, loss \$30,000. One hundred and ten hands were thrown out of employment.

North Bay.—Over one hundred buildings are in the course of erection here.

Pembroke.—A considerable loss was sustained by the bursting of a boom at Des Joachims.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of June found all classes of labour busy, it being difficult to meet the demand in many cases. This city is spending \$15,000 on new granolithic pavements this year, which will keep a large number employed for several months. The rolling mills, which have been idle for a couple of years, will start again about the first of July. This will also cause a demand for skilled mechanics, several of whom have already arrived from Montreal and other points.

The cement works, situated just outside of the city, are rapidly nearing completion, and it is expected that they will be in full operation before the snow falls; the steel work is fast being erected, and a large number of men are employed. All the stock has been subscribed for, and the industry

promises to prove a boon to this section, the amount of raw material being practically inexhaustible. The company, finding it impossible to secure local labour, has placed an order with a Montreal firm for seventy-five Italians, who are expected to arrive at the works the first week in July.

There has been no changes in the rates of wages or hours of labour, and no unrest in the labour field.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have their seedling all done, and there is every prospect of a good crop, fall wheat especially looking fine. Cheese making is the principal industry with the farmers in this district, this part of the country being noted for the excellence of this product. The Cheese Board meets every Saturday, with an average boarding of between four and five thousand boxes.

Fishing.—This industry is very active since the opening of the season.

Lumbering.—The logs have just began to arrive, and it is expected that about 600,000 pieces will comprise the drive this year. The logs mostly belong to Rathbun and Gilmour.

Manufacturing.—The local canning factory is in full operation on strawberries, and many women and girls find employment at good wages.

Mining.—The mining season this summer promises to be the best in many years, as many new discoveries are to be opened out.

Railroad construction and employment.—The Grand Trunk Railway Company is busy putting in a new siding, to enable it to make its eastern yards larger. A large number of men are now engaged at this work.

CONDITION OF PARTICULAR TRADES.

Building trades.—The several branches are having plenty of work. Bricklayers, masons, carpenters, lathers, plasterers, painters and paperhangers report a splendid

month's work, with wages good. Stone cutters and builders' labourers are busy.

Metal, engineering and shipbuilding trades.—These trades had a good month and report work plentiful, all the firms employing full staffs and working full time, especially in the ironworking trades. Boilermakers had a good month, with no men idle. Blacksmiths and horseshoers are all busy. Jewellers also experienced a good month.

Woodworking and furnishing trades.—These trades are extra busy, as large quantities of manufactured articles are being shipped from the city, especially caskets and furniture. There are several woodworking establishments here, and all are active with full staffs. Carriage and wagon makers report a busy month.

Printing and allied trades. During the month of June the printing business has been especially active, all classes of printers and pressmen working full time. Bookbinders were also busy.

Clothing trades.—Tailors and boot and shoe workers were all working full time at good wages.

Food and tobacco preparation.—All branches of these industries report a busy month, with excellent indications for a good season.

Leather trades.—Harnessmakers and leather workers in general are busy, a couple of firms having to work overtime. Good wages prevail in the trade.

Miscellaneous.—Barbers report work plentiful. Hotel and restaurant employees and laundry workers find business good.

Transport.—Railway engineers and firemen are all busy. Telegraphers, switchmen and freight-handlers also report having had a good month. Considerable changes are being made in the Grand Trunk Railway Company's yards, and trackmen are all busy. All classes of steamboat workers are busy, and the longshoremen have plenty of work, although most of the season's coal has

arrived. Cab drivers and carters all report a very busy month.

Unskilled labour.—There is plenty of work for unskilled labour, with wages running from \$1.25 to \$1.50 per day.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Every branch of labour is now fully employed and considerable work is standing until assistance can be secured to carry it on. Everything considered opportunities for employment are more abundant than they were in June last year. In addition to the work under way, tenders are being advertised for for the elevators and for masons' work required in the construction of a foundation for a mill building for the Frontenac Cereal Company.

The double track on Princess street, for the electric railway, is now completed. The company experienced much difficulty in securing labour, and as a result the work was much delayed. During the construction a night gang was kept working overtime, so that traffic might not be delayed. Corporation labourers are now spreading stone on the street where the double tracking is completed, and it is thought that by the first of July the road will be rebuilt.

Last year there were 2,100 men in the military camp here, but the better pay has very largely increased the attendance at the camp now being held.

Another new passenger engine was completed at the Canadian locomotive works during the early part of the month, and delivered to the Central Ontario Railway Company, at Trenton, Ontario. This was the second engine turned out for this company in two weeks. In the meantime two large shunting engines have been finished for the Intercolonial Railway.

As the result of resolutions passed by the city council and the county council of

Frontenac, a deputation waited upon the Minister of Railways to ask that the Rideau canal be extended for the benefit of the mining operations now going on in this district. While Frontenac county is rich in felspar, and other ores and minerals, it is felt that better transportation facilities would benefit the entire province. It is promised that within one year of the completion of the extension 1,000 miners will be at work.

The cotton companies of Canada have agreed to close all mills for the first two weeks of July. The Kingston mill will be among the number.

About fifty people from this district left on the 28th inst., via the K. & P. R. R., for the North-west on the second of the C.P.R. homeseekers' excursion.

Terms have been reached in regard to the city taking over the Kingston Light, Heat and Power plants, and a special meeting of the city council was called for the evening of the 28th instant to ratify the agreement.

The directors of the Frontenac Cereal Co., of Kingston, have declared a dividend of seven per cent on the preferred stock of the company. This is the result of the company's first year in business.

The proprietors of all the shoe stores in the city have agreed to close every afternoon, excepting Saturday, at five o'clock during July and August.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—While many places in this district are not under cultivation, the land having been too wet to sow, still there is every evidence of a bountiful harvest. Farmers are now busy haying, which promises to be a splendid crop.

Fishing.—This industry is rather quiet just now.

Lumbering.—Conditions are rather quiet at present.

Manufacturing.—Factories and manufacturing industries were active.

Mining.—Extensive mining operations are being carried on and preparations made to largely extend operations.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades are fully employed.

Metal, engineering and shipbuilding trades.—These trades are working full time.

Woodworking and furnishing trades.—Woodworkers and those engaged in the furnishing trades are rushed.

Printing and allied trades.—Printers are working full time.

Clothing trades.—Clothiers report improved business.

Food and tobacco preparation.—Bakers and confectioners are very busy. Butchers report a scarcity of good beef to meet the demand of the trade.

Leather trade.—Tanners report business fair.

Miscellaneous.—Barbers, broom-makers, delivery employees, hotel, restaurant and laundry workers are in much demand.

Transport.—All engaged in the transportation business are very actively employed.

Unskilled labour.—The supply of unskilled labour is not equal to the demand.

PETERBOROUGH, ONT., AND DISTRICT.

Mr. W. J. Johnstone, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour in all trades during June has been active, excepting iron moulders, who have been dull, some shops which last month were very active being very slack, during June. All outside building trades are very active, as are also the sash and door factories. Another combination of industries, known as the Peterboro Cold Storage and Provision Co., Ltd., with an authorized capital of \$300,000, is starting here and will

give employment to a large number of men when in full operation. Peterboro is also to have another industry, a flour and cereal grist mill with a daily capacity of 350 to 500 barrels. The elevator will be capable of storing 40,000 to 50,000 bushels of grain.

Work has already begun on the foundation of the Greene Foundry recently destroyed by fire. The new building will be one-half larger than the old building.

Fire destroyed a large pump and windmill establishment, entailing a loss of \$4,000 and putting 25 men out of work. The owner has begun to rebuild, as he has over one year's work ahead.

The work on the electric street railway system is being pushed forward with all speed.

Wholesale and retail tradesmen are all doing a good business. Local banks report business good.

Workmen are busily putting the finishing touches on the lift-lock here, which is to be opened on Saturday, July 9th.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in this locality report an excellent harvest in view. Dairying is a leading industry among the farmers here during the period from May 1st to the 31st of October. Nearly all farmers send milk to the factories.

Fishing.—There are only a few men here who make this a means of livelihood.

Lumbering.—This industry is very active, the leading lumber dealers state that the demand is so great that they cannot get any stock ahead for winter trade. There is one mill in Lakefield, which has begun working on the season's cut, and it is expected that lumber will be more plentiful.

Manufacturing.—Manufacturing is not quite so active as it was in May in the metal trades. When the iron moulders are slack the rest of the metal trades as a rule are also slack, especially in certain lines. Brass moulders, however, in the lock works, and

other establishments manufacturing brass goods, are exceptionally busy just now. The manufacturing of cement blocks for building purposes by two small industries here is quite active. It is purposed to test their stability for building purposes.

Railroad construction and employment.—

Railroad work is not so active as was reported in previous months, excepting on the repairing of road-beds in the several districts. From three to four section men are at work all the time looking after their several divisions. No new work is going on now.

CONDITION OF PARTICULAR TRADES.

Other industries.—The corporation is putting down six miles of cement walks by day labour, which will give employment to a number of men.

Building trades.—Bricklayers and masons are all very active now as the new brick are out and are being delivered to the new building being erected. The cost of brick here this summer was as follows :—\$8.50 to \$9.00 per thousand. The cost of stone was \$4.50 to \$5.00 per cord. Carpenters and joiners are all very busy. Lathers and plasterers are exceptionally active. Lathing here costs 2½ cents per yard for labour. Plastering costs 14c. per yard for labour and supplies. The painting trades here are very active, and there is a demand for painters. Decorating and paperhanging is not so active. Gas and steamfitters are quite active. There is not much stone cutting done here. Plumbers and builders' labourers were very busy, with a demand for men.

Metal, engineering and shipbuilding trades.—Iron moulders are dull, as are iron-workers and helpers. Coremakers and machinists are not very active. Steam engineers, electrical workers and linemen are in good demand. Metal polishers, buffers, platers and brassworkers are busy. Blacksmiths are fairly busy, but are not rushed. Sheetmetal workers are exceptionally busy. Bicycle workers and boilermakers were fair-

ly active, and jewellers report trade very fair.

Woodworking and furnishing trades.—

Woodworkers and upholsterers were very active. Varnishers and polishers are quite active, especially on carriage and canoe building. Carvers are not much in demand just now. Carriage and wagon making is exceptionally active. Patternmakers are a little slack. Coopers are very active, there being a great demand for barrels in the grist mill.

Printing and allied trades.—Printers, pressmen and bookbinders are all in demand, but there is not much demand for electrotypers, platers or engravers.

Clothing trades.—Journeyman tailors are in good demand, and garment workers are busy. Boot and shoe workers are fairly active.

Food and tobacco preparation.—Bakers and confectioners are doing a rushing business. Butchers and meat cutters are active; the price of meat has increased 2 cents per lb. Ice handlers are now exceptionally active, and cigarmakers are doing a steady trade.

Leather trades.—Leather workers in the manufacture of harness and collars are doing a fairly good local and export trade.

Miscellaneous.—Barbers and laundry workers are doing a steady business. Broom-makers are quite active. Clerks, stenographers and delivery employees are very active at this season of the year. Furriers' work on winter goods is beginning here, and advertisements are inserted in the local papers for fur-workers.

Transport.—Tourist traffic to the several summer resorts has begun, and railway transportation at this season of the year has to be increased by putting on extra trains and employees for handling the passenger and freight traffic. Steamboatmen of all classes are very busy, and cab drivers, hackmen, carters, draymen, teamsters and expressmen are all doing an exceptionally good business.

Unskilled labour.—Unskilled labour is well employed, and it is impossible to find a man idle.

DISTRICT NOTES.

During the month a portion of the *township of Smith*, lying on the outskirts of the town, was annexed to the corporation of Peterborough. This materially affects working-people to the number of 105, who will have the benefit of the ward school for their children.

Farmers are cutting their clover-hay. They report a heavy crop of all kinds of produce. All the general store merchants in small places around Peterborough report business good.

Current market quotations for the dis-are as follows:—

Wood, soft, \$3.00 to \$5.00 per cord.

Wood, hard, \$6.50 to \$8.00 per cord.

Hay, timothy, \$9.00 to \$10.00 per ton.

Hay, clover, \$7.00 to \$8.00 per ton.

Wheat, 88 cents to 90 cents per bushel.

Butter, 16 to 20 cents per lb.

Eggs, 17 to 22 cents per dozen.

Potatoes, 55 to 60 cents per bag.

In *Bridgenorth*, a small village, a large saw-mill was burned down. The fire made a total wreck of the establishment, throwing 25 men out of employment.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is little change in labour conditions since last month, nearly all trades finding steady employment. A favourable feature was the settlement of several strikes and disagreements, which threatened to become formidable, so that relations between employers and work-people are generally harmonious, and a better feeling prevails than has been the case for some time. A disturbing circumstance is the continued arrival at this point of large numbers of immigrant mechanics and urban labourers, many of whom are unable

to obtain employment and have very scanty resources. The pressure is perhaps less severely felt at present than it was last month, owing to the greater activity in the building and other trades as the season advances. The labour displaced by the fire has been nearly all absorbed, with the exception of those engaged in the book-binding and kindred occupations. The giving out of a number of civic contracts for paving, and the commencement of work on the extension to the waterworks system will be important factors in furnishing employment during the summer.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Although vegetation is somewhat backward the crops in this neighbourhood are in excellent condition, owing to the heavy rains which have given them a good start; with continued favourable weather a good harvest may be anticipated. Hay is an excellent crop. While the severe winter has affected the fruit unfavourably, so that the quantity is expected to be considerably below the average, the quality is likely to be improved owing to destruction of insect pests by the frost. Farmers are all very busy, and there is the usual urgent demand for extra help.

Manufacturing.—Factories and workshops in all lines continue busy. The demands of Manitoba and the North-west Territories are an increasing factor in the prosperity of Toronto industries, and a noticeable feature of this trade is the tendency of this market to demand goods of first-class quality. There is everything to indicate a continuance of steady activity for some time in nearly all departments of the manufacturing industry.

CONDITION OF PARTICULAR TRADES.

Building trades.—The resident members of the building trades are well employed, and activity increases with the advance of the season. The rebuilding of the burned district furnishes of course a considerable portion of the season's work, but it is delayed by uncertainty as to the extent of the railway expropriations. Operations

are likely to be much more extensive during the latter part of the season. There are few unemployed, with the exception of recent immigrants, whose competition is more keenly felt in this than in any other department.

Permits for May called for a total value of \$554,956 as compared with \$219,800 last year. For the first five months of this year, however, the amount is slightly less than for the same period last year, and the favourable showing for May is accounted for by the absence of labour disputes.

Metal, engineering and shipbuilding trades.—Machinists, blacksmiths, boiler-makers, iron moulders and sheet metal workers have plenty of work as a rule. Brass workers and finishers are very busy. Electrical workers have obtained an advance in wages from 25 cents to 27½ cents per hour. The difference between the horse-shoers and their employers is not yet settled, the compromise by which the men were to receive a reduction in hours not being acceptable to some of the employers. Another agreement was made for an increase of wages under which floormen would receive \$13.50, and fitters \$15 for a week of 55 hours, this in turn was refused by three of the shops employing a few men, who, about the middle of the month, went out on strike. Negotiations looking to a settlement are in progress.

Woodworking and furnishing trades.—This department is in a flourishing condition, with plenty of work. The carriage and wagon workers have decided upon making a demand for a nine-hour work-day at the beginning of next season.

Printing and allied trades.—Printers have had a good month, and bookbinders have been as actively employed as possible considering the limited facilities at the command of some of the firms burned out, and occupying temporary premises. A number of the bookbinders, bindery women, are still out of work on this account, but the great majority have found employment.

The negotiations between the allied printing trades and the master printers, for a three years' agreement, fixing the rate of wages, which had been in progress for some time, came to a satisfactory conclusion on the 5th instant, when the men accepted the following terms, to take effect from June 1st:

Job printers.—1st year, \$14.50 per week; 2nd year, \$14.75; 3rd year, \$15.00.

Pressmen.—\$16 per week for 1st and 2nd years; \$16.50 for 3rd.

Feeders.—\$9 per week.

Bookbinders.—Male, 1st year, \$14.50; 2nd year, \$14.75; 3rd year, \$15 per week; female, 1st year, \$5; 2nd year, \$5.25, and 3rd year, \$5.50.

A few days later an agreement was effected with the stereotypers and electrotypers on the following basis:

Foremen.—\$20 per week.

Finishers and moulders.—\$19 per week.

Others.—\$15 per week.

There was no change as to hours. A number of members of the Photo-engravers' Union went out on strike on the 3rd for increased wages and recognition of the union. They returned to work again on the 9th instant, pending a settlement of the matter in dispute.

Clothing trades.—Custom tailors find work a little slack. Garment workers are better employed than last month, but the trade is dull for the season. Boot and shoe workers, and hat, cap and neckwear workers are well employed.

Food and tobacco preparation.—Cigar-makers report conditions favourable. Bakers have also had a fair month. Confectioners find trade quiet, as usual at this time of year. The strike of the brewery workers was called off on the 8th instant, E. T. Malone, K.C., acting as mediator between the parties. The employers agreed to recognize the union, and to give some immediate increases in wages, the general scale of wages to be settled by arbitration, the men returning to work in the meantime. D. A. Carey and Alfred Raynor have

been appointed arbitrators for the union; the employers have not as yet appointed their arbitrators. Thirty-five members of the Meat Cutters' Union, in the employ of the Harris Abattoir Co., went out on strike on the 21st for an increase of 10 per cent in wages, and time and a half pay for overtime. The strike is still on.

Miscellaneous.—The brickmakers' strike in the brickyards in eastern Toronto was terminated on the 1st instant by the return of the men to work unconditionally. Laundry workers report plenty of work.

Transport.—Navigation continues quiet, and sailors, longshoremen, etc., find employment slack. All classes engaged in land transportation are actively employed. The street railway employees have secured an advance in wages.*

Unskilled labour.—General labourers have plenty of work with good prospects for the remainder of the season.

DISTRICT NOTES.

Toronto Junction.—On the 24th instant, the boiler of the engine supplying power to the C.P.R. shops, exploded; no one was injured, but the damage necessitated the closing of the shops for some days, throwing a number of men temporarily out of employment. The Grand Trunk Railway Company has been allowed to construct a siding to connect its main line with the Union Stock Yards, with proper protection at the crossings at Keele street and the Toronto Suburban Railway. The application of the Canadian Pacific Railway Company to construct a branch line into the stock yards, across the Grand Trunk Railway and the Suburban Railway, is being discussed before the Railway Commissioners.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows:—

* See special article on another page of the present issue.

GENERAL CONDITION OF THE LABOUR MARKET.

With some few exceptions the labouring classes are fully employed. Supply and demand have been better balanced this month than in May. This is on the whole the busiest season ever known here. Electric power development works are being rushed, and employ thousands of men. Municipal improvements, paving, etc., engage many men. Many miles of sewers, and granolithic sidewalks will be built this summer. The pressed brick paving contracts are nearly completed.

The building trades are rushed with work. Dwelling houses are being erected in great numbers. Many retail stores have been enlarged or improved, and a number of business blocks are projected.

Business is active in every line, and financial interests are well satisfied. Railway freight traffic is very good for the season, but lake transportation is light.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy, and farm labour is scarce. Fruit crops will nearly all be light. Hay promises well.

Fishing.—Fishing along Lake Erie is fairly good.

Manufacturing.—Factories are running full time, with full complements of employees.

Railroad construction and employment.—Railroad construction promises to be active, but has not started yet. General railway employment is good, especially on electric lines, which take on many extra men for the summer.

Other industries.—The power development works are the centre of employment and interest. The Canadian Niagara Power Company's tunnel is almost finished, its power house being well under way, machinery being placed in the first section of the wheel pit, and the excavation of the second section progressing rapidly. The tunnel of the Electrical Development Co. has been bored over 11,000 feet, half its

length, and its wheel pit is down nearly half the necessary depth. The steel conduit of the Ontario Power Co., over a mile long and 18 feet in diameter, is nearly all built. Great progress has been made with excavation of the basin and erection of concrete dams and walls for the intake. This company has reduced its staff of foreign labourers, and has let contracts for the completion of portions of its works.

CONDITION OF PARTICULAR TRADES.

Building trades.—All the building trades are overwhelmed with work, but the rush will possibly only last till autumn. Masons, bricklayers, plasterers, lathers, etc., are very busy. There has been a great demand for first-class carpenters, but poor workmen are not wanted. Painters, plumbers, and the allied trades are well employed. Gasfitters are very busy.

Metal, engineering and shipbuilding trades.—Work is steady in the foundries and machine shops. Local men are all working, but there is no demand for more men. Steam engineers are busy, but a number have left the city to work elsewhere. Electricians and linemen are all working. Sheet metal workers are well employed.

Printing and allied trades.—Printers and allied craftsmen are all busy, and business is active.

Clothing trades.—In the clothing trade employment is steady and wages fair.

Food and tobacco preparation.—Bakers, butchers, ice handlers, etc., are all very busy. Tourist traffic helps them at this season, as hotels, etc., require extra supplies.

Miscellaneous.—Barbers are having a good season. Office employees of all classes are busy, and large numbers of stenographers, book-keepers, time-keepers, etc., are employed. Hotels and restaurants are running with full staffs, giving employment to large numbers of women and many men.

Transport.—Railway business is active in all branches, and there is no report of lack of employment. All classes of railway employees are busy. The end of labour troubles on the lakes has increased the employment of steamboat men in lake and canal ports. Street railway men, cab, cart, and draymen, teamsters, etc., are all busy.

Unskilled labour.—This class is fully employed.

DISTRICT NOTES.

Allanburg.—The enlargement of the De Cew Falls power canal employs large forces of men.

Niagara-on-the-Lake.—The Sovereign Bank has taken over the business of the insolvent Dennison's Bank. Summer hotels are open and give considerable employment. The militia camp made business active during June. The fruit season is opening, and many pickers are employed.

Port Colborne.—A brass foundry is being erected. The end of the strike of the masters and mates has greatly improved lake and canal traffic. Canal and harbour improvements are steadily progressing.

Ridgeway.—Additional men are working in the quarries.

Sherkston.—Over 250 men were working in the quarries on June 1st.

Welland.—Extra track gangs are employed by the Michigan Central Railway Company. The Pere Marquette Railway Company is preparing to establish freight yards here. Canal improvements give employment to a number of dredge and marine drill men, labourers, electric linemen, etc.

ST. CATHARINES, 'ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during June has been active, with a noticeable scarcity of labour in some branches, especially in the building

and construction trades. June compares very favourably with last month, and is a decided improvement over the corresponding month of last year, there being none unemployed that are willing to work. On June 26th the St. Catharines box factory was totally destroyed by fire, throwing out of employment a large staff of hands; they have all secured other employment, pending the rebuilding of the factory. The contract has been let by the Dominion government for the erection in St. Catharines of a new armoury, to cost \$80,000. This amount does not include the cost of lighting, and other inside work; the total cost will approximate \$100,000. Messrs. Sullivan & Langdon, of Kingston, were the successful bidders, and have already started operations. The Trades and Labour Council of St. Catharines and district petitioned the Minister of Public Works to have labour interests safeguarded by the appointment of an inspector on the armoury; their request was granted. The Martin Electric Supply Co., of this city, has secured the contract from the Dominion government for 552 arc lights of 2,000 candle power for the lighting of the new Welland canal. The city has voted aid to a new electric road to be built shortly from this city to Niagara-on-the-Lake and to Queenston, taking stock to the extent of \$25,000. The sum of \$50,000 has also been voted for the construction of sewers this year.

Business houses report wholesale and retail trade as very good, and comparing favourably with the corresponding month of last year. The retail grocers have decided to give a half-holiday on Wednesdays, from June 15th to September 1st, to their employees. The number affected by this will be about 90. Other business houses will give their employees the same half-holiday during July and August; this will affect about 250 more.

The only disquieting element of the month has been the strike of the firemen, labourers and teamsters of the Riordan Paper Mills, of Merriton, who refused to work with non-union hands who were put to work to fill the places of the striking

papermakers. The total number on strike in this mill was 150. The company fixed a date for the men to report for work at the company's terms, but there was no general response; a good many of the non-union hands have also quit work in sympathy with the strikers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are quite busy, being well into their season's work. They report prospects very good in nearly all crops, but state that there is still a scarcity of farm labourers.

Manufacturing.—With few exceptions the manufacturing industries are busy, except those which are slack for temporary reasons. The canning factories have started their season's work, and will soon be giving employment to a large staff of hands.

Railroad construction and employment.—There has been considerable work done in building railway sidings to factories and in repair work.

CONDITION OF PARTICULAR TRADES.

Building trades.—All the building trades are busy, with a good season's work ahead of them.

Metal, engineering and shipbuilding trades.—Linemen are busy, the Bell Telephone Co. putting in an underground system of wiring, which is giving considerable employment to labourers.

Woodworking and furnishing trades.—These trades all report work plentiful.

Printing and allied trades.—Printers, pressmen and bookbinders are well employed.

Clothing trades.—Journeymen tailors report trade good.

Food and tobacco preparation.—Bakers, confectioners, butchers, meat cutters, ice handlers, cigarmakers and tobacco workers are busy.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees are well employed. Laundry workers are busy.

Transport.—Railway conductors and engineers are well employed. Railroad trainmen, trackmen and freight-handlers are busy. Street railway employees, cab drivers, carters, teamsters and expressmen are all well employed.

Unskilled labour.—There is a demand for unskilled labour.

DISTRICT NOTES.

Port Dalhousie.—All branches of labour are well employed, especially in the building trades.

Merritton.—The strike in the Riordan paper mills still continues, and has had a very disquieting effect on the labour market. Many of the hands are securing employment at other work.

Thorold.—The labour market is quite satisfactory, all branches of labour are well employed.

Power Glen.—The favourable condition of the labour market during last month continues.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is still plentiful, about the same conditions prevailing as in May.

The Diamond Glass Company and the Mansfield Glass Company have joined forces to open up a factory here. About \$30,000 will be spent in fixing up the old plant. The Hamilton Bridge Works Company took out a permit to make a \$20,000 steel and concrete extension to its building.

The Frost Wire Fence Company, of Hamilton, has been organized with a capital of \$500,000.

Frazer & Johnson, hardware and saddlery dealers, have assigned, with liabilities of \$14,000. This is one of the firms whose harness makers are out on strike.

The Hamilton, Grimsby and Beamsville Electric Railway Co. has sold out to the Grand Trunk Co.

As a result of increased rents, the city assessors have materially increased assessments.

The price of beefsteaks has advanced. Round steak is to be 15 cents a pound, instead of 12½ cents, and sirloin and porterhouse steak 18 cents, instead of 15 cents.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Manufacturing generally is fairly active. The boot and shoe and clothing trades are very fair. Matters are still quiet at the harvester works and the many men who were recently laid off have not as yet been re-engaged.

Railway construction and employment.—At present there is little or no railroad construction in progress.

CONDITION OF PARTICULAR TRADES.

Building trades.—In the building trades work is plentiful, but there is no rush. A large number of brick dwelling houses are being erected, giving steady employment to bricklayers, masons, carpenters, plumbers, tinsmiths, painters, electric workers and the kindred trades.

Metal, engineering and shipbuilding trades.—Iron moulders, stove and plate stove mounters are fairly busy. Machinists in many shops are also busy. Horseshoers report work fair.

Woodworking and furnishing trades.—Woodworkers, pattern-makers and coopers are fairly well employed.

Printing and allied trades.—The printing trades, including newspaper plants, are all fairly busy and many men are well employed.

Clothing trades.—Journeyman tailors are slack. Garment workers' work is improving considerably. Shoe workers are busy.

Food and tobacco preparation.—The tobacco workers' strike is at an end. On

the 13th the fourteen women workers returned to work and the imported men were initiated into the union.

Transport.—Street railway men and steamboat men are fairly busy, but long-shoremen are slack.

Unskilled labour.—Unskilled labour is not in great demand. The city has increased their unskilled labour from 18 to 20 cents an hour.

DISTRICT NOTES.

Dundas.—Manufacturing in the various establishments has been very fair during the month. There is the usual construction work going on by the town authorities, which gives labour to a number of men. The Bertram machine shops, the clothing establishments, refrigerator factory, mills, etc., are running full time.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally has been fully employed during the past month, which compares favourably with May and the corresponding month of last year. There has been more activity displayed in the building trades than in any other line. Plasterers received an increase in wages of five cents per hour, the scale now being 35c. an hour. The Grand Trunk Railway Company is erecting a fine new station on the main line here. In the iron trade employment has been steady, but no exceptional activity has been exhibited. A number of unemployed men reached here from various parts of Canada, the United States and Great Britain, but a limited number only found employment. Merchants, wholesale and retail, had an active month. The Wednesday half-holiday will be observed during July and August.

As evidence of the gradual growth of the industries of Brantford, the following statistics, taken from the annual report of the Board of Trade during the past eight years, are of interest:—

Year.	No. Men Employed.	Wages Paid.
		\$
1896.....	2,926	965,412
1897.....	2,815	943,335
1898.....	3,381	1,151,190
1899.....	3,515	1,224,880
1900.....	3,896	1,323,017
1901.....	4,038	1,377,436
1902.....	3,870	1,506,000
1903.....	4,570	1,742,000

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have experienced a busy month. The hay crop in many localities will be very heavy. Farm labourers are scarce, and many of the farmers will co-operate in the harvesting of the various crops.

Manufacturing.—In the various factories manufacturing has been steady, perhaps not so active in some cases as during the three former months, but the full complement of men has been retained.

Railroad construction and employment.—Railroad construction is being carried forward rapidly on the Grand Trunk Railway and the electric railways. A number of labourers can find employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Great activity prevails in the building trades, and bricklayers, masons, carpenters, lathers and plasterers have been fully employed. Painters and decorators have been actively engaged. Plumbers and builders' labourers have had a steady month.

Metal, engineering and shipbuilding trades.—Iron and brass moulders have had an average month, all local men being employed. Coremakers, machinists and engineers have had steady employment, though there is no demand for extra men. Electrical workers and linemen report a fair month. For metal polishers, buffers and platers there has been steady work. Machinists and carriage and general blacksmiths have worked full time. Boiler-makers and stove mounters have had a busy

month. Sheet metal workers report plenty of work for all local men.

Woodworking and furnishing trades.—Woodworkers in general have been well employed. Carriage and wagon makers, pattern makers, millwrights, and coopers have all worked full time.

Printing and allied trades.—Printers and pressmen have had a busy month.

Clothing trades.—Journeymen tailors have had a steady month, though hardly as active as May.

Food and tobacco preparation.—Bakers, and confectioners have had a busy month, all local men being fully employed. Butchers report an active trade. Ice handlers have had steady employment. Cigar-makers and tobacco workers report trade fair.

Leather trades.—Leather workers and saddlers had steady employment, there being sufficient work for all local men.

Miscellaneous.—Barbers, clerks and delivery employees had an average month. Hotel employees, especially waitresses and cooks, are in demand. Laundry workers had a busy month.

Transport.—Railway trackmen and freight-handlers, especially the former, have been busy. Street railway employees had steady work. Teamsters and draymen were busy, and cab-drivers had a fair month.

Unskilled labour.—For railroad construction and farm work, unskilled labour is in demand.

DISTRICT NOTES.

Blue Lake.—The Portland Cement Company has been very busy and is advertising for day labourers.

Paris.—The building trades are active. The mills and factories have been running steadily.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour is fully employed in the city and district. The month of June has shown considerable improvement over any month since last fall in the general state of employment; there will possibly be some falling off during the warm weather. The factors that have caused the good market for labour have been the large number of men from this district that have attended the militia camps and the excursion season to the O. A. College. Outside employment of all kinds has been plentiful, and the building trades are very busy. Contracts are being made for the erection of a \$70,000 addition to the Homewood Sanitarium, and work has been started on the Macdonald Consolidated School at the Ontario Agricultural College, to cost about \$25,000. There is a serious scarcity of dwelling houses for workingmen, and about 75 to 100 families, who ordinarily would be householders, are boarding or rooming. People of means claim that the cost of building is too high, and only a comparatively small number of houses are being erected or figures asked for from contractors. As a result rents have a tendency to go up. Retail trade, had a good month. There has been no noticeable unrest in the labour market, and no changes in wages rates.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—About 25,000 farmers visited the Ontario Agricultural College during the month, which is a falling off in numbers compared with recent years.

Manufacturing.—Board of Trade held an exhibit of manufactured goods that were made in Guelph in the winter farm building; about twenty firms made exhibits, and those in charge say that the results have been satisfactory, both in attendance of the visitors and in the orders that were taken.

Railroad construction and employment.—There are prospects of considerable railway extension and improvement work at this point. The Guelph Junction Railway has bought considerable property for its extension to Goderich. The prospects are

that a start on this work will commence in the near future. The Grand Trunk Railway Company has made an application to the Railway Commission to appropriate Jubilee park for passenger station purposes; the application is being strongly opposed.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had an exceptionally good month. The fine weather and the amount of work on hand has tended to steady work. About \$150,000 worth of work was either started or contracted for during the month. Bricklayers and masons are all fully employed. Carpenters and joiners and painters had a good month. Stonecutters are only fairly well employed, owing to the importation of stone already cut. Builders' labourers are well employed.

Metal, engineering and shipbuilding trades.—Iron moulders had only a fair month, which slightly improved towards the latter part. Sheet metal workers have experienced a slight falling off in work compared with May. Machinists' helpers and tube mill men had a good month.

Woodworking and furnishing trades.—Woodworkers and piano and organ workers had a fair month. Upholsterers and carriage workers had a good month.

Printing and allied trades.—Printers had a good month, but there has been some falling off in the volume of work.

Clothing trades.—Tailors had a very good month for June, all hands being steadily employed.

Food and tobacco preparation.—Bakers had an extra busy month. Cigarmakers report trade better with the opening of warm weather.

Textile trades.—Brussels carpet weavers, and textile workers generally, have been steadily employed during June.

Miscellaneous.—The excursion season made employment much more active for hotel employees, clerks, butchers, drivers,

street car men, barbers and other lines of trade that cater to the public.

Unskilled labour.—There has been a considerable number of Italians brought in to do some classes of heavy outdoor labour. This evidently did not overstock the market, for there seems to be sufficient work for all.

DISTRICT NOTES

Berlin, Ont.—A new shirt and collar factory will shortly begin operations with twenty-four machines of the newest type, requiring about forty employees to operate.

Palmerston, Ont.—The plant of the Palmerston Pork-Packing Company, which recently changed hands, is running to its full capacity, about 2,000 hogs per week.

STRATFORD, ONT., AND DISTRICT.

Mr. Joseph T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has improved since May, and all branches of industry and labour are active. There is no scarcity of labour and no noticeable number of idle workmen. The Grand Trunk Railway shops closed on Saturday, 25th instant, but they will reopen in eleven days. Tenders are being called for for an addition to the G.T.R. shops, 169 x 120 feet; a new tender shop, 326 x 102 feet; a new brass foundry, 75 x 40 feet; and an extension to the blacksmiths' shop, 50 feet. This will mean a large addition to the working force eventually, as the new shops will afford increased capacity. Building contractors report being somewhat delayed in carrying out their contracts by a scarcity of brick, as the brickyards can scarcely supply the demand. The railway companies report an active passenger and freight traffic. Wholesale and retail merchants had a fairly good month; merchants have granted a half-holiday every week during July and August to their employees. There were no changes in the rates of wages or hours of labour, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are preparing to harvest their hay, which promises a good crop. All the other spring crops are looking remarkably well.

Manufacturing.—All the manufacturing industries, and local factories are fairly active and are running full time.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were busy, with the exception of the brick layers, who had a few idle days owing to a scarcity of brick.

Metal, engineering and shipbuilding trades.—Iron workers, machinists, blacksmiths and boilermakers were fairly well employed. Bicycle workers were busy, especially in the repairing line. Horseshoers and jewellers report a good month.

Woodworking and furnishing trades.—Woodworkers, upholsterers and varnishers and polishers report a good month. Coopers had their usual amount of work.

Printing and allied trades.—Printers and pressmen were steadily employed, and there are no idle men in this craft in the city.

Clothing trades.—Journeymen tailors report a good month, with an improvement over May. Garment workers had plenty to do.

Food and tobacco preparation.—Bakers and confectioners and butchers report business good. Cigarmakers are all working, with prospects good.

Miscellaneous.—Barbers lately increased their prices for a hair-cut from 15 cents to 20 cents. A shave is 10 cents as before; a neck shave is 5 cents extra.

Transport.—Railroad conductors, locomotive engineers and firemen, and trainmen find steady employment. Cabmen and draymen report business active.

Unskilled labour.—The supply of men is equal to the demand.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour has improved during the past month, and compares favourably with the same month of 1903. Labour in the building trades and in the manufacturing and mechanical lines, is employed to its full capacity. The district military camp held here during the month brought about 1,400 men, which entailed considerable extra work in many lines of business, especially among bakers, butchers, etc. A large number of new residences are being built. The Canada Tin Plate Co. has decided to move to Hamilton. A number of public works are expected to commence shortly, and an extension of about one mile of street railway is to be begun, and will be finished by the 1st of November. The reduction of the tariff on oil has caused a fall in the prices here from 20 and 22 cents per gallon to 16 and 18 cents a gallon, according to the class of oil. A large number of immigrants continue to arrive in this city, and at present all find employment. Railroad freight business fell off somewhat during the month, caused by the strike of the masters and pilots on the lakes, thus holding back some of the freight that comes in from lake ports.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions are active, and the hay crop is being cut in this district. A scarcity of farm labour is complained of, the supply having been drained in this district by emigration to the Canadian Northwest.

Railroad construction and employment.—The construction of the London and Northwestern Electric road, between London and Port Stanley, is being pushed forward and the ties have been laid to a point close to St. Thomas. An agreement has been reached between the city of London and the London Street Railway Company for the latter to build an extension to meet the London and Northwestern Electric Railway at the city limits. The double tracking of the Grand Trunk between Lon-

don and Hamilton is being pushed rapidly forward.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have found better conditions during the past month, and there is plenty of work for all. Carpenters and joiners, and lathers and plasterers are very busy. Painters have slackened somewhat, although they are all working. Plumbers, gasfitters and builderers' labourers are busy. Stonecutters report trade fair.

Metal, engineering and shipbuilding trades.—Iron moulders on stove work are busy, and report conditions better since moving into the new shop at McClary's. Iron workers are busy, but the night shift at the rolling mills has been taken off during the summer months. Electrical workers report business good. Linemen report little doing inside the city and are being sent to the surrounding country to do work there. Metal polishers and stove mounters are rushed, and have made more wages during the past three months than for some years; they work piece-work. Sheet metal workers and machinists are very busy.

Woodworking and furnishing trades.—Very little upholstering is done in this city. Carriage and wagon makers are busy. Car builders report business as only fair. Coopers are extra busy.

Printing and allied trades.—Printers and pressmen are busy, with expectations of still more active conditions shortly. A pressmen's union was formed on the 4th of June.

Clothing trades.—Tailors have now entered upon their slack season. Sterling's boot and shoe factory will be in operation again shortly.

Food and tobacco preparation.—Bakers and butchers have been extra busy during the earlier part of the month, owing to the military camp. Cigarmakers report trade good, and no hands out of employment.

Miscellaneous.—Broom-makers report trade good. Furriers are busy in preparation for the fall trade.

Transport.—Railroad crews on freight trains have had a small month, caused in part by the strike of masters and pilots on the lake boats, which tied up considerable freight.

Unskilled labour.—This class of labour is well employed at present, with prospects of a good summer. The employees at Springbrook had their wages increased early in the month, from \$1.50 to \$1.60 per day.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The healthy state of industry prevailing throughout this district during the month of June was evidenced by the keen demand for labourers, especially in the building trades. As a result of the shortage a large amount of building is in a state of slow progress. Transportation business was greater in volume than usual, owing to the retarded movement in navigation, as a result of the vesselmen's strike. Business activity continues normal. The Retail Merchants' Association has decided to give its employees a half-holiday on Wednesday afternoon of each week during July and August.

The strike of twelve cigarmakers in the factory of B. F. Hornsinger, was amicably settled on June 3rd on a basis of compromise. The advance asked for, which ranged from 50 cents to \$1 per thousand cigars, was for the most part granted, with the exception of those engaged on the lowest grades of work.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy taking off the hay crop, which is exceptionally heavy. The corn crop prospect is unfavourable owing to the wet weather, but for other grains conditions are favourable. The dairying outlook is also good.

Manufacturing.—The favourable conditions prevailing among local industries continue unchanged from last month, with the exception of the broom and brush factory, in the brush department of which production is curtailed by a falling off in the number of the staff, several having accepted better outside inducements.

Railway construction and employment.—The laying of new steel rails, and the building of double track continues to employ a large number of men. In the construction and repair shops, work is active, and a few men are being taken on when available. Work on the construction of the Pere Marquette Company's repair shops is in progress. A delay was occasioned by a change in site, the first selection proving to be too small. A Chicago contractor has the contract for the work. About \$200,000 will be spent in this connection, and labourers and teamsters were advertised for.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work is in progress on most of the larger contracts of the season, and every available building mechanic is busy. The work is practically confined to resident workmen. There is a keen demand for teamsters for excavating, levelling and general building work, largely due to the fact that gravel and cement is being used more extensively than formerly.

Metal, engineering and shipbuilding trades.—The condition of the iron industries continues prosperous, and work is steady for moulders, machinists, boiler-makers and blacksmiths.

Woodworking and furnishing trades.—Employment in these lines was active. A fire in the planing mill of H. Lindop, builder and contractor, was a disturbing factor in the furnishing trade, though arrangements have been made to carry out the contracts in hand by using the machinery of another local mill, and the employees will not be out of work. A new mill will be erected to take the place of the one destroyed.

Printing and allied trades.—Printers and bookbinders report trade steady with conditions unchanged.

Clothing trades.—Journeymen tailors were busy, as were also garment workers.

Food and tobacco preparation.—Bakers and confectioners report a steady trade, and anticipate an increase of business, owing to the summer attractions coming to the city. Cigar making has assumed normal conditions again, and all workmen are busy. The settlement of the recent strike is said to be satisfactory.

Unskilled labour.—This class of labour is in keen demand generally.

DISTRICT NOTES.

Aylmer.—Industrial conditions are healthy so far as manufacturing is concerned. The work of constructing a water-works system for domestic purposes is about completed; it has been in progress during three summer seasons. An ample supply of water has been obtained from an artesian well, situated three miles from the town, and a conduit has been built connecting the spring with an elevated stand pipe. The cost of the entire work is approximately \$100,000.

The London and Aylmer and North Shore Electric Railway Co., has about completed arrangements with the town council for a franchise to build branches from its main line to the principal shipping points within the town.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The industrial situation is generally satisfactory, employment for most classes of labour being plentiful, and few men in any trade being idle. The building trade is at present exceptionally active, a great many houses suitable for workingmen being built, which will be a boon to workingmen, as houses of this description have been

scarce for some time. Although work is very plentiful in the building trades, the supply of labour is equal to the demand, and contractors have no difficulty in getting all the men they require. Transportation, both by rail and water, is active. Wholesale and retail trade is fairly good. Lumber dealers report trade active; there is a good demand for lumber owing to so many frame houses being built. There were no changes in the rate of wages or hours of labour, and no unrest in the labour market during June.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The prospects for a good hay crop are excellent, but farmers say fruits of all kinds will be scarce.

Manufacturing.—Local industries are enjoying favourable conditions, with a good demand for products.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, lathers, plasterers, painters, plumbers and stonecutters are all fully employed, and there are no men idle in any of these trades.

Metal, engineering and shipbuilding trades.—Iron workers of all classes, steam engineers, electrical workers and linemen are all busy. Bicycle workers and horse-shoers have plenty of work.

Woodworking and furnishing trades.—Carriage and wagon makers are well employed. Coopers report trade quiet, this being their dull season.

Printing and allied trades.—Printers, pressmen and bookbinders report trade very good.

Clothing trades.—Journeymen tailors report trade very good for the season.

Food and tobacco preparation.—Bakers, confectioners, cigarmakers and tobacco workers are all steadily employed.

Leather trades.—Saddlers and harness makers are busy.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and laundry workers have steady employment.

Transport.—Railroad men of all classes are working full time. Steamboatmen, longshoremen, carters, draymen, teamsters and expressmen have plenty of work.

Unskilled labour.—This class of labour is well employed in the city. Farmers complain of a scarcity of farm help.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour have been well employed during June, and the outlook for the balance of the season is generally very favourable. In the building trades building is very active, and good skilled labour is in demand. There is a keen demand for houses, and rents are high; real estate agents, instead of having houses to rent, are looking for them.

A new industry started this month—the Windsor Cement Block Company—to manufacture cement blocks to take the place of brick and stone for building purposes. The works will have an output of nearly 3,000 blocks weekly, and will give employment to from 15 to 20 men.

Wholesale and retail merchants report a good month's business, with collections very prompt.

There were no changes in the rates of wages or hours of labour during the month.

Some difficulty is being experienced between the contractor of the Catholic church and the building trades unions of the city. The firm that has the contract is from Chatham, Ont., and had estimated on the Chatham scale, which calls for longer hours and smaller wages than are paid here. The tender in consequence was considerably lower than those of the contractors here. The contractor also refuses to make it a union job.

The city council granted the Ontario Traction Company a thirty years' franchise to run an electric road into the city, which it is thought will be of great benefit.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—There is a good demand for farm produce, and the prices are good. Eggs are selling at from 16 to 18 cents per dozen, and butter at from 18 to 20 cents per pound on the market. Owing to the cold nights the crops are not so far advanced as they might have been, but on the whole they are doing well.

Lumbering.—The lumbering business is very active. There have been several cargoes unloaded this month.

Manufacturing.—All establishments are running full time, with plenty of orders.

Railroad construction and employment.—The only railroad construction work going on the city is the laying of sidings in the yards, and the keeping of the old ones in repair.

CONDITION OF PARTICULAR TRADES.

Building trades.—There was never so much building under way at one time in Windsor as at present. Dwelling-houses are going up in all parts of the city, being rented as soon as completed, and all employees connected with the building trades are very busy.

Metal, engineering and shipbuilding trades.—The Canadian Pacific Railway Company is giving one of its car ferries a general overhauling, and employment is thereby afforded to a large number of shipbuilders and helpers.

Woodworking and furnishing trades.—All connected with these trades are busily employed.

Printing and allied trades.—Printers and pressmen are very busy, some of them working overtime.

Clothing trades.—The Journeymen Tailors' Union report business a little quiet at present, although all members are working.

Food and tobacco preparation.—All connected with this department are employed.

Leather trades.—Leather workers and saddlers are all busy.

Miscellaneous.—Barbers report trade good. A union man was fined \$5 for working on Sunday, no Sunday work being permitted here.

Transport.—All railroads running out of this city found business very good. Owing to the masters and pilots' strike being declared off, the steamboatmen are all working. Street railway employees are very busy just now, as this is their busy part of the season. Draymen and teamsters were all fully employed.

Unskilled labour.—Active conditions prevailed.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. Edward Barry, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions in Sault Ste. Marie are at present duller than at any previous period in the last several years. There is a large number of men employed, yet there are many more here than the amount of work calls for. It was generally expected that the Lake Superior Company would have resumed operations two months ago, and this hope kept a large number here who would otherwise have sought employment elsewhere. The receiver, however, has as yet only three plants in operation, viz., the mechanical pulp mill, employing 140 men; the veneer mill, employing 100 men, and the saw mill, employing 100 men.

The contractor who is extending the government dock has 25 men employed, at a rate of from \$1.50 to \$3 per day. The contractors on the post office building employ 45 men at wages ranging from \$1.75 to \$4.50, and on the extension of the pier, on the eastern approach to the ship canal, 45 men were employed at daily wages ranging from \$1.50 to \$4.50.

The action of the Ontario government in throwing open the lands along the route of the Algoma Central Railway is expected to give an impetus to the mining industry in this district.

At the closing of June prospects for the resumption of operations at the steel plant seem brighter than in some time. The result would be immediate throughout the entire district.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The condition of agriculture in any season throughout the district of Algoma and Thunder Bay varies with the locality. This year, owing to the heavy and frequent rain-storms, crops on low-lying agricultural lands are not so promising as on the upland tracts, though as yet the indications are for a fairly good year.

Lumbering.—Lumbering has practically ceased for the present. The drives were exceptionally successful, and logs hung up since last season, and in some cases the season before, were brought to the mills at an unusually early date. Saw mill industry is reported to have been very active. There are six large mills in operation between Spanish crossing, on the Sault branch of the Canadian Pacific Railway, and Blind River, within a distance of 26 miles. There are about 800 men employed in this industry, and the aggregate output must come very near one million feet per day.

Mining.—This industry is being carried on, but not on as large a scale as formerly. The Canadian Copper Company is not so active and the Consolidated Lake Superior Company is at present only employing a small number of watchmen, &c., on its various properties. There are throughout this district quite a large number of prospects, which might almost be called mines, in the development of which a large number of men are employed; in fact, a good miner will find continuous employment in this district almost any time. The scale of wages varies, employers rarely paying alike. Twelve miles north of Webbwood, for example, there is a promising gold proposition; about 15 men are engaged in development work, and the number will be largely augmented if results continue to be favourable. At Hunter's Island de-

velopment work has been carried on for the International Mining Company. This company, which is composed of American capitalists, owns 400 acres under option; it has driven a tunnel on the property during the winter, and the results are said to be most encouraging. Diamond drills are also employed in exploration. At Loon Lake, about 14 miles east of Port Arthur, an American syndicate has a large gang of men employed, and, although nothing has been made public, it is stated that iron of high grade has been discovered in paying quantities. It is also stated that stripping will commence at once, and mining proper very shortly. It is also reported that the company is making arrangements for the shipment of ore. Another large body of high grade ore is reported to have been discovered in the Michipicoten District. Smelting operations have been temporarily suspended at Copper Cliff during the installation of a new plant; the old one was considered too expensive, and the company expects to effect a very considerable saving by the adoption of more modern methods. It is stated that the company has 4,000 men on its pay-roll.

A report issued by the International Nickel Company, covering the year ended March 31, 1904, shows total assets of \$30,896,167; the earnings totalled \$966,225, of which \$341,102 were carried to surplus account. Exports during the year were somewhat disappointing, but it was stated that the condition of the present foreign and domestic contracts would require a production equal to the past year for several years to come.

DISTRICT NOTES.

Fort Francis.—A large industrial boarding school will be built on the Indian reserve near this town.

Port Arthur.—Great activity in building prevails. A number of substantial business blocks are being erected and several residences of the better class are in progress of construction.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The amount of skilled labour offering is much greater than the demand. In the building trades it was hoped at the commencement of May that all hands would have been given employment. At that time there was a shortage of material and many large structures were not advanced beyond their foundations. Conditions, however, have not improved as was anticipated. A very large quantity of material has been placed on the ground, but not enough to give employment to the large numbers of men offering to work. The situation has been aggravated by the continuous influx of men from different parts, the greatest proportion of whom appear to come from the United Kingdom. This surplus of skilled labour is not confined to the building trades, but applies generally, though most conspicuous in the building trades. The bricklayers' union, for instance, which last year had a membership of something like 200, has now approximately 500. The carpenters' unions have increased in similar proportions. As to the amount of work, it will be at least double the volume of last year, but the supply of labour is still greater in proportion. As a result of this congestion of the labour market some signs of distress and disappointment are apparent, and the prospects of better conditions are meagre. Some of the contractors state that when the brick and stone begin to come in with greater freedom it is their opinion that every available bricklayer will be employed. In other trades the prospect is not so good. Many of the carpenters are finding temporary occupation as labourers or teamsters, and the same can be said of other skilled mechanics. Last year the commonest labour was paid a minimum of 17½ cents per hour, but this year the rate dropped to 15 cents, which is lower than has been paid for some years previous.

The factories of the city are all busy. Adjoining the city's quarry, a private com-

pany will commence operations and will deliver stone in the city in the course of a few days. Other new manufacturing industries on a smaller scale are making their appearance in different parts of the city.

Bank clearings continue to show increases over last year, and the transportation companies also find the volume of traffic to be increasing.

Retail trade has never enjoyed a more prosperous season, and the wholesalers are extending their businesses. The latter, however, complain of slowness of collections at provincial points.

The only change in wages that has taken place is that of common labour, such as is employed in excavating for foundations. Large numbers have been employed at 15 cents per hour, a rate lower than has prevailed for some years.

There has been no disturbance in the labour market of any kind. On June 6 the tailors called off their strike against two employers.

At the commencement of the season there was some anxiety with regard to the supply of bricks. The first kilns burnt were rapidly absorbed, and in a very short time the bricklayers were practically idle for lack of material. One or two sources of supply that were expected to put a large supply on the market failed to do so. This was largely the result of the inexperience of the work-people in handling the available class of bricks. These difficulties are rapidly being overcome, and in future the supply is likely to be abundant.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—No crop bulletin has yet been issued by the government, but from railway and other private sources it is learned that the crops never looked better than at present. The acreage is estimated to be five per cent greater in Manitoba, and in the Territories, it is about 33½ per cent greater than last year. Excellent growing weather has prevailed.

Manufacturing.—Manufacturing is very active. In the iron and machine shops all the men are employed that building and plant capacity will allow. One manufacturer in this line said that although they were busy now the orders in hand were not such as would keep their plants in full operation beyond a very limited period. Beyond that it was difficult to say what the conditions would be. Others, however, are more optimistic. Labour of all kinds is very plentiful.

Railroad construction and employment.—Railroad construction is now in full operation, and men for this kind of work are in demand. Up to the present month there has been a surplus of labour. For this particular class of work this has disappeared, and an actual shortage exists. There is also a large demand for men to work on the permanent way. The Canadian Pacific Company is making extensive improvements to its lines, and is absorbing a large number of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—The amount of building being done in the city of Winnipeg can be best gauged by the building inspector's permits. About the middle of June the amount of building sanctioned represented a value of over \$5,000,000, a sum equal to the total of the building done for the whole of 1903. Last year the bulk of the permits were issued subsequent to the month of June, and it is therefore estimated that the permits for this year will be double those of last year, although these were then considered abnormally large. In spite, however, of the large amount of building, the various trades have never before been so overcrowded as they are at the present moment. Thus far, with the exception of the carpenters, there has been no break in the prevailing scales of wages. The contractors recognize that extraordinary conditions prevail and manifest no desire to take advantage of the glut in the market for skilled men. A large number from the United Kingdom who have been employed have not proved to be accustomed

to the class of work required here, and are not giving the best of satisfaction.

Metal and engineering trades.—The extraordinary amount of building being done is causing the moulding shops to be very busy. They are not engaged solely in filling orders for the city of Winnipeg, but iron-work for substantial structures in different parts of the west is being made at the Winnipeg foundries. General repair work is also increasing very rapidly, and all the shops engaged in this class of work are working to their full capacity.

Woodworking and furnishing trades.—These trades are working at full capacity, and will continue to do so for the rest of the season.

Printing and allied trades.—Printers have continued during June in their normal state of regular employment. The Dominion Exhibition has added somewhat to the volume of the business. The Winnipeg 'Free Press' Company has commenced the erection of a new building on the corner of Portage avenue and Garry street. The Winnipeg 'Telegram' has moved into new quarters on the corner of McDermot and Albert streets.

Clothing trades.—Although the spring season has almost passed, the tailoring trades continue busy and garment workers are well employed.

Food and tobacco preparation.—Food and tobacco preparation factories continue to be active.

Leather trades.—Saddlers are all busy, and the volume of business is rapidly increasing.

Miscellaneous.—There continues to be a large class of unemployed in the city who are looking for any class of work. Such do not care to leave the city to work on railroad construction or on the farm or the railroad, and in consequence the market assumes an overstocked condition. In the business under the head of miscellaneous, general activity prevails and in all lines expansion is taking place.

Transport.—The railroads are employing full staffs. Permanent way gangs are being strengthened and indications point to a very busy season.

Unskilled labour.—As reported last month, unskilled labourers willing to adapt themselves to any kind of outdoor work, and to western conditions, can secure full employment. Last month there was enough men on the ground, but now employers are seeking for hands.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market is still somewhat overstocked, owing to additional arrivals of unskilled labour. Although a large number have found employment with contractors and farmers, there is still quite a number in this city who have not. A few weeks' time will, no doubt, find these men employed, as work on improvements has just commenced.

No new work has been started since May, with the exception of city improvements and work on new cement sidewalks. It is contemplated also to make extensive improvements in the waterworks system this summer, and this will give employment to a large number of men.

Exceptional activity prevails in the building trades and in the manufacture of building supplies, all parts of the city being affected by this. The weather has been very favourable for outdoor work. The Canadian Pacific Railway Company is moving the bridge and building department from Portage la Prairie to this city, as being more central. Shops are being put up near the new roundhouse, and this also will give employment to a large number of men.

Transportation companies find business more active than last month, which was injuriously affected by the floods in different parts of the province and the Terri-

tories. There is considerable improvement in wholesale and retail trade this month. Merchants report trade very active.

There have been no changes in rates of wages or in hours of labour, and there is no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Seeding is completed throughout the province and the Territories, but some farmers were still busy putting in oats and barley. The weather so far has been all that could be desired since spring opened, and the prospects are good everywhere. The reports from the Canadian Northern system and the Canadian Pacific Railway lines go to show that the grain that has been put in is growing splendidly, more especially in south-western Manitoba.

Lumbering.—Timber merchants report trade very active, owing to the demand for lumber throughout the west.

Manufacturing.—Manufacturers of building supplies report orders far ahead of last year. They are increasing their staffs, and are also putting in new machinery. The two flour mills are exceptionally busy, running night and day with full staffs. The Kelly mill has been running night and day for eight months. Last week it was forced to close down on account of the high water in the river. The planing mills are doing a rushing business in meeting the demand for building material.

Railroad construction and employment.—Construction on the Canadian Northern is in full operation. Many carloads of supplies and labourers have passed through Grand View for the Mackenzie & Mann system, and for various points west. Grading was resumed last week on the Greenway, Holmfild and Wakopa extension of the Canadian Northern Railway. Sixty teams and a large gang of men passed through Holmfild to resume grading where it was left off last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and stonemasons, lathers and plasterers, painters

and decorators are busy. Carpenters are fully employed, and there are some openings for good men at the present time. Plumbers report trade exceptionally good. Steamfitters find business good. There are no gasfitters employed here. Stonecutters and builders' labourers find plenty of work.

Metal, engineering and shipbuilding trades.—With iron moulders and helpers trade is good. Machinists find trade good, with openings for some on the Canadian Pacific Railway. Steam engineers and railway electrical workers are actively employed. Linemen are not busy. No metal polishers or stove mounters are employed here. Blacksmiths and boilermakers are very busy, with openings on the Canadian Pacific Railway for first-class men. Sheet metal workers, bicycle workers, pattern-makers and men engaged in manufacturing supplies for building purposes find trade good. Tool sharpeners also report trade good, and horseshoers were busy. Jewelers and watch-case makers find trade active.

Woodworking and furnishing trades.—Trade is good with woodturners, and there are some openings for first class men. Upholsterers are well employed.

Printing and allied trades.—Printers, pressmen and bookbinders find trade good. Photo-engravers are not employed in this city.

Clothing trades.—Journeyman tailors and garment workers report trade good. There are no hat or glove makers employed in this city. Boot and shoe workers are very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters are very busy. Ice drivers find trade somewhat slack. With cigarmakers trade is active.

Leather trades.—Tanners and curriers find trade exceptionally good. With saddlers trade is active.

Miscellaneous.—Clerks and stenographers find business good. Trade is also good

with delivery employees. Furriers find trade rather slack. Hotel and restaurant employees and laundry workers are busy. There are no broom-makers here.

Transport.—Men engaged in the passenger service on the railways are very busy, but those in the freight service are not so busy. Telegraphers were actively employed. Switchmen and trackmen find work plentiful. Freight-handlers, carters and draymen find trade good. Teamsters and expressmen were busy.

Unskilled labour.—The labour market is well supplied at present. Railway companies, no doubt, will give employment to a large number of unskilled labour as the season advances.

NOTES.

Several towns in Manitoba and the Territories are busy installing better fire protection. *Saskatoon, Lacombe and Prince Albert* are being equipped with gasoline fire engines. *Carman* voted \$6,000 for fire appliances. *Estevan* is asking for tenders for fire protection equipment. The building outlook throughout the district is very promising. Mr. A. J. McLean has purchased the C. Y. ranch, containing 50,000 acres of fenced land, on Betley river, near Tabor. He has about 7,000 head of cattle, and 150 mares, and is going into stock-raising on a large scale.

Regina, N.W.T.—A free site and exemption from taxation for ten years were voted to the Western Manufacturing Company of Indian Head on June 24. The report of the city assessor of Regina, N.W.T., shows a total assessment of \$2,219,110, an increase during the past twelve months of \$847,574.

Calgary, N.W.T.—The complete census shows a total population, including the suburbs, of 9,554, of which 5,311 are males.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

The labour market throughout the Kootenay boundary districts of British Columbia is in a most satisfactory condition at the present time. One reason for this is that any excess of labour has found employment in prospecting work or in taking the places of claim owners who are now in the hills performing their annual assessment work. From every district comes the report that no unemployed men are met with, while in some sections—notably on the boundary—the conditions are unusually active as a result of extensive railroad construction operations.

Boundary.—Work was recently commenced on the Great Northern extension to the V. V. & E. road from Grand Forks to Phoenix and to the Granby smelter, in all twenty-three miles, mostly heavy rock work. The contract is understood to call for the completion of the road in October, and work is being rushed ahead. Sixteen hundred men and three hundred horses are employed, and the number of men is likely to be increased to 2,000. The fact that 35 cars of giant powder was ordered for the work indicates the magnitude of the rock-cutting to be performed. The men are largely foreigners. The district is profiting substantially from the large monthly pay-roll distributed. Elsewhere in the district the mining and smelting industry is flourishing. New mines are opening, and, although the number of skilled miners employed in the ordinary new property is small, the prospect for enhanced employment of this desirable class of workmen is very materially improved.

Rossland.—The number of men employed in mines is still somewhat below normal, owing to the reductions in the force at the Le Roi. Minor properties have strengthened their crews, however, and the outlook for the working force being restored to normal numerical strength is excellent. In the building trades about seventy-five men are working in Rossland proper, this number being employed on the White Bear

concentrator and the armoury under construction for the local militia.

Nelson.—The Nelson district is active. Mining and agriculture are forging ahead rapidly throughout the district. Various new mining properties are being opened, and others equipped with reduction works that will increase their productiveness and give additional employment for skilled miners and millmen. Along Kootenay lake, to the northeast of Nelson, is an area of bench lands that has proved well suited to fruit culture. These lands are rapidly filling up. The federal inspector under the Fruit Marks Act is authority for the statement that this year alone 35,000 fruit trees were set out in southern Kootenay, and the bulk of this enterprise has been displayed in the Nelson district. An unlimited market for the fine grade of fruits raised in the interior of British Columbia is found in the Northwest Territories, and the Canadian Pacific railroad is fostering the industry.

Slocan.—Activity in the silver-lead mining industry is steadily increasing, and each advance sees additional employment for skilled labour. The advances along this line have been gradual but substantial since the federal lead bounty came into effect.

Lardeau.—The mining industry is more active throughout the Lardeau country at this time than at any previous juncture. At Poplar Creek it is estimated that 300 prospectors are opening up claims on the free gold belt. The mines developed to the greatest extent in Poplar are closed down just now pending litigation, but the district as a whole is going ahead rapidly.

East Kootenay.—Throughout East Kootenay, with its extensive silver-lead and coal mining industry and lumbering, reports are invariably favourable. At Moyie the St. Eugene mine is employing almost 300 men where none were at work two months ago. In Marysville the partly finished Sullivan smelter is being hastened

to completion, consequent upon the mine passing into new hands. At Fernie, Morrisey and Michel, the Crow's Nest Coal Company's mines are working to full capacity as the result of the closing of large contracts for coal and coke. The International Coal and Coke Company is employing a considerable crew, and the Imperial Coal and Coke Company will shortly commence extensive development on its many miles of coal areas.

Lumbering is in full operation at a score of points along the Crow's Nest railroad. The lumbering interests are still dissatisfied with the tariff conditions in respect to the free admission of American rough lumber, but the demand for lumber is excellent, and the situation has not changed recently.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during the past month, a demand being made for carpenters and painters. The outlook for the building trades in particular is very favourable. During the past month a large number of workmen have arrived, and secured employment. Work on the new distillery buildings has commenced, about 80 men being employed. The contract price for clearing the site and buildings is \$70,000. All the steel work on the railway and traffic bridge here is placed in position, and it is expected that the bridge will be opened for use about the middle of July. The construction of the bridge was undertaken by the provincial government, and will cost in the neighbourhood of one million dollars. The work has been under way for two years.

Customs returns for the month of May were as follows:—

Imports—Dutiable goods, \$80,632; free goods, \$40,991; total, \$121,623.

Duty collected, \$15,499; increase over May, 1903, \$2,956.

Exports, \$161,479.

The exports for May are greater than they have been for any May since the year of the fire.

On July 1, next, a new schedule of wages for the employees of the B. C. electric railway will go into effect. Motormen, conductors and car maintenance men will be paid under the following schedule:—

First six months in service,	20	cents	per	hour.
Next six months	21	"	"	"
Second year	22	"	"	"
Third year	23	"	"	"
Fourth and fifth year	24	"	"	"
Sixth and seventh	25	"	"	"
Eighth, ninth and tenth year,	26	"	"	"
After tenth year,	27	"	"	"

Trackmen as follows:—

First year..	20	cents	per	hour.
After first year..	22	"	"	"

The wages of the car men were also advanced on July 1, 1902; previous to that the rates paid were 20, 21 and 22 cents. In 1902 the first year's pay was made 20 cents, second and third year 22 cents, fourth and fifth, 25 cents. Under the new schedule the increases continue to men who have been a long time in the service.

CONDITION OF LOCAL INDUSTRIES

Agriculture.—The farmers throughout the district have had exceptionally favourable weather during the past two months, and there is a larger area of land in seed now than ever before. A large number of Eastern farmers have secured farm lands in the municipality of *Chilliwack*. It is estimated that fully \$80,000 worth of farming property in that valley has been turned over to new settlers since the beginning of the year, the sellers having bought other property in the valley and remaining there.

Fishing.—The spring salmon fishing during the month has been fairly good, but halibut fishing was slack, the steamer engaged in this trade only getting small catches. All the canneries on the river that are to be operated this year are ready for the sockeye season to commence.

Lumbering.—At the present time this industry is not active; the mills are running full time, but there seems to be an overplus of logs. The loggers of British Columbia decided to petition the provincial government to rescind the Order in Council passed about a year ago to prevent the export of logs.

Manufacturing.—The sash and door factories, and the factories engaged in the manufacture of salmon boxes, fruit boxes and crates are very busy, a large number of orders being on hand. The fruit cannery has commenced operations, and is now packing strawberries and small fruit; the work is being done by white labour. It is expected that when the larger fruit is being packed employment will be found for from forty to fifty hands.

Mining.—This industry is slack at present, nothing but assessment work being carried on.

Railroad construction and employment.—A large number of men still find employment in this work; there is also a number of survey parties at work on prospective roads.

Other industries.—Application for incorporation has been made by the Chilliwack Power and Light Company, Limited, with a capital of \$500,000, in \$10 shares, to build and operate a tramway to run from that point to this city.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are very busy, with both contract and job work plentiful. Carpenters report work very good, with prospects of a very busy season. Lathers and plasterers are busy. Painters report that a number of new men have found work here during the past month, and there is plenty of work not yet commenced owing to unsettled weather. Plumbers and steamfitters are all employed, chiefly on new work.

Metal, engineering and shipbuilding trades.—In the metal and engineering trades work is reported plentiful, a large

amount of cannery and steamboat work being under way. Shipwrights and caulkers have been very busy during the past month with repair jobs and several new contracts. Blacksmiths and horseshoers have been steadily employed, mostly on repair work.

Woodworking and furnishing trades.—All engaged in these trades were steadily employed. Carriage-makers find work somewhat slack. Car builders report work plentiful. In the electrical car shops it has been found necessary to increase their capacity, and a large addition, 100 x 75 feet, is being made. Shingle weavers report work plentiful, with a demand for more men.

Printing and allied trades.—All in these trades were fully employed.

Clothing trades.—Journeymen tailors report steady employment, with all members employed.

Food and tobacco preparation.—Cigar-makers find work plentiful, and several additional hands have found employment in these lines during the month.

Transport.—A good trade is being carried on by the river boats. Traffic generally is also fairly good, especially passenger traffic, a large number of excursion trips being run by the passenger boats. Street railway employees report work active.

Unskilled labour.—A demand was made for this kind of labour, both in the city and throughout the district, and men were offered good wages for farm work.

DISTRICT NOTES.

Kamloops.—The Canadian Real Property Company, Limited, has expended \$150,000 in the construction of canals, known as 'The Fruitland Irrigation Enterprise.' The company owns 6,000 acres of semi-arid land—land which in past years, for lack of water, was practically valueless. This will now be placed upon the market with the view of encouraging settlers.

Chilliwack.—Nine miles of telephone line is being constructed along the dyke for use during the spring freshets for the patrol, so as to be able to get in communication with the resident engineer in case of any danger of the dyke giving way.

The Eden Bank Creamery, Limited, has been incorporated, with a capital of \$10,000, \$10 shares, to take over the business of the present company, of similar name, at Chilliwack. It is the intention of the new company to go extensively into the canning of meats and vegetables. Building in the district is very brisk, a number of contracts being called for.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

As compared with the month of May, unskilled labour is not as well employed. Plenty of idle men are reporting for work, and the 'no men wanted' sign is still hanging at the city hall. Regarding the building trades, bricklaying is particularly active and stonemasons are all at work. More carpenters are being employed than in May, but there is no immediate demand for extra men. There are no new industries of importance being started, the principal work under way being the building of houses.

The number of resident workmen out of work, and the dullness of trade generally, have combined to render conditions unsettled, with the immediate prospect in some doubt.

The variations in prices for the month of June for produce, &c., have been few and unimportant. Summer fruits are on the decrease as the season advances. Potatoes still keep high, though the Ashcroft show a decrease of \$1 a ton (\$24). Hay has fallen \$2, being now \$18. Dealers in agricultural implements say trade is very good at present; but the hardware business is dull. On the whole local merchants report business very quiet. This is partly

accounted for by the fact of so much money being invested in houses and lots.

The installation of the plant for the supplying of electrical energy generated at Lake Beautiful for the street car service at Vancouver, B.C., was completed during June. The city of New Westminster has been supplied from the same source for some weeks. A steam plant is used for supplementary power.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from Lulu and Sea Islands and the surrounding Fraser River Valley districts, indicate that crops will be good this year. The fruit crop is very promising.

Fishing.—Fishing on the Fraser at Steveston has not yet opened, but the prospects indicate a poor season.

Lumbering.—The lumbering business is reported dull for foreign shipment, but good for the home trade.

Manufacturing.—Manufacturing concerns, generally speaking, are fairly busy.

Mining.—Mining is quiet. At Steveston, where boring for petroleum is now in progress, natural gas of 25 pounds pressure has been struck.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are busy, with prospects bright for the season. Carpenters and joiners are all at work, but the prospects are uncertain, inasmuch as large numbers of men keep coming in; this fact will probably be the cause of resident men being thrown out of work later on. Lathers and plasterers are well employed, and prospects are bright. Painters report a number of men idle and prospects poor, although the volume of work in hand exceeds that of last year, the new arrivals having caused an over-supply of men. Plumbers and gasfitters are busy. Stonecutters are all at work, and the prospects are good for the remainder of the season. Builders' labourers are fairly well employed, but there is no demand for men.

Metal, engineering and shipbuilding trades.—Iron moulders report trade very quiet and the prospects poor, there being a large surplus of idle men. Iron workers and helpers report a large number out of employment, with immediate prospects poor. Coremakers report trade dull. Machinists and engineers report trade very dull, and many idle men are in the city.* Steam engineers report no demand for men. Electrical workers are fairly well employed, but there is no demand for men, and prospects are uncertain, inasmuch as a new by-law regulating wiring of houses, &c., is being considered by the city council. There are no metal polishers or stove mounters employed here. Boilermakers and iron shipbuilders report trade fair, but there is a large number of idle men. No bicycle workers are employed here, only repair work being done. Linemen are all at work. Blacksmiths report trade good, and all men at work. Shipwrights and caulkers report trade fairly good at present, but the prospects are very uncertain, as the only new work reported is a boat to be built at Port Moody, distant twelve miles from here. Sheet metal workers report trade good, and all employed. There are about six tool sharpeners here, and all are at work. Horseshoers are very busy. Jewellers report trade fair, with a few idle men.

Woodworking and furnishing trades.—Woodworkers are busy, with prospects fair. Upholsterers report trade dull, and a few idle men. Carriage and wagon makers are very busy, orders ahead for two months being reported. Car builders and repairers on the Canadian Pacific Railway are busy at present, but the prospects are uncertain. Coopers report trade active, and the outlook promising. Shingle weavers report trade very dull for white men; Chinamen cutters are busy, and they do all the packing.

Printing and allied trades.—Job printers report trade very quiet, and a few idle

men in the city. News printers report trade fair, but with no demand for men. Pressmen report work and prospects fair. Bookbinders report work quiet, with no sign of improvement.

Clothing trades.—Tailors report work quiet and prospects uncertain. A few idle men are reported, and some are working short time. There are no garment workers, hat or glove makers, or boot and shoe makers employed to any considerable extent in this city. There are a few one-man concerns, however, in operation, which more than fill the requirements of the community.

Food and tobacco preparation.—Bakers and confectioners report work fair, with good prospects. Butchers and meat cutters are well employed, with no demand for men. Cigarmaking is active, but this condition is only temporary on account of the forthcoming Dominion Day celebrations.

Leather trades.—Leather workers report trade only fair. The demand for harness for June fell below that of May, and there are a few idle men reported.

Miscellaneous.—Barbers report trade as falling off. Whether this is due to the quietness at present prevailing in business circles, or to a surplus of shops, is problematical. A large number of young men are seeking positions as clerks and stenographers. There is no set schedule of hours or wages for this class of work, and there is no demand for young or even experienced clerks in this city. Female clerks are not in demand, and the wages paid those employed are very low. Delivery employees are not in demand. Hotel and restaurant employees report trade very quiet; this is partly accounted for by the employment of oriental labour. Laundry workers report work quiet.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market is much the same as last month, la-

* In a letter received at the Department of Labour, from the managing director of the Vancouver Engineering Works, it was stated that "the company's shops are running full of work, as is usual at this time of year."

hour being fairly well employed. There is no marked activity in any particular branch, but in some there is a tendency to dullness. The metal and shipbuilding trades are particularly inactive, which is unusual at this season of the year. There is no demand for additional help. In the early part of the month heavy shipments of freight were forwarded to Dawson, consisting of general merchandise and live stock. On July 1st, street railway employees and policemen received an advance in wages. Harmony between employers and employed prevailed.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The first fish traps to be introduced into British Columbia have been erected on the west coast of the island, a short distance from this city. They will be used this year as an experiment; if successful many more will be built.

Lumbering.—Loggers complain that there is no market for logs, and in consequence a number of camps will close down. Lumber mills are running full time, and some have just completed extensive additions to their plants.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment is fairly active in all branches. So far, building operations have been confined principally to small structures, which means numerous 'lay-offs' for mechanics. Bricklayers report all hands at work, but many have had to seek employment in other places. Carpenters and joiners are fairly well employed. Lathers and plasterers and painters and plumbers are fully employed. With stonecutters work is slack. Builders' labourers are all working.

Metal, engineering and shipbuilding trades.—Throughout these trades employment is not as good as it usually is at this season of the year. Conditions may be summarized as follows:—With iron moulders, work is good; machinists, dull; steam engineers, fair; blacksmiths, fair; boiler-makers and shipbuilders, dull; shipwrights and caulkers, very dull; horseshoers, fair.

Woodworking and furnishing trades.—Woodworkers are well employed. Carriage and wagon makers are busy.

Printing and allied trades.—Printers, pressmen and bookbinders are all fully employed.

Clothing trades.—Journeyman tailors are fairly well employed. Garment workers are in demand.

Food and tobacco preparation.—Bakers are well employed, but work is slack with butchers. Cigarmakers report good employment.

Leather trades.—Harnessmakers report trade dull.

Miscellaneous.—Barbers and clerks report conditions fair, and laundry workers are all employed.

Transport.—Steamboat men, steamboat firemen, ship labourers and longshoremen are well employed. Street railway men report all hands working. A new schedule of wages for the employees of the British Columbia Electric Railway Company goes into effect on July 1st. It has been accepted by the Street Railway Employees Association, and an agreement covering a term of three years signed. Motormen, conductors and car maintenance men will be paid as follows under the new schedule: For the first six months in the service, 20 cents per hour; next six months, 21 cents; second year, 22 cents; third year, 23 cents; fourth and fifth years, 24 cents; sixth and seven years, 25 cents; after tenth year, 27 cents. The rate formerly paid was: First year, 20 cents per hour; second and third years, 22 cents; fourth and fifth years, 23 cents; after fifth year, 25 cents. The schedule for trackmen is 20 cents an hour for the first year, 21 cents for the second year, and 22 cents an hour after the second year. Cab drivers and hackmen complain of lack of employment. Teamsters and expressmen are well employed.

Unskilled labour.—This class of labour is fully employed.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market during the past month have been dull for the time of year, and, while some trades have done fairly well, the principal industries have been badly crippled, owing largely to destructive fires which have occurred. In business circles trade has also been poor, owing to the number of men leaving or out of work. There are prospects, however, of business soon returning to its usual state.

There have been no changes in the rates of wages and no industrial unrest.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is nothing doing in the fishing industry at present, but a company is making preparations to cure fish when the season opens.

Lumbering.—Trade is quiet. The camps are working as usual but there is no rush of work. The local sawmill, which was burned last month, is being rebuilt on a small scale, and will soon be working again.

Manufacturing.—The shoe factory is running full time, with prospects of increasing its output.

Mining.—In the quartz mines there is no unusual activity, but several properties are working steadily. In the local mining industry June has been a very poor month. On the 29th of May, the pit head and engine house of the principal shaft in this district was burnt to the ground, and between five and six hundred men thrown out of work. The company at once took steps to get coal out of another shaft which has not been used for a long time and gradually got several of the men at work again, although there is still a large number unemployed. In the meantime the company is rushing work on rebuilding, but it will be some

time before conditions are the same as before. To make matters worse a small mine has been shut down; the coal was getting very dirty and, on the miners complaining about being docked so much for dirty coal, the company decided to shut the mine down and are withdrawing all the rails and other materials. At the Extension mines work is getting slack, the miners having been idle during the closing week of the month, and the outlook for the summer is poor.

There is nothing doing in *Railway construction* at present.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons were fairly well employed, and carpenters report business as good, especially bridge carpenters. Lathers and plasterers report nothing doing. Plumbers, stonecutters and builders' labourers report nothing doing.

Metal, engineering and shipbuilding trades.—Iron moulders report business as quiet. Machinists and engineers are fairly well employed.

Woodworking and furnishing trades.—Blacksmiths and carriage makers report work as steady.

Printing and allied trades.—Printers report work fairly good.

Clothing trades.—Tailors report business dull.

Food and tobacco preparation.—Cigar-makers' work is about as usual.

Transport.—Teamsters and expressmen report business as dull for the time of year.

Unskilled labour.—There has been very little doing for unskilled labour.

No changes among the unions.

DISTRICT NOTES.

The *Ladysmith smelter* will close down for two weeks at the end of June, for lack of ore.

FRAUDULENT REPRESENTATIONS IN ENGLAND TO MECHANICS AND OTHER SKILLED WORKMEN.

THE Dominion Government has been informed that certain individuals in Great Britain are engaged in making fraudulent representations to mechanics and other skilled workmen with a view to securing their emigration to Canada. In the House of Commons, on the 20th of June, a question as to the action of the Government in the matter was asked of the Ministry by a member of the House, and replied to by The Honourable the Minister of the Interior. The following verbatim account, taken from the 'Hansard' reports, will indicate the nature of the alleged representations and the actions of the Government in reference thereto. The publication in the *Labour Gazette* of the reply by the government to the question asked in the House, is intended to serve as a further means of acquainting the public with the facts in regard to the alleged fraudulent representations therein referred to.

Action of the Government.

Mr. Ralph Smith asked:

1. Is the government aware that certain individuals in Great Britain are engaged in making fraudulent representations to intending emigrants to Canada by holding themselves out as agents of the Canadian government, guaranteeing positions, and otherwise being guilty of fraud?

2. If so, what action, if any, does the government intend to take for the suppression of these frauds and the punishment of the offenders?

Hon. Clifford Sifton (Minister of the Interior):

1. The government is aware that certain individuals in Great Britain are engaged in making fraudulent representations to intending emigrants to Canada by guaranteeing positions and otherwise, but it is not aware that these individuals hold themselves out as agents of the Canadian government, excepting from general reports to the effect that in some cases these persons have represented themselves as agents of the government.

2. In order that the offices of these individuals may not be mistaken for government offices, the department has made pub-

lic announcements in Great Britain that the individuals in question are in no way connected with the government of Canada, and has instructed that notices be posted, especially in the London office, to this effect.

In addition to this, the attention of the imperial government has been drawn to these frauds with the view of suppressing them and punishing the offenders.

The following advertisement is also being inserted in leading newspapers of the United Kingdom:

The government of the Dominion of Canada, having been informed that certain persons conducting labour agencies in London and elsewhere in the United Kingdom, have been promoting the emigration to Canada of mechanics and other skilled workmen, have been giving false information respecting labour conditions in Canada and have represented themselves as agents of or as having the sanction and endorsement of the Dominion government, notice is hereby given that the Dominion government has no such agents in the United Kingdom, has not authorized, sanctioned or in any way given its approval to any agency in the United Kingdom for promoting the emigration to Canada of mechanics or other skilled labour. James A. Smart, Deputy Minister of the Interior of Canada.

The Department of the Interior is advised that this advertisement is appearing in the London 'Telegraph,' the London 'Chronicle,' the London 'Mail,' London 'Express,' London 'Leader,' London 'Star,' London 'Sun,' London 'Echo' and the London 'Evening News'; the Manchester 'Guardian' and the Manchester 'Evening News'; the Birmingham 'Post' and the Birmingham 'Mail'; the Liverpool 'Post' and the Liverpool 'Echo'; the Glasgow 'Herald' and the Glasgow 'Record'; the Edinburgh 'Scotsman' and the Edinburgh 'Evening Despatch'; the Newcastle 'Chronicle' and the Newcastle

'Evening Chronicle'; the Cardiff, South Wales, 'Echo' and the Cardiff 'Western Mail'; the Bristol 'Western Press' and the Bristol 'Evening News'; the Belfast 'Northern Whig' and the Belfast 'Evening Telegraph'; the Dublin 'Irish Times' the Dublin 'Freeman's Journal.' The Press Association has also circulated the notice.

Other Notices.

The following notice, taken from the Glasgow 'Evening News,' of June 15, a copy of which has been forwarded to the Department of Labour, will indicate the nature of the public notices referred to in paragraph two of the reply of the Minister of the Interior, quoted above:

'WARNING TO EMIGRANTS.'

THE EMIGRATION BRANCH of the CANADIAN GOVERNMENT desires it to be distinctly understood that individuals and organizations sending out mechanics to Canada, are not approved by, nor in any way connected with the CANADIAN GOVERNMENT.

J. BRUCE WALKER,

Canadian Government Office,
52 St. Enoch Square.

PROCEEDINGS OF THE ROYAL COMMISSION TO INVESTIGATE THE ALLEGED EMPLOYMENT OF ALIENS.

In the June number of the *Labour Gazette* an account was given of the appointment on the 23rd May of a Royal Commission to inquire into the alleged employment of aliens in connection with the surveys of the Grand Trunk Pacific Railway, and of the proceedings of the Commission to the end of the month.*

During the month of June the Commission continued its sittings at Montreal, and held sittings at Winnipeg, Edmonton, Regina and North Bay. About 90 witnesses in all had been examined up to the close of the month, including the general

manager and the assistant chief engineer of the Grand Trunk Pacific Railway Company, the divisional, district, office and assistant engineers, and a number of transit-men, draftsmen, levellers, topographers and others in the employ of the company. The evidence of a number of Canadian engineers, who had made application to the Grand Trunk Pacific Railway Company for employment but failed to secure positions, was also taken, as well as the opinion of some of the leading engineers as to the qualifications and capabilities of Canadian engineers for work in connection with these surveys.

At all of the places at which the Commission held sittings during the month the government was represented by Mr. H. M. Mowat, K.C., as counsel, and the evidence recorded by Mr. G. G. V. Ardouin, of the staff of the Department of Labour. The Grand Trunk Pacific Railway Company was also represented by counsel at the several sittings of the Commission. The inquiry was not confined to the examination of witnesses under oath, but included a personal examination by the Commissioner, His Honour Judge Winchester, and counsel, of letters and other documents in the offices of the company in the localities visited.

It was the intention of the Commission to continue its sittings at Ottawa and Kingston, and to hold another sitting at Montreal during the month of July.

ROYAL COMMISSION TO INVESTIGATE IMPORTATION OF ITALIAN LABOURERS INTO MONTREAL.

During the present year a large number of Italian labourers, apparently between 6,000 and 8,000, have come to Canada, either direct from Italy or from the United States, via the city of Montreal, and during the months of May and June the number of these Italians without employment in the city of Montreal was such as to occasion considerable discontent among the Canadian workmen of that city, and also considerable hardship among the Italians

* See *Labour Gazette*, Vol. IV., No. 12, page 1228, June, 1904.

themselves. The matter having been brought to the attention of the government, the Deputy Minister of Labour was sent to Montreal on the 6th June to investigate and prepare a report upon the causes of the importation of the Italians in question.

The deputy minister conducted his investigation forthwith, and presented his report to the government on the 11th June. In his report it was recommended by the deputy minister that the matter be further inquired into under oath by Royal Commission appointed for that purpose.

On the 20th June the Commission issued to His Honour Judge Winchester to inquire into the employment of aliens on

the Grand Trunk Pacific was extended so as to include an inquiry as to the 'circumstances which have induced Italian labourers to come to the city of Montreal from other countries during the present year, the persons engaged directly or indirectly in promoting their immigration, and the means and methods adopted in bringing about such immigration.'

Judge Winchester will enter upon the investigation into the importation of Italian labourers as soon as the examination of witnesses in connection with the Commission concerning the employment of aliens by the Grand Trunk Pacific Railway is completed.

SPRING CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA, 1904.

IN the accompanying table detailed information is presented relating to sixty-eight changes affecting rates of wages and hours of labour in Canada which were reported to the Department of Labour as having taken place during the months of March, April and May, of the present year.

Of the changes recorded, forty were increases in wages: thirteen were decreases in hours; ten were increases in wages in combination with decreases in hours, and one was an increase in hours. There are also noted in the table three instances of a decrease in hours, with a corresponding decrease in pay, and one case of an increase in hours with corresponding increase in pay.

The General Result.

According to the returns presented in the table an approximate increase of \$3,639.80 is shown in the weekly wage bill as the result of the spring changes of 1904, affecting 2,939 work-people, with an approximate decrease in working hours amounting to 5,558 per week, affecting 1,038 work-people. It should be remarked in this connection, however, that it was found impossible by the department to obtain statis-

tical information with regard to certain tendencies in the labour market which were reported in one or two localities. Thus, in the case of carpenters in Winnipeg, Man., wages were on a considerably lower level during the present season than they were in 1903, in some instances being as low as 25 cents per hour, while in others 32½ cents were paid, the rate last year being 35 cents. As the number of workmen affected by these varying conditions was also constantly fluctuating, after the opening of the immigration season, it would be very difficult to estimate the extent to which the wages bill was diminished. The same observation applies to the unskilled labour market in the same city, and at other points in western Canada, wages at Winnipeg having fallen from 20 cents last year to 17½ cents in May, and to 15 cents in June. In some of the changes also which are recorded in the table complete details were not obtainable, and only approximate estimates, in consequence, of the extent and effect of the change could be arrived at.

More particular reference to the nature of changes recorded in the tables is as follows:—

Increases in Wages.

An approximate total of 2,200 work-people had their wages increased during the spring months, the amount of the increase aggregating, in round numbers, \$2,800 weekly. These returns do not include the increase granted to I.C.R. telegraphers, numbering 385, or to batteau-men at Quebec, numbering 150. Of the changes concerning which the department was able to obtain full information, that which went into effect in a wood-working establishment at Etchemin, Que., was the largest single instance of increased weekly earnings, 250 men obtaining an increase of 25 cents a day, or an aggregate increase of \$375 per week. In another establishment in the same locality 175 men received an increase of \$105 weekly. The second largest increase in aggregate weekly earnings was in the case of civic labourers at Hamilton, which amounted to \$324. The increase granted to steam engineers, rock drillers, rock drillers' helpers and channel drillers at Niagara Falls, Ontario, affected between all four classes some 240 work-people, and added about \$708 to the weekly wage bill. The city of Ottawa also incurred an additional expenditure, which may be roughly placed at \$185 weekly, by the increase granted by the city council to civic labourers. At Winnipeg street railway employees to the number of 102 received an approximate weekly increase of \$137.70 in the pay roll. The increase to carpenters at Peterborough, Ont., added \$94.50 to the weekly wage bill, and at Sandwich, Ont., fur cutters received a weekly increase that may be estimated at \$97.50.

Increases in Wages and Decreases in Hours.

Nine instances will be found in the table in which wages were increased at the same time that a diminution in hours was granted. Some 739 work-people were affected by these changes, the increase in weekly earnings aggregating \$839.80, and the decrease in weekly hours of labour amounting to 4,040. The most important

change noted in this connection was that to carpenters at Quebec, who numbered 250, and to stonemasons at Ottawa, to the number of 100.

Decreases in Hours of Labour.

Work-people who received a reduction in hours without alteration of the wages scale numbered 299, and the change represented a shortening in hours weekly of 1,518. Among the changes included that by which 95 yardmen, engineers and firemen in the employ of the G.T.R. Co. at Niagara Falls, Ont., had their hours reduced by seven a week, counted most largely, the acquisition by the painters of Victoria of an 8-hour day coming next. No reference is made in the above totals to the obtaining of summer schedules by the retail clerks, of which the department was unable to obtain a complete return. Reductions in hours accompanied by a corresponding decrease in pay are also omitted.

Increase in Hours of Labour.

Only one increase in hours without corresponding increase in pay is noted in the table, that of papermakers to the number of 77 at St. Catharines, Ont., representing a weekly increase of about 300 hours.

Changes According to Localities.

Looking at the table from the standpoint of locality, and with regard primarily to the number of classes of work-people affected by changes in wages or hours, it will be seen that out of a total of sixty-eight changes which appear as individual items in the table, forty-five belong to the province of Ontario, twelve to the province of Quebec, five to British Columbia, three to Nova Scotia and one each to New Brunswick and Manitoba. The increase granted to Intercolonial Railway telegraphers may be regarded as shared between Quebec and the maritime provinces, and is not taken into consideration in these details.

From the standpoint of cities or towns affected, Guelph and Niagara Falls, Ont., stand first on the list with nine changes

each; Hamilton, Ont., reported six; Quebec, Que., and Sherbrooke, Que., five each; St. Thomas, Ont., four; Berlin, Ont., three; Victoria, B.C., three; and Sydney, N.S., Etchemin, Que., Ottawa, Ont., Chatham, Ont., and Vancouver, B.C., two each.

Changes by Industries and Trades.

The following is a detailed statement of the various changes in wages and hours reported to the department during the spring months of the present year, according to the several groups of trades or industries affected:—

The Building Trades.

As will be seen from the table, the greatest number of spring changes reported in any branch of trade was under the heading of the building trades, the department having secured detailed information with regard to twenty-six changes which went into effect. Of these changes thirteen were of the nature of an increase in wages, and five were reduction of hours. In the remaining cases an increased wages scale was combined with a decrease in working time. The changes reported to the department, according to the various classes of work-people involved, were as follows:

Masons.—At *Ottawa, Ont.*, one hundred stonemasons had their wages increased from thirty-six to forty-two cents an hour with a half-holiday allowed on Saturdays, the ordinary workday being of nine hours. The change was dated from May 1st, in response to a demand of the men for forty-five cents an hour and a Saturday half-holiday.

Bricklayers and masons.—Three instances were reported to the department of an improvement in wage conditions being granted to these classes in conjunction. At *Berlin, Ont.*, thirty workmen in the employ of local contractor received, on May 5th, an increase in scale from thirty-five to thirty-seven and a half cents for all work then on hand, a rate of forty cents an hour to be allowed on all new contracts. The concession was granted after a strike. At *Brantford, Ont.*, bricklayers and masons received on

April 1st an increase of five cents per hour on last year's schedule, twenty-five men being affected. In this case the change consisted rather of an accommodation of the schedule to existing wage conditions, the rate of forty cents per hour having been paid at the close of the season of 1903, although only thirty-five cents an hour were called for in the 1903 agreement with the union. At *Guelph, Ont.*, the same class of employees, to the number of thirty, had their wages increased twenty-five cents a day, on April 1st, in response to a demand of the union.

Bricklayers.—At *St. Thomas, Ont.*, bricklayers, to the number of sixteen, had their wages scale increased one cent per hour to thirty-seven cents during April, after a conference between the contractors and the local union. From *Sherbrooke, Que.*, two changes in the wages of bricklayers were reported, both taking effect on April 1st. In one case ten work-people had their hours reduced by two hours on Saturday, and in the other instance fifty workmen received on demand a reduction from ten hours to nine hours a day, and an increase from thirty-five to forty cents per hour in wages.

Stonecutters.—Two changes were reported to the department, one at *Niagara Falls, Ont.*, involving ninety-five men, and the other at *Guelph, Ont.*, involving fifteen men. Both changes took effect in May, and represent a reduction in hours from a nine to an eight-hour day. In the latter case no change in wages took place, but at *Niagara Falls* the scale was increased from thirty-nine to forty-five cents per hour. In *Montreal, Que.*, a strike of stonecutters for an increase in wages took place, but up to the end of May had not resulted in a definite increase in the scale.

Plasterers.—One change only was reported, namely, at *Berlin, Ont.*, whereby twenty men received on May 5th an increase in wages corresponding to that granted to bricklayers and masons at the same point, as above noted.

Carpenters.—Five changes in all were reported to the department. At *Sydney,*

N.S., the wages of carpenters were raised, after a strike, by an average increase of \$3.05 a week. At *Quebec, Que.*, a change affecting a large body of employees, namely, two hundred and fifty, was granted in May, a reduction from a ten to a nine-hour day being granted at the same time. The increase was from fifteen cents to twenty cents an hour. At *Sherbrooke, Que.*, twelve carpenters had their hours reduced by two hours on Saturdays on April 1st, as a voluntary concession on the part of their employers. At *Peterborough, Ont.*, seventy workmen, engaged principally on house building, had their wages increased on April 1st, to a minimum rate of twenty-five cents per hour, though several were granted thirty per hour. The minimum rate previously was twenty-two and a half cents per hour. At *St. Thomas, Ont.*, carpenters, to the number of fifty, had their wages advanced from a scale of 17½, 18½ and 20 cents per hour, to one of 20 cents and 22½ cents per hour. The union had demanded a uniform rate of 22½ cents per hour after May 1st, but several of the contractors voluntarily raised wages to 22½ cents prior to that date; the others increased the 17½ and 18½ to 20 cents, exceptionally good men getting twenty-five cents per hour.

Painters.—Five changes in wages and hours to painters were reported to the department during the spring months. Two of these were reported from *Chatham, Ont.*, as having taken place during the early part of April, by one of which twelve house painters in the employ of the Blonde Manufacturing Company had their wages increased from twenty to twenty-two and a half cents per hour after a lock-out of the workmen. In the other instance twenty-four house painters employed by six firms had their wages increased from 20 cents to 22½ cents per hour, with their hours reduced from ten to a nine-hour day. In the province of Quebec, fifty painters at *Sherbrooke, Que.*, had their work reduced from a ten to a nine-hour day, the minimum rate of wages being fixed at \$2 per day. The numbers affected by this change

it was thought will be increased as the season advances. In the city of *Quebec* also an increase in wages to painters took place, though full details were not available at the close of the month, some one hundred and fifty members of the National Painters' Union having gone on strike on April 1 for an increase from 17½ cents to 25 cents an hour. Six weeks later the strike was still in existence, though some of the men had obtained employment on a somewhat improved basis. At *Victoria, B.C.*, sixty employees in the different establishments of the city had their workday decreased from nine to eight hours without alteration in wages, on March 15.

Plumbers.—Three changes were reported to the department as having occurred at *Kingston, Ont.*, *Hamilton, Ont.*, and *Windsor, Ont.*, respectively. At *Kingston* the different firms of the city, eight in number, increased the wages of eighteen employees from a minimum rate of 19½ cents and a maximum rate of 22½ cents to a flat rate of 25 cents an hour for a nine-hour day, the change following a strike of the employees. At *Hamilton* seventy plumbers and gasfitters had their wages advanced on May 1 from 27½ cents per hour to 30 cents per hour, with a short day on Saturdays. At *Windsor* eleven plumbers had their scale increased to 35 cents per hour on May 1, after a strike for a scale of 36 cents and a half-day on Saturdays.

Builders' labourers.—Two changes were reported, one at *Sherbrooke, Que.*, at which twenty-five men had their hours reduced from fifty-nine to fifty-seven per week on April 1, and one at *Galt, Ont.*, by which thirty men had their wages increased from 18 cents to 20 cents per hour for first-class men on March 24. Second-class men continue to receive eighteen cents an hour.

Metal, engineering and shipbuilding trades.—The spring changes affecting the largest body of work-people under this heading were reported from *Guelph, Ont.*, and consisted of the granting of a Saturday half-holiday during the months of May, June, July and August to four hundred

machinists and machinists' helpers in the employment of the Raymond Manufacturing Company, Limited, and to two hundred and fifty *iron moulders and labourers* in the employ of the Taylor Forbes Company, Limited. The former company has for several years given a half-holiday on Saturdays during the warm months, but the present is the first occasion on which a similar concession has been granted by the Taylor Forbes Company. In both cases the concession was voluntarily granted by the employers. Another change reported from Guelph, Ont., was an increase granted on April 16 to twenty *tinsmiths* from a general rate of \$1.75 and \$2 to a rate of \$2.25 for journeymen, \$1.80 for two-year men and \$1.50 for first year men. Time and a half will be allowed for overtime, with double time on Sundays. The hours of labour were at the same time reduced from 59 a week to nine hours a day. The change was granted after a strike affecting two shops.

Sheet metal workers and tinsmiths employed in the several shops at Hamilton, Ont., to the number of eighty, had their wages increased from a minimum rate of 22½ cents an hour to a minimum of 25 cents an hour, with a short day on Saturdays. The change went into effect on May 2, and was granted on the demand of the workmen.

Steam engineers at Niagara Falls, to the number of fifty, in the employ of several contractors engaged in constructing the various power shops, received an increase in the scale from 25 to 30 cents an hour, after a strike of a number of the workmen.

At Vancouver, B.C., *electrical workers* received an increase of 25 cents a day on last year's scale, the hours of labour remaining as before, viz., eight hours per day.

The Woodworking and Furnishing Trades.

Under this heading three changes were reported to the department, all being in the nature of increases, and all going into

effect during the month of May. An aggregate of 475 men were affected. Two of the changes were reported from *Etchemin, county of Lévis, Que.*, mill hands being the class affected in both cases. In the one instance two hundred and fifty employees in the planing mills of the A. Gravel Lumber Company received an increase from a rate of \$1 to a rate of \$1.25 per day on May 14; in the other, one hundred and seventy-five employees in the matchwood mill of the Edson Fitch Company were increased from \$1.10 to \$1.20 per day on May 21. In both shops the change was granted on the demand of the workmen, the hours remaining as before, namely, ten per day. In the case of the matchwood mill employees a similar increase of 10 cents per day was granted last year. The other change affecting woodworkers reported to the department was that by which fifty employees of the J. H. Still Manufacturing Company at *St. Thomas, Ont.*, received a ten per cent increase on May 15, the raise being voluntarily granted, though a number of individual requests for improved conditions had been presented to the company.

The Printing and Allied Trades.

Two changes were reported, one at *Guelph, Ont.*, being a decrease in hours, and one at *Stratford, Ont.*, being an increase in scale. The Guelph change affected fifteen employees of the 'Mercury' printing office, and consisted of a reduction of the work-day on Saturdays from eight to six hours without loss of pay, the change being a voluntary concession, the publishers' agreement with the union calling for eight hours' work on Saturdays. At Stratford eleven printers in the employment of the 'Herald' and 'Beacon' companies received a new scale, representing on an average an increase of from \$1.50 to \$2 per week to members of the union.

The Clothing Trades.

The most important of the three changes reported to the department, from the standpoint of the numbers in-

volved, was that by which sixty-five employees of a furrier's establishment at *Sandwich, Ont.*, received a general increase in scale. The increase was the result of a strike by which the fur cutters had their average wages raised from an approximate rate of \$10 to \$12 per week; nailers from \$7-\$9 to \$8-\$10, and help girls from \$3-\$4 to \$4-\$6 per week. These wages represent piece-work prices. The change went into effect in March, the hours of labour remaining the same as before, namely, sixty per week.

At *Victoria, B.C.*, also, thirty-six journeymen tailors, of which number twenty-one were females, received on June 1 a slight increase in piece-work scale, amounting in the case of male workmen to about 50 cents per day, and to 60 cents for females.

The remaining change under this heading was that by which *journeymen tailors* at *St. John, N.B.*, received an increase of from \$1 to \$2 per week, with a reduction in hours from ten to nine per day. The change was the result of the presentation of a new bill of prices by the union, to which nine firms agreed. Four other firms, however, refused to sign, and twelve of their employees struck, though three subsequently returned to work and one began business for himself. The more important items of the new schedule are as follows:—

COATS.

Dress coat....	\$ 6 00
D. B. frock coat..	6 00
D. B. overcoat..	5 50
Fly front overcoat ..	5 00
Cutaway coat..	5 00

All extras not mentioned to be paid for at twenty cents per hour.

Weekly hands to be paid from \$2 to \$2.50 per day.

Nine hours shall constitute a day.

All overtime to be paid for at the rate of 20 cents per hour.

The Leather Trades.

The only spring change reported to the department was that whereby twenty-five leather workers employed in different city shops at *Hamilton, Ont.*, received a half-holiday on Saturdays, dating from May 14, reducing the week from one of fifty-nine to one of fifty-nve hours.

The Railway Service.

The most important change was that by which telegraphers on the Intercolonial and Prince Edward Island railway systems received a new set of rules and rates of pay, dating from May 1, 1904. In the rules, the changes were of minor importance, relating chiefly to promotion procedure. In the rates of pay, however, a material advance was granted, as the following table will show:—

The monthly salary of train despatchers remains unchanged, as follows:—

1st year.. . . .	\$ 95
2nd year.. . . .	100
3rd year.. . . .	105
4th year.. . . .	110

On the Prince Edward Island District the monthly salary of train despatchers is unchanged, as follows:—

Senior despatcher.. . . .	\$110
Assistant.. . . .	95

Relieving despatchers are allowed \$90 per month as formerly, and 50 cents per day and travelling expenses when away from headquarters.

Twelve consecutive hours, including meal hours, constitutes, as before, a day's work for a telegrapher. Operators and despatch offices work as a rule eight consecutive hours.

Twenty-five cents per hour for overtime, instead of twenty cents per hour will now be allowed.

Car shop employees of the Grand Trunk Railway Company at *London, Ont.*, and of the Michigan Central Railway Company at *St. Thomas, Ont.*, were affected by changes in hours of labour, in the first instance to the number of three hundred and fifty, and in the second to the number of three hundred and twenty. The change at *London* amounted to a decrease of one hour per week, the shops closing at eleven a.m. on Saturdays, instead of at noon as formerly, after April 4. The change was in the nature of a retrenchment on the part of the company, about fifty men being laid off at the same date. The change at *St. Thomas* was from a nine-hour day to a ten-hour day, with a short day on Saturdays, in accordance with the usual custom of the company during the summer season.

At *Niagara Falls, Ont.*, yardmen, yard engineers and yard firemen, to the number of ninety-seven, had their hours reduced from eleven to ten per day on March 1. The change amounted to a reduction from seventy-seven to seventy hours per week, as the men work seven days per week.

Eight *freight-handlers* in the employ of the Intercolonial Railway at *Quebec, Que.* had their wages increased on April 6 by twenty cents per day, after a short strike.

General Transport.

Six changes were reported to the department, affecting in the aggregate 287 men. All changes were in the nature of increases in wages, two being to street car employees, two to steamboat firemen, one to batteau men and one to coal wagon drivers.

Of the increases granted to *street railway employees*, that which went into effect at *Winnipeg* on May 1 involved one hundred and two work-people, and was of the general nature of an increase of ten per cent in wages granted on request of the workmen on May 1. More particularly the change was as follows:—

—	Old Rate.	New Rate.
	Cts.	Cts.
First six months.....	17	19
Second six months.....	18	20
Second twelve months....	19	21
Third twelve months.....	20	22
Over three years.....	21	24

After working one year with the company the men get their uniforms free, but for the first year they pay half the cost. The hours of labour remained as before, namely, an average of ten per day.

The other increase to *street railway employees* reported to the department was in the case of the men employed by the Guelph Radial Railway, which is owned by the city of Guelph, and operated by a commission. It consisted of an increase of one cent an hour, first year men getting 13½ cents, second year men getting 14½ and third year men 15½ cents an hour. The increase was granted on the application of the men, who are without organization.

Steamboat firemen on the Dartmouth-Halifax ferry, four in number, received an increase of \$1 per week after a strike

of two days' duration. A change for the same class of labour at Toronto, not noted in the table, affected employees of the Toronto Ferry Company, the Toronto-St. Catharines Navigation Company, and the Hamilton Steamboat Company, and consisted of an increase from \$35 to \$40 per month. In many cases, however, under the old arrangement the men at the close of the season received a bonus of \$5 per month for the number of months worked.

Coal wagon drivers to the number of fifteen, in the employment of four coal dealers at Hamilton, Ont., had their wages increased \$1 on May 7, on the demand of the men.

The increase to batteau men at Quebec, which went into effect on the opening of navigation, and involved 150 men, was on a piece-work basis, and amounted, approximately, from 12½ to 15 per cent. The schedule in full as it went into effect is as follows:—*

		Size.		Per car.
				\$ cts.
Planks	Mixed	Unloaded from the car and delivered to batteaus		1 75

General cargo, including work in freight sheds, warehouses, propellers, barges and all vessels of 40 tons and over : 25c. per hour from 7 a.m. to 6 p.m.; 30¼ per hour from 6 p.m. to 7 a.m.; 40c. on Sundays.

A patron, stevedore or foreman who will call a gang of men after 7 o'clock p.m. and keep them waiting will have to pay the time in full, as if they were working. This tariff will take effect at the opening of navigation, until 15th December, 1904.

Civic Employees.

Among changes in wages granted by city corporations during the spring months, labourers in the employ of the city of Hamilton, Ont., received an increase from eighteen cents an hour to twenty cents, dating from June 1, this being the most important change from the point of view of the number of work-people immediately af-

fected. An increase of ten per cent, however, allowed to labourers by the city of Ottawa, Ont., affected a body of men at times as equally as numerous, viz., from 60 to 300, according to season. In the latter case \$1.65 was fixed as a minimum wage for labourers for a nine-hour day, the latter class of men being paid as high as \$1.75 per day, being a voluntary concession by

* The schedule for the season of 1903 was published in the *Labour Gazette* for September, 1903, page 231, a reference to which a more detailed comparison of rates may be obtained.

SPRING CHANGES IN RATES OF WAGES

Class of Workpeople affected.	Locality.	Approximate number of Workpeople affected.	Date from which change took effect.	Particulars of Change.
<i>Building Trades.</i>

the city council. The civic appropriation for labour accordingly was increased from \$50,000 to \$55,000 this year.

At *Hamilton, Ont.*, also, five foremen, on city sidewalks construction operations, had their wages raised from thirty-five to thirty-seven cents per hour.

Labourers employed by the town of *Berlin, Ont.*, received an increase during April, amounting to ten and in some cases fifteen cents per day, the wages of labourers being now \$1.35, \$1.65 and \$1.75, according to the capacity of the workman.

At *Toronto, Ont.*, city drain diggers, to the number of thirty-five, had their wages increased from twenty-one to twenty-five cents per hour, the men also getting a half holiday on Saturdays without reduction in pay. The change was the result of a strike.

At *Quebec, Que.*, firemen, to the number of seventy-six, and policemen to the number of eighty, had their wages increased on May 1 by the voluntary action of the city council. In both cases the advance amounted to seventy cents per week.

At *Vancouver, B.C.*, a by-law was passed by the city council an April 3, providing for the fixing anew of the salaries of officials of the city. Extracts from the list of wage schedules are as follows:—

Building Inspector (who shall also carry out the duties of building assessor):—	
	Per month.

Miscellaneous Trades.

Arrangements for a weekly half-holiday for retail clerks were in several cases arrived at during May, and the case of the employees of this class at *Guelph, Ont.*, is included in the table as typical of conditions that prevail very widely in Canadian cities during the summer season. About one hundred male and two hundred females were affected in the Guelph case, and the arrangement was for a half-holiday during July and August, excepting in weeks in which a public holiday occurs. The concession was obtained in response to a petition signed by two hundred members of the Retail Clerks' Association and presented to the local Retail Merchants' Association.

A change in hours went into effect in *St. Catharines, Ont.*, by which paper-makers were changed to a longer schedule without corresponding change in wages. Prior to the change, day hands worked fifty-five hours a week, and tower hands fifty-six hours. Under the new arrangement, these classes work fifty-eight and seventy-one hours respectively. The change came into effect on March 14, and was ac-

cepted, after a lock-out, by a majority of the hands, the places of others being filled.

Barbers received a reduction in hours during May in two cases, namely, at *Guelph, Ont.*, and *Victoria, B.C.* In the former case concessions were granted after negotiations between the employers and the union, each journeyman barber being allowed a half-holiday per week, when the work of the shop would permit it, without reduction in wages. In *Victoria* the reduction amounted to a half-hour per day, reducing the weekly hours from sixty-five to sixty-two, on demand of the workmen. Twenty-five were affected in the latter case, and fifteen in the former.

The remaining change was that by which *rock drillers, channel drillers* and their *helpers*, employed at *Niagara Falls, Ont.*,

received various increases in wages, amounting to from $2\frac{1}{2}$ to 5 cents per hour. The change was granted after a strike, referred to above in connection with the increase in wages granted to steam engineers in the same city.

Unskilled Labour.

In addition to the changes noted above under the heading of *civic employees*, a change in the wages of common labour occurred at *Sydney, N.S.*, on April 11, by which one hundred and fifty men received improved conditions after a short strike. The workmen in question were employees of a firm of contractors engaged in the erection of a coal-washing plant. Labourers received an increase from 12'6 to 13 cents per hour, and concrete men an increase from 13'5 to 14 cents per hour.

AGREEMENT OF THE TORONTO RAILWAY COMPANY WITH ITS EMPLOYEES.

The following statement was supplied by Mr. Phillips Thompson, correspondent of the *Labour Gazette* for Toronto and district :—

AN agreement effected by means of a conciliation committee was signed on June 28 between the Toronto Railway Company and its employees, by which the men secured an increased wages schedule and other improvements in conditions for the next three years, dating from June 1, 1904.

Negotiations looking for a readjustment of conditions had been in progress for several weeks but, until about the middle of June, were conducted in secrecy, and information as to details in consequence were not available. The company, however, is understood to have requested the appointment of a conciliation committee by the men to meet a similar number of the directors. In accordance with this request, at a mass meeting of the men held on the night of June 15, Messrs. J. H. Pickle, president of the Employees' Union, Magnus Sinclair, and J. W. Griffin were

appointed as their representatives on the joint conciliation board.

Statement by the Company

On June 16th a statement was issued by the company in which the various stages reached in the course of the negotiations were referred to in part as follows:

On May 16 the general manager of the Toronto Railway Company received a request from George Coney, signing himself 'Secretary of Committee,' stating that 'a mass meeting of the employees of the company' had been held on Saturday evening, May 7, and forwarding certain resolutions then passed embodying requests which the employees wished to be made upon the company. Mr. Keating replied that there were several requests to which the company could not agree, and he suggested that in accordance with the terms of the agreement made with a committee on behalf of all the employees in 1903, a conciliation committee of three employees should be named for the purpose of adjusting these matters. An undated reply was received on May 21 asking the company to receive a committee that had been appointed, consisting of six employees. To this the company replied that it would be willing to receive the committee appointed by the mass meeting preliminary to the appointment of a conciliation committee, if found necessary, and asking, as the company was in the midst of heavy traffic

for holiday season, that an appointment be made for the 6th June. On that date a meeting was held between the officials of the company and the committee representing the employees, and conferences were continued daily until Friday, the 10th inst. When the matter had been fully discussed the officials stated that they were prepared to make their report to the board of directors. Meetings of the board of directors were held on Monday and Tuesday to discuss this matter.

The company further stated that on Tuesday, June 14, after a full discussion, a letter was sent to the secretary of the committee, in which it was expressly insisted upon that the company must retain its right to contract with its employees as such rather than with a portion of them organized into a division of the Amalgamated Association of Street and Electric Railway Employees of America. The employees were urged to name three of their number who will act on a conciliation committee, as provided in the agreement of 22nd May, 1903.

The statement further referred to the action of the employees in calling a mass meeting in the name of the union, to the seriousness of a strike, and to the anxiety of the company to avert trouble.

Points of Difference.

The extent to which the question of the recognition of the union was involved in the discussion is further shown by a reference to it in the following additional extract from the company's statement:

The committee representing the employees, in their discussion with the management, stated they were not prepared to submit to conciliation or arbitration the two requests with reference to recognition of the union. These requests are that the agreement of 1903 should be amended so as to make it an agreement with the union instead of with the whole body of employees; and that no dismissal can take effect until after submission of the causes thereof to a committee of the union for adjustment. The reason given for refusing to arbitrate was that such requests involved a principle.

The company also objects upon principle to the questions as to the union being submitted to arbitration, believing that any such control by the union would be entirely destructive to discipline, and that it would deprive the company of that control which its responsibility to the public, its passengers and the city necessitates. The differences upon the other points as to which the officials of the company and the committee representing the employees have failed to agree the company is willing should be left to arbitra-

tion. The wages of the car men have been increased 24.7 per cent during the past four years, and at the present time they are the highest paid motormen and conductors in Canada east of Lake Superior.

Further Negotiations.

On the 16th of June the company was notified of the appointment of the men's representatives on the conciliation committee and immediately addressed a communication to the secretary of the committee, in which the circular letter above mentioned, calling a meeting of Division No. 113 of the Amalgamated Association of Street and Electric Railway Employees of America, was referred to, and it was asked if the mass meeting at which the men's representatives had been appointed was the same as that summoned by the circular letter. The manager repeated the refusal of the company to enter into any negotiations with the union, and declined to meet the men's committee, if the meeting at which they had been appointed was not open to all the employees of the company. On receiving assurances that the meeting, though called in the name of the union, was representative of all the employees of the company, the company appointed Mr. E. H. Keating, manager, and Mr. James Gunn, superintendent, and Mr. W. H. Moore as its representatives to confer with the representatives of the men.

An Agreement Arrived At.

After several conferences of the joint board thus appointed, an agreement was arrived at on June 21, which was ratified by the men at a mass meeting held on the morning of the 23rd. The following is a summary of its more important items:

Wages scale.—The following wage schedule was agreed upon: Motormen and conductors, first year, 18 cents an hour; second year, 20 cents; third year and thereafter, 21½ cents; shedmen, foremen, 21½ cents; assistants, 19 cents; car washers, foremen, 22 cents; assistants, 18 cents; motor and truck shop men, first year, 18 cents; second year, 20 cents; third year and thereafter, 21½ cents.

The car men have been getting eighteen cents for the first year and twenty cents afterwards. Under the new agreement this will stand, except that the twenty cents will only apply to second year of service, the rate for the third and later years being 21½ cents an hour.

Uniforms.—The company will pay half the cost of uniforms of motormen and conductors who have been with the company for one year and provide for those in the service for more than two years.

Discipline.—As to maintaining discipline, any employee against whom charges are brought will be required to report to the superintendent. His case will then be considered by the proper officials. For first and second offences a warning will be given, and for subsequent offences suspension. For serious cases, including drunkenness, drinking in uniform, drinking on cars, careless destruction of property or neglect of duty, omitting to collect fares or allowing friends to ride free, incivility to passengers and profanity upon cars, to be punished by suspension or dismissal at the discretion of the proper officials.

Any employee against whom charges are brought shall have the right to appear before the general manager and may bring with him a deputation of his fellow-employees and it shall not act to their disadvantage.

The company will not discriminate against any employee who may belong to any organization.

Minor provisions.—Arrangements will be made towards providing seats for motormen in open and closed cars.

If the company is requested by two thirds the men on any route to make such changes as will give a more equitable division of hours the company will consider same.

Employees desiring time off for a reasonable period will be accommodated if at all possible by the car starter.

The company will experiment with several kinds of closed cars to see if doors can be placed in the front vestibules.

The agreement also provides that so far as possible the schedules shall be arranged so as to give every car man at least seven hours' work a day.

A detail to which objection was taken by the men was the term for which the agreement was to stand. This was at first fixed at two years. After being referred back to the conciliation committee, however, the provision was amended to meet the wishes of the men by fixing the term at three years.

A few days' delay in securing the final adoption of the agreement was caused by the absence of the president of the company from Toronto.

INCREASE IN THE STAFF AND JURISDICTION OF FACTORY INSPECTORS, ONTARIO.

DURING June the government of Ontario took steps to secure improved administration of the Factories Act by the appointment of additional officers as members of the board of factory inspectors for that province. Mr. A. W. Holmes, for some years a member of the executive of the International Association of Machinists, was appointed in the place of Mr. James R. Brown, who had been compelled by failing health to retire after seventeen years continuous service in the position. Mrs. Brown, wife of Mr. Jas. R. Brown, was appointed as an additional female inspector to work in conjunction with Miss Margaret Carlyle, who up to the present time has covered the industrial establishments in which females are employed throughout the province. Both of the new officers will enter upon their duties on the 1st of July, and in addition to the inspectors already in office will increase the

number of inspectors for the province to four male and two female officers.

Duties of Inspectors.

The appointment of these officers is under the section of the statutes which expressly provides for the appointment of an inspector, to be paid such salary as may be appropriated for the purpose by the legislature, and whose district is to be fixed by the Governor in Council.* The appointment of a female inspector is also expressly provided for by the Act.† Briefly stated, the duties of the inspectors are in general to secure the enforcement of, by personal investigation and supervision, the various provisions of the Factories Acts, more especially those relating to the hours of labour of children, young girls and women, sanitary conditions in factories, and matters generally affecting the health of employees, the personal safety of employment as protected by the Act, the construction of fire escapes, the posting of notices and various other particulars. In the performance of these duties inspectors may enter into and examine at all reasonable times any building they may have reason to believe is a factory; they may require the production of any register or document and examine witnesses under oath, taking a constable with them if serious objection in the execution

of these duties is anticipated. A report of proceedings must be laid before the legislative assembly. The wilful delaying or deceiving of an inspector, or the failure to produce any document or witnesses he may require, is punishable by a fine of \$30.‡

Increased Jurisdiction.

By Order in Council of the Lieutenant Governor of Ontario, dated June 10, the following business premises in addition to those already named in the Factories Act, are made liable to inspection by the provincial officers:

Apple evaporator factories, artificial flower factories, basket factories, boat and canoe factories, brick yards, buffalo robe factories, binder twine factories, cereal food factories, chain works, chamois factories, cement works, chewing gum factories, chicle works, coal hoisting plants, condensing, cream and milk factories, cutlery factories, elevator factories, enamelling works, excelsior factories, fire works, flour mills, feather-down factories, gas and electric light works, hair factories, leather goods factories, meat packing houses, millinery workshops, mica works, moccasin factories, oilcloth factories, over-gaiter factories, photographic supplies factories, polish factories, plush factories, printing offices, pump factories, pumping stations, quilting factories, regalia factories, repair shops, seed sorting works, silk ribbon factories, silverware factories, spoke and hub factories, tent and awning factories, typewriter factories, umbrella works, veneer factories, wheel factories, wholesale packing houses,

CANADIAN TRADE AND REVENUE DURING THE MONTH OF JUNE, 1904.

The following article, intended as supplementary to the general Summary of Industrial Labour conditions, is based on statistics furnished by courtesy of the Departments of Customs and Finance, Canada, on the latest weekly reports issued by the Department of Trade and Commerce, Canada, on current information collected from reliable trade and financial journals, and on the references contained in the reports of correspondents of the *Labour Gazette* published in the present issue.

CANADIAN revenue presented a better showing comparatively during the past month than in May, and for the fiscal year a surplus of \$16,500,000 in round numbers is estimated. The foreign trade

situation on the other hand showed a decline in exports, and domestic trade within the Dominion was not characterized by marked activity. The announcement by the Hon. the Minister of Finance of certain changes in the tariff and the favourable annual reports of a number of Canadian banks, were other important features of the month, fuller particulars with regard to which will be found under the following headings, relating respectively to foreign trade, imperial trade, domestic trade, and Canadian revenue and expenditure.

Foreign Trade Returns.

A continuance of the decline in exports is shown in the accompanying tables relating to foreign trade during May supplied by courtesy of the Department of Customs, Canada. For the month this amounted to \$7,077,179. Imports also showed a decrease of \$1,008,689 for May, but an increase of \$18,044,886 for the eleven months ended May 31. The total trade showed a decline of \$7,818,201 for the month, and an increase of \$4,091,348 for the eleven months.

It will be seen from the table that the most material decrease in exports were in the trade in agricultural and animal products. The decline in agricultural ex-

ports is stated to be chiefly in cheese, butter and bacon, owing to the unfavourable market conditions in Great Britain. During the fiscal year of 1903 an average price of twenty cents per pound for butter prevailed, and for cheese eleven cents per pound. During May, however, butter sold on an average at 17 cents, and cheese at 8½ cents. Bacon similarly dropped from 11 cents to 9½ cents. Exports have also suffered from the interruption to navigation on the great lakes caused by the strike of masters and pilots, many vessels at Montreal being unable to secure their usual cargoes of grain. It is estimated that fully 3,000,000 bushels of wheat were thus held back in the elevators at Port Arthur and Fort William.

The budget speech was delivered by the honourable the Minister of Finance in the House of Commons on June 7th. A surplus for the present year of \$16,500,000 was announced, out of which the net debt of the country will be reduced by \$7,500,000. The effect of the German surtax, it was stated, decreased the trade in woollens and cottons, iron and steel and other articles by \$8,000,000 in the first ten months of last year, and \$5,000,000 in the same period this year. A number of changes in the tariff were announced, the more important of which were as follows: The minimum duty on woollens was from 23½ to 30 per cent; the minimum duty on twine and cordage was raised from 16½ to 20 per cent; the duty on refined petroleum was decreased from 5 to 2½ cents per gallon, and crude oil for manufacturing purposes placed on the free list, a bounty of 1½ cents per gallon being allowed to crude oil producers in Canada; the duty on silk fabrics imported for manufacturing purposes, was reduced from 30 to 10 per cent. There were special provisions made to prevent the 'slaughtering' or 'dumping' of goods in Canada, and a policy of imperial preferential trade was enunciated. Various additions were made to the free list; to the list of prohibited goods stallions and mares of less value than \$50 each were added.

It was announced by the government that an improvement in the steamship service between France and Canada was to be effected within a short time.

Imperial Trade—Reports of Commercial Agents.

Canadian trade with New Zealand received considerable attention in the weekly reports of commercial agents issued during June by the Department of Trade and Commerce, Canada, the prospects of building up an extensive trade between the two colonies being reported as at present more favourably regarded in New Zealand than formerly. The transportation problem offers the most serious difficulty, there be-

ing no direct steamship connection between Canada and New Zealand. Careful packing by Canadian shippers and the judicious selection of agents to whom consignments are to be forwarded are urged. To Australia, during 1903, exports totalling £352,011 were sent from Canada, as against £346,580 in 1902, the Dominion receiving back £24,770 in 1903, and £33,372 in 1902. The market for Canadian timber is at present quiet, but good openings are reported for boots and shoes in both Australia and New Zealand.

In Great Britain, the Manchester agency reports a good demand for Canadian box boards, and for household furniture and fleece-lined underclothing. From the Leeds and Hull agencies also the openings for Canadian furniture are reported satisfactory. Canadian timber, canned goods, fruit, pulp and apples are also reported as in demand. The requirements of the English butter trade are dealt with by the Birmingham agency.

British Board of Trade returns show the following imports into Great Britain from Canada during May:—

	Number.	Value.
Cattle.. . . .	8,465	£149,761
Sheep and lambs.. . . .	1,215	2,138
Wheat.. . . .	303,200 cwts.	107,236

Bacon.. . . .	35,004	71,221
Hams.. . . .	11,122	26,417
Butter.. . . .	682	2,757
Cheese.. . . .	56,980	118,464
Horses.. . . .	29	1,010

Domestic Trade.

Domestic trade conditions on the whole continued healthy throughout June, though with no special activity, the prevailing coolness of the weather having tended to diminish sales among retailers, though a fair sorting business was done. Collections were also fairly satisfactory, and in British Columbia trade with the Yukon was active. Canadian securities ruled within narrow margins. The generally favourable crop outlook has caused the prospects for summer and fall trade to be regarded as satisfactory.

The bank statement for May showed a decline in circulation from April, such as usually occurs at this time of the year, and the material decline in the deposits reflecting on the business of speculation. Total assets showed a gain of \$15,000,000 and total liabilities, an increase of over \$14,000,000.

Canadian Annual Bank Reports.

During the month of June a number of the leading chartered banks of Canada held their annual meetings and a brief reference to the main features of the statements presented thereat is given below, as affording an index to current financial and commercial conditions throughout Canada. It will be seen that without exception these reports are of a most favourable character:

The Bank of Hamilton.—The 32nd meeting was held at Hamilton on June 20th. Profits of \$335,513.53 were declared, from which, and from premiums on new stock, \$300,000 were carried to the reserve fund, after payment of the half-yearly dividend of five per cent. The assets and liabilities of the bank now balance at \$24,713,613.07. In the president's address reference was made to the business outlook as satisfactory.

The Hochelaga Bank.—The 30th annual meeting was held on June 15th. Profits to the amount of \$295,337.76 were declared, out of which \$150,000 were added to the rest fund; \$7,000 contributed to the official pension fund, and \$21,000 carried forward to profit and loss.

The Imperial Bank of Canada.—At the 29th annual meeting held at Toronto on June 15th, profits of \$504,414.33 for the year were declared, dividends at the rate of ten per cent per annum were provided for, and the rest account increased by \$200,000.

The Merchants Bank of Canada.—Net profits of \$729,714.39 were declared at the annual meeting held on June 15th, of which \$420,000 were spent in dividends, and \$300,000 added to the rest fund. The

bank has total assets of \$17,038,191.98 now immediately available.

The Ontario Bank.—The forty-seventh annual report shows a net profit of \$176,255.54 for the year, out of which \$100,000 were added to rest; \$5,000 reserved for officers' pension fund, and \$90,000 distributed in dividends. Deposits were reported to have increased during the year by \$1,089,735.06.

The Quebec Bank.—The 86th annual meeting was held at Quebec on June 6th, profits amounting to \$283,221.31 being shown for the year. After full provision for management expenses and bad debts, the sum of \$100,000 was added to the rest; \$5,000 reserved for the pension fund, and \$25,000 set apart for improvements to bank premises. The general statement now shows a capital stock of \$2,500,000, with a reserve of \$1,000,000.

The Sovereign Bank of Canada.—Net profits of \$119,760.94 were declared at the second annual meeting of the bank held at Toronto on June 14th. Out of this \$25,000 were transferred to the reserve fund. The subscribed capital of the bank is now fully paid up and an increase of over \$2,400,000 in deposits and \$2,000,000 in commercial loans has taken place during the past year.

The Standard Bank of Canada.—The 29th annual meeting was held on Wednesday, June 15th. Profits amounting to \$183,007.17 were shown for the year, out of which, after payment of a dividend of ten per cent. \$75,000 were added to the reserve fund, bringing the latter to \$1,000,000, or one hundred per cent on capital stock.

The Traders' Bank of Canada.—The year's business showed a net profit of \$238,422.34, to which \$150,000 were added as premiums on new stock. Out of this sum \$250,000 were transferred to rest account. The net profits showed a percentage of 12'06 per cent on capital. Eight new branches were opened during the year.

The Union Bank of Canada.—The 39th annual meeting was held in Quebec on June 20th. The net profits for the year amounted to \$438,697.25, out of which two half-yearly dividends of three and a half per cent were paid, and a balance of \$67,339.86 was carried forward. Six new branches were opened in Ontario.

Canadian Revenue and Expenditure.

According to the latest official statements of the Department of Finance, Canada, the total revenue of the Dominion during May amounted to \$5,989,401, as against \$5,363,542.02 in May, 1903. For the first eleven months of the fiscal year the increase was from \$57,725,383.40 in 1902-03 to \$62,718,117.39 in 1903-04. The increase amounts to \$625,858.98 for the month, and \$4,992,733.99 for the eleven

months ended May 31. As compared with April, also, the return shows an increase of over \$500,000. Expenditure on account of consolidated fund during the month amounted to \$5,820,747.49, and for the eleven months to \$41,623,580.67. On capital account a total expenditure of \$901,059.03 was reported, or a total of \$8,425,681.31 for the eleven months. The chief items of expenditure under the latter heading during May were as follows:—

Expenditure on Capital Account, &c.	Month of May, 1903.	
		\$ cts.
Public Works, Railways and Canals ...	243,601	79
Militia, capital.	10,883	66
Bounty on iron and steel.	18,819	33
Dominion Lands ...	33,245	61
Railway Subsidies ...	3,552	00

THE IMMIGRATION AND COLONIZATION MOVEMENT.

HEAVERY arrivals of immigrants continued to reach Canada during June, via Quebec, the majority and better class being reported from British ports. Evidence that the movement will be maintained at its present activity throughout the balance of the season is considered promising, the fact that almost the entire second class accommodation of the Allan line of steamships is already booked until September next being adduced. The class of the passage taken would also indicate the good quality of these intending settlers. The majority of the June arrivals were, as in previous months, sent through to western Canada, though an increasing percentage was distributed in Ontario, where they went to meet the prevailing scarcity in farm labour. Toronto was particularly active as a distributing centre for this class, and in the Ottawa valley the numbers thus placed out were on an exceptionally large scale. The transportation problem was apparently well met, few complaints being registered during June, and these of a minor nature. A few cases of immigrants having been attracted to

Canada by fraudulent offers of employment which were not fulfilled and caused loss and inconvenience, were reported. For the most part, however, the processes of absorption proceeded satisfactorily in spite of temporary congestions, as of British building trades artisans at Toronto, Italian labour at Montreal, and general labour at Winnipeg and Brandon, reported at a few points. In western Canada, the districts of which Regina, Calgary, Red Deer and Edmonton are the centres, have received the greater portion of the new settlers of the present year, although at Lethbridge, Battleford and Prince Albert as well homesteading and general settlement activity is marked. On the whole, the steadiness of the influx during the present season is stated to be its most prominent characteristic, though the volume, as previously stated, is also on an exceptionally heavy scale.

Immigration Returns for May.

The following statement of immigration returns for the month of May, and for

the first five months of the present year, is published by courtesy of the Department of the Interior, Canada:—

—	Total for Month.	Total from 1st January.
British	9,887	25,101
Continental, &c.....	7,493	17,830
United States.....	5,652	16,808
Total.....	23,032	59,740

Notes of the Month.

Forty boys and girls arrived at St. John, N.B., on June 20, destined for homes in New Brunswick.

The first of a series of trains of Ontario settlers for distribution in the Northwest Territories was run by the Canadian Pacific Railway Company during June.

A number of immigrants who arrived from Bordeaux, France, on June 12, were rejected by the Canadian medical authorities as unfit to land.

Operations of American colonization companies in Southern Alberta were very active during June. Considerable activity in the movement from the State of Washington was also noted.

Attention was directed by the Hon. Minister of Crown Lands, Ontario, during the month to the thorough system in operation for the distribution of farm labourers throughout the province.

The inauguration of a two pound steerage passenger rate by certain steamship companies of continental Europe went into effect during June and greatly stimulated the traffic in immigrants.

A considerable number of immigrant arrivals in British Columbia were reported, the majority settling on small fruit ranches and farms. The movement is expected to increase during July.

The monthly report of the Ottawa Valley Immigration Aid Society shows that 350 persons registered at the office during May, out of which a large number were directed to New Ontario and the Lake Temiskaming district. In April ninety persons registered.

A specially instructed commissioner of the Department of Agriculture of Japan arrived in Canada during June to investigate conditions under which immigrants from Japan are received in Canada and the United States. The policy of the Japanese government was stated to be to prevent immigration to all countries where such immigrants were not welcome, passports being issued only to merchants, students, professional men, &c.

A statement made by the Minister of the Interior in the House of Commons during June was to the effect that paupers hereafter would not be allowed to enter Canada, and that the High Commissioner of Great Britain had been notified that only farmers and farm labourers were wanted as immigrants. An advertisement printed by authority of the Dominion government was published in the newspapers on June 21, warning intending immigrants against so-called immigration agencies, and pointing out the fact that only duly appointed government agents were authorized to act on behalf of the Dominion government. Instructions were also issued from the Canadian government agencies to all steamship agencies with regard to the classes of immigration which it was the policy of the Canadian Government to encourage, namely, agricultural immigrants and female domestic servants only.

Some weeks ago it was brought to the attention of the Montreal Women's Club that a number of factory girls who had arrived in Canada from England were not meeting with the success in finding employment they had expected. A committee appointed by the club to investigate the situation reported that under existing conditions it was difficult for the girls to make a living at piece-work and to find suitable boarding houses. Representations to this effect were made by the club to the British women's immigration societies, under whose auspices the girls were sent out. A letter received during June from this association stated that one of its members was at the time in Canada making inquiries as to the openings for female im-

migrants, and that prior to the report of this member the association would discontinue sending out girls for factory work. The object of the visit of the member in question was to gain information with regard to the demand for women workers of all kinds, though hitherto the women sent to Canada by the association have been almost entirely those of domestic training.

Homestead Entries for May, 1904.

The following statement, published by courtesy of the Department of the Interior, Canada, shows the number of homestead entries, according to the various agencies, made during the month of May, 1904, as compared with the month of May, 1903:

TABLE OF HOMESTEAD ENTRIES DURING MAY.

Agency.	1904.	1903.	Increase.	Decrease.
Alameda.....	107	211	104
Battleford.....	287	344	57
Brandon.....	33	49	16
Calgary.....	246	237	9
Dauphin.....	46	70	24
Edmonton.....	300	343	43
Kamloops.....	31	8	23
Lethbridge.....	227	129	98
Minnedosa.....	12	47	35
New Westminster	3	3
Prince Albert...	167	718	551
Regina.....	812	1,134	322
Red Deer.....	135	168	33
Winnipeg.....	64	100	36
Yorkton.....	478	551	73
Total	2,948	4,109	133	1,294

It will be seen that there has been a net decrease in the number of homestead entries made during May, 1904, of 1,161.

A statement of entries made during the first eleven months of the fiscal year 1903- as follows:—

TABLE OF HOMESTEAD ENTRIES, JULY-JUNE.

Month.	1903.	1902.	Increase	Decrease.
July.....	3,438	2,622	816
August.....	2,288	1,904	384
September.....	1,845	1,416	429
October.....	1,958	2,142	184
November.....	2,406	2,482	76
December.....	1,570	1,640	70
	1904.	1903.		
January.....	1,240	1,169	131
February.....	1,128	1,165	37
March.....	1,330	2,325	995
April.....	2,322	5,778	3,456
May.....	2,948	4,109	1,161
June.....
Total	22,473	26,692	1,760	5,978

It will be seen that the net decrease for the last eleven months amounted to 4,219.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia during the month of May, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS DURING MAY.

Nationalities.	Number of Entries.
Canadians from Ontario.....	420
" Quebec.....	64
" Nova Scotia.....	17
" New Brunswick.....	11
" Prince Edward Island.....	3

Special grants.	5	168.00
Yukon Territory sales.
Yukon Territory special.	2
Total.	628	478,788.49

In May, 1903, the number of patents issued was 449, covering an area of 126,123.11 acres.

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the 'Canadian Patent Office Record' issued by the Department of Agriculture during the month of June.

During February there were 533 patents issued in Canada. Of these 43 related directly or indirectly to transportation, 38 were for electrical inventions, 19 related to mining and metallurgical industries. There were 36 patents for new machinery, 10 for new industrial processes, and 8 for new articles of manufacture. There were 18 agricultural patents, and 10 new office utilities. Among the miscellaneous inventions, there were 45 patents relating to turbines, this large number being in con-

nection with the construction of power plants which is now taking place at Niagara Falls, Ont.

Inventions relating to Transportation.

Few of the inventions relating to transportation are of sufficient importance or general interest for a detailed description. There were 5 patents for motor vehicles and their parts, 10 for rail joints, ties and switches, and other patents were for air brakes, trolley poles, a coupler, a locomotive boiler, a signal, car fenders, &c.

Electrical Inventions.

The electrical inventions patented in February included 11 lamps, 4 relating to telephony, 7 to wire telegraphy, and one to wireless telegraphy. There was a new method of telegraphing or telephoning from a railway carriage, by means of an instrument connected with an electrical wire running alongside of the rails in a tubing composed of an insulating material and open at the top. Another invention consists of a combination of a telegraph and telephone, and there is also a process of producing pictures at a distance by means of electricity. There are patents for two electric batteries. The active material of one consists of a mixture of granulated lead and lead oxide granules, and the composition used in the other consists of one and one-half pounds of ammonium carbonate, ten ounces of carbonate of sodium, ten ounces of bisulphate of mercury and some sulphuric acid.

Metal Working and Mining Inventions.

A number of the patents relating to the treatment of minerals contain important principles if they prove to be commercially successful. A process is patented for the extraction of metals by electrolysis. There is another process for recovering valuable dust from smelter gases, which consists in precipitating the gases upon filtering material such as ore, matte, or converted slag, containing values fit for reduction, and then smelting the precipitated dust and the filtering material together. Among the

other inventions are two ore furnaces, a gold separator, and another apparatus for separating metals from their crushed ore or other material. There are processes for recovering values from silicious ores and sulphide ores. The former process consists in introducing the ore in lumps into a copper converter, adding molten matte and bessemerizing it. To smelt sulphide ores, the principle adopted is to place the ore on a hearth, heating it sufficiently to enable a portion of the sulphur to combine with oxygen, and then forcing air upon it, effecting combustion of the sulphur. There is an invention of a new process for plating, which consists in rubbing the metals to be welded with aluminum, and covering them with a thin sheet of aluminum, with the object of preventing oxidation in non-precious metals when they are being heated for purposes of plating.

Industrial Machines and Processes.

A large number of new machines were patented for the following purposes, in addition to many others: the manufacture of briquettes, brushes, cigars, matches, mattresses, wire fences and wire springs. There were also mechanical inventions for the following purposes: cementing leather or straw board, inserting diagonal strands in woven cane fabrics, excavating, welding, winding and wood working. There is a process for the manufacture of filaments from cellulose, which consists in forming an initial viscose compound, aging it and dissolving it by means of an alkaline solution, discharging the compound in a filamentary form into a setting solution and gelatinizing it.

ENFORCEMENT OF FAIR WAGE RESOLUTION BY THE POST OFFICE DEPARTMENT, JUNE, 1904.

During the month of June the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations

for the suppression of the sweating system, and securing employment to the workmen and women of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.	
	\$	cts.
Making and repairing metal dating and other stamps and type and brass crown seals	360	65
Making and repairing rubber dating and other hand stamps and type.....	19	70
Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and post marking and cancelling ink	381	89
Repairing post office scales	6	00
Supplying Mail Bags	964	65
Repairing mail bags.	770	69
Repairing mail locks and supplying mail bag fittings	44	80
Repairing letter boxes, mail clerks' tin boxes and portable tin letter boxes. .	18	75
Miscellaneous orders for making and repairing postal stores.....	211	55
Making up and supplying articles of official uniform.....	213	00

UNIONS FORMED DURING THE MONTH OF JUNE, 1904

The department has received notice of the following organizations as having been formed during the month of June, 1904:—

Nova Scotia:

Halifax—Tailors.

New Brunswick:

St. John—Longshoremen.

Quebec:

Montreal—Rulers, feeders and assistant pressmen.

Ontario:

Dunnville—Woodworkers.

London—Pressmen.

Niagara Falls—Bricklayers and masons.

Ottawa—Barbers.

“ Waiters.

Manitoba:

Winnipeg—Stationary firemen.

TRADE DISPUTES DURING THE MONTH OF JUNE.

DURING the month of June, industrial conditions throughout Canada were, for the most part, very little affected by trade disputes, with the exception of the iron and steel industry at Sydney, N.S., and the paper industry at Merritton, Ont. Normal conditions were gradually resumed in the building trades at Quebec and Montreal, and many disputes in other localities were terminated in the course of the month.

Analysis of Trade Disputes During the Month.

Number and magnitude.—There were 24 disputes in existence during the month of June, a decrease of 7 compared with the previous month, and of 23 compared with June, 1903. There were 15 disputes which commenced prior to the beginning of the month, and 9 after. About 67 firms and 2,694 employees were affected by trade disputes of the month.

The magnitude of the new disputes is indicated in the following table, according to the number of working-people involved:

Magnitude.	Number of Disputes.
From 1,000 to 2,000.. . . .	1
From 300 to 500.. . . .	1
From 50 to 100.. . . .	1
From 25 to 50.. . . .	2
From 6 to 25.. . . .	4

Loss of time in working days.—The loss of time to employees through trade disputes during June was approximately 62,488 working days. This is an increase of nearly 30,000 days compared with the previous month, and is largely accounted for by a strike of iron and steel workers at Sydney, N.S., in which 39,000 working days were lost. In June, 1903, there was a loss of 122,612 working days, being about 60,000 more than in the present year.

Trades affected by new disputes.—The following trades were affected by new disputes of the month:—

Trades.	Number of Disputes.
Metal.. . . .	3
Clothing.. . . .	1
Food and tobacco preparation.. . . .	1
Printing and bookbinding.. . . .	1
Unskilled labour.. . . .	1
Miscellaneous.. . . .	2

The disputes affecting miscellaneous trades consisted of a strike of paper-makers and a strike of teamsters, firemen and labourers of a paper factory. In addition to these there was a dispute in the metal-working trades, which began on May 25 with the dismissal of five men, and led to a strike of 130 men, which continued throughout June.

Causes of new disputes.—The following were the causes of the new disputes:—

Causes.	Number of Disputes.
For increase of wages.. . . .	3
For decrease in hours.. . . .	1
For increase of wages and recognition of union.. . . .	1
Against employment of certain persons.. . . .	2
For change in method of payment.. . . .	1
Against new conditions.. . . .	1

Methods of settlement.—Of the 24 disputes in existence during the month, definite settlements were reported in the cases of eleven, and two other disputes practically ceased to exist, very few of the original strikers remaining unemployed. Two disputes were settled by negotiations between the parties concerned. In three cases the strikers returned to work, leaving the matters in dispute to be settled by arbitration, in four cases the strikers returned to work unconditionally, and in the remaining two their grievances were removed without negotiations.

Results of disputes.—Three disputes ended in favour of the employers, and three in favour of the strikers. Four disputes ended in compromises satisfactory to both parties, and in the remaining case, which concerned the employment of non-

STATISTICAL TABLES, SERIES C, NO. 44.

TABLE OF TRADE DISPUTES OF THE MONTH OF JUNE.

Province.	Locality.	Occupation.	Alleged Cause or Object.	No. of Firms or Establishments affected.	Approximate No. of Employees affected.		Date of commencement.	Date of termination.	Result.
					Directly.	Indirectly.			
DISPUTES WHICH BEGAN PRIOR TO THE BEGINNING OF THE MONTH.									
Quebec.....	Montreal.....	Granite cutters.....	Demand for recognition of union and increase of wages.	8	25	Apr. 1	June 16	Men returned to work. No change in conditions except slight increases in individual cases.
Ontario.....	St. Thomas.....	Cigarmakers.....	Demand for increase in wages of from 50 cents to \$1 per 1,000 cigars.	1	12	" 30	"	3 Increase granted except in lowest grade of work.
Quebec.....	Montreal.....	Plumbers.....	Demand for 57 cents an hour and an 8 hour day.	75	May 2	No settlement reported at end of month.
"	"	Marble workers.....	Demand for increase in wages from 22½c. to 27½c. per hour.	100	35	" 2	No settlement reported at end of month.
Ontario.....	Marathon.....	Papermakers.....	Decision of company to return to longer working hours.	1	41	26	" 4	No settlement reported at end of month.
"	Toronto.....	Brewery workers.....	Demand for increase in wages from 12 to 15 per cent and shorter hours in some departments.	2	100	" 6	"	8 Union was recognized. An increase in wages was granted, a new scale to be settled by arbitration.
Quebec.....	Montreal.....	Stonecutters.....	Demand for higher wages and shorter hours.	25	60	" 9	No settlement reported at end of month.
"	Quebec.....	Carpenters and joiners.....	Demand for increase in wages, shorter hours and adoption of union rules.	5	70	" 9	Only two firms and a few men affected at the end of the month.
N. Brunswick.....	St. John.....	Tailors.....	Refusal of employers to adopt new scale of wages.	4	11	" 10	Three men returned to work. Seven still out at end of month.
Quebec.....	Montreal.....	Bookbinders.....	Employment of girls on work previously done by men.	5	39	" 16	No settlement reported at end of month.
Manitoba.....	Winnipeg.....	Journeyman tailors.....	Refusal of firms to sign schedule	2	27	" 18	June 6	Strike declared off by union.
Ontario.....	Toronto.....	Brewery workers.....	Employment of non-unionists, causing strike in one brewery, followed by lock-out in three others.	4	100	" 23	"	8 Union was recognized, an increase in wages was granted, a new scale to be settled by arbitration.
"	Hamilton.....	Tobacco workers.....	Employment of 30 coloured tobacco workers.	1	14	" 23	"	13 Strikers returned to work; coloured tobacco workers joined the Union.
"	"	Machinists.....	Dismissal of five men for refusing to work on two machines.	1	130	" 25	No settlement reported at end of month.
Quebec.....	Montreal.....	Clockmakers.....	Demand for increase in wages and changes in conditions.	1	25	" 30	"	4 Increase in wages granted and changes in conditions promised.

DISPUTES WHICH BEGAN DURING THE MONTH.

			1	1,500	June 1	No settlement reported at end of month.
New Scotland, Sydney	Steel workers	Demand for increase in wages	7	35	3	Four firms signed agreement, another promised to do so at end of July.
Ontario	Photo-engravers	Demand for increase in wages and recognition of union.	1	95	3	No settlement reported at end of month.
Merritt	Transfers, firemen and labourers.	Employment of non union men.	1	300	10	17 Demand for fortnightly payment granted and grievances settled.
Quebec	East Angus.	Demand for payment every two weeks instead of four, and men had grievance against superintendent.	1			
N. Brunswick	Fredericton.	Demand for a 9 hour day.	1			
Ontario	Toronto	Demand for increase in wages.	3	12	16	20 Men returned to work as required on old conditions.
"	"	Demand for slight increase in wages and payment of time and a half for over-time.	1	40	21	20 Men returned to work. Questions in dispute referred to arbitration.
Quebec	Montreal	Objection to an increase of work.	1	12	16	No settlement reported at end of month.
Ontario	St. Catharines	Objection to employment of extra apprentice.	1		30	27 Men returned to work unconditionally.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

unionists, the difference ceased with the initiation of the new employees into the union.

Disputes Commenced prior to the Beginning of the Month.

Few incidents occurred with regard to the majority of the disputes which commenced prior to June 1, beyond the settlement of seven out of the fifteen which were in existence at that date.

Settlement of the Disputes of Brewery Workers at Toronto.

An account of the two strikes and lock-out of brewery workers at Toronto, which took place during the month of May, is given in the June number of the *Labour Gazette*. Although it was claimed by the employers that they ceased to be affected by the disputes a few days after they had begun, there was no definite settlement until June 8.

With a view to assisting the brewery workers, the District Labour Council of Toronto sent a letter to the Brewers' Association, stating that if a settlement was not made with the United Brewery Workers by Friday evening, June 3, steps would be taken to demand of the city council that a local option by-law be submitted to a vote of the people. At the beginning of the month the Licensed Victuallers' Association of Toronto appointed a mediator to try and end the dispute. After

several interviews with representatives of the brewers and their employees, a satisfactory settlement was reached, and, on June 8, the men returned to work under an agreement to submit the question of wages to arbitration, receiving in the meantime increases in their wages amounting to from five to ten per cent. The Brewers' Association also agreed to recognize the Brewery Workers' Union.

Strikes in the Building Trades at Montreal.

At the beginning of the month there were in existence at Montreal strikes of granite cutters, plumbers, marble workers and stonecutters. Of these, the only one in which a settlement was reached was that of the granite cutters. The primary cause of this dispute, which began on April 1, was the decision of the employers to conduct open shops. This led to a demand for the recognition of the granite cutters' union to which was coupled a demand for an increase in wages. On June 16 the men returned to work, having withdrawn their demand for recognition of their union, and receiving slightly higher wages in individual cases. Although there was no definite ending to the other three disputes, the majority of stonecutters and plumbers had obtained employment in the course of the month, and building operations therefore ceased to be greatly impeded by the disputes.

New Disputes.

The most important dispute of the month was a strike of employees of the Dominion Iron and Steel Company at Sydney, N.S., affecting 1,500 men, which began on June 1. An account of this dispute is given in a special article on page 87 of the present number of the *Labour Gazette*.

Strike of Photo-Engravers at Toronto.

A strike of photo-engravers at Toronto was declared on June 3, owing to a refusal of the employers to recognize the union, and to grant an increase in wages. Seven firms and 35 men were affected. On April

2 the Toronto Photo-Engravers' Union had sent to the employers a draft agreement, embodying an increase in wages, but as no reply was received in answer to their letters, a strike was declared on June 2, taking effect on the following day. The firms affected were the Toronto Engraving Company, the Alexander Engraving Company, the Royal Engraving Company, the Grip Company, the Dominion Engraving Company, and the Salvation Army printing department. All the union engravers of these offices went out, with the exception of those in the Salvation Army office, who were engaged in army work. On June 9 the Toronto Engraving Company sent word that they were willing to deal with the committee of the union, and on the following day the Alexander Engraving Company also agreed to deal with them. It was then arranged that the men would return to work immediately, pending negotiations. An agreement was afterwards reached, the principal features of which were a reduction of working hours from 50 to 46½ per week, a uniform ratio of apprentices to journeymen, and a slight increase in wages in some branches. Before the end of the month two more firms had signed the agreement, and another had promised to do so at the end of July. By June 30 there were only two firms and seven strikers still affected. Further negotiations were left in the hands of the Allied Printing Trades Council of Toronto.

A strike of 300 papermakers took place at East Angus, Que., on June 10. The cause of the dispute was dissatisfaction with the superintendent of the works on the part of the men, and a demand that their wages be paid every fortnight instead of every month. After two or three interviews with the management of the company the grievances of the men were settled and their demand for fortnightly payment was granted, and the strikers returned to work on June 17.

On June 3, ninety-five employees of the Riordan Paper Mills at Merriton, Ont.,

went on strike, owing to the employment of non-union men to take the place of striking papermakers, who had stopped work on May 4. The ninety-five employees consisted of teamsters, firemen and labourers. They were joined later by a number of non-unionists.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began, or were in continuance during the month of June, and which have been reported to the department.

STRIKE OF IRON AND STEEL WORKERS AT SYDNEY, N.S.

ON June 1st, a strike commenced at the works of the Dominion Iron and Steel Company at Sydney, N.S., which has affected directly about 1,500 employees. The dispute was in continuance throughout the month, and its effects were seriously felt by other industries in Nova Scotia.

Cause of the Dispute.

According to the statement of the secretary of the Provincial Workingmen's Association, the cause of the dispute was the refusal of the company to grant a demand of its employees for a restoration of the scale of wages paid prior to December 1, 1903, on which date their wages were reduced. A demand for the restoration of the former scale was made by the Provincial Workmen's Association, to which the men belonged, in the month of April, but was refused by the company. A strike was threatened during the month of May if the rates were not restored, and, the company having refused to concede the demands, the strike took effect on the 1st of June.

The company claimed that the wages paid their employees compared favourably with wages for similar classes of work elsewhere, and stated that they were prepared to arbitrate this point. The company also urged that on account of the present condition of the steel industry it was impossible to give more. The men claimed that wages were higher in the United States and in the mining districts of Cape Breton, and that, owing to the cost of living in Sydney, their earnings were not sufficient for the support of their families.

They were unwilling, however, to submit to an arbitration restricted to particular points.

Progress of the Strike.

The first result of the strike was an almost complete stoppage of work in the company's plant. On June 2nd, the strikers claimed that not more than thirty labourers went to the works. The company then decided to close down its works completely, until the difficulty with its employees was settled. Another reason given for closing the works was a desire to wait until there was an improvement in the prices of iron and steel, and until the completion of the rail and finishing mills which were being constructed.

The only disturbance in any way connected with the strike during the month, occurred on June 15th, when the men were being paid off. A police officer, in attempting to collect a poll tax of five dollars from an Italian labourer, was attacked by about fifty others and severely beaten. The Provincial Workmen's Association immediately appointed a committee to assist the police in maintaining order, and no further trouble took place.*

It was reported that a number of strikers, and other employees of the company left Sydney during the month to seek work elsewhere.

Action of the Department of Labour.

On the evening of June 1st, the Sydney Board of Trade sent a telegram to the

* The account here given relates to happenings up to June 30, and not to anything which has occurred since that date.—Ed.

Honourable the Minister of Labour at Ottawa, stating that the board had unanimously resolved to ask the minister's intervention in the existing trouble between the Dominion Iron and Steel Company and its employees, which had resolved itself into a general strike which threatened to very seriously affect the community. This telegram was received at the department and duly forwarded from there to the Minister of Labour, who was in Toronto on that day. On the following day it was acknowledged, and the Hon. Sir William Mulock, Minister of Labour, communicated with both parties to the dispute, and tendered the good offices of the Department of Labour with a view to bringing about an adjustment of the difference.

The communications of the Honourable the Minister of Labour in this connection, were as follows:—

Toronto, June 2, 1904.

Dear Sir,—The Government much regrets the existing differences between the Dominion Iron and Steel Company and its employees which have resulted in a strike and a shutting down of the works, and earnestly hopes that at the earliest moment harmony may be restored and the men be again at work.

The Sydney Board of Trade has telegraphed asking intervention of the Department of Labour, and I beg to offer the department's services towards a settlement of the differences.

Yours faithfully,

(Sgd.) W. MULOCK,

Minister of Labour

F Nicholls, Esq., vice-president, Dom. I. & S. Co., Toronto.

The following telegram was sent by the minister to the grand secretary of the Provincial Workmen's Association:—

Toronto, June 3, 1904.

John Moffatt, Grand Secretary, P. W. A., Sydney, N.S.,

Sydney Board of Trade has telegraphed government suggesting its intervention with a view to removal of present troubles between Dominion Iron and Steel Company and its employees. Government greatly regrets existence of these differences, and hopes that without any delay satisfactory solution may be found, and if desired will be pleased to lend its friendly services towards removing grounds of friction and re-establishing friendly relations between both sides. Kindly telegraph me whether intervention by government is agreeable to employees, directing answer after to-day to me at Ottawa.

(Sgd.) W. MULOCK,

Minister of Labour.

To these communications, the following replies were made. From the vice-president of the Dominion Iron and Steel Co.:

Toronto, Canada, June 3.

Sir William Mulock, K.C.M.G.,

Minister of Labour, Ottawa, Can.

Dear sir,—I beg to acknowledge receipt of your letter of the 2nd inst., and may say I share your regret at the existence of differences between the Dominion Iron and Steel Company and their employees. At the time of reorganization of the company's affairs last December, the position of the company was fully explained to the representatives of the men and also to members of the town council and Board of Trade of Sydney, and there has been no change for the better in the iron and steel market since that date. The trend of prices has been steadily downwards, and ironmasters have in some cases shut down their works and in others reduced their staff of employees and also their wages. We have made a determined effort under discouraging circumstances to keep the various mills in operation and afford continued employment to our workmen. A short time since they made a demand for increased pay, which, under the circumstances, it is impossible to concede, but as with this demand was coupled the statement that they were receiving less than the standard rate of wages in similar industries, our directors in their reply offered to submit this claim to arbitration, and I inclose a copy of the resolution adopted unanimously by the directors at a special meeting called to consider the situation.

As the men have voluntarily quit work, the company has decided to suspend operations until the iron and steel trade is in a more satisfactory condition, but with a sincere desire to alleviate any possible suffering, arrangements have been made to, so far as possible, give work to any of our late employees who may desire it.

Yours faithfully,

(Sgd.) FREDERICK NICHOLLS,

Vice-President Iron and Steel Co.

Copy of the resolution unanimously passed by the directors of the Dominion Iron and Steel Company at a meeting of the board, held on Monday, May 30th, 1904:—

It was resolved that the director of works be authorized to ask the officers of the P. W. Association and a Committee of the employees of the company to meet the president and himself on Thursday, the 16th day of June next, and to say to them that the directors of the company are of opinion that they are now paying the current rate of wages in similar industries in Canada, and that they are not prepared, in the present circumstances of the company, to increase the rate of wages beyond what it at present is; and that in event of the P. W. Association and the committee of the employees disputing the correctness of this statement as to the rate of wages, that the company will consent to a decision thereon by a board of arbitration, to be chosen, one by the company, one by the employees, and an umpire to be chosen by these two, and failing a choice that he be a

judge of the Supreme Court of Nova Scotia named by the Lieutenant Governor.

The following reply was received from the grand secretary of the P. W. A. to the telegram sent by the Minister of Labour:

Dominion, N.S., June 4.

Hon Wm Mulock,
Ottawa.

We prefer to be left to settle this dispute ourselves in our own way. Thanks for kind offer.

(Sgd.) JOHN MOFFATT.

On the receipt of the replies of the vice-president of the Dominion Iron and Steel Co., and of the secretary of the Provincial Workmen's Association, the Minister of Labour wrote to the secretary of the Sydney Board of Trade as follows:

Ottawa, June 4.

Dear sir,—Re request of Sydney Board of Trade for intervention of Department of Labour in dispute between Dominion Iron and Steel Co., and its employees.

As promised in my telegram to you this morning, I am inclosing herewith copies of correspondence between the government and the Dominion Iron and Steel Company and the representatives of its employees, in regard to the communication received from the Sydney Board of Trade, asking the intervention of the Department of Labour with a view to bringing about a settlement of existing difficulties.

Upon receipt of your telegram I immediately offered the services of the department to both parties, but greatly regret that the replies received indicate an unwillingness to accept government intervention.

It is possible that the parties to the dispute may not desire the immediate intervention of any third party, but that later on they may change their attitude in this particular, in which event I shall be only too pleased to lend the friendly offices of the department, should such intervention be acceptable.

Yours faithfully,

W. MULOCK,

Minister of Labour.

S. P. Challoner, Sec'y, Board of Trade,
Sydney, N.S.

No further correspondence took place between the department and either of the parties to the dispute during the month.

Further Efforts Toward a Settlement.

The Sydney Board of Trade continued its efforts to effect a settlement of the dispute. On Tuesday, June 21st, the president of the Board of Trade held a conference with the management of the company, and two days later a special meeting was

called by the board to consider the situation. In his introductory remarks the president stated that he had been informed by Mr. Plummer, president of the Dominion Iron and Steel Company, that the wages could not be increased, and that the works had been kept open all last winter at a loss. He was told that the company was willing to start again and give employment to the old hands if the civil authorities were prepared to assist in preventing interference from the strikers.

A resolution was then passed 'that the Board of Trade urge the mayor and city council to do all in their power to protect any employee of the Dominion Iron and Steel Company from harm and insult while attending to his duties as such employee, and to insure him and the company the fullest protection that any British subject or industrial concern is entitled to,' and 'that the mayor and city council be asked to communicate with the managers of the Dominion Iron and Steel Company, requesting that operations be resumed as soon as possible, and that as many of its late employees as apply be reinstated in their former positions; and guaranteeing to it and them whatever assistance can be given to prevent disorder and afford protection to employees, employer and plant.'

The efforts of the Board of Trade proved unsuccessful, as both sides remained firm, and the situation continued unchanged until the end of the month.

Effects of Dispute on Other Industries.

Among the industries affected by the closing down of the steel works were the iron ore mines at Wabana, the quarries at Marble Mountain and Georges River, and the works of the Delomite quarry, and of the Dominion Tar and Chemical Co. Owing largely to the strike, the Dominion Coal Co. discontinued its night shifts. The general trade situation at Sydney was depressed, and nearly all industries there suffered from the effects of the trouble.

GOVERNMENT CONTRACTS FOR THE MONTH OF JUNE.

(Information supplied by the Department of Public Works.)

THE following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties in the last days of the month of May and during the month of June, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'fair wages' schedule in each contract :—

Extension to the new wharf at Iona, Victoria County, N.S., May 20, 1904 ; \$10,230.

Trade or Class of Labour.	Rate of Wages.		
	Not less than :—		
Contractor's foreman carpenter.. . . .	\$2.50	per day of 10 hours.	
Carpenters.. . . .	2.00	" 10 "	
Blacksmiths.. . . .	2.50	" 10 "	
Blacksmiths' helpers.. . . .	1.50	" 10 "	
Ordinary labourers.. . . .	1.25	" 10 "	
Driver with one horse and cart.. . . .	2.00	" 10 "	
Driver with two horses and wagon.. . . .	3.00	" 10 "	

Breakwater at Tennycape, Hants County, N.S., May 17, 1904 ; \$8,370.

Trade or Class of Labour.	Rate of Wages.		
	Not less than :—		
Foreman carpenter.. . . .	\$2.00	per day of 10 hours.	
Carpenters.. . . .	1.50	" 10 "	
Blacksmiths.. . . .	1.50	" 10 "	
Blacksmiths' helpers.. . . .	1.25	" 10 "	
Ordinary labourers.. . . .	1.25	" 10 "	
Driver with one horse and cart.. . . .	2.00	" 10 "	
Driver with two horses and wagon.. . . .	3.00	" 10 "	

Pilework pier, Victoria Beach, N.S., June 15, 1904 ; \$93,870.

Trade or Class of Labour.	Rate of Wages.		
	Not less than :—		
Foreman carpenter.. . . .	\$2.00	per day of 10 hours.	
Carpenters.. . . .	1.50	" 10 "	
Blacksmiths.. . . .	1.75	" 10 "	
Blacksmiths' helpers.. . . .	1.25	" 10 "	
Ordinary labourers.. . . .	1.25	" 10 "	
Driver with one horse and cart.. . . .	2.00	" 10 "	
Driver with two horses and wagon.. . . .	3.00	" 10 "	

Breakwater at Petit Rocher, N.B., May 31, 1904 ; \$32,900.

Trade or Class of Labour.	Rate of Wages.
	Not less than :—
Foreman carpenter..	\$2.00 per day of 10 hours.
Carpenters..	1.50 " 10 "
Blacksmiths..	1.50 " 10 "

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the Office of the Factories Inspectors of the province of Ontario, to one of the Factory Inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

THE Department of Labour has received information of 281 industrial accidents which took place in Canada during the month of June, resulting in the death of 76 persons and serious injuries to 205 persons.

Compared with the month of May, there was a decrease of 2 in the number of deaths, and an increase of 13 in the number of persons injured, making a total increase of 11 industrial accidents.

The following is the record for the month by industries and groups of trades:—

Trade or Industry.	Killed.	Injured.	Total.
Agriculture,	12	10	22
Fishing and hunting, ...	4	4
Lumbering	12	11	23
Mining	5	12	17
Building trades	5	21	26
Metal trades	5	35	40
Woodworking trades	2	26	28
Food and tobacco preparation,	4	4
Clothing trades	2	2
Textile trades	2	2
Railway service,	14	24	38
General transport	9	13	22
Unskilled labour	5	20	25
Miscellaneous	3	25	28
	76	205	281

In addition to the above there were also reported to the department 27 industrial accidents, involving the loss of 3 lives,

which took place during previous months, information of which had not been received before. Adding these to the returns for June, there were reported to the department during the month, 306 industrial accidents, in which 78 persons were killed and 228 injured.

The Record by Trades and Industries.

Agriculture.—During the month there were 12 fatalities and 10 other accidents among persons engaged in agricultural industries. Among those who were killed there were 1 rancher, 2 cattle drovers, 1 farm hand and 7 farmers. The injured were nine farmers and one farmer's wife. Two persons were killed and five injured by horses, two were killed by bulls, and one was severely injured by a cow. One person was killed and three injured by falling from wagons, and five were killed by railway accidents. One was killed and another injured at barn-raising, and one was killed by a heavy pole which he was using in a bush.

Fishing and hunting.—Two hunters were drowned at Sleeve Lake, Manitoba, when returning from hunting muskrats, and two fishermen were drowned off the Labrador coast by the upsetting of their dory, when they were engaged in cod-fishing.

Lumbering.—There were twelve fatal accidents, and eleven resulting in serious injuries, in the lumbering industries. Of the fatalities, seven were due to the drowning of shantymen or river drivers, three men were killed by falling trees, and two saw-mill owners were killed by circular saws.

Mining.—There were five fatal accidents and twelve serious accidents to miners. One miner was drowned, one was struck by a loaded car, one death was caused by falling down a mine shaft, one by falling coal, and one by a piece of rock which was blown up by a blasting operation. Ten of the accidents occurred in coal mines,

five in gold mines, one in an asbestos mine, and one in a gold district.

Building trades.—In the building trades there were five fatalities and twenty-one serious accidents. Of the deaths, three were caused by falling from roofs, one by a blow from some timber of a building which was being pulled down, and one by drowning, the victim falling into the water when engaged in painting a ship. Of the accidents which did not end fatally, eight were caused by falling from roofs of houses, three by falling from scaffolds, one by falling from a plank, two by falling into excavations, and one by a blow from falling timber. Those who were killed were two painters, a carpenter, a mason and a roofer.

Metal trades.—In the metal trades there were five deaths and thirty-five serious accidents. Four electrical workers were killed, all of whom were linemen. Three of them were killed by falls, and one was drowned when returning from work. The only other fatality was caused by the clothing of a machinist being caught in some shfating, which pulled him into the machinery. Seven other accidents were suffered by electrical workers, twelve by machinists, three by moulders, iron workers and cement workers, respectively, and two each by engineers, blacksmiths and boilermakers. The remaining accident happened to a sheet metal worker, whose fingers were crushed in a press.

Woodworking trades.—There were two fatalities in the woodworking trades, and twenty-six accidents. The two deaths were of a factory hand, who fell into a boiling vat in a cheese-box factory, and a shipping clerk in a wagon factory, who fell down an elevator shaft. Six operatives were cut by saws, three by shapers, and two by chopping machines. Eighteen of the accidents consisted in the loss of fingers or hands, in two cases the forehead was wounded, and in one internal injuries were inflicted by a piece of wood flying back from a rip-saw.

Food and tobacco preparation.—Only four accidents were reported in the food and tobacco trades, none of which ended fatally. Two of the accidents took place in breweries and two in biscuit factories. One brewery worker was hurt by falling on the side of a large tank, and another by a barrel of beer rolling over him. A biscuit maker was scalded by falling into a tank of hot water, and another had his thumb badly cut by being caught between the rollers of a sizing machine.

Clothing trades.—The only two accidents in the clothing trades were in an overshoe factory, where an employee had a finger cut by a machine, and in a wholesale clothing establishment, where an employee received internal injuries through falling down an elevator shaft.

Textile trades.—An employee had a bone of his face fractured by being struck with a shuttle in a weaving factory, and an employee of a cotton factory had the palm of his hand badly cut by being caught between a belt and pulley.

Railway service.—Fourteen railway employees were killed and twenty-four injured in railway accidents during the month. Half the number killed were brakemen, two were sectionmen, and the others consisted of a civil engineer, a locomotive engineer, a shunter, a railway shop hand, and a railway call boy. The injured were five brakemen, two switchmen, two firemen, two sectionmen, three steam railway conductors, five electric motormen, an electric car conductor, a civil engineer, a carpenter foreman, a machinist and a railway shop hand.

General transport.—The greatest disaster of the month relating to the transportation industries was the wreck of the steamer 'Canada' in the River St. Lawrence, on Sunday, June 12th. The accident was due to a collision with a coaling vessel, which occurred about two and a half miles east of Sorel. The purser and four passengers were drowned by the sinking of the ship.

As only accidents occurring to persons in the course of their employment are included in this article, the death of the purser is the only one recorded. There were seven other deaths on board vessels, the victims being two seamen, three long-shoremen, a batteau-man, and an engineer. The only other fatality in the transportation industries occurred to a carter, who was run over by a train at Tweed, Ont.

Miscellaneous.—Among miscellaneous occupations there were three deaths. The superintendent of an elevator factory was struck on the head by a steam pump and his skull fractured. An employee of a paper mill was crushed to death by machinery, and a well digger was crushed to death by falling stones when blasting a well.

Circular of the Nova Scotia Steel Company respecting Accidents.

With a view to the prevention of accidents among its employees, the Nova Scotia Steel Company recently issued the following circular:—

To all concerned :

We have had so many accidents in and about our collieries during the past few weeks, that we take this means of appealing to our officers and men on this important subject.

We expect that our officers are doing everything in their power to carry out the special rules and mining law as regards accidents, and we also expect that they are insisting upon the workmen doing the same.

Our workmen would help us very much if they would call the attention of the officer in charge to any dangerous practice or any source of danger, or anything or practice that might cause an accident.

While we expect our officers to report any workmen that violate the mining law or special rules, we would go further and ask our workmen to report to the manager any violation of the law or any oversight of a violation on the part of any of our officers.

A number of our workmen are in the habit of travelling behind trips on haulage roads.

This is a very dangerous thing to do, and many men lose their lives by trying to save a few moments' walk.

A great many accidents occur at the working face, where men run great risk in their mad rush to get down their piece of coal and get home. They neglect to properly sprag the coal and the result sometimes is only too well known.

If our men would only observe some of the following don't's a great many accidents might be avoided :—Don't rush hurriedly back to see the result of your shot ; don't get down and mine under a block of coal unless securely spragged ; don't work under bad or suspicious roof ; don't travel any other road but the travelling road provided ; don't ride on trips when riding is forbidden ; don't violate any of the rules or laws which have been prepared to protect you in your hazardous occupation, and don't forget that all these laws and rules have been prepared for your own protection, and don't expect any law-maker or company can protect you if you neglect to do so yourself.

You and your family are the directly and vitally interested ones. Therefore we plead with you to observe every care, and see that others do the same for your mutual protection.

We especially appeal to all our officers to be careful in their daily examinations to move or cause to be moved all threatened dangers, to severely discipline all violations and to realize daily the importance of their positions, particularly in respect to the safety of themselves and their fellow-workmen.

It is much better to report a violation and have the violator dismissed from the mine, than to have him and probably innocent victims carried out, as the result of some violation.

From our older miners of Sydney Mines, who have always been noted for their skill and care in mining, we expect much. We particularly ask them to advise the younger men, and if the advice is not sufficient, to report them to the officer in charge, whenever they notice them at any dangerous practice. A small word may be the means of saving a boy's life.

Our laws are many and good—but they are no good and not worth the paper they are written on, unless the miner gives them his hearty and intelligent co-operation.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Agriculture</i>						
Farm hand	Little Rideau, Ont.	June 8	1	1	Kicked by a horse. Died the next day.
"	St. Jean, Man.	" 15	1	1	Fell off a wagon and was run over.
Farmer	Anarauth, Ont.	" 2	1	1	Stomach torn.	Attacked by a stallion.
"	Near Lemieuxville, Que.	" 15	1	1	Crushed to death.	Part of building fell on him when barn raising.
"	Huntingdon, Que.	" 13	1	1	Arm broken and severe nervous shock.	Struck by a train when crossing the track.
"	Trappin, Ont.	" 13	1	1	Struck by a train and instantly killed.
"	Danphim, Man.	" 22	1	1	Dangerously injured in chest.	Gored by a bull.
"	Near Woodstock, Ont.	" 22	1	1
"	London Tp., Ont.	" 25	1	1	Had both arms broken.	Fell off a loaded wagon and was run over.
"	Morden, Ont.	" 24	1	1	Hurt internally.	Fell from the roof of a barn when barn-raising.
"	Erin Township, Ont.	" 25	1	1	Head and body seriously injured.	Kicked by a horse.
"	Near Bracebridge, Ont.	" 26	1	1	Instantly killed by a blow on the neck.	"
"	Brussels, Ont.	" 28	1	1	Was dragged to death by a horse.
"	Hespeler, Ont.	" 16	1	1	Bone in shoulder broken.	Was struck by a heavy pole which he was using.
"	Erin, Ont.	" 25	1	1	Head seriously injured.	Fell from a wagon.
"	Near Peterboro, Ont.	" 20	1	1	Ribs were broken.	Was kicked by a horse.
"	Near Belleville, Ont.	" 28	1	1	Had concussion of the brain.	Team ran away and he fell from the wagon.
"	St. Denis de Richelieu, Q.	" 28	1	1	Was crushed to death.	His cart was struck by a train.
"	Kippen, Ont.	" 22	1	1	Had three ribs broken.	Attacked by a cow when milking.
Farmer's wife	Brantford, Ont.	" 17	2	2	Killed in a railway collision.
Cattle drover.	Clear Springs, Man.	" 19	1	1	Ribs broken and side injured.	Trampled on and gored by a bull.
Rancher	Sleeve Lake, Man.	" 8	2	2	Drowned when hunting muskrats.
<i>Fishing and Hunting—</i>	Labrador coast.	" 16	2	2	Drowned by upsetting of dory.
Hunters						
Fishermen.						
<i>Mining—</i>						
Gold miner.	Klondike River.	" 4	1	1	Right hand badly crushed.	Drowned by capsizing of boat.
"	Rossland, B.C.	" 8	1	1	A finger was crushed.
"	"	" 12	1	1
"	"	" 14	1	1
"	"	" 14	1	1	Right hand was badly cut.	Killed by fragment of rock when blasting.
"	Rossland, B.C.	" 14	1	1
"	Quebec	" 12	1	1	Struck by a loaded car in an asbestos mine.
"	Quebec	" 12	1	1	Fell 200 feet down a shaft in a gold mine.
"	Rossland, B.C.	" 16	1	1	Struck by a running box.
"	Glacier Bay, N.S.	" 13	1	1	Chest injured.
Coal driver						

Coal miner.	Port Morien, N.S.	"	15	"	1	Legs and arm broken and four ribs displaced	Struck by falling stone and dangerously injured.
"	Fernie, B.C.	"	17	"	1	Sprained an ankle.	Struck by a car which jumped the track.
"	Caledonia Mines, N.S.	"	21	"	1	Leg broken.	Hurt when working in a mine.
"	Glouce Bay, N.S.	"	24	"	1	"	Killed by a fall of coal.
"	Nanaimo, B.C.	"	3	"	1	Leg badly injured.	
"	"	"	3	"	1	Leg broken.	
"	"	"	9	"	1	Collar bone broken.	
"	"	"	13	"	1	Hip was dislocated.	
"	"	"	16	"	1	Thigh was broken.	
Lumbering—							By fall of coal.
Saw-mill owner	Upham, N.B.	"	3	"	1	Leg cut off.	Fell across a circular saw. Died from shock.
"	Lambton, Que.	"	15	"	1	Dangerously hurt on face.	Was struck by a piece of steel from a machine which burst.
"	Near Ignace, Ont.	"	29	"	1	Was cut from right shoulder to waist and died instantly.	Foot caught in a cogwheel and he was thrown on a circular saw.
"	Guelph, Ont.	"	1	"	1	Had concussion of the brain.	Fell down steps to cement floor.
Lumber handler	Ridgeway, Ont.	"	9	"	1	Eye was injured.	Was struck by a board.
Shantyman	Union Bay, B.C.	"	11	"	1	Drowned.	When trying to reach boat that had gone adrift.
"	Ottawa River.	"	5	"	1	Neck broken.	Accidentally knocked off a log when working on a drive.
"	Near Cobble Hill, B.C.	"	6	"	1	Drowned.	Struck by a branch when sawing a tree.
"	Poplar Rapids, Ottawa R.	"	11	"	3	Drowned.	Boat swamped in rapids.
"	Rainy River, Ont.	"	12	"	1	Drowned.	Stepped off a log.
"	Ottawa River.	"	21	"	1	Drowned.	Boat capsized in rapids.
"	Near Megantic, Que.	"	11	"	1	"	A tree fell on him, and he died in a few hours.
Axenian	Bryson, Que.	"	25	"	1	"	A tree fell on him and he died instantly.
Saw-mill hand	Hull, Que.	"	1	"	1	Lost four fingers.	Thrown by a horse when working in a woodyard.
"	Gaspé, Que.	"	13	"	1	Painfully injured about the body.	Hand was caught in a circular saw.
"	Chathamagne, Que.	"	15	"	1	"	Clothing caught in machinery.
"	Lake Pearlsey, Que.	"	15	"	1	Head cut.	Dangerously injured by machinery.
"	Hamilton, Ont.	"	14	"	1	Two fingers cut.	Was struck by a board.
"	"	"	16	"	1	One hand almost severed.	When operating a machine.
"	St. John, N.B.	"	15	"	1	End of second finger cut off.	Cut by a saw when pushing a piece of wood towards it.
Shingle-mill hand	Deseronto, Ont.	"	21	"	1	Concussion of the brain.	Knocked off ladder by a wagon.
Joiner	Toronto, Ont.	"	15	"	1	Belly hurt.	Fell from staging at the blast furnaces.
Painter	North Sydney, N.S.	"	2	"	1	"	Fell 60 feet from roof of building.
"	Toronto, Ont.	"	7	"	1	Skull and ribs fractured.	Fell with scaffold.
"	Montreal.	"	8	"	1	Arm broken and injured internally.	"
Mason	"	"	8	"	1	Right foot fractured.	"
"	"	"	1	"	1	Wrist broken.	Fell from a ladder.
"	Quebec.	"	3	"	1	Head badly hurt.	Fell from a scaffold.

"	Vancouver, B.C.	"	9	"	9	Two ribs broken, scalp wound and back of head injured.	Fell 20 feet from a roof.
Bridge carpenter.	Near Konoka, Ont.	"	2	"	1	"	Struck by a piece of timber when on work train.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
Building Trades—Con.						
Carpenter	St. Thomas, Ont.	June 23	1	1	Broke left leg at thigh.	Fell twenty feet off a scaffold which broke.
"	"	" 23	1	1	Injured ankle.	"
"	Near Leamsville, Que.	" 26	1	1	Seriously injured internally.	Struck by a timber when pulling down an old building.
"	Sherbrooke, Que.	" 13	1	1	"	Fell from a house.
Painter	Sorel, Que.	" 18	1	1	"	Was drowned when painting a ship.
"	Hatbrey, Ont.	" 27	1	1	Both arms broken.	A ladder broke and he fell 27 feet.
Carpenter	Montreal, Que.	" 28	1	1	"	His neck was broken by fall from a roof.
Mason	Niagara Falls, Ont.	" 22	1	1	Thigh broken.	Fell into an excavation.
Contractor's foreman	"	" 24	1	1	Two ribs broken.	"
"	"	" 14	1	1	Dangerously wounded on head.	"
Sheet-metal roofer	Sorel, Que.	"	1	1	Dangerously injured.	Fell from a roof off a scaffold.
"	Montreal, Que.	" 21	1	1	Injured internally.	Was sun-struck and fell from a roof.
"	Quebec, Que.	" 21	1	1	"	Fell from a roof.
"	Montreal, Que.	" 30	1	1	"	"
Metal Trades						
Electrical worker	Kingston, Ont.	" 10	1	1	Jaw and arm injured.	A pole fell with him when he was mending a wire.
"	Montreal, Que.	" 10	1	1	Dangerously hurt by an electric shock.	Touched a wire carrying 5,000 volts.
"	Welland Canal, Ont.	" 7	1	1	Drowned.	Fell into a canal when working on electric light line.
"	Montreal.	" 8	1	1	Ruptured a blood vessel.	Fell when making repairs in a building.
"	London, Ont.	" 10	1	1	Head cut, and leg, arm and pelvis bone broken.	Fell from top of forty-foot pole, owing to breaking of waist strap.
"	Three Rivers, Que.	" 17	1	1	Dangerously hurt by an electric shock.	Touched a transformer carrying 10,000 volts.
"	Hamilton, Ont.	" 10	1	1	Two fingers crushed.	Caught in a machine.
"	Niagara Falls, Ont.	" 3	1	1	Received bruises and strains.	Fell 30 feet from pole.
"	North Hatley, Que.	" 21	1	1	Drowned.	While returning from work.
"	Norwich, Ont.	" 29	1	1	Had broken thigh and internal injuries.	Fell from a pole and died an hour later.
"	Peterboro, Ont.	" 23	1	1	"	Fell 10 feet when repairing a trolley wire.
Machineist	Montreal, Que.	" 8	1	1	Left arm broken, right arm and both legs broken, and body crushed.	Clothing caught in shafting and he was pulled into the machinery.
"	Quebec, Que.	" 13	1	1	Stomach injured.	Struck leg on iron bar.
"	Hochelega, Que.	" 14	1	1	Skull fractured and face cut.	Struck by a piece of iron.
"	Stratford.	" 13	1	1	Finger lacerated.	Cut by a rip-saw in a foundry.
"	Hamilton, Ont.	" 1	1	1	Lost an eye.	Was struck by a piece of steel while working on a planer.

Engineer.	Peterboro', Ont.	"	11	Two fingers cut.	Was struck by a piece of metal.
"	"	"	2	Left foot cut and bruised.	When operating a machine.
"	"	"	6	Finger badly crushed.	Hurt when moving a mower frame.
"	"	"	6	Slight of right eye destroyed.	A flask dropped on the finger.
"	"	"	6	Knee wrenched.	When using a wrench it slipped and struck his eye.
"	"	"	6	Slight of right eye destroyed.	He fell while varnishing a rake frame.
"	"	"	13	Finger badly cut.	When using a wrench it slipped and struck his eye.
Iron-worker.	Toronto, Ont.	"	13	Two toes crushed.	Out on a saw.
"	London, Ont.	"	11	Arm injured.	A load of steel fell on them.
"	London, Ont.	"	3	Hand smashed, lost some fingers.	Caught in machinery.
Stationary engineer.	Smith's Falls, Ont.	"	20	Hand burnt.	Placed hand on cylinder of threshing machine.
Moulder.	London, Ont.	"	18	Hands and arms burned.	While grinding at an enemy wheel.
"	Nanaimo, B.C.	"	23	Badly scalded.	Injured when working in rolling mills.
"	Toronto	"	2	Left leg scalded.	By hot water from a boiler at a brewery.
"	Hamilton, Ont.	"	8	Two fingers smashed.	Stepped into a tank of water near smelters.
Boilermaker.	"	"	24	Instep burned badly.	By large tongs while unloading ingots.
"	St. Thomas, Ont.	"	15	Face, chest and arms scalded.	Molten iron splashed out of ladle.
"	Toronto, Ont.	"	14	Third finger cut off and 2nd finger crushed.	Injured when in the fire-box of an engine.
Blacksmith.	Hochelaga, Que.	"	11	Arm wounded.	Hand was caught in gear wheels.
Sheet-metal workers.	Montreal, Que.	"	20	Cut a vein of the arm.	A piece of steel ran through his arm.
"	Toronto, Ont.	"	7	Thumb and 1st finger crushed.	A restive horse caused a nail to pierce his arm.
Cement-worker.	Marbank, Ont.	"	4	Right arm was burnt.	Crushed by a press.
"	Belleville, Ont.	"	16	Had a bad scalp wound.	Came in contact with hot iron.
"	Long Point, Que.	"	24	Right leg fractured and head cut.	Was struck by machinery.
Wood-working Trades—	Guelph, Ont.	"	1	Shoulder and side badly bruised, concussion of the brain.	Was struck by an iron plate.
Mill owner.	"	"	16	Body injured.	Fell down steps in a mill.
Factory hand.	Montreal, Que.	"	30	Lost a hand.	Fell on a machine near a saw.
"	Goderich, Ont.	"	9	Two fingers cut.	Out off by a circular saw.
"	Hamilton, Ont.	"	7	Thumb lacerated.	Out by a rip-saw.
"	Newington, Ont.	"	13	Arm crushed.	Fell into boiling vat in cheese-box factory.
"	Steeleford, Ont.	"	20	Lost a hand.	When operating a buzz-saw.
"	Montreal, Que.	"	20	Lost a hand.	Caught in the belting of a planing-machine.
"	Woodstock, Ont.	"	24	Fingers and hand lacerated.	Caught in machinery.
"	"	"	21	Four fingers lacerated.	Was caught in a chopping machine.
"	Dundas, Ont.	"	8	Lost two fingers.	Was hurt by a chopping-machine when saving another employee.
"	Toronto, Ont.	"	24	Fingers cut.	Out by a shaper.
"	Dundas, Ont.	"	20	Lost three fingers.	Hand was caught in a stamping-machine.
"	Harrover, Ont.	"	6	Thumb torn.	Was cut by a machine.
"	Hamilton, Ont.	"	1	Forehead cut.	Out by a spindle-carver when operating it.
"	"	"	8	Forehead badly wounded.	Out by a rip-saw.
"	Toronto, Ont.	"	15	Left eye injured.	Struck by a plank in an air-brake factory.
"	"	"	2		Struck by an axe when polishing it.
"	"	"			Struck by a four-inch nail when making a table.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Wood-working Trades—Con.</i>						
Factory hand.....	Cornwall, Ont.	June 6.....	1	1	Injured internally.....	Struck in the abdomen by a piece of wood flying back from a rip-saw.
Carriage worker.....	Brantford, Ont.	" 1.....	1	1	Finger badly lacerated.....	Cut by a shaper.
"	"	" 14.....	1	1	Tips of 2nd and 3rd finger cut off.....	Cut by a jointer machine.
"	Montreal, Que	" 11.....	1	1	Lost four fingers.....	Hand was caught in a machine.
"	"	" 18.....	1	1	Lost two fingers.....	"
Wood turner.....	London, Ont.	" 7.....	1	1	Lost three fingers.....	Hand was caught in a wood turning machine.
Shipping clerk.....	Woodstock, Ont.	" 9 1.....	1	1	Lost two fingers.....	Fell through elevator shaft at a wagon factory.
Hoop cutter.....	Southwold, Ont.	" 15.....	1	1	Lost two fingers.....	Fingers were cut off by a knife.
Organ worker.....	Clinton, Ont.	" 1.....	1	1	Lost a finger and cut hand.....	Cut by a saw when ripping hardwood lumber.
Box-factory hand.....	Toronto	" 14.....	1	1	Two fingers cut.....	When using a shaper machine.
<i>Food and Tobacco Preparation—</i>						
Brewery worker.....	Quebec, Que	" 2.....	1	1	Body badly injured.....	Fell on side of large tank.
"	Woodstock, Ont.	" 18.....	1	1	Badly hurt internally and five ribs broken.....	Fell under rolling barrels of beer and a barrel rolled over him.
"	Toronto, Ont.	" 10.....	1	1	Scalded	Fell in tank of hot water.
"	London, Ont.	" 14.....	1	1	A thumb was cut and bruised.....	Caught between rollers of a sizing-machine.
<i>Clothing Trades—</i>						
Factory hand.....	Stratford, Ont.	" 9.....	1	1	Finger cut.....	Caught in machine at overshoe factory.
Employee in a wholesale clothing warehouse.....	St. John, N.B.	" 20.....	1	1	Injured internally.....	Fell down an elevator shaft.
<i>Textile Trades—</i>						
Factory hand	Hamilton, Ont.	" 16.....	1	1	A bone of the face was fractured.....	Struck by a shuttle.
"	Cornwall, Ont.	" 17.....	1	1	Pain of hand was badly cut.....	Hand was caught between belt and pulley in cotton factory.
<i>Railroad Service—</i>						
Conductor.....	Near Konoeka, Ont.	" 2.....	1	1	Sustained scalp wound.....	Struck by a piece of timber being carried by train.
Carpenter foreman.....	Near North Bay, Ont.	" 4.....	1	1	Lost leg and arm.....	Run over by a train.
Motorman.....	Near Fort Arthur, Ont.	" 3.....	1	1	Foot badly bruised.....	Jumped to avoid a collision, three passengers injured.
Switchman.....	Belleville, Ont.	" 5.....	1	1	Leg crushed and spine injured. May not recover.....	Was struck by an engine when fixing a break beam underneath a box car.
"	"	"	1	1	Feet injured. Amputated.....	Slipped under wheels while trying to board a moving train.
Section-man.....	Carleton Place, Ont.	" 4.....	1	1	Skull fractured.....	Fell in front of a hand-car. Not expected to recover.
"	St. Thomas, Ont.	" 2.....	1	1	Head and scalp wound, and badly shaken up.....	Was struck by an engine when shovelling ballast.
"	Black Creek, Ont.	" 2.....	1	1	"	Struck by a piece of timber being carried by train.
Brakeman.....	Near Konoeka, Ont.	"	1	1	"	"

"	Pasque, N.W.T.	"	1			Foot caught in a frog, run over by a train.
"	Montreal, Que.	"	5	1		Run over by train when returning from work.
"	Point St. Charles, Que.	"	10	1		Fell from train.
"	Thistle, Ont.	"	11	1		Badly mangled in a wreck.
"	Near Ymir, B.C.	"	11	1		Fell through trap-door of car and train ran over him.
"	Beausville, Ont.	"	15	1		Instantly killed on railway.
"	Berlin, Ont.	"	26	1		Was run over by a train.
"	Fort Francis, Ont.	"	22	1		Fell beside a moving train and was run over.
"	Chenainus, B.C.	"	4	1		Was run over by a train.
"	Stanford, Ont.	"	16	1		Fell beneath a car and was cut in two.
"	Paris, Ont.	"	17	1		Hurt in collision.
Switchman.	Little York, Ont.	"	12	1		Struck by engine and thrown down an embankment.
Shunter	Montreal, Que.	"	4	1		Fell on track from wagon and was run over.
Railway shop hand	"	"	21	1		When moving a transferring table.
"	London, Ont.	"	11	1		Hand struck a circular saw when cutting a board.
Railway machinist	East Toronto, Ont.	"	2	1		Was caught between an engine and door jamb of roundhouse.
Conductor	London, Ont.	"	3	1		Struck down by engine when trying to board it.
"	Cornell, Ont.	"		1		Fell when climbing over a train.
Engineer.	Paris, Ont.	"	17	1		Hurt in collision.
Fireman	Carleton Place, Ont.	"	4	1		Fell when trying to board train and run over.
"	Hamilton, Ont.	"	11	1		Fell when running to open a switch.
Sectionman	Near Aylmer, Ont.	"	1	1		He was run over by hand-car.
Electric motorman	Niagara Falls, Ont.	"	2	1		Hurt in collision.
"	"	"	2	1		"
"	"	"	22	1		Car was struck by lightning.
"	Port Arthur, Ont.	"	3	1		Hurt in collision.
Electric car conductor	Montreal, Que.	"	27	1		A car started when he was boarding it and he fell.
Railway call boy	Lindsay, Ont.	"	3	1		Fell when passing between cars on moving train and run over.
General Transport—						
Quartermaster	Hamilton, Ont.	"	21	1		Leg was caught in the anchor chain when it was being paid out.
Pilot.	Jones Falls, Ont.	"	24	1		Fell between the boat and dock.
Purser	Near Sorel, Que.	"	12	1		Was drowned in a collision.
Seaman.	Reed's Point, N.B.	"	20	1		Fell from the cross trees and was drowned.
"	Chenainus, B.C.	"	20	1		Caught between two masts when raising one.
Steamboat fireman	Troqueux, Ont.	"	19	1		When working ballast rock from bucket fell on him.
" engineer	Quebec, Que.	"	18	1		Two tubes from a boiler blew out.
Chief engineer of steam tug	Sault Ste. Marie, Ont.	"	5	1		Coupling of steam pipe blew off.
Batteau man	Quebec, Que.	"	7	1		Fell off boat into river.
Longshoreman	Port Arthur, Ont.	"	8	1		Drowned.
"	"	"	8	1		Was struck by steel rail.
"	"	"	9	1		"
"	Montreal, Que.	"	9	1		Was struck by a lump of coal when discharging it from boat.
"	"	"	27	1		Fell head first into coal bin when loading boat.
"	"	"	27	1		Hurt when discharging coal.
Cartier	Tweed, Ont.	"	1	1		Was run over by train and died three days later.
"	Montreal, Que.	"	15	1		Fell from cart.
"	"	"	21	1		Fell from cart and wheel passed over him.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JUNE—*Concluded.*

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>General Transport Com.</i>						
Teamster.....	Stuartford, Ont.....	June 29.....	1	1	Seriously injured.....	Wagon was struck by train.
Cab driver.....	Ottawa, Ont.....	" 27.....	1	1	Three ribs fractured.....	Was kicked by a horse.
Hostler.....	Guelph, Ont.....	" 25.....	1	1	Face badly injured.....	"
Elevator boy.....	London, Ont.....	" 14.....	1	1	Skull fractured.....	While standing under the elevator was struck by it.
<i>Unskilled Labour—</i>						
Labourer.....	Toronto, Ont.....	" 9.....	1	1	Skull severely injured, recovery doubtful.	Struck by bricks from wall which was being pulled down.
"	Montreal, Que.....	" 9.....	1	1	Right arm was broken.....	Hurt by fall of earth when digging.
"	Winnipeg, Man.....	" 9.....	1	1	Severe scalp wound and leg cut.	He was struck by a steel cable used in moving gravel cars.
"	Brantford, Ont.....	" 21.....	1	1	Suffocated by gas.....	Was repairing sewer pipes when hole filled with gas.
"	"	" 21.....	1	1	Several ribs broken and he had other internal injuries.	Was thrown from a defective elevator.
"	Sydney, N.S.....	" 20.....	1	1	Neck broken.....	Fell nearly thirty feet from platform.
"	Ottawa, Ont.....	" 23.....	1	1	Crushed between a vehicle and a wall.	When at work close to wall.
"	Montreal, Que.....	" 8.....	1	1	Skull fractured, fatally injured.	Struck by a falling brick.
"	"	" 9.....	1	1	Leg broken and injured internally.	Crushed by a fall of earth.
"	"	" 28.....	1	1	Back and hip injured.....	Fell from roof of a building.
"	Point Am, Ont.....	" 23.....	1	1	Back and hip injured.....	A derrick broke and struck him.
"	Niagara Falls, Ont.....	" 14.....	1	1	Back hurt.....	Crushed by a fall of rock.
"	Hamilton, Ont.....	" 24.....	1	1	A finger crushed off.....	Was knocked into a wheel pit by a swinging bucket.
"	Niagara Falls, Ont.....	" 2.....	1	1	Spine injured.....	Fell from a pile of lumber.
"	Toronto, Ont.....	" 25.....	1	1	Leg crushed, afterwards amputated.	While handling machinery.
"	Hamilton, Ont.....	" 1.....	1	1	Brain injured.....	Fell 18 feet from scaffold.
"	Niagara Falls, Ont.....	" 1.....	1	1	Ribs were broken.....	Earth fell on the leg.
"	"	" 3.....	1	1	Foot crushed.....	Head was pierced by a falling spike.
"	"	" 8.....	1	1	Dangerously wounded on head and injured internally.	Struck by rock which fell from a bucket.
"	Montreal, Que.....	" 16.....	1	1	Left leg seriously injured.....	A piece of iron fell on the foot.
"	Toronto, Ont.....	" 28.....	1	1	Back scalp wound.....	Fell from a building.
"	"	" 28.....	1	1	"	Was struck by a falling girder when working in fire ruins.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during June, 1904.

DOMINION REPORT.

Experimental Farms.

Experimental Farms, Reports for 1903, Ottawa: King's Printer, 1904. Pages, 447. Price, 30 cents.

In the volume of reports on Experimental Farms for 1903, issued as an appendix to the report of the Minister of Agriculture, there are contained reports of the director, agriculturist, horticulturist, chemist, entomologist and botanist, experimentalist, poultry manager, the superintendent and horticulturist of the experimental farm at Nappan, N.S., and the superintendents of the experimental farms at Brandon, Man., Indian Head, N.W.T., and Agassiz, B.C.

The report of the director contains a general summary of the most important work carried out at the various farms, and an account of his inspection of them during the year. It is stated that the results of farm operations in Canada in 1903 were, on the whole, encouraging. In the North-west a reduction in the volume of the wheat crop and a somewhat lower grade of quality were offset largely by higher prices which prevailed. In the eastern provinces the production of most of the more important crops was above the average, and there was a general increase in the output of live stock and dairy products. In Ontario the oat crop occupies a larger area than all other cereals combined, and in Quebec it is the most important next to hay, while in the North-west districts wheat is by far the most important cereal. It is estimated that in Manitoba, Assiniboia, Saskatchewan and Alberta an area of 171 million acres is suitable for cultivation. Wheat has also been ripened as far north as Fort Simpson, 818 miles north of Winnipeg, where the longer summer days made their development more rapid than in more southern districts.

ONTARIO REPORT.

Mineral Production in Ontario.

Mineral Production of Ontario for 1903. Bulletin No. 6. The Bureau of Mines. King's Printer, Toronto, 1904. Pages, 6.

In Bulletin No. 6 of the Ontario Bureau of Mines statistics are given as to the quantity and value of the minerals produced in the province during the year 1903. It is stated that the aggregate output was less in value than that for 1902 by \$521,041. In steel there was a reduction in value from \$1,610,031 to \$304,580, which is accounted for by the closing down of the Algoma Steel Works. The yield of iron ore in 1903 was 208,154 tons, worth \$450,099, compared with 359,288 tons, worth \$518,445, in 1902. This reduction was also due to the failure of the industries at Sault Ste. Marie. There was a decrease of \$41,792 in the yield of gold, and of \$49,051 of silver. The production of copper was greater by 471 tons than in 1902, and the output of nickel was greater by 1,053 tons, the production of 6,998 tons being greater than for any previous year.

There was a general increase of about 7 per cent in the value of non-metallic products. Carbide of calcium gained 1,105 tons in quantity and \$54,580 in value, and iron pyrites 3,098 tons and \$6,700 in value. With regard to building materials, the chief feature was the development of the Portland cement industry, which produced 695,260 barrels in 1903, valued at \$1,182,799. About 1,100 tons of peat fuel were manufactured by two separate plants during the year, and it is stated that their product gave satisfaction.

The total mineral production for the year amounted to the value of \$12,870,593, of which \$7,628,018 consisted of non-metallic, and \$5,242,575 of metallic substances.

BRITISH REPORTS.

Emigration and Immigration.

Copy of Statistical Tables relating to Emigration and Immigration from and into the United Kingdom in the year 1903, and Report to the Board of Trade thereon. London: Eyre & Spottiswoode, 1904. Pages, 77.

In 1903 the total passenger movement from Great Britain reported to the Board of Trade was 449,006 to countries outside of Europe, and 699,901 to European countries. The immigration from Europe was 814,441, and from other countries, 199,685. There was a net efflux of about 149,000 natives, and a net influx of about 14,000 foreigners. Comparing the census of 1901 with the census of 1891, the returns show an average annual increase of 6,740 aliens. The total number of persons entered on the alien lists was 207,191 in 1903, of whom 124,591 were stated to be en route to other countries. Correcting these figures with information from other sources, it is stated that the alien immigrants proceeding to other countries numbered 134,330, of whom 129,460 were bound for America. Among the other alien immigrants there were 30,046 Russians and Poles, 7,502 Germans, 7,045 Italians and others. Reports were received with regard to destitute aliens resident in certain towns. There continued to be a rapid increase of foreign Jews in East London. In Portsmouth there was a decided increase in the number of destitute aliens, but not elsewhere.

Mining Statistics.

Mines and Quarries : General Report and Statistics for 1902. Part IV—Colonial and Foreign Statistics. London : Eyre & Spottiswoode. 1904. Pages, 200. Price, 1s. 6d.

In Part IV. of the General Report on Mines and Quarries for 1902, issued by the British Home Office, it is estimated that the total number of persons in the world engaged in mining and quarrying exceeds $4\frac{1}{2}$ millions, of whom about one-fifth are employed in the United Kingdom and one-third in the British empire. More than half the total number are employed in getting coal, of which there was produced, in 1902, 800,000,000 tons, the value of which was more than 270,000,000 pounds sterling. The British empire produced more than half the world's supply of gold, Australia contributing 24 per cent, the Transvaal 12 per cent, and Canada 7 per cent. The highest output of iron was in the United States, which produced 18,000,-

000 tons. The German empire and Great Britain produced about four and a half million tons each.

The deaths from industrial accidents in mines and quarries during 1902 were estimated at 4,612, being at the rate of 1.91 per 1,000 employed.

AUSTRALIAN REPORT.

Labour Bureau of West Australia.

Report by the Superintendent of Government Labour Bureau of West Australia for the Year ending 31st December, 1903. Perth : Government Printer, 1904. Pages, 15. 5

The work of the Government Labour Bureau of West Australia is said, in the sixth annual report for 1903, to consist in assisting employers to secure employees, and to furnish men and women when out of employment with free and reliable information as to the character of the work to be had. Since the establishment of the bureau, in 1898, steady progress has been shown, due largely to the support given to it by employers. In 1903 there were 850 individual applicants for workers, as against 523 in the previous year. The number of men who applied for work in 1903 was 4,283, a decrease of 411 compared with 1902, and employment was found in 2,018 cases, being 213 more than in the previous year. Among the men who applied for work there were 1,400 general labourers, 423 bushmen, 276 farm hands, 166 cooks, 161 handy men, 133 horse drivers, 131 handy boys, 114 engine drivers and fitters, and others. Work was found for 599 labourers, 402 bushmen, 271 farm hands, 146 handy men, 69 cooks, 68 handy boys, and others. Reports are given on the condition of the labour market from the most important industrial centres in the state. Satisfactory conditions were reported in some cases, but in the majority of localities there was little demand for labour.

UNITED STATES REPORTS.

Industrial Conditions in Indiana.

Seventh Annual Report of the Department of Inspection of the State of Indiana. 1903. Contractor for State Printing, Indianapolis. 1904. Pages, 211.

In the state of Indiana the Department of Inspection has to do with manufacturing and mercantile establishments, laundries, bakeries, quarries, printing offices, and public buildings. The seventh annual report of the department contains a brief summary by the chief inspector, and five exhibits as appendices to the report, in which are given a tabulated statement of inspections made, a classification and summary of the industries of the state, a detailed statement of accidents reported to the department, and selections from the 1,996 orders issued by the department.

The chief inspector reports that the industries, with the exception of the steel and window glass industries, enjoyed another year of prosperity. The feature of the steel trade was the consolidation of companies. There had been eleven mills engaged in the manufacture of bar iron, employing 4,181 workmen. The Republic Iron and Steel Company purchased ten of these and up to the present date closed or removed all but four plants, which employ 3,116 workmen. Five other independent plants were constructed, employing 2,800 men.

A law which has been passed by the state requiring the weekly payment of wages, was declared unconstitutional by the Supreme Court of Indiana. Reference is made in the report to several other labour laws in force in the state. One compels the inspection of steamboats, naphtha and gas engine launches twice each summer, another provides for the inspection of all boilers of more than ten horse power, and

there are other laws requiring the reporting of industrial accidents and the use of safety devices.

Labour Statistics of Louisiana.

Report of the Bureau of Statistics of Labour for the State of Louisiana, 1902-1903. Baton Rouge: 'The Advocate.' 1904. Pages, 280.

The report of the Louisiana Bureau of Statistics of Labour for 1902-3 opens with an introduction, in which a recommendation is made for the enactment of a Child Labour Law and a Factory Inspection Law. This is followed by a chapter on 'The Value and Influence of Labour Statistics,' by the Hon. Carroll D. Wright. The second chapter deals with an account of the strikes and lock-outs occurring in the state since the previous report of the bureau was written. Chapter III. contains the new laws passed by the state legislature most vitally interesting to labour. The next chapter is composed of various miscellaneous subjects. It contains an article by Hon. Carroll D. Wright from the 'American Federationist,' an address delivered by him before the Manufacturers' Convention at New Orleans, in April, 1903, an address delivered by Archbishop Ireland before the Civic Federation at New York in December, 1902, and statistics relating to the number of educable children in Louisiana, the state assessment by parishes, and the cotton industry. The final chapter contains the report of the proceedings of the Association of Officials of Bureaus of Labour Statistics at New Orleans, in April, 1902.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

The following synopses of cases affecting labour are based upon the latest law reports and other legal records of the different provinces of Canada:—

NOVA SCOTIA CASE.

Claims for Damages—Lost by Contributor Negligence.

D. was employed by the Dominion Iron and Steel Company. It was one of his

duties to move a car from a chute when it was filled, then to jump on the end of the car when it was in motion and put down the brake. On one occasion D. got on the car and took the brake off, but the car did not move. D. then came down to the foot-board and shoved back the rod connecting with the brake. The car started and D. commenced to climb up the steps

at the side of the car, but was caught between the side of the car and the post which supported an unused chute. He was greatly injured, was unable to work at all for a long time, and was never afterwards able to work as he did before. The evidence showed that the post in question was only about seven or eight inches from the track, and that the manager of the company had been warned of the danger on account of its position.

It was also shown, however, that D. could have got on the rear of the car instead of using the steps at the side, or could have walked after the car until it had passed the post.

At the trial judgment was given in favour of D., who was awarded eight hundred and fifty dollars (\$850) damages. The company appealed and a higher court affirmed the judgment, but reduced the damages to \$600. The company then appealed to the Supreme Court of Canada, and the majority of that court came to the conclusion that D. had been guilty of contributory negligence. The Chief Justice in giving judgment, said:—

As I read the evidence, if he had stepped off to the ground immediately on the car starting, he would not have been hurt. He is not merely guilty of contributory negligence but is the victim of his own carelessness. It is a case where it was perfectly in the power of the servant, by keeping his eyes open, to guard himself against a possible danger of which he was fully aware. If, by not doing so, he suffers injuries, he must take the consequences of his own neglect. Without the respondent's negligence or stupidity this accident would never have happened.

The previous decision was therefore reversed with costs.

(Day v. The Dominion Iron and Steel Company. Judgment given by the Supreme Court of Canada, Feb., 1904.)

QUEBEC CASES.

Accident Caused by Negligence of Stevedores.

W. was employed by M. & M., a firm of stevedores. On 24th August, 1903, while W., with other workmen, was loading a truck with planks taken from a pile, and conveying it to the side of a steamer, a

plank fell from the pile on him and caused injuries from the effects of which he died a couple of days later.

W.'s widow brought an action against M. & M., alleging that they had been negligent in allowing the planks to be taken from the pile in the manner they were; she also brought an action against C. & Co., the owners of the lumber in question, alleging that they had been negligent in allowing the pile of planks to be constructed in the way it was. According to the judgment rendered, the court was of the opinion that the following facts were proved by the evidence:

The pile was about six feet high and twenty feet wide, and consisted of three-inch planks, nine inches wide, piled on top of each other. There was a roof to keep out the water constructed in the following manner: One of the planks was extending on its edge across the ends of planks composing the pile, and upon this was placed a row of planks corresponding to the rows forming the pile, one with one end elevated the width of a plank, then another row was placed covering the joints of the first row.

In the pile which caused the accident the plank placed across the ends of the other was not long enough to reach completely the side of the pile, and a box some twenty inches in length, and about the width of a plank, was used to complete the length.

The work of taking down the pile to load it on the steamer was under the charge of one P., foreman of the defendants, M. & M. He put three trucks at work, one at each side and one at one end of the pile. To load the truck at the end of the pile, a man was sent up on top, and he took the planks forming the roof and slipped them lengthwise, where they were received by men below. W., with other workmen, was put with a truck at one side of the pile, and then commenced by pulling out the planks forming the first tier of the pile, thus leaving the roof overhanging. They had just loaded their truck with twelve

planks, and W. had stooped down to push the truck when two or three planks fell and struck him, and caused his death.

No one seems to have observed with certainty the cause of the fall of these planks, but certain facts are proved which leave no doubt in mind as to the cause. The workman engaged on the roof had slipped down a certain number of planks, and was progressing removing the roof in the direction of the side where plaintiff's husband was working, and had reached within two or three planks of the side. I have already spoken of a box about twenty inches long, which supported the roof at that side. A row of planks nine inches wide had been pulled out from under that box, and so the box would only be supported underneath on a length of about eleven inches; while the roof planks rested upon it out to its extremity. As the removal of the roof planks proceeded towards that side, either by the removal of a plank, which rested upon the extreme inner end of the box, or by some shock given by the man working on the roof, the exceedingly unstable equilibrium of these roof planks resting on the box and undermined by the pulling out of the side planks, was destroyed, and, I do not say the accident happened, but the well known laws of nature operated, and the man was killed.

A certain amount of proof has been made as to the manner of taking down these piles, defendants' witnesses showing that it is usual to commence on the top and at the sides at the same time. I attach no importance whatever to the proof. It is the duty of a foreman to examine the work at which he puts his men, and to direct them to do the work in such a manner as shall, in any given instance, be safe. In the present case the manner of doing the work was not only dangerous, but it was certain that the planks which did fall, would fall. The only element of uncertainty was whether they would hit any one when they fell.

The foreman probably did not see the box when he set the men to work at the

side of the pile. He ought to have seen it, and the defendant cannot avoid responsibility for his failure to see it.

Upon this evidence the court held that M. & M. were liable. It also decided that C. & Co. were not liable, the accident having happened not because C. & Co. had put the box where it was, but because the planks which rested upon it had not been removed before the planks underneath it were taken away. The action against C. & Co. was therefore dismissed.

In deciding the amount of damages to be awarded against M. & M., the court took into consideration the fact that W. and his widow were each about thirty-six years of age, and that W. had been earning, on an average, six hundred dollars (\$600) per year. Considering these facts, W.'s widow was given \$3,000 damages.

(*Wilder v. Mills & MacMaster*. Judgment given by Mr. Justice Archibald, in the Superior Court at Montreal, 9th June, 1904.)

Accident Caused by Negligence of Foreman.

R. was employed as a longshoroman. While engaged in loading a barge he, together with a number of other men, was directed by the foreman to carry a gangway to the wharf. When they arrived at the place where it was to be put down, one of his fellow-workmen, without warning, and before the foreman had given the usual signal, let go, and the gangway, which weighed about 400 pounds, fell on R.'s foot, crushing it, and also injuring his leg. R. was laid up for some time, and alleged that he was unable to work for three months. He brought an action against his employers for damages, claiming that they were liable because their foreman had not given a signal to let go, as he should have done.

The court decided on the evidence that the foreman had given no signal; and that when no such warning was given, as was sometimes the case, it was customary for

each man to look out for himself. It was held, therefore, that the accident was caused partly by the negligence of the foreman, and partly by the fact that R. did not use the same vigilance as did his fellow-workmen. R. was therefore awarded \$60 damages and costs.

(Ray v. Furness, Withy & Co., Limited. Judgment given by Mr. Justice Davidson in the Superior Court at Montreal, June 14, 1904.)

BRITISH COLUMBIA CASES.

Decision Regarding the Alien Labour Law.

Some time ago an information was laid against the Vancouver Engineering Works, Limited, the charge being that it had contravened the Alien Labour Law by inserting in an American newspaper the following advertisement: 'Wanted, first-class mechanics; apply to the Vancouver Engineering Works, Limited.'

The police magistrate found, as a matter of fact, that the Vancouver Engineering Works had caused the advertisement in question to be put in a Seattle newspaper. He decided, however, that that did not constitute any infringement of the law. The matter was subsequently argued before a judge of the Supreme Court of British Columbia, who also decided that the advertisement did not constitute any promise of employment, and that, therefore, causing its insertion was not a breach of the Alien Labour Law Act.

As the case is of considerable importance, and as both decisions deal very fully and plainly with the facts of the case, the judgments are here given as rendered.

The police magistrate in giving his judgment, said:—

In the matter of the information of George P. Downie against the Vancouver Engineering Works, Limited. This is an information laid by George Pearce Downie against the Vancouver Engineering Works, Limited, for that the Vancouver Engineering Works, Limited, of the city of Vancouver, within the space of one

week past, to wit, on the 28th day of March, at the city of Vancouver, did knowingly and unlawfully assist or encourage the importation or immigration of an alien, one Cornwall Megere, of Seattle, Washington, into Canada under contract or agreement, parole or special, implied or expressed, made previous to the importation or immigration of such alien or foreigner to perform labour or service of a machinist in Canada, such importation not being within the exception of section 5 of the Act restricting the importation and employment of aliens.

The information is laid under section 3, of chapter 13, of the Dominion statutes, 1901, substituted for section 3, chapter 11, statutes 1897.

The questions I have to decide are two: First—Did the accused company authorize the publication of the advertisement, 'Wanted, first-class machinists; apply Vancouver Engineering Works, Ltd., Vancouver, B.C.,' in the Seattle *Post-Intelligencer* of the issue of the 28th March last? and, second, if so authorized, did the accused violate the provisions of the above mentioned Act by authorizing the publication of such advertisement?

The counsel for the prosecution and defence agreed that the case had narrowed down to these two points. I find it proved that the accused did authorize the publication of the advertisement.

As to the second question I have come to the conclusion that the publication of the advertisement at the instance of the accused company is not a violation of the provisions of the Act. In order to sustain the charge in the information it must be proved that there was a contract or agreement, expressed or implied, parole or special, with Mezere previous to his becoming a resident in or citizen of Canada.

That there was no such contract or agreement is too apparent to call for argument. I do not think section 8 of the Act can be invoked in this information. If the prosecutor wished to proceed under the provisions of section 8 he should have laid his information under that section. But assuming the right of the accused to rely upon section 8, in proof of the charge, it must be shown that there was a promise of employment through the advertisement. Is the advertisement a promise of employment? It makes no difference for the purpose of construction whether the advertisement was in a paper published in a foreign country or here. If Mr. Bird put an advertisement in one of our daily papers, 'Wanted, an office boy—apply to Bird and Brydone-Jack, Vancouver, B.C.,' it could not be contended that there was a promise to employ each or any boy that presented himself at the office, and that irrespective of his fitness for the position or his own estimate as to his value. There are no precedents directly bearing upon the case. If the advertisement had gone on 'and we undertake to employ any machinists applying for work,' then the reward cases might apply. (See judgment in *Spencer et al. vs. Harding et al.*, 5 C. P. 563.)

The advertisement cannot in any manner be tortured or twisted into a promise of employment. It only amounts to a statement that there is a demand for machinists at the works of the accused. It is at most merely

an invitation for mechanics to call at the office of the company and negotiate for employment. These are not the elements of a contract but only preliminaries.

If the accused had refused employment to Mezere on his presenting himself, would the company have been liable in damages at the suit of Mezere? If there was a promise, was it a promise that law would enforce? I think not. What breach could have been assigned? How long was the engagement to have lasted? What were the hours of service? What was the rate of wages? If the Act was intended to meet a case of this kind it could easily have been framed to cover it.

For the reasons aforesaid I dismiss the information. I make no order as to costs.

The decision given in the Supreme Court by Mr. Justice Duff was as follows:—

This is a case stated for the opinion of the court by Mr. Williams, the police magistrate of Vancouver, on the hearing of an information charging the Vancouver Engineering Works Company, Limited, with an infraction of the 1st section of chap. 11 of 60 and 61 Vic. Stats. of Canada, which section reads as follows: 'From and after the passing of this Act, it shall be unlawful for any person, company, partnership, or corporation in any manner to prepay the transportation, or in any way to assist or encourage the importation or immigration of any alien or foreigner into Canada under contract or agreement, parole or special, expressed or implied, made previous to the importation of such alien or foreigner to perform such labour or service of any kind in Canada.'

In support of the charge, it was proved that the accused had or caused to be inserted in a newspaper published in Seattle, in the State of Washington, an advertisement in the following terms:

'Wanted—First-class machinists. Apply Vancouver Engineering Works, Ltd., Vancouver, B.C.'

The magistrate has found as a fact that the accused company was responsible for the publication of this advertisement, Chap. 13 of 1 Edw. VII., Stats. of Can., sec. 4, amended the 8th section of the last mentioned Act by substituting therefor the following provision: 'It shall be deemed a violation of this Act for any person, partnership, company or corporation to assist or encourage the importation or immigration of any person who resides in or is a citizen of any foreign country to which this Act applies, by promise of employment through advertisement printed or published in such foreign country, and any such person coming to this country in consequence of such advertisement shall be treated as coming under contract as contemplated by this Act, and the penalties by this Act imposed shall be applicable to such,' and then follows a proviso which is not here material.

The question submitted for the opinion of the court is: 'Does the advertisement, the terms of which I have read, contain a promise of employment within the amendment of 1901?' I have come to the conclusion that the advertisement does not contain a promise of employment. It is, I think, an invitation to

apply for employment and nothing more. It was urged on behalf of the prosecution that the second clause of the 8th section of the Act as amended, in effect declares that where you have an advertisement published in a newspaper in a foreign country which induces a citizen or resident of that country to come into Canada without the expectation of obtaining employment here, you have a contract within the meaning of the Act, but the advertisement referred to in the second clause of that section is plainly, I think, an advertisement of the character dealt with in the first clause of the same section, and obviously an advertisement dealt with in the first clause of the section is an advertisement containing a promise of employment. The argument, therefore, I think, begs the question. It is said that the enactment must be construed with reference to the practice of persons desiring to obtain employment by means of a notice published in the newspapers, and that it is not in accordance with such practice that such notice should contain either an express promise of employment or any words implying or suggesting such a promise more forcible than the words in question here. Now, I have not the materials before me to form a judgment upon the point of fact, but assuming the fact, am I also to set up an assumed policy of the legislature, namely, the intention to prohibit invitations to apply for employment as well as promises to employ, and in conformity with this assumed policy to assign a forced or unusual meaning to the terms which the legislature itself has selected to set forth its designs? Parliament, not usually parsimonious of language, has in this case employed a precise phrase, and I must look to the words themselves for the policy of the legislature, not elsewhere. Nor can I agree with the argument of Mr. Bird that on this construction the amendment of 1901 adds nothing to the Act of 1897. Obviously the Act of 1897 reached those cases only in which the immigration was preceded by a completed contract of service. Before the passing of that Act, the Federal courts of the United States had more than once held that an enactment of Congress framed in similar terms did not prohibit an agreement arising from offer and acceptance, whereas, the immigration of the employee itself constituted or was an essential ingredient in the acceptance of the offer of employment. It is plain that a number of these decisions would have no application to the limited class of cases embraced within the scope of the amendment of 1901, and to that extent that amendment has enlarged the restrictive provisions of the Act.

It was strongly pressed upon me that the legislation thus construed imposes no effect of restraint upon the importation of foreign labour in times of industrial stress or emergency, and that this result is altogether alien to the spirit and to the design which prompted these enactments. If so, the remedy must, I think, be sought elsewhere. In no case, least of all in appeal and proceeding, can I press the words of the legislature beyond their fair and natural sense. The question submitted by the case will be answered in accordance with this appeal. With regard to costs, as the point, now raised for the first time, is not without difficulty, I think it is not a case for costs.

Employment of Chinese in Mines.

In December last a magistrate at Nanaimo, B.C., imposed a fine upon certain colliers for employing Chinese in their coal mines, in contravention of a provincial law. The matter was appealed, and the Supreme Court of the province decided that the statute in question was beyond

the power of the provincial legislature, and that the convictions were, therefore, bad. One judge, however, gave a strong dissenting opinion, maintaining the validity of the enactment. It is said that the constitutionality of the law will be taken to the Privy Council for final decision.

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. V—No. 2

AUGUST, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
OTTAWA, Aug. 15, 1904.

During the month a dispute between the Grand Trunk Railway Company and the telegraphers in its employ in Canada was referred for settlement under the Railway Labour Disputes Act, 1903. A full statement of the matters in dispute and the procedure followed by the Department in connection with the appointments made to the board of mediators is given in a special article in the present issue.

A special article is also devoted to a report of the settlement by the Department under the Conciliation Act, 1900, of the strike of employees of the Dominion Iron and Steel Company at Sydney, N.S., which lasted over seven weeks, and was attended with serious loss and demoralization to trade and industry throughout the locality affected.

Three special articles deal with recent legislation enacted in Canada affecting labour. In one of these a resume is presented of several Acts passed at the session of the Ontario Legislature of the present year, including an important amendment to the Factories' Act and other measures designed especially for the protection of labour. The Land Act passed at the recent session of the Quebec Legislature, is also briefly analysed as having a direct bearing on lumbering and colonization interests. In a third article reference is made to various Acts passed during the present session of the Dominion Parliament and assented to prior to prorogation.

The taking of evidence under the commissions issued to His Honour Judge Winchester to investigate the alleged employment of Aliens by the Grand Trunk Pacific Company and in the importation of Italian labourers into Montreal during the present season, was proceeded with during June, and a brief reference to the progress of the inquiry in each case is made.

In addition to the reviews of reports of Departments and Bureaus, published as a regular feature of the month, the issue contains a special reference to an official return recently received relating to strikes and lockouts in Great Britain during the past year.

INDUSTRIAL AND LABOUR CONDITIONS DURING THE MONTH OF JULY. I.—GENERAL SUMMARY.

LABOUR and industrial conditions during July, as shown by the reports of correspondents to the *Labour Gazette*, were of

a generally favourable character throughout Canada, employment being, on the whole, somewhat more active than in June, with

the exception of isolated localities or branches of trade. A few instances in which a decided betterment took place were reported. At Sydney, N.S., though the demoralization caused by the strike of steel-workers was extended over the greater part of the month, a marked improvement set in with its termination on July 22. At Sault Ste. Marie, Ont., also the general industrial tone showed improvement over June. The cities of St. John, N.B., Sherbrooke, Que., Peterborough, Toronto, Niagara Falls, Stratford, London, St. Thomas and Windsor, Ont., may also be instanced as having reported exceptional activity. At Winnipeg, Man., Brandon, Man., and Rossland, B.C., a very busy month was reported, and throughout the west the absorption of the immigration movement proceeded without congestion in the labour market. On the Pacific coast less favourable conditions prevailed, and at a few points in Central and Eastern Canada as well, as at Montreal, Que., Chatham and Guelph, Ont., a falling off in activity since June seems to have taken place. In the remaining localities represented by correspondents of the *Labour Gazette* fair conditions were reported, with employment on a normal basis, and the demand for and supply of labour as a rule well balanced.

Changes in Wages and Hours.

Few changes in wages and hours of labour were reported during July, though all of which the department received notice represented an improvement in working conditions. The changes affecting the largest body of work-people were, an increase in wages which went into effect at the *Government Printing Bureau, Ottawa, Ont.*, following the increase in scale obtained in Toronto during June, and a decrease in working hours from twelve to ten and a half per day obtained by two hundred *saw-mill workers* at *D'Israeli, Que.* By the former change *printers* were advanced from \$13.50 to \$14.50 per week, *linotype operators* from \$16.50 to \$16.65 per week and *pressmen* from \$14.50 to \$16 per week. The *foremen* of the composing room will receive \$25 per week, an advance of \$3, and the *deputy foremen*

will be paid \$18 per week, an advance of \$1.50. *Stonecutters* at *Ottawa, Ont.*, had their schedule raised to 43 cents an hour, with an eight-hour day. At Ottawa, also, and elsewhere in Ontario and Quebec, it was stated that the wages of men for the lumber woods during the coming season would show a decline. *Telegraphers* in the employ of the *Grand Trunk Railway Company* received an improvement in scale in some instances. Wages in the *building trades* at *St. Thomas, Ont.*, were on a higher level than in June, and at *Winnipeg, Man.*, common labour was receiving 17½ cents per hour as a minimum rate instead of 15 cents, the prevailing rate for June. *Plumbers, gas and steamfitters* to the number of sixteen had their wages increased 50 cents per day to \$4 at *Victoria, B.C.* Early closing measures were in operation in many localities, and the extension of the practice was discussed at *Montreal, Toronto* and other points.

Cost of Living.

Prices of staple commodities remained fairly stationary throughout July. Meats continued high in Ontario and the scarcity of *houses*, with consequent increase in *rents* in a number of industrial centres still remained a subject of complaint. In British Columbia the price of *cured meats* and *canned goods* showed an advance as a result of the strike of meat packers at Chicago and elsewhere in the United States, a large quantity of American canned goods being consumed in that province. The price of *flour* showed a tendency to decline on the strength of favourable crop reports from Western Canada.

Interruptions to Industry.

The intervention of the Department of Labour in the strike of the steel workers at Sydney, N.S., brought to a close, on July 22, the most serious industrial disturbance of the month, and caused an immediate improvement in trade and labour conditions throughout the section affected. Apart from this dispute there were nineteen other strikes reported as in existence during July, as against twenty-three in June and thirty-

eight in July, 1903. Of these, moreover, many had lapsed prior to the close of the month, and of the six new disputes that were reported none were of more than minor importance.

The strike of meat packers at Chicago and elsewhere in the United States slightly affected railway employment in some sections of Ontario by diminishing freights. In a number of cotton mills also the staffs were continued on short time.

Among industrial establishments destroyed by fire during the month the following may be mentioned: a saw-mill at Shulee, N.B., loss \$6,000; a large manufactory of coffins and funeral supplies, employing about 100 men at Three Rivers, Que., loss \$75,000; the hammer, blacksmith and boiler shops of the Grand Trunk Railway Company at Point St. Charles, Que., loss \$10,000, and 120 men thrown out of employment; several stores and a hotel at Havelock, Ont., loss \$15,000; a planing mill at Essex, Ont.; a wholesale warehouse at Toronto, Ont., loss \$70,000; a box factory at Toronto, ten men thrown out of employment; a saw-mill at Forest Mills, Ont.; a box factory at St. Catharines, loss \$30,000; a flour mill at Atwood, Ont.; the factory and office of the Preston Metal, Shingle and Siding Company, at Preston, Ont., loss \$40,000; a store and storehouses at Dresden, Ont.; a carriage factory at Chatham, Ont.; a railway depot at Nipissing Junction, Ont., loss \$3,000; several stores at Sundridge, Ont.; a carriage shop at Napanee, loss \$5,000; a saw-mill at Sparwood, B.C., loss \$20,000; and a dry kiln of the C. P. Lumber Co., at Port Moody, B.C., loss \$75,000.

In addition to the above, considerable damage was done by electrical storms at a number of points in Ontario, a number of barns being struck by lightning and destroyed. Forest fires also caused heavy damage in the neighbourhood of Sydney, N.S., and on Vancouver Island, B.C. A saw-mill near Haliburton, Ont., was demolished by a boiler explosion causing a loss of \$8,000.

According to a report published by the Secretary of the Toronto Board of Fire

Underwriters, during July, the total area covered by the great fire of April 19, was 19.7 acres, ninety-eight separate buildings being destroyed. Three hundred and thirty-eight claims were reported by the companies, involving 2,043 policies. The nature of the business destroyed was as follows:—

Boots and shoes (wholesale), 9; clothing manufacturers, 9; drugs, chemicals, photo goods and oils (wholesale), 9; furs, hats and caps (wholesale), 6; hardware and machinery (wholesale), 8; millinery, small wares and fancy goods (wholesale), 21; printing, lithographing, bookbinding and stationery, 23; white-wear and men's furnishing (wholesale), 7; dry goods (wholesale), 24; crockery and lamps (wholesale), 3; miscellaneous, 18, including two rubber manufacturers, one woodworker, one umbrella manufacturer, one coffee and spice mill, one biscuit and confectionery manufacturer, one tobacco dealer, one auctioneer.

It was announced that the rebuilding of the planing mill of the Rat Portage Lumber Company recently destroyed by fire would be commenced at once, the new building to be larger and more commodious than the old one.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada, as indicated by the reports of correspondents to the *Labour Gazette* for July, and by information received at the department from other sources, may be briefly summarized as follows:—

Agriculture.

Interest chiefly centered during July on the outlook for the various crops and the supply of labour requisite to harvest them. With regard to the latter, some alleviation in the stringency of the farm labour market was in evidence both in Ontario and Western Canada, though many localities continued to report an extreme scarcity of men. In Manitoba, however, as a result of the heavy immigration movement, it is thought that fewer men will be required this year from Eastern Canada in connection with harvesting operations. From \$20 to \$30 per month and board was the prevailing rate of wages offered in Ontario during July. With regard to the crop outlook, it may be stated that prospects at the

close of July, as indicated by railway and press reports, were a little, if at all, less favourable than the excellent 'showing of June. Drought at different periods caused some anxiety during the latter part of the month at points in Western Canada and in the maritime provinces, but in both sections the situation was relieved before serious injury resulted. In Quebec, Ontario and British Columbia uniformly excellent conditions were reported. On the hay crop alone, the gathering of which was the leading feature of activity of the month, was anything, like an injurious effect produced by the dry weather, and the yield, in spite of local instances of a light crop more particularly in the Maritime provinces, has proved much better than the average, comparing very favourably with 1903. The clover crop in Ontario, however, and much of the fall wheat in the same province, has proved on the whole a failure, as was previously anticipated. Fruit also will probably be on the whole a light crop in Ontario, the outlook for plums and peaches being particularly unpromising in the Niagara Peninsula, though grape vines give evidence of good yields. In Nova Scotia, however, the apple crop is estimated to exceed last year's.

The Ontario Department of Agriculture, in connection with the Eastern and Western Ontario Dairymen's Association, is continuing this year the system of cheese instruction inaugurated in 1903. There are at present thirty-three instructors on the road, each instructor having assigned to him from between fifteen to twenty-five factories. Two chief instructors, one for the Eastern Division, and the other for the Western Division of the province have general oversight of the work. The department has also employed three instructors to visit the different creameries throughout the province. About one-half of the cost of the instructions is borne by the factories. An improvement in the average quality of cheese offered for export over last year is reported by the wholesale dealers of Montreal.

It is estimated that the new clip of wool will be between twenty and forty per cent lower than normal.

Fishing.

In the maritime provinces fair conditions were shown, good catches of mackerel and lobster being taken. The season for the latter, which ended about the middle of the month, has been, on the whole, a profitable one. Dog-fish continued to interfere with fishing operations; the ravages of the pest were discussed in the House of Commons on July 19. The demonstration of the Scotch method of curing herring was continued at Canso, N.S., with pronounced success. On the Great Lakes quietness prevailed. The sockeye season opened in British Columbia on July 8, and though a fair run was reported on the Skeena, the catch for the month, on the whole, was light. The new traps at Sooke harbour, near Victoria, however, made some heavy hauls in the opening weeks. Preparations among salmon canners, owing to the small run of last year, have been characterized, on the whole, by caution. An increase in the demand for salted salmon and salted herring, as a result of the Russian-Japanese war, was reported. Improved markets for salmon were also reported from New Zealand. An important event of the month was the conference held at Vancouver, B. C., between the executive of the Puget Sound Salmon Association and members of the Fraser River Cannery Association.*

Lumbering.

The leading feature of the month was the exceptional activity of saw-milling. This prevailed throughout the entire Dominion, with the exception of the coast section of British Columbia and at a few points in the maritime provinces, where the outlook was affected by the depression of prices in the British market. Loggers on the Pacific

* A statement of the proceedings of this conference will be found in the report of the Vancouver correspondent of the *Labour Gazette* in the present issue.

coast were also generally dull, and were agitating for the passing of a Bill legalizing temporarily the export of logs. Throughout the Kootenays, however, activity was general in all branches, further concessions having been obtained from the Canadian Pacific Railway in the matter of freight rates into the markets of Manitoba and the Territories.

The Manufacturers' Lumber Company, Limited, was incorporated under the provisions of the Manitoba Joint Stock Company's Act, with a capitalization of \$1,000,000. The object of the company is to manufacture and sell lumber and lumber products by wholesale and retail in Manitoba and the North-west Territories and in British Columbia.

Mining.

A falling market was reported in the collieries of Nova Scotia, chiefly attributed to the exceptionally heavy output of the larger companies during recent months, and the extensive development works that have been in progress. As a result short time prevailed at several points during July. In Quebec asbestos and mica mining was very active. In Eastern Ontario there has been a continuance of the busy conditions of the earlier months of the season; at Leamington a very profitable strike of oil was made, while in Algoma a distinct improvement in employment is recorded since last month. A still more marked improvement was reported in the metaliferous mines of British Columbia, especially in the Kootenay and boundary districts, where the general tone was better than for some time past. Coal mining, however, on Vancouver Island made a less favourable showing.

Manufacturing.

With local exceptions the manufacturing industry reported a busy month, and the factories of Ontario and Quebec were, as a rule, employed to full capacity. The settlement of the strike at Sydney, N.S., and the progress of reorganization at Sault Ste. Marie, Ont., were features of special importance, making for further improve-

ment. With good crops regarded as assured in Western Canada, buoyancy has been reflected on the manufactories of the east. The canning factories, however, have had thus far a somewhat backward season, as a result of the diminished yield in small fruits; a scarcity of help is also complained of in some localities.*

Transport.

Under the heading of *railway construction* conditions throughout Canada were very busy, especially in Ontario and the North-west Territories, in the latter of which there was a keen demand for workmen. *Railway employment* was also active, though the traffic in settlers and immigrants showed a falling off. The usual tourist and excursion trade caused increased employment in several of the transport branches, though, on the whole, business in this connection has been below that of last year. Some diminution in railway freights was also caused by the meat packers' strike at Chicago and Kansas City. On the Great Lakes business has been below that of last year, and ship labourers, longshoremen, &c., are experiencing a less active season. The port of Montreal also shows a falling off in both grain and lumber shipment, both of which are large factors in the export trade of that port, the reason given being the low price and diminished demand in the British market.

In a statement in the House of Commons made by the Honourable the Minister of Railways and Canals, a deficit of \$547,772 was shown for the first ten months of the last fiscal year in the operation of the Intercolonial Railway, as against a surplus of \$127,670 for the previous year. The increased price of fuel, together with the increases in wages, the sum spent in betterments, and the heavy operating expenses of last winter were held responsible for the shortage.

* A statement relating to the report issued during July by the Canadian Manufacturers' Association as to the state of employment in Canada appears on another page of the present issue.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

A deputation representing a number of municipal councils and boards of trade waited upon the Dominion Government on July 14, to advocate the opening up of a water-way from Georgian Bay by way of French river, Lake Nipissing and the Ottawa river to Montreal and the sea-board.

Notice of motion was given by the Honourable the Minister of Railways and Canals of a resolution favouring the purchase of the Canada Eastern Railway Company for the sum of \$800,000, and the addition of the same to the government system of railways.

It was stated that steps would be taken by the Railway Commission to adopt uniform rules on Canadian railways.

The total freight through the Sault Ste. Marie canal during June showed a decrease of 1,965,842 net tons. The Canadian canal alone showed a decrease of \$477,317 tons.

Conditions in the Trades.

In the several trades, conditions throughout July were uniformly favourable, the demand for labour being well sustained and the market free from serious unrest. Very busy conditions were in particular reported in the *building trades* in practically every section of the Dominion, operations, as shown by the issue of building permits by municipalities, being in many instances on a scale never before equalled. Among the different tradesmen of the group, *masons*, *bricklayers* and *carpenters* were perhaps the most active. In many of the large buildings under construction to take the places of those destroyed in the Toronto fire, however, cement foundations and facings are being used, thus diminishing the amount of employment for *stonecutters* and *masons*. *Painters* showed a slight falling off in some localities. Accompanying these conditions in the building trades the manufacture of building materials of all kinds was on a heavy scale, with the result that *woodworkers*, *brickmakers*, &c., were uniformly busy, being unable in some cases to supply the demand. *Coopers* also began to be active on barrels for the coming fruit season. The *metal and engineering branches*, though

less noticeably active had a good month with local exceptions. In the *printing and allied trades* also the statement for the month was favourable. The *clothing trades*, on the other hand, were generally quiet, especially among tailors, for seasonal reasons. *Garment makers* and *boot and shoe workers*, however, were generally well employed, though depression in the latter branch continued at Quebec. Under *food and tobacco preparation*, *bakers*, *butchers*, *ice cutters* and *cigar makers* reported a good month's employment. The *leather trades* also had a fair month, and in the *miscellaneous trades*, the tourist season made *hotel and restaurant employees*, *barbers*, &c., fairly active. *Unskilled labour* had a good month, with men in fair demand in most localities at good wages.

Meetings of Associations, &c.

The annual convention of the International Painters and Decorators Association was held at Montreal. The subject of trade and technical schools was discussed.

The National Association of Master Plumbers and Steamfitters of Canada held its annual convention in Toronto, opening on July 20. About 175 members were present from all parts of Canada, east of Winnipeg. The officers elected were President, Robert Ross, Toronto; and Secretary, J. A. Gordon, Montreal. The city of Winnipeg was selected as the next place of meeting.

The fifth annual convention of the Retail Merchants' Association of Canada was held at Toronto, opening on July 5. It was reported by the secretary that twenty-seven new branches had been added to the association during the past year, and it was expected that large additions would be made before the next annual meeting. Mr. A. L. Geen, Belleville, was elected president and Mr. E. N. Trowern, Toronto, secretary.

Notes of the Month.

A new city directory of *Montreal*, issued during July, shows a population of 373,000 for the city and outskirts.

A deputation of wholesale grocers, with representatives of the American Tobacco

Company, waited upon members of the Dominion cabinet with reference to the prohibition of tobacco manufacturers from making an exclusive contract with wholesale merchants.

The new bridge over the Fraser river, at New Westminster, was formally opened on July 23, by the Lieutenant-Governor of the province of British Columbia. Another important public work opened during July was the new hydraulic lift-lock on the Trent canal at Peterborough, by the Honourable the Minister of Railways and Canals.

During the past ten years the weekly output of the *piano factories* situated in Toronto has increased from seventy-seven to two hundred and twenty, while the number of hands employed has increased from four hundred and five to one thousand one hundred and twenty. In factories making piano parts the number of hands has increased from one hundred and twenty-one to three hundred and sixty-five. Wages during the time indicated have advanced about 20 per cent.

The rate-payers of *Preston, Ont.*, decided in favour of *municipal operation* of the electric lighting plant by a vote of 170 to 15 on July 11. Three by-laws to install a waterworks system, to purchase the electric

plant, and to spend \$6,500 for additional granolithic walks at *Thamesville, Ont.*, were also carried on the same day. The city of *Kingston* will take over the Kingston Light, Heat and Power Company's plants on August 1, and will conduct them hereafter as municipal utilities. *Municipal railways* are at present in operation at *Guelph, St. Thomas* and *Port Arthur, Ont.* A return issued by the Provincial Secretary of Ontario during the month relates to various reproductive undertakings operated by municipalities throughout the province. In addition, the following information in connection with municipal ownership is also furnished:

The city of Stratford has recently taken over the water works system.

The town of Gravenhurst has purchased an electric lighting plant.

The town of Hawkesbury is constructing water works.

The town of Palmerston is purchasing an electric lighting system.

The town of Strathroy has purchased water works and an electric lighting plant.

The town of Listowel has maintained a water works system for fire protection purposes only, respecting which no figures have been supplied.

The village of Port Perry is constructing water works and an electric lighting plant.

The village of Southampton is constructing water works.

The village of Alvinston maintains a water works system for fire protection purposes only, the power for the same being furnished by the Grand Trunk Railway at the rate of \$1 per hour.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffat, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during July were not as favourable as in June or July of last year. The strike in the steel works, which began on June 1, lasted until July 22.* As

a result trade was demoralized and business generally depressed.

The coal industry was much duller than for years, the cause being a narrow market, increased production and the steel strike. A few men were employed on the Cochrane Lake coal areas, which are soon to be developed.

Shipping has fallen off very considerably, but the closing week of the month showed signs of renewed activity.

Retail trade was depressed, but wholesale business did not suffer to the same extent,

* A special article dealing with the progress of the strike during July, the intervention of the Department of Labour under the Conciliation Act, 1900, and final settlement will be found on another page of the present issue of the *Labour Gazette*.

as much of the business done by the wholesale firms is with the collieries.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop of Cape Breton, owing to continuous dry weather, will be below the average, but recent rains will greatly help the grain and root crops.

Mining.—Coal mining, which for the previous five years has been very active in the summer season, has recently shown signs of a falling market. Some of the collieries were idle several days during July. The extensive development of the coal areas of Cape Breton, and the rapid increase in the output of the larger companies have tended to over-production and hence to much loss of time. It is expected that an improvement in conditions will occur during the month of August. The Inverness, Pictou and Cumberland collieries are busy. Joggins mine is rapidly recovering from the fire accident in the lower lift.

Other industries.—The new steel plant at Sydney Mines is almost completed; the blast may be blown in some time in August.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners were active. Plumbers were busy. Lathers plasterers, gas and steamfitters, stonecutters and builders' labourers had but little employment.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, core makers, machinists and engineers, boiler makers and steam engineers were dull. Electrical workers, linemen and blacksmiths were busy. Horse-shoers were active.

Woodworking and furnishing trades.—Carriage and wagon makers, car-builders, and pattern makers were active.

Printing and allied trades.—Printers and pressmen were all actively employed.

Clothing trades.—Journeymen tailors, garment workers and boot and shoe workers were busy.

Food and tobacco preparation.—Butchers and meat cutters were active.

Miscellaneous.—Barbers were busy, but clerks and stenographers were quiet. Laundry workers were busily employed.

Transport.—Railroad conductors and telegraphers were busy. Locomotive engineers and firemen, trainmen, switchmen, trackmen and freight-handlers were not busy. Street railway employees were busy, but teamsters and expressmen were quiet.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the past month the general condition of the labour market was quite as favourable as in June. Continued activity in several branches of the building trades was noticed, but in the painting trade the first rush seems at an end, and, while the trade continues active, a slight relaxation has occurred. Printers, during the past month, have enjoyed greater activity than during June. Commercial activity continued to be as marked as during the previous month, and general transportation lines were very busy. In the wholesale and retail trades the volume of business was very good, and quite up to the standard for the season of the year. The arrival of many tourists caused quite a stir among retailers. The labour field continued free from unrest of any kind.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather during July was exceptionally dry and warm, with the result that, contrary to expectations, the hay crop will be short. All other branches of agriculture, however, will make a good return—in some cases the best in years.

Fishing.—The industry was much more active than in June. Summer mackerel have been taken in good quantities, and other branches show improvement. All are materially hindered, however, by the appearance of dog-fish, which harass the mackerel and destroy the gear of the fishermen.

Railroad construction and employment.—Railroad construction continued to afford considerable employment, and supply and demand was fairly balanced.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, plasterers, plumbers, stonecutters and builders' labourers were busy. Painters were also active, but a slight relaxation is noticeable.

Metal, engineering and shipbuilding trades.—Moulders were fairly busy. Machinists were active. Electrical workers and linemen were busily engaged, with blacksmiths normal. Shipwrights and caulkers were busy. Boilermakers report work fairly good.

Woodworking and furnishing trades.—All branches of the woodworking and furnishing trades reported normal employment.

Printing and allied trades.—Printers were fairly busy, with an improvement over June. Pressmen were active.

Clothing trades.—Tailors reported work plentiful.

Leather trades.—Harness workers reported employment fairly good.

Transport.—Railroad and steamship employees were busy. Ship labourers reported work fairly good. Longshoremen and teamsters were normally active.

Unskilled labour.—This class of labour was fairly active.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during July was, in most respects, similar to that of June, except that the lobster season, which closed about the middle of the month, temporarily removed a source of employment from many of the fishermen. A new foundry and machine shop was started in the city, which makes two altogether

in Charlottetown at present. Work at the Murray Harbour and Hillsboro bridge gave employment to a large number of men, and smaller public works throughout the province kept others busy. The building trades were active, with supply and demand well balanced.

In business circles considerable activity prevailed, and wholesale men report trade fully up to the standard of the same period of last year. The low price of cheese, which had fallen to an unprecedented figure, was a feature in the commercial situation, as the industry is one of the most important in the province.

There were no changes in the rates of wages or hours of labour, and harmonious relations between employer and employee continued.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The unprecedented hot spell and scarcity of rain caused a shortage in the hay crop, and the turnip crop is practically a failure. In wheat and oats the straw promises to be short, but the grain gives indications of filling well. The supply of farmer labourers is not quite up to the demand.

Fishing.—Lobster fishing closed about the middle of the month after a good season. Very few catches of other kinds of fish were made during the second half of the month.

Manufacturing.—The few factories in the province were running as usual with little change to note.

Railroad construction and employment.—Good progress is being made on the Murray Harbour branch railway, and the work will be completed about the first of August. On the Hillsboro bridge, which forms part of the system, considerable progress has been made in filling in the approach on the northern side, and in getting the superstructure ready.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were fairly busy. Carpenters and joiners, lathers and plasterers were busy, as

were painters. Plumbers had a quiet month. Builders' labourers had a fair month.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers had a busy month. Machinists and engineers, and linemen were busy.

Woodworking and furnishing trades.—Wood workers, carriage and wagon makers, car builders and coopers had steady employment.

Printing and allied trades.—Printers and bookbinders had steady employment.

Clothing trades.—Journeyman tailors and boot and shoe workers were busy.

Food and tobacco preparation.—Bakers, butchers and tobacco workers were steadily employed.

Leather trades.—Tanners, curriers and saddlers were busy.

Miscellaneous.—Barbers and hotel employees were busy.

Transport.—Railroad conductors, locomotive engineers and firemen, telegraphers, trainmen and freight-handlers all had steady employment. Steamboat men and steamboat firemen had a good month. Long-shoremen had a fair month.

Unskilled labour.—There was a good demand for this class of labour.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A marked improvement took place in the labour market during July, especially in the building trades. Work on the harbour front was also exceedingly active and at times it was difficult to secure enough men to carry on the work. Painters were well employed, and in some cases extra time was resorted to. Carpenters and joiners are enjoying much activity, and bricklayers and stone masons are exceedingly busy. The Maritime Copper and Reduction Company will open up its works at Goose Creek, St. John county, as soon as the stock-holders agree to the transfer of the whole business. The property and works of the St. John

Sulphite Pulp Company, Limited, situated at Mispic, St. John county, is advertised for sale. Tenders will be received until October 1, 1904. The company has gone into liquidation.

Wholesale and retail trade is improving, and reports are to the effect that business was much better than during the month of June. The transportation companies are doing a large business, hundreds of passengers arriving and departing on every steamboat and train.

Bank clearings for the four weeks ending July 28 were \$4,050,048, and for the corresponding period last year \$4,116,903, being \$66,855 less than in 1903, and \$742,840 less than in June of the current year. There have been no changes in the rates of wages or hours of labour during the month, and the labour market has been free from strikes or lockouts.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from country districts are very encouraging, the crops being in an advanced state. The recent rains were a great boon to the farmers.

Fishing.—Fishing has been fair, but the local market is pretty well supplied. Retail quotations are : Salmon, 20 to 23 cents per lb.; shad, 15 to 30 cents each; mackerel, 15 to 18 cents each; halibut, 12 to 15 cents per lb.; smelts, 8 to 10 cents per lb.; cod and haddock, 5 cents per lb.; salt shad, 20 to 25 cents each; finnan haddies, 7 cents per lb.; boneless cod, 13 cents per lb.

Lumbering.—Owing to the depression in the lumber market it is feared that the city mill-owners will have to shut down about the first of September. If this should take place, about 600 hands would be thrown out of employment.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, builders' labourers, lathers and plasterers were well employed. Painters and decorators were active. Plumbers, gas and steamfitters were busy. Stonecutters were fairly active.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, blacksmiths and boiler makers, reported work active. Machinists and engineers, steam engineers, electrical workers and linemen were busy. Sheet metal workers and horse-shoers report work plentiful.

Woodworking and furnishing trades.—Woodworkers were well employed. Shingle weavers reported work fair.

Printing and allied trades.—Printers, pressmen and bookbinders were well employed.

Clothing trades.—Journeyman tailors reported a falling off in business. The strike is still on.

Food and tobacco preparation.—Bakers and confectioners reported plenty of work. Cigarmakers reported work as good.

Leather trades.—Tanners and curriers were well employed.

Miscellaneous.—Broom and brush makers continue active.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen, railroad switchmen, railroad trackmen and freight-handlers reported business very active, owing to tourist travel. Steamboat men and steamboat firemen were also kept busy by the large number of tourists. Ship-labourers were well employed, and report this the best summer for a number of years. Street railway employees were busy, owing to the extension of the line to Seaside Park, Lancaster, St. John county.

Cab drivers and hackmen also enjoyed a large share of business.

Unskilled labour.—Unskilled labour was well employed.

QUEBEC, QUE., AND DISTRICT.

Messrs P. J. Jobin and Ed. Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions of employment were generally active with the demand for labour at times exceeding the supply. The amount of civic employment under way contributed largely to the activity of the month, and in the

building trades also an exceptional amount of employment was afforded.

Quebec is to have two Labour Day celebrations this year. The National Trades and Labour Council will observe August 22nd as Labour Day, owing to the impossibility of securing the Exhibition Grounds on the regular date as the Provincial Exhibition will then be in progress. The Federated Trades and Labour Council will celebrate the day on September 5th, the date to be observed throughout the Dominion.

The second section of the crib-work for the extension of the breakwater was successfully placed in position on the 13th instant.

Mr. Joseph Tanguay, shoemaker, has been appointed superintendent of the Civic Employment Bureau, which is now in full operation at the City Hall.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Hay, though not the heaviest crop on record, will make a good return, being in excess of last year's yield. Other crops give evidence of a plentiful harvest.

Lumbering.—Saw mills throughout the district are working to their full capacity.

CONDITION OF PARTICULAR TRADES.

Building trades.—**Bricklayers** and masons had a good month. Carpenters were less actively employed, and there were a few men at times seeking employment. Painters and paperhangers were very busy, and builders' labourers had a good month. Stonecutters, on the other hand, were somewhat dull.

Metal, engineering and shipbuilding trades.—Moulders and machinists had a busy month, and iron ship-builders were exceptionally busy, owing to an unusual amount of repair work. Boilermakers were quiet. Electrical workers and linemen had a fair month.

Printing and allied trades.—Printers and pressmen had a good month, with overtime prevailing in some of the larger establishments, though with plenty of men to meet

all demands. Bookbinders were well employed.

Clothing trades.—Tailors and garment workers were well employed, but in the boot and shoe departments depression continued.

Food and tobacco preparation.—Cigar-makers had a fair month's work.

Transport.—Railway employees were very busy owing to the traffic in tourists, which is not, however, as heavy as last year. Long-shoremen and ship labourers had a fair month.

Unskilled labour.—A fair month was reported with plenty of men to meet the demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Favourable conditions continued during the month of July, and business was generally active. The building trades were not as active as they might have been, as there has been a lack of building of a second class character.

A very extensive fire took place here on Wednesday, July 27, at 9.30 p.m., at Messrs. Gerard & Godin's coffin factory, situated on the outskirts of the city and close to the C.P.R. track. The new buildings, which were all destroyed three or four years ago, were all destroyed with all machinery and contents, causing a loss of at least \$75,000. This will take employment away from at least one hundred hands, many of whom are fathers of families. It is not decided whether the firm will remove to Montmagny, P.Q., where they have lately purchased a similar factory on a smaller scale. Having saved one of their most important buildings, in which the coffin trimmings were manufactured, and their offices, it is stated that the city may vote a bonus which will enable them to reconstruct the buildings destroyed and start afresh before winter sets in. When the fire took place, they had more orders on hand than they could fill.

The government, having voted large sums for different works on the St. Maurice, will give employment to the large numbers of workmen.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Heavy sales of agricultural implements have taken place in this district this year.

Lumbering.—Owing to the decline of prices of lumber in England fewer ships are loading here and less employment in that line of labour is given. Several hundred men are still employed on the drive on the St. Maurice, and will be for some time to come. The saw mills are all very busy ; the St. Maurice Lumber Company is sawing night and day.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were very busy. Carpenters and painters were also very busy, while lathers, plasterers, plumbers and steamfitters report less favourable conditions.

Metal, engineering and shipbuilding trades.—Moulders and machinists have been working during July to their full capacity. Blacksmiths were fully employed. Tool-sharpeners were very busy, owing to the continued fine weather.

Woodworking and furnishing trades.—Carriage and wagon makers were not very busy.

Printing and allied trades.—Printers, pressmen, &c., report normal conditions.

Clothing trades.—Journeyman tailors are still very busy. The glove and the boot and shoe manufacturers are very busy, and are increasing the number of hands weekly.

Food and tobacco preparation.—The biscuit factory reports a very active demand for its product. The cigar factories were all busy, and report business satisfactory.

Leather trades.—Tanners and curriers, &c., have all the work they can do.

Miscellaneous.—Barbers are doing well. Hotel and restaurant employees, laundry workers, &c., were very busy.

Transport.—Cab drivers, hackmen, car-workers, &c., were very busy.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was well employed during July, and in some departments the demand was in excess of the supply. This was the case in the agricultural and mining industries, where in some cases the scarcity of labour caused much inconvenience. Reports received from the mining centres at Black Lake and Thetford Mines go to show that the companies are greatly in need of more help. The King Bros.' asbestos mill at Thetford, which was started running night and day, had to close down the night work on account of the scarcity of help. Representatives of various mining institutions went into Montreal and brought out large numbers of Italians, but they could not get enough. In this connection Mr. Graconio Maruca, an influential Italian in this section, and who has had many applications from employers for men to work at the Caperson mines, also at Cookshire and on the Quebec Central Railway, sent repeated messages to Montreal for a supply of labour, but was unable to secure sufficient to meet the demand. Several of the lumbermen brought out gangs of Italians from Montreal, and the employers report that they are doing good work. The farmers also have engaged Italians where they could get them, as other help was so scarce. Farmers are paying \$1.50 a day and board for men, and are glad to get them at that figure.

Large numbers of returning Canadians are passing through Sherbrooke on the Quebec Central Railway from the industrial centres in the New England States. An official of the Quebec Central Railway says that the exodus from the United States is very large, and that the men are given ready employment along their system. Some of the returning Canadians stated that since the spring they had had to accept a reduction of wages of from 15 to 40 per cent. Work was very scarce in the mills,

and many more intended to return. It was also stated that the good wages now being paid in Canada would be the means of bringing many to this country.

At a meeting of the city council it was decided to prepare a by-law for submission to the ratepayers granting a bonus of \$15,000 and exemption from taxation to the Modern Bedstead Company. The vote will be taken in a few weeks. This company intends to erect a new factory, as its business has grown so that the present premises are altogether inadequate.

At a meeting of the Eastern Townships Mining and Smelting Company, it was reported that representatives of a mining brokerage firm intended coming to Sherbrooke in a week or two, when the question of erecting a copper smelter would be definitely settled.

The ratepayers will vote on August 1st on a by-law authorizing the city council to issue bonds to the amount of \$200,000 for the purpose of installing an electric light plant at the city's power on the St. Francis river at Westbury, or to purchase the plant of the Sherbrooke Heat, Light and Power Company. When the vote was taken last February to purchase the plant of the local electric company it was defeated, there being about \$150,000 of property valuation against the project, although there was a majority of 15 votes in its favour. This vote will be by secret ballot, in accordance with the amendment to the city charter passed at the last session of the Quebec Legislature.

The contractors on the new court-house have increased their staff of employees, and the work is proceeding rapidly. The corner stone will be laid on the 30th of next month.

According to the census taken by the city valuers, the population of Sherbrooke is now 13,064, being an increase of over 1,000 since last year. The increase of taxes this year, owing to the increased property valuation, will amount to over \$8,000 on the valuation roll of 1903, upon which the taxes for 1904 are levied.

All branches of industry are busy. The only concern that is on short hours is a

small woollen mill. The Paton mills are running full time, as are also the machine shops, which have some very heavy orders for mining concerns.

The retail and wholesale trades report business very good.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural outlook in this section is very bright, and the indications are that the farmers will have an exceptionally good year. The hay crop has been all harvested, and it shows in some cases an increase of fifty per cent over last year. The other crops are promising well. The farmers have a serious complaint in the scarcity of help, and although more immigrants have come into the township this year than formerly, the supply is not sufficient.

Lumbering.—Lumbermen have a large number of men in the woods, and they would have a great deal more if they could get them. The saw-mills are running full time, and, the water in the rivers having kept up well, there has been no inconvenience felt through the 'drives' being hung up, as was the case last year. The Brompton Pulp and Paper Company got its drive of 14,000,000 feet of lumber down the first of the month.

Manufacturing.—All the manufacturing industries are fully employed. The Paton Mill Company have secured some large orders lately including one for 5,000 Pullman and steamer rugs for the C.P.R. The Moore Carpet Company is now in full operation, and is turning out some large orders.

Mining.—The asbestos mines are employing every available hand they can secure, as there is a good demand for their product. A new mine has been opened at Broughton, on the I.C.R.

Railroad construction.—The various railroads have large gangs of men repairing the roadbed and changing the grades.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons are all well employed. Carpenters and

joiners had a good month. Lathers and plasterers have been somewhat quiet, as several of the buildings now in course of erection are not quite ready for them. Painters were fairly well employed. Plumbers were active. Stonecutters are in demand at \$3 per day. Builders' labourers are in good demand.

Metal and engineering trades.—These trades were steadily employed.

Woodworking and furnishing trades.—All branches of this industry in the city reported work plentiful.

Printing and allied trades.—Conditions have been good, work for the exhibition keeping the offices well employed.

Clothing trades.—Journeymen tailors and garment workers reported business good. The glove factory at Lennoxville reported an increasing business.

Food and tobacco preparation.—Bakers and confectioners were very busy. Ice cutters and drivers were active. The cigar factories reported a good business.

Miscellaneous.—Barbers reported business as good. Store clerks were well employed. Hotelkeepers say the tourist traffic is rather quiet this year. Laundry workers were well employed, this being their busy season.

Transport.—Railway and street railway employees were fairly well employed. Cabmen and carters were busy.

Unskilled labour.—This class is in great demand, and wages are offered as high as \$1.50 and \$1.60 per day.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was no marked change in the condition of the labour market during July, except that in the Penman Company's establishment, weavers, carders and spinners, are only working four days per week; in the other branches, however, they are working full time. At the Ames & Holdrege boot and shoe factory conditions are not very

busy. They are finishing making samples, but every indication points to work being more plentiful in the future. Increased activity prevails in the sash and door factory, as well as in the organ and machine shops. Business in general was very quiet. There has been no change in the rates of wages, or hours of labour during this month.

A slight difficulty arose at the cigar factory. The proprietor having received an order for cigars of a brand not usually made by the employees, the latter refused to make them at the current prices, and left work at once. They were about 20 in number, comprising men and boys. The next day several of the employees applied for their old positions, but only a few were reinstated, as work was not very active at the time. The proprietor stated that the disturbance did not affect him. With this exception, relations between employers and employees have been friendly.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are well advanced with haying operations, some of them having finished. The yield was fairly good.

All other local industries have been fairly active.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, lathers and plasterers have had a fairly good month. Plumbers, gas and steamfitters report a good month.

Metal, engineering and shipbuilding trades.—Blacksmiths and all employed in similar trades were fairly busy.

Woodworking and furnishing trades.—All of these classes report business fair.

Printing and allied trades.—These trades were very busy and report good prospects.

Clothing trades.—Reports from these trades are that conditions are fair, with boot and shoemakers slack.

Food and tobacco preparation.—Cigar-makers have had a dull month.

Leather trades.—Tanners, curriers and saddlers were fairly well occupied.

Miscellaneous.—Barbers report work quiet.

Transport.—Workers have been well employed.

MONTREAL, QUE., AND DISTRICT.

Mr. Thos. J. Griffiths, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were fully employed during July, the demand for unskilled labour being particularly noticeable.

Real estate transfers have shown great activity during the month, and a large number of costly edifices, bank buildings, &c., besides workmen's dwellings, are in course of construction.

No change has taken place in the rates of wages or hours of labour, and the end of the month shows the labour situation in the city and district practically free from strikes. The glove cutters employed in the C. Galibert's glove factory, who went out on strike on June 16, returned to work on July 4, under the conditions prevailing before the strike.

Much interest was awakened in labour circles throughout the city by the commission of inquiry into the Italian immigration problem held by Judge Winchester.

Building permits for the first six months of the year numbered 687, representing a total valuation of \$1,875,479. Permits for the corresponding term last year numbered 505, with a valuation of \$2,259,153. The valuation of 1903 was largely accounted for by the erection of the new C.P.R. shops in the east end.

Over 360 privy pits have been abolished in Montreal since the opening of the year.

Attention was directed during the month to sanitary conditions in connection with the delivery of milk. The city council voted \$500 in order that pure milk might be furnished free of charge to poor people who had small children, in view of the heavy death rate among infants in the city. A fine of \$40 was imposed on a milkman for keeping milk in dirty cans.

The sum of \$862,463 was collected during 1903 for water in Montreal, of which it is estimated that \$300,000 was profit.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades were actively employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists and engineers found work only fair. Steam engineers, electrical workers and linemen were well employed. Stove mounters and blacksmiths were busily employed. Tool sharpeners, horse-shoers, jewellers and watch case makers were busy.

Woodworking and furnishing trades.—Workmen engaged in these industries were working.

Printing and allied trades.—Printers, pressmen and bookbinders, and those employed in other branches, were busy.

Clothing trades.—All engaged in the clothing trades are experiencing a quiet period. Boot and shoe workers were busy.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters, cigarmakers and tobacco workers were busily employed.

Leather trades.—All branches were busy.

Miscellaneous.—All engaged in the miscellaneous branches were employed.

Transport.—Railway trainmen were well employed. Steamboat firemen, steamboatmen, ship labourers, longshoremen, street railway employees, cab drivers, hackmen, carters and draymen were all well employed.

Unskilled labour.—This class of labour was in demand.

DISTRICT NOTES.

Since the change in ownership last spring of the locomotive and machine shops at Longue Pointe, the new company has spent \$300,000 in enlarging the shops and purchasing new tools. The company is now going to spend \$100,000 in the erection of an hotel and workmen's dwellings in

the vicinity of its works. The company has experienced some difficulty in the past in securing a sufficient number of mechanics, owing to the scarcity of dwelling accommodation in the neighbourhood of the works.

The Angus shops of the Canadian Pacific Railway Company, at Rosemount, continue to approach completion, the number of machines and mechanics being augmented daily.

A fire occurred in the hammer shop of the Grand Trunk Railway Company at Point St. Charles on Sunday morning, July 10. The fire started through the explosion of an oil furnace. The damage was mostly to the buildings, and did not keep most of the men from work more than a day or two.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fairly well employed, although not so actively as during June, owing to the termination of spring contracts. Carpenters and joiners, however, were in good demand at a higher rate of wages, and the building trades as a whole were reported as fair. Similar conditions prevailed in the different industries, and in business in general. A large proportion of the population is spending vacation time at summer resorts.

The prospects for a busy fall season are very good for plumbers, masons, bricklayers and plasterers, but conditions have not been as favourable as in the previous month. Conditions in the tobacco trades have also been quiet.

The marble cutters who went out at the beginning of May suspended the strike on the 17th of this month. Several of them are receiving an increase in pay. Owing to a scarcity of workers in that branch, the employers have some difficulty in getting all the men they require, some of the men having left the country at the commencement of the dispute.

The stonemasons' strike is considered ended, all men being at work, and only two employers refusing to sign the new arrangement. This strike, which began May 9, had for result a diminution of hours. The men are now working 8 hours per day instead of 9 hours, and are paid 40 cents per hour instead of 36 cents per hour, as before the strike.

The employees of the Scottish Rubber Company have declared a strike. Their reason for going out is the alleged intimidation on the part of the foreman, bad sanitary conditions in the factory, and a diminution of hours to 9 hours per day. The International Women's Garment Workers' Union No. 38, whose members are affected by this strike, put pickets at several points. The company objected and had the president of the Workers' Union and one of the pickets arrested, but both were released on bail. Later another of the pickets was also arrested. He appeared before Judge Sicotte, who sentenced him to three months in jail, without the option of a fine.

The Bookbinders' strike, commenced on May 16th, was suspended on July 18th. The employees returned to work on the conditions existing before the strike took place. The reason given by the men for going on strike was that the bosses were employing women to perform work which was previously done by men.

Several new buildings are in course of erection. The Royal, Proctor, Academy of Music, National Francais theatres, and several other buildings are undergoing extensive repairs.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—The woollen and cotton mills, the rubber works and sugar refineries reported business quiet during July. At this period each year, these different establishments, dispense with the services of a certain number of employees.

CONDITION OF PARTICULAR TRADES.

Building trades.—All were fairly well employed, with the exception of plasterers, who were quiet; carpenters and joiners were in great demand.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, tool sharpeners, horseshoers, core-makers and machinists reported business quiet; steam engineers, linemen, stove-mounters, and blacksmiths were active.

Woodworking and furnishing trades.—In these branches work was not plentiful. The Canadian Pacific Railway Company has dispensed with a large number of employees for a period of five or six weeks.

Printing and allied trades.—Employees were fairly well employed.

Clothing trade.—Journeymen tailors and garment workers were quiet. Boot and shoe workers found conditions fair.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were active. Ice cutters and drivers were very busy; cigarmakers and tobacco workers were only working four or five days per week.

Leather trades.—In this class conditions were good.

Miscellaneous.—Barbers, delivery employees, hotel and restaurant employees, and laundry workers, enjoyed fair activity.

Transport.—Great activity prevailed in these trades.

Cab drivers, however, are complaining of the action of the 'Seeing Montreal' Car Company, and hackmen are daily protesting to the aldermen. These men depend upon the traffic of summer months to make up for the slack trade during the winter season.

HULL, QUE., AND DISTRICT.

Mr. R. Laferrière, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July was an exceptionally active month, and the supply of hands ran short of the demand. There were no strikes, and the last trace of the papermakers' trouble has disappeared. All classes were busy. Rural communities were actively engaged in harvesting, and good reports of the crops have reached the city. July, 1904, was decidedly

more favourable all round than July, 1903. Prospects for the future, from a working-man point of view, are also reassuring. Hull depends much upon the Booth industries across the river, and the fact that factories are building there which will run twelve months in the year, and thus increase the earning facilities of workmen, is a very promising indication for the future.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This is more a mining and lumbering than a farming district, yet there are extensive areas under crops in the townships of Eardley, Masham and Hull. Fruit crops in Wakefield and Eardley townships are exceptionally promising. Cattle-raising is quite an industry in the southern part of the district, and is extending gradually. The Deschenes stock stables, although comparatively new, are progressing steadily, and these two branches of an important industry may become ere long great factors in the market of this district. The best reports are daily coming down from the farming communities. Fodder is abundant.

Lumbering.—Lumbering is at its height just now, and, if sales are lacking a little in activity, yards are being stocked up for next year's markets. Shantying operations will, it is expected, be very active. Wages have shown signs of a stop in the increasing tendency of the past few years. The demand for men is large and the supply fairly good; every hotelkeeper hires gangs who are leaving daily for the shanties. J. R. Booth's industries at the Chaudière require more shantying operations. Pulp wood will be cut on creeks nearer to the main channels, which had long ago to be abandoned owing to the scarcity of pine. Old shanties will be opened up anew for smaller timber of another variety. The pulp and paper mills at the Chaudière may give work to those of Eddy's men and girls who were left out after the strike.

Mining.—Mining is fair. Mica producers of this district are agitating for an import duty on mica. Certain American companies, it is stated, doing business in Ottawa,

belong to a combine, whose object is to squeeze out the small mine owners. These import the manufactured product from Europe and India.

Manufacturing.—Another factory has gone up on the flats, and Hull girls will find employment there. The pay is not very high. Eddy's match shop is closed for the customary two months' summer holiday, and a couple of hundred girls are rendered idle. Hull's new mattress factory will soon be completed, when some forty hands will be employed. A new match factory has been established in Hull on a small scale by Mr. J. Deslamiere; about half a dozen girls and as many men are employed.

The civic by-law for the loan of \$55,000 to complete the waterworks was carried unanimously. A busy fall may be expected for corporation labourers. Their pay ranges from \$1.35 per day.

Building operations in the city have started pretty actively. Some \$50,000 will be spent on buildings, mostly stores, which have already been started; \$20,000 is being spent on a public hall on Main street, and about \$12,000 on a private residence and amusement hall on the same street.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

July was a fairly active month, except in the iron and clothing trades. Building operations were considerably more active, and there was a demand for workers in nearly all lines.

Favourable conditions prevailed in commercial circles, and bank clearings showed a fairly large increase. Fall buying was reported good, the merchants counting largely on an abundant harvest.

There were no industrial disturbances until the end of the month, when 35 iron moulders went on strike for a minimum wage of \$2.50 a day, instead of \$2.25 as at present.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the district have finished haying, and an exceptionally heavy crop was reported. The grains were heading out and ripening well, and a good yield was anticipated.

Lumbering.—Lumbering operations were active, although market conditions were not very favourable. Mr. J. R. Booth had 1,700 men employed. A record drive of pulp wood was reported on all the streams. Mr. Booth's new pulp mill is in full operation, with a capacity of 75 tons a day.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades were busy, as quite a large number of buildings were in process of erection. The indications pointed to steady work for the remainder of the season.

Metal, engineering and shipbuilding trades.—All the iron trades were quiet during July, and these conditions will likely prevail until September.

Woodworking and furnishing trades.—The woodworking trades were more active, consequent upon the improvement in the building operations.

Printing and allied trades.—The printing trades were busy, and an increase in wages was granted the employees at the Government Printing Bureau, as a result of an increase granted by Toronto employers to the trade in that city.

Leather trades.—The leather trades were busy, a scarcity of harness makers being reported.

Transport.—Transportation companies were kept busy, and, as a result, railway employees were more constantly employed than was expected at the first of the month.

Unkilled labour.—This class of labour was generally employed. During the month some 10 or 15 men quit work at the Silica Brick works, Ottawa East, owing to their request for a nine hour day on Saturdays, with ten hours pay being refused.

DISTRICT NOTES.

A log jam on the Rouge river at Calumet tied up over a million loges and destroyed a

bridge. Seventy-five men were engaged liberating the logs, but several weeks' delay will be caused.

KINGSTON, ONT., AND DISTRICT.

Mr. Wm. Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fully employed during July, and many indications point to a continuance of the opportunities of employment that have prevailed here for every kind of labour during the first six months of 1904.

In the Dominion supplementary grants appear the following: Kingston Military buildings, barracks for Royal Canadian Artillery, re-vote, \$25,000; R.M.C. drill hall, re-vote, \$6,000, and R.M.C. servants' quarters, \$8,000.

The acting secretary for the Hon. the Commissioner of Public Works, Ontario, has called for sealed tenders for extensive alterations and improvements to be made to the Kingston Dairy School. Plans and specifications are now ready, and the tenders close on August 6, 1904. Tenders have also been requested for the several works required in making modern improvements to the municipal offices in the city building.

During the month workmen began the extension and enlargement of several stores to be occupied by dry goods men, plumbers, tinsmiths, &c.

The inventories having been checked, and other necessary steps taken, the city of Kingston took over the plant of the Kingston Light, Heat and Power Company, on Monday, August 1, 1904, at a valuation made up as follows:—

Bonds assumed by the city.. . . .	\$99,975 00
Six months' interest on bond.. . . .	2,451 00
Interest on overdue interest	30 63
Accruing interest.. . . .	1,210 19
Outstanding coupons.. . . .	22 70
Seven months' taxes.. . . .	1,986 83
City's costs in appeal.. . . .	1,356 01

Total.. . . . \$107,032 36

The above amount deducted from the arbitration award, leaves \$63,340.64 as the cost to the city. It is expected that as

soon as the lighting plants are municipalized the citizens will be requested to vote another \$10,000 or \$12,000 to thoroughly equip them for all requirements. If the needed grant is made for lighting improvements, Kingston will have over half a million dollars invested in its utilities.

A large amount of municipal taxes was collected for 1904 up to July than for some years past. In 1902 the amount was \$46,325; 1903, \$47,042; 1904, \$60,559, the latter amount is \$13,517 greater than in 1903, and \$14,234 greater than in 1902. It is impossible to tell at the moment whether this is due to a change in the system of collection or to the better financial condition of the citizens.

The excise collections at the Inland Revenue division of Kingston for June were as follows: Spirits, \$6,722.05; malt, \$109.80; tobacco and cigars, \$3,537.37; bonded factory, vinegar, \$209.90; other receipts, \$94.17. Total, \$11,874.19.

The registration at the newly-formed summer school for teachers at Kingston, was something like one hundred and fifty. The work was of such a profitable and interesting nature that this is likely to become a permanent institution here, with a largely augmented attendance.

A second contingent of servants sent out by the British Emigration Society, has arrived here. Mistresses employing those that came out in May are very much pleased with them, finding them willing, capable, industrious and respectful.

There were no changes in the rates of wages or hours of labour and no strikes or lockouts during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Among the agriculturists of this district haying is nearly finished. There was a large crop, although some parts of it was much coloured by the too frequent rains. The general harvest promises to be very large. Farm hands are scarce.

Fishing.—The industry is rather quiet at present.

Manufacturing is quite active.

Mining.—This industry is very active. The Hon. the Minister of Railways and Canals, has notified the member that, in answer to the petition from Frontenac county, \$50,000 has been placed in the estimates for the spur canal from Bedford Mills to Desert lake. This will give added impetus to the mining and other interests throughout this section of the country.

Railroad construction and employment.—All engaged in these lines were active. During the month workmen were busy laying eighty-pound standard rails on the Grand Trunk Railway. The line from Brockville to Kingston is laid with the new rails. The work is being rushed forward.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades were satisfactorily employed.

Metal, engineering and shipbuilding trades.—All engaged in these industries were actively employed.

Woodworking and furnishing trades.—Satisfactory conditions prevailed in all branches of these industries.

Printing and allied trades.—Printers had a good month.

Clothing trades.—Plenty of work was reported in these trades.

Food and tobacco preparation.—Bakers, confectioners, ice handlers, cigar makers, &c., report exceptional brisk business.

Miscellaneous.—Barbers, clerks, delivery employees and laundry workers all report abundance of work.

Transport.—The transportation business is now at its height. Steamboat and other lines are having the largest crowds of the season. The Wolfe island new ferry steamer, the *Thomas Fawcett*, arrived from Toronto during the month, and has been placed in commission. This boat is proving a boon to her purchasers, the residents of Wolfe island, adjacent to the city. Her time table went into effect August 18, 1904.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July was unusually busy for all kinds of labour, being better than the same month in several years. Common labourers are in good demand, and outside labourers have been brought in, the Grand Trunk and the cement works importing workmen from Montreal and other outside points. Wages are high.

The resumption of the rolling mills under new management after a cessation of nearly two years, has increased industrial activity, although the mill is not yet working to its full capacity. There are at present about seventy men employed, but when the plant puts on a night shift, which is expected shortly, a much larger force will be employed. Many skilled workmen are brought in from different parts, but principally from Montreal. The company finds difficulty in securing sufficient labourers and scrap-handlers.

The enlargement of the Grand Trunk yards for new tracks and a new coal yard has given employment to a large number of men.

The Belleville Portland Cement Works are progressing rapidly, a large force of men being engaged on the steel work for the buildings, most of the material being on the ground.

Rivermen are busily employed just at present, as the annual drive of logs for the Rathbun and Gilmour Companies are being sorted.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been very busy getting in their hay, which is a very large crop. There is an excellent yield of raspberries, black raspberries selling at five cents per box, and the red ones at three boxes for twenty-five cents. Butter brought from 22 to 25 cents per pound and eggs 15 to 17 cents.

Fishing. Dullness prevailed, only rough fish being caught. Lake salmon is being brought in at 12½ cents per pound.

Manufacturing.—All manufacturing concerns were very busy, working full time, and no idle men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were fairly busy, as well as carpenters, joiners and other allied trades, although there is little building activity this month. Several stores, however, are being rebuilt and remodelled, giving employment to a number of men. Painters and decorators report all members working.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, blacksmiths, boiler makers and bicycle workers were all busy and working full time at good wages.

Woodworking and furnishing trades.—Woodworkers, upholsterers and polishers had a splendid month; carriage and wagon workers reported an extremely busy month, and are behind their orders.

Printing and allied trades.—Printers, pressmen and bookbinders are all working full time, with plenty of work ahead. There are no electrotypers employed here.

Clothing trades.—Journeyman tailors had a fair month, as good as July generally is. Boot and shoe workers are working full time.

Food and tobacco preparation.—Cigar makers were busy, as were butchers, bakers, confectioners and ice men.

Leather trades.—The leather trade is exceptionally good, harness-makers in one shop working overtime all month.

Miscellaneous.—Barbers had a good month, as had clerks, stenographers and delivery employees, while the tourist trade kept hotel and restaurant employees very busy. Laundry workers also reported a busy month.

Transport.—Railway trainmen have been quite busy, especially during the latter part

Pacific Railway Company is building a small branch line from Pontypool to Bobcaygeon, which has given employment to an abundant supply of labourers. The line will be a great convenience to the northern portion of this district.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, painters and paperhangers are very busy. Carpenters and joiners are also very busy, and more good men are wanted. Lathers and plasterers are behind with their work, owing to a scarcity of men. Plumbers, gas and steamfitters and builders' labourers are all well employed. With stonecutters there is only one large job under way.

Metal, engineering and shipbuilding trades.—Iron moulders report a better month than June, with orders increasing. Iron workers, machinists, blacksmiths and boiler-makers, were well employed. Steam engineers, electrical workers and linemen were very busy, as well as tool sharpeners in the larger establishments. Horseshoers were fairly busy, but bicycle workers were slack.

Woodworking and furnishing trades.—Woodworkers, upholsterers, polishers and carriage and wagon workers were exceptionally busy. Pattern-makers and coopers were fairly well employed.

Printing and allied trades.—Employment was somewhat slack from seasonal causes.

Clothing trades.—Tailors and garment workers reported conditions dull. Boot and shoe workers were well employed.

Food and tobacco preparation.—Bakers and confectioners were very busy. Cigar-makers, butchers and meat cutters were fairly busy.

Leather trades.—Favourable conditions were reported.

Miscellaneous.—Barbers, broom-makers, clerks and stenographers were busy. Delivery employees, furriers, and hotel and laundry workers were very busy.

Transport. All branches were very busy.

Unskilled labour.—A scarcity of men was reported.

DISTRICT NOTES.

Business was reported active in most of the villages throughout the district. Grist mills and saw-mills were running to their full capacity. Some of the prices of products current were as follows:—

Article.	Price.
Fall Wheat.....	90.
Spring wheat.....	88 to 90c.
Oats.....	32 to 33c.
Peas.....	55 to 70c. (choice)
Barley.....	38 to 42c.
Rye.....	48 to 50c.
Butter.....	18 to 20c.
Eggs.....	17 to 22c.
Potatoes.....	50 to 60c. per bag
Beef.....	7 to 9c. per lb.
Wood.....	\$6.50 to \$7.50
Hay.....	7.00 to 9.00

A joint stock company, with a capital of \$40,000, for the manufacture of boats of every description, was organized at *Lakefield, Ont.*

Some 2,138 boxes of cheese were sold throughout the district at a ruling price of 7½ cents.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is but little change to report in conditions as compared with those of last month. Labour continues to be well employed in nearly all the leading lines, though trade is perhaps a little less active in some departments. The favourable crop reports from most parts of Ontario and the west tend to stimulate production in anticipation of a prosperous fall and winter season. Largely owing to the great demand for labour in connection with the clearance and rebuilding of the burned district, the greater portion of the extensive influx of labour from abroad has been absorbed and comparatively few are now out of work, but the volume of immigration has been

a considerable factor in regulating wages and employment, and under normal conditions its competition would have been more seriously felt.

The board of business agents representing several important unions have now taken up their quarters in the Labour Temple, Church street.

The total duty collected at Toronto during the last fiscal year was \$8,185,258, an increase of \$1,136,483 over the previous year. At Toronto Junction an increase of \$67,157.79 was shown.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are very busy and the harvest in the vicinity promises well. A noteworthy feature is the increased attention that is being paid to the raising of sugar beets. So far the results have been highly favourable, and as a consequence a larger number of farmers in the county of York are cultivating this crop. Reports from the sections where beets have been largely planted are of a very encouraging character. The Provincial Immigration Bureau continues to receive many applications for help during the harvest season, and farm labourers arriving from Britain are speedily provided with places.

Manufacturing.—There is no noticeable slackening in activity in the staple lines of the manufacturing industry which characterized the earlier portion of the season. The conditions all appear favourable for a steady development, and many new factories are in course of erection. One effect of the fire and the rearrangement following upon it is likely to be the building up of King street west as a manufacturing centre. A large number of modern factories have, during recent years, been located on that thoroughfare, and the tendency is decidedly in that direction, leaving the more central portions of the city to wholesale and distributive business.

Railway construction.—There is great activity in prospect in railway construction. The settlement of the Esplanade question by the Railway Commission gives the Canadian Northern an entrance to the city,

and provides for the building of a union station with other terminal facilities for the Canadian Pacific, Grand Trunk and Canadian Northern upon the expropriated area between Yonge and York streets, bounded by Esplanade street on the south, and Front street on the north. Contracts have been let for the James Bay road from Toronto to Parry Sound, and the construction of the proposed Canadian Pacific Railway line from Toronto to Sudbury, at a cost of \$8,000,000, is to be proceeded with immediately. The construction of the Toronto and Hamilton Electric Railway is now assured, and material is already on the ground for the commencement of the work at Toronto Junction. These extensive enterprises will afford employment to a large number of mechanics and labourers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters, bricklayers, masons, builders' labourers, plasterers, and other members of the building trades, are actively employed and likely to continue so until late in the season. Recent immigrants, especially carpenters, do not always find work obtainable. With the exception of new arrivals, practically all are at work. The anticipations formed early in the season of an exceptionally busy year are likely to be fulfilled, as the building permits issued for the first six months of the year aggregate \$2,629,102, as compared with \$2,197,115 for the first six months of 1903. The settlement of the question as to the expropriation of a large portion of the area of the burned district for railway purposes will give an additional stimulus to rebuilding, as many firms were awaiting a decision before making their plans.

Metal, engineering and shipbuilding trades.—Activity generally prevails in all these lines. Machinists, blacksmiths, boiler-makers, sheet metal workers and electrical workers are all well employed, and the outlook for the fall season is highly encouraging. The attempt to settle the differences between the horse-shoers and their employers by arbitration was unsuccessful, as the arbitrators failed to agree. In the mean-

time the men are receiving the advanced wages.

Woodworking and furnishing trades.—Workers in these departments reported generally favourable conditions and plenty of employment. Piano makers had a good month.

Printing and allied trades.—The printing trade is somewhat slack as compared with last month, and quite a number are looking for work. Bookbinders had a fair month. Stereotypers and electrotypers had steady employment.

Clothing trades.—Tailors (custom) and garment workers find trade decidedly quiet. Boot and shoe workers were well employed, but hat and cap workers were not so busy.

Leather trades.—Those engaged in the leather trades, especially harness-makers, had an active month, with plenty of work ahead.

Food and tobacco preparation.—Conditions in most of these trades are satisfactory, but meat cutters complain that trade is slack and a number out of work in addition to those out on strike at the Harris' Abattoir. No settlement of this difficulty has yet been arrived at. A decision of the arbitrators in brewery workers' strike has not been reached.

Miscellaneous.—Laundry workers are having a busy season. Barbers find plenty of work, but there is considerable friction over the working of the early-closing by-law adopted by the city, which is strenuously opposed by some of the employers. Hotel employees are hardly so busy as usual at this season, as tourist travel has so far been light.

Transport.—Railway and street railway employees, expressmen and teamsters are all well employed, but navigation is less active than usual. Longshoremen are only employed intermittently.

Unskilled labour.—Ordinary labourers have no difficulty in obtaining work and are likely to be in demand throughout the fall.

DISTRICT NOTES.

East Toronto.—A by-law to raise by loan \$55,000 to establish an independent water-works system was carried by vote of the citizens of East Toronto on the 11th instant.

North Toronto.—The Metropolitan Railway is preparing for the delivery of live stock over the road. Cattle trucks are being built for the purpose, and a delivery stall has been erected below the Belt Line Railway, near the Deer Park power-house.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Full employment of all classes of labour continues, and there are no idle men. The demand for more men, however, is not great in any line, and exists only in one or two trades, the continued prosperity of the working classes having attracted a steady supply of men from other places. The Niagara Falls Milling Company is building a new flour mill. The city will spend \$54,000 on a new sewer system for the south end. Large sums are also being spent on water-works and permanent sidewalks, and in extending sewers at the north end. The building trades continue to be exceptionally busy, and railway traffic is also heavy. The Pere Marquette Railway Company began running to this city on July 18.

Retail trade is excellent, and wholesale trade very good. Financial interests are generally pleased with the local outlook.

A strike of stonecutters has occurred at the Queenston quarries, and a small strike occurred in a printing house over the refusal of the management to increase wages. The strikers left the city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy haying, the crop of which is light. In fruits, strawberries and raspberries are a light crop, cherries an average yield, grapes promise to be plentiful, apples, pears, plums and peaches will be rather light.

Manufacturing.—The Ontario Silver works were shut down for ten days' holiday. All other factories are busy.

Railroad construction and employment.—A number of men and teams are employed in grading the new yards of the Pere Marquette Railway Company. The Michigan Central Railway Company has relaid its main line with 100-pound rails, in place of the 80-pound rails. Track and telegraph gangs are very busy on the different roads. General railway employment is excellent.

Other industries.—The Electric Power Development Works are progressing rapidly, several large contracts for electric equipment of power houses and cable for power transmission were let during July, local firms supplying considerable dressed lumber, sheet metal work, and rubber clothing for the men employed in the tunnels and wheel pits. A Welland foundry and engine shop has supplied many hoisting engines, and derrick equipments.

CONDITION OF PARTICULAR TRADES.

Building trades.—The rush in the building trades continues. All classes of men employed in the erection of buildings are fully employed, and carpenters are particularly in demand. Planing mills are running overtime. Gas fitters have been very busy, as natural gas is being supplied to all parts of the city.

Metal, engineering and shipbuilding trades. Foundry and machine shop men are all employed; business is steady. Steam engineers are busy. Linemen are crowded with work; the reconstruction of the Michigan Central telegraph lines has employed many. Sheet metal workers are very busy.

Woodworking and furnishing trades.—Coopers' shops are reopening in different parts of the district for the manufacture of apple barrels.

Printing and allied trades.—Printing houses are well supplied with work, and the usual staffs of compositors and pressmen are employed.

Clothing trades.—Tailors are busy. Boot and shoe-makers are overcrowded with work.

Food and tobacco preparation.—Bakers, butchers and ice-handlers are employed and business is good.

Leather trades.—Harness-makers and saddlers are busy.

Miscellaneous.—Barbers are well employed. Clerks and stenographers are all busy, and good wages are paid to all classes of office employees. Restaurant and hotel employees and girls for laundry work are in demand.

Transport.—Railroad business is excellent. The principal east and west lines are carrying a heavy traffic, and local transport business is large. Employment in all departments is extra good for the season. Steamboat hands are all engaged. Electric railway business is good. Drivers of carts, drays and teams on public works are all working.

Unskilled labour.—This class of labour was fully employed. Any slight reduction of the force of labourers on the power works is followed by an exodus of men, so that there are no idle men here.

DISTRICT NOTES.

Port Colborne.—The Dominion government is reported to have ordered plans for a two million-bushel grain elevator to be erected here, and to be ready for business in the fall of 1905. The brass works buildings are nearly finished and the factory will be running early in August. Further extensive harbour improvements are stated to be planned by the government.

Welland.—Retail merchants now close their stores every Wednesday afternoon, giving their clerks a half holiday. Barbers' shops close at an earlier hour.

Altenburg.—More new buildings are to be built along the Welland canal in this vicinity. Construction of the Decew Falls Power canal continues to employ many men.

Sherkston.—The Empire Limestone Company is paying out \$10,000 per month in wages.

St. Davids, and Niagara-on-the-Lake fruit canneries are employing many women and girls, and some men are engaged in hauling, &c.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. James A. Wiley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The very favourable condition of the labour market that existed during June was continued throughout July. There was a demand for additional labour in some of the branches of the building trades at the beginning of the month. This, in a measure, has been supplied, and present needs are sufficiently met. All branches of the building trades are particularly active, and there is more labour employed in building and construction work than for many years. The new armoury being constructed by the Dominion government will give employment to a large number of workmen; already there are between forty and fifty men employed on foundation work. Messrs. Ross & Sons have broken ground for the erection of their new factory. Operations have begun on the erection of a new Young Men's Christian Association building. These with a number of large residences that are being built, will give steady employment to the building trades for the remainder of the season. Other construction works employing a large number of men are, sidewalks, sewers, the Queenston Street Railway bridge, and other civic improvements. Business houses and banking institutions continue to report conditions favourable.

A difference arose between the masons and the stonecutters employed on the new armoury, but an understanding was quickly arrived at and trouble averted. Trouble also occurred on July 1 in the Welland Vale works between the saw-smiths and the firm, over the latter employing more saw-smith apprentices than the rules of the Saw-smiths' Union calls for. The men are still out. The paper-makers' strike in the Riordan mills, Merritton, which began in May last, is still on, as are the sympathetic strikes of the teamsters, firemen and labourers employed by the firm. Strikers on two occasions have been charged with breaking the peace; the magistrate dismissed the

first case, and in the second, the case was sent to a higher court.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit-growers were very busy. The scarcity of farm labour felt at the beginning of the season has to some extent been relieved.

Manufacturing.—Manufacturing industries were fairly busy. The Smith saw factory closed down for two weeks, but has again resumed operations. Canning factories are in the midst of their busy season, and are giving employment to a large number of hands, principally women and girls.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are all busy, with a good season's work ahead.

Metal, engineering and shipbuilding trades.—All engaged in these trades were well employed. Electrical workers and linemen were busy.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers found steady employment.

Printing and allied trades.—Printers, pressmen and bookbinders were satisfactorily employed.

Clothing trades.—Journeyman tailors reported trade quiet.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, cigar-makers and tobacco workers reported trade good. Ice-handlers were busy.

Leather trades.—Tanners and curriers, saddlers and leather workers were well employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers found steady employment.

Transport.—Railroad trainmen, trackmen, freight-handlers, street railway employees, cab drivers, hackmen, teamsters, and expressmen were all well employed.

Unskilled labour.—This class was fully employed.

DISTRICT NOTES.

Port Dalhousie.—The labour market continued in a satisfactory condition, with building operations on a large scale under way.

**Merritton.*—The strike in the Riordan paper mills has had a very disquieting effect upon the labour market, but there are few idle men.

Thorold.—Favourable conditions prevailed in the labour market and business circles.

Power Glen.—A large staff of men is still being employed by the Cataract Power Company at its improvements.

HAMILTON, ONT., AND DISTRICT.

Mr. G. Landers, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during July, with the exception of unskilled labour, which was plentiful. Industrial and commercial activity continued, with prospects bright. Wholesale and retail trade was very good. Rates of wages and labour conditions remained about normal. The leather workers' and machinists' strikes remain with little change.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit prospects appear bright.

Manufacturing.—Outside construction work on factories is progressing, and many men are being employed. Several hundred men are at work for the Cataract Power Co., at Decew Falls. Additional contracts have been let amounting to over \$200,000.

Railroad construction and employment.—Railroad construction in the vicinity is very busy. The Grand Trunk Railway Company is double-tracking the main line between Hamilton and London, and a large gang of men is employed. The Radial Electric Railway Co. has called for tenders for the construction of an additional piece of road from Burlington to Oakville. The increasing freight business of both railroads

between Toronto and Hamilton has made necessary the construction of a third track, and the Grand Trunk Railway Company is preparing to expropriate a further right of way for freight business only.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in these trades were well employed. Bricklayers, masons and carpenters were very actively employed. Plumber and painters were fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders and stove mounters were not so busy as last month. Machinists were fairly busy. Steam engineers and electrical workers, inside and outside, had a good month, but extra men are not in demand. Shipbuilders on light boat, have been fairly busy. Sheet metal workers, both inside and outside, have been very active during the month. Horseshoers were a little slack, as were also the jewellery workers.

Woodworking and furnishing trades.—These industries are not rushed, although all men are employed. Pattern-makers and coopers were very busy.

Printing and allied trades.—All the printing trades, including stereotypers, engravers and bookbinders, had a good month, and trade is fairly active. Work in news-rooms and in advertising work is a little slack. Job-room work is firm.

Clothing trades.—Journeyman tailors are now in their slack season. Garment workers were fairly busy in some branches. There appears to be too many men in some branches of the trade, caused by the recent influx of labour. Hatters are steadily employed. Boot and shoe workers were fairly busy.

Food and tobacco preparation.—Bakers and confectioners were fairly busy. Cigar-makers and tobacco workers reported a very good month.

Leather trades.—Leather workers were well employed, with the exception of those out on strike.

Miscellaneous.—Barbers were well employed. Broom-makers found work slack. Clerks were fairly busy. This class of employees enjoy the Wednesday afternoon holiday, which is becoming an established institution in most retail stores. Laundry workers were very busy.

Transport.—Steam and electric railway employees were very busy, as were steamboat employees, but longshoremen are slack at the docks.

Unskilled labour.—This class of labour was only fairly employed, and there are some unemployed in the city.

DISTRICT NOTES.

Dundas.—All workers in the different factories had a very good month. In the garment-working trades business was good. An employee summoned a contracting tailor for violation of the provisions of the 'Alien Labour Act.' The contractor was tried at Hamilton, and pleaded guilty, but was allowed out on suspended sentence, after paying all costs. The Dominion Wire Fence Company, which is looking for a location, wrote the town council in reference to removing from Toronto to Dundas. The council instructed the clerk to write the company that it would be glad to have the industry here, and would assist it in any way within its power.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fairly well employed during July. In the building trades there was greater activity than during the corresponding month of last year, but in the iron trades there was less. Exceptional activity in the building trades, in fact, was a characteristic of the month. The Grand Trunk station, now under way, promises to be an expensive structure, costing about \$42,000. The Mohawk Institute, being erected by the New England Company, is almost completed; it will cost about \$25,000. The number of private residences in the

course of construction far exceeds the number erected last year. The Verity Plough Co. is enlarging its plant and adding new machinery. The following additions are being made: a press room and experimental department, 156 x 56 feet, two stories high; and a second story to the grey iron room, 167 x 56 feet, are in the course of erection. The Barber, Ellis Co. will immediately increase its output, and an additional number of girls will be employed. The Brantford Starch Works Co. has closed down for a short time, as is usual at this season. Natural gas from the wells at Bow Park farm is being piped to the city. Merchants, particularly grocers and butchers, have found trade active during the month. Friendly relations between employer and employees have continued.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists report a heavy hay crop in many sections, although the clover will be light. Cherries and strawberries were scarcer than usual and prices were high.

Manufacturing.—Manufacturing in most branches has been quiet. The Massey-Harris Co. laid off a few men, as is customary at this season. The Nail Works have been running overtime.

Railroad construction and employment.—The rails for the electric road between Brantford and Galt are laid within three miles of the latter place. The work on the Grand Trunk 'cut off' still gives employment to a large force of men, mostly foreigners. On the whole, railroad construction and employment have been active during the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, lathers and plasterers had an exceptionally busy month. Painters, decorators and plumbers reported all local men fully employed.

Metal, engineering and shipbuilding trades.—Iron and brass moulders, core-makers, machinists and engineers worked full time. Electrical workers and linemen

had a steady month. Metal polishers, buffers, plasterers and stove-mounters, particularly the latter, have been busy. Machinery, carriage and general blacksmiths had steady employment. Boiler-makers and sheet metal workers had an active month. Horseshoers had steady work; they will have the Saturday half holiday during July and August.

Woodworking and furnishing trades.—Carriage and wagon-makers, pattern-makers and millwrights have all had steady employment.

Printing and allied trades.—Printers and pressmen reported trade active, with all local men employed.

Clothing trades.—Journeymen tailors had a fair month, and trade was good for the season.

Food and tobacco preparation.—Icemen and butchers reported a busy month. Bakers and confectioners were all busy, with trade good and all local men employed. Cigar-makers and tobacco workers were slack in some instances, but the majority are now working.

Leather trades.—Leather workers and saddlers had a steady month.

Miscellaneous.—Barbers, clerks and delivery employees were fully employed. Hotel and restaurant employees and laundry workers reported a busy month.

Transport.—Trackmen and freight handlers, especially the former, were busy. Street railway employees reported all men fully employed. Teamsters and draymen were active, and cab-drivers experienced a fair month.

Unskilled labour.—This class of labour found ready employment, but the supply is equal to the demand.

DISTRICT NOTES.

Paris.—The factories and mills have been running steadily during the month. The building trades were active, and labour generally has been fully employed.

Blue Lake.—The Cement Works Co. was very busy, and there is a demand for unskilled labour.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was not quite as well employed during July as in June, though in some lines employment was very active. In others, however, there was a considerable amount of lost time. June is a particularly busy month here, and the contrast may on that account have been more noticeable. The outdoor trades had, generally, a very good month. Some slight betterment was also noticeable in the metal trades, but the woodworking trades lost considerable time in some shops. The amount of building work now on hand is sufficient to ensure a first-class season, including a larger number of houses than was at one time contemplated, though there is little prospect of the demand for houses being fully met. Towards the end of the month employment in the shops in which time was lost became steadier and prospects look brighter.

Retail trade is slacker, owing to the farmers having entered upon their busy season. Quietness is generally looked for in retail circles during July and August.

There have been no changes in wages and no unrest among work-people.

CONDITION OF LOCAL INDUSTRIES.

Railroad construction and employment.—Tenders have been asked for for the grading, masonry and fencing of the Guelph to Goderich extension of the Canadian Pacific Railway. The tenders are for eight sections, of about ten miles each. It is expected that work will be commenced this fall.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades had a good month. There was plenty of work for all classes of builders, and it is expected the season will be a long one. Bricklayers and masons were fully employed, and carpenters, joiners and builders' labourers had a good month. Painters and paperhangers, while not so busy as in the

spring, were fully employed. Stonecutters had only a fair month.

Metal, engineering and shipbuilding trades.—Iron moulders are busier than in June, an improvement being noticeable in the stove foundries. Machinists and machinists' helpers had a good month, and sheet metal workers were fully employed.

• *Woodworking and furnishing trades.*—Those engaged in the woodworking trades lost considerable time in some shops during the month, but at the end of the month an improvement was noticeable. Woodworkers had only a fair month, working about half time. Piano workers have been steadily employed, but organ workers have only worked about half the month. Carriage workers have finished working on buggies, and are now commencing on cutters. The season was equal to last year. Upholsterers were steadily employed, but coopers had only a fair month.

Printing and allied trades.—Printers had a good month for July, and there were no idle men.

Clothing trades.—Tailors had a good month, considering the season of the year.

Food and tobacco preparation.—Brewery workers had a good month. Cigarmakers reported steady work.

Textile trades.—Textile workers had only a fair month. The Brussels carpet weavers lost considerable time.

Miscellaneous.—All engaged in these trades have been in about the same condition as last month, with no noticeable slackness or demand for help.

Unskilled labour.—This class of labour is well employed, with sufficient men to fill steady jobs. There is perhaps some difficulty in getting help for odd-day jobs.

DISTRICT NOTES.

Hespeler.—The Canada Woollen Mills Company has closed down for an indefinite period.

Galt.—Contracts have been let by the town council for about two miles of main sewers. The work will be mostly in the limestone rock. The old Salvation Army

barracks have been purchased with the object of being turned into an addition to the knitting factory.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fully employed during July. The chief activity prevailed in the building trades, though brick still continues scarce and building operations are being somewhat hindered in consequence, and several houses, which were to be erected this season, will probably not be started till next year. The McLagan factory, where there are nearly one hundred work-people employed as a rule, had fifty out of work during the closing of the month, owing to an accident to the building by the giving away of the foundation, which caused two stories to sink eighteen inches. The accident occurred during working hours, but fortunately, no one was hurt. These are the only idle men in the city at present, and they expect to be to work in a few weeks.

Wholesale and retail merchants report a good month's business.

No changes in the rates of wages or hours of work were reported, and no trouble in the labour market.

The Grand Trunk shops have been steadily increasing their staffs of employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are through haying, which proved to be a very plentiful crop, and are harvesting their fall wheat. As was anticipated in the spring, the crop will only be a fair one, there being only an occasional field that presents a good appearance. Most of the grain is shrunken and has considerable rust.

Manufacturing.—Favourable conditions prevailed in the local industries, as in the month of June.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were all employed, as there are a great

number of dwelling houses being erected this season. Carpenters, lathers and plasterers were also fully employed. There are no idle men in the building trades.

Metal and engineering trades.—Machinists and engineers were busy, with prospects for steady employment. Boilermakers were fairly busy. Blacksmiths reported trade active, and bicycle workers were busy on repair work. Horseshoers were fairly active, but not rushed. Jewellers reported business good.

Woodworking and furnishing trades.—The various branches were extra busy, with prospects of continuing so, as there are several woodworking factories here and all are active with full staffs.

Printing and allied trades.—Printers reported trade good, with no idle men.

Clothing trades.—Journeyman tailors had an active month, and garment workers were fully employed.

Food and tobacco preparation.—Bakers and confectioners have done a good business during the month. Butchers reported business very satisfactory. Cigarmakers are all working and say prospects are very good.

Leather trades.—Harness makers were busy, and have a number of orders ahead.

Miscellaneous.—Barbers reported business good. Clerks, stenographers and delivery employees had steady employment.

Transport.—Trainmen have been kept busy, and draymen and teamsters have plenty of work.

Unskilled labour.—This class is fairly well employed.

DISTRICT NOTES.

Mitchell.—Eizerman's planing and sawing mill, which was so badly damaged by fire on June 24, has been repaired, and is running again with a full staff.

Sebringville.—A number of Indians have arrived for the flax-pulling, and have commenced work. The flax is a fairly good crop.

A scarcity of female operators is complained of by factory owners throughout the district.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of July, for the majority of workers, has been the best one so far this year. Men are in demand in most lines of business. Quite a number of buildings are in course of erection, and numerous civic works are under way, including new roads, sewers, sidewalks, &c. A new round-house for the Grand Trunk Railway Company, 416 feet in diameter, with forty stalls for engines, to cost about \$75,000, is being tendered on by local contractors, and a \$20,000 addition to the Post Office is spoken of.

Wholesale and retail trade is very active at present, the different houses being rushed with orders. Jewellers, tailors, grocers, and other stores are closing Wednesday afternoons during July and August.

In the early part of the month the Union painters employed by O. B. Graves, refused to work with a non-union man. Mr. Graves forwarded their names to the other employers in the city, and they were unable to obtain work. The Painters' Union asked Mr. Graves to withdraw their names from the other employers, and when he declined, they refused to hang any paper bought from his store. In the case of two firms where Graves' paper was being handled, the men quit work and are not endeavouring to get back again.

A new laundry tax of \$10 on small laundries went into effect during July.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this district have commenced harvesting, the hay yield being very good, and the outlook favourable for all sorts of grain. The scarcity of farm labour continues, and the small number of horses in the district, all being busy, keeps a large number of farmers from coming to market.

Railroad construction and employment.—Grading and tie-laying on the Grand Trunk

Railway double track between London and Hamilton is about completed, and rails are now being put down. On the London and North Western Electric Road, the grading is in an advanced state, and rails are being laid. It is expected that this line will be opened early in September.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and plumbers are rushed at present, and business is better than was expected this summer. Carpenters and joiners are very busy, quite a number being employed at the new armoury and at the new dairy building at the fair grounds. Lathers and plasterers, and painters are busy. Stonecutters are all working. Brick-makers are also very busy at present.

Metal, engineering and shipbuilding trades.—Iron moulders are busy, there being more work in this city than there ever was before. Iron workers are not doing so much during the hot weather. Machinists are very busy. Linemen find work only fair. Metal polishers and stove mounters have more than they can do.

Woodworking and furnishing trades.—Woodworkers report trade good. Carriage and wagon makers are extra busy. Car builders report trade as only fair. At the G. T. R. shops a week's shut down took place during the month without any reason being given. Coopers are busy on apple barrels, and enough to supply the demand cannot be turned out.

Printing and allied trades.—Printers are very busy, there not being an idle man in the city. Pressmen are exceptionally busy, and considerable overtime is being worked, some getting 16 to 20 hours' overtime a week. The London Printing and Litho. Company is adding another large cylinder press, and two other firms are adding modern power cutting machines.

Clothing trades.—Journeyman tailors report work as only fair. Garment workers are rushed. Sterling's boot and shoe factory has opened up again, giving work to about forty hands.

Food and tobacco preparation.—Bakers and confectioners are very busy; about ten tons of soda biscuits are turned out in this city daily. Cigarmakers in all shops had a three weeks' lay-off during the month, caused through the firms being overstocked.

Leather trades.—Leather workers and saddlers report trade good, and that their business is increasing steadily here.

Miscellaneous.—Broom makers have plenty to do. Furriers are very busy at present on fall work.

Transport.—Train crews report less runs, owing to a falling off in freight traffic, caused by the meat packers' strike in the United States.

Unskilled labour.—There is plenty of work for this class at present, and a sufficient number of hands is hard to get.

DISTRICT NOTES.

In the twelve months ending June 30th, the number of cigars made in the London District was 33,133,565, or an increase of 143,000 over last year, and the quantity of petroleum passing through the division was 3,526,984 gallons, and of naphtha, 943,473 gallons.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial conditions during July were very active. There was much work in progress in the building trades, with a comparatively small staff of workmen; consequently the demand for builders was keen, especially for carpenters, labourers and teamsters. The work of constructing the plants for the Canada Iron and Foundry Company and the Pere Marquette Railway Company, absorbed all the surplus labour available. The walls of the foundry building are being constructed of cement with steel girders, and will be fire-proof. The main building will be 292 x 80 feet, with an additional building 100 x 40 feet. It is expected that the plant will be ready for

use late in the autumn, and will afford employment to 200 hands, an increase of about 50 per cent in the number at present employed. The Pere Marquette shops will furnish the city with its largest new industry during recent years. When the shops are completed, which is expected some time next spring, about 200 hands will be required to operate them. Higher rates of wages are being offered to secure labour on this job, 25 cents per hour is being paid to carpenters, and $16\frac{1}{2}$ cents to labourers, which is about $2\frac{1}{2}$ cents more than the current rate. A large amount of levelling, and constructing of new switches, &c., for yard accommodation is being done by foreign labour, principally Poles, in the employ of the Pere Marquette Railway Company.

Railway traffic was quite normal during the month. A change was effected on July 18th by which Pere Marquette freight trains are now running over the Eastern division to Buffalo, by way of the Michigan Central Railway, hauled by the company's own engines and crews. Formerly the freight was transferred from one company to the other. The head offices of the Pere Marquette Railway Company have been removed from Ridgetown to St. Thomas, together with despatchers and train masters.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With farmers, conditions are on the whole favourable. The wheat in this district is a failure, but the acreage was small, and many farmers ploughed up their wheat fields and sowed other grains. Spring grains, hay and root crops are fairly good, but corn will be short. The dairying and pork-raising industry is normal.

Manufacturing.—There were no changes to report in connection with manufacturing, all plants being active. In the lines where low wages obtain difficulty was experienced in retaining staffs.

Railroad construction and employment.—Work continues very active. In addition to the large amount of improvement work being done by the Michigan Central Railway and the Pere Marquette Railway, the

Wabash Railway Company is making extensive improvements on its Canadian division. New passing tracks were necessitated by the steady growth of business. Several of these new sidings have been constructed; they are of the standard length, sufficient to accommodate 100 cars. The cost of the improvements when completed will be about \$40,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are very busy, but, notwithstanding the considerable amount of building in progress, there is a distinct shortage of the amount of house-building that should be done in order to meet the demand for workingmen's dwellings. The cause is attributed very largely to the fact that, owing to the increased cost of building in recent years, investment in this class of dwellings does not yield a profitable return. Contracts have been let for the erection of the Carnegie Public Library at a cost of \$25,000. A planing mill is being built by H. Lindop, to replace the one recently destroyed by fire. The new building will be constructed of cement.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, blacksmiths and boilermakers reported work steady.

Woodworking and furnishing trades.—Factory hands reported steady employment without material change in conditions.

Printing and allied trades.—Printers, pressmen and bookbinders reported a steady trade with normal conditions.

Clothing trades.—Journeymen tailors and garment workers report a steady month.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters reported employment satisfactory. The price of meat continues very high at this point.

Transport.—Teamsters were in exceptionally good demand, and obtained steady employment at \$4 per day, which is higher than they were heretofore enabled to command.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were not so favourable during July as in the preceding month. The building trade was fairly active, yet quite a number of men in some branches were working only part of the time, notably bricklayers and painters. As many of the houses now being built are frame buildings, carpenters have fairly steady employment. Many of the houses being built are of a class suitable for workingmen. Yet the supply of such houses is scarcely equal to the demand.

A new machine shop has been built and will soon be in operation. The Wm. Guay & Sons' Carriage Company has commenced the manufacture of automobile carriages.

There is no exceptional activity in any particular trade except in house-building, which is fairly active. Commercial activity as evidenced by transportation and shipments of manufactured and agricultural products, lumber, &c., is normal. Wholesale and retail trade is fairly good. There were no changes in rates of wages or hours of labour, and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers say *there will be almost no wheat crop*, and hay is not more than half a crop. Oats, beans, barley, and corn, however, promise well.

Manufacturing.—All local factories are fairly busy, especially planing mills and sash factories, which supply building contractors.

Railroad construction.—Only the construction and alteration of switches is being done here.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, stonecutters and painters reported trade quiet. Plumbers, gas and steamfitters were fairly well employed.

Metal and engineering trades.—Iron workers, moulders, machinists, steam engineers, electrical workers and linemen, blacksmiths and boilermakers were fairly well employed.

Woodworking trades.—Carriage and wagon makers were steadily employed. Coopers reported trade quiet.

Printing and allied trades.—Printers, pressmen and bookbinders reported trade very fair.

Clothing trades.—Journeyman tailors reported trade quiet.

Food and tobacco preparations.—Bakers, confectioners and cigarmakers were steadily employed.

Leather trades.—Leather workers and saddlers reported trade quiet.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees had steady employment.

Transport.—All railroad men were fully employed. Teamsters and expressmen were busy.

Unskilled labour.—This class was fairly well employed, chiefly on civic works, such as paving, laying sidewalks and sewers, &c.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for all classes of labour during July was exceptionally active, and the outlook at present is very promising for a large fall trade in all branches.

The growth and development of the city is clearly shown in the assessment roll, which the assessment commissioner completed on the 30th of June, the past year having been one of the best in the history of the city. During the past twelve months more property has changed hands than in three years previous; there has been a substantial increase also in the assessed value of both land and buildings; and the population has increased very materially, there being now 424 more souls in the city

than at this time last year, making the present population 13,835. The ratepayers have increased in number by 1,030, showing that many buildings have been erected.

The city council has granted the Ontario Traction Company a thirty years' franchise to run a suburban railway into the city. The line passes through Walkerville along the river front to Tecumseh, and is to be completed in two years.

The chief trouble experienced by wholesalers at the present time is that their places of business are not large enough to meet the requirements of their increased trade. Retail merchants report trade active.

There have been no changes in the rates of wages or hours of labour, and no disturbances in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are all busy with their haying. In some parts they have a very fair crop, mostly timothy, as the clover was killed out. Corn and oats are looking well and promise to be a good crop. A hail storm passed through the township of Sandwich South last week and did considerable damage to crops. Prices for farmers' produce still remain good; potatoes are selling for 75 cents per bushel, eggs are 18 cents a dozen, and butter from 18 cents to 20 cents per lb.

Railroad construction and employment.—The Canadian Pacific Railway Company has a large gang of men giving the slips and docks a general overhauling. It is expected that it will take about two months to complete the work.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were all well employed, and the prospects never looked better for a good fall trade in the building line. A contract was let this month for a new Methodist church, costing about \$40,000. Other contracts were let for the erection of dwelling houses, &c.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers and machinists were all busy, with

the exception of those employed in the Typograph Works, which have been closed down for three weeks through some trouble with regard to the supply of power. About forty hands are in consequence out of employment. Blacksmiths and horse-shoers had a good month.

Woodworking and furnishing trades.—All employed in the woodworking trades were fully employed.

Printing and allied trades.—Printers had an exceptionally busy month, with several more men working than last month.

Clothing trades.—Journeyman tailors reported business quiet.

Food and tobacco preparation.—Bakers, butchers and tobacco workers reported a busy month.

Leather trades.—All engaged in these lines are working.

Miscellaneous.—Barbers reported trade good, and all working.

Transport.—Railroad trainmen were all busy. With street railway employees, hackmen, draymen and expressmen this is the busy season.

Unskilled labour.—This class of labour was fully employed.

DISTRICT NOTES.

Sandwich.—This town has become a very busy centre, and has made rapid strides in the last three years. Among its industries are, a large saw-mill and salt plant, which give employment to about 150 hands, and the Bishop Fur Company, which gives employment to about 75 hands. Many fine dwellings have gone up recently, along the river front. The Dominion Government is about to erect a new post office, which will cost about \$10,000.

Walkerville, Ont.—It is reported that a new company, with a capital of \$125,000, will begin the manufacture of automobiles.

The sum of \$78,000 is being expended on street paving this year, about 36,000 square yards being laid.

SAULT STE. MARIE AND DISTRICT.

Mr. Edward Barry, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

At the close of July the local industrial depression, consequent upon the shut-down of the Consolidated Lake Superior Company in September last, appeared about to be removed. A temporary arrangement, by which a receiver was appointed, enabled the new company to appoint a general manager and also to formulate and put into execution a policy of its own. The local press stated, on July 27th, that the company is advertising for 1,000 men in Toronto and other places; also that the Algoma Central Railway will immediately be pushed to completion, and that the steel plant will be in operation by the 15th August. After so many months of uncertainty the effect on the town is not easily over-estimated; confidence seems to be restored, and while the people are not looking for the activity that prevailed in 1901, yet there is scarcely any one here who does not anticipate a period of steady and healthy growth. At present the Mechanical Pulp Mills and the saw-mill are in full operation. The machine shop, the foundry and the veneer mill are in partial operation. There are also about fifty men employed in the steel plant, and the greater part of the company's fleet is in commission. The Trans-St. Mary Traction Company and the Algoma Water and Light Company are also in full operation. Altogether there have been 1,200 and 1,500 men on the pay roll at the end of July.

The action of the Ontario government in releasing a large tract of land for exploration purposes has had the result of bringing specimens of mineral to Sault Ste. Marie which convey the highest promise. The desideratum for this district is a Bessemer iron mine; such ore has not yet been found in paying quantities, though indications are favourable.

Mining generally throughout the district is fairly active with signs of greater activity in the near future. There is a ru-

mour that the Mond interests at the Victoria mines, after a shut-down of nearly a year, are about to resume operations. The company's smelters were operated by the Canadian Copper Company.

The Eddy Bros.' saw-mill plant, at *Blind River*, affords an instance of the growth of New Ontario. Six years ago Blind River was a small village with an antiquated mill which ran only occasionally. It was almost surrounded by an Indian reservation. There was then, and is now, some activity in the fishing industry, but not of great importance. With the advent of the Eddys, however, a mill with larger increased capacity was installed, and in the meantime the old mill was acquired by a Mr. Fisher, who effected a complete transformation. Under these conditions Blind River has become the most important town between Sudbury and Sault Ste. Marie.

The Canadian Copper Company has installed its new plant. An accident to the electric crane used for conveying from the smelter to the converters has delayed progress somewhat, but a short time will suffice to make repairs.

Sixty men are employed on the extension of the piers of the Government canal at from \$1.50 to \$2.50 per day. The men employed on the post office building are as follows:—Six stonemasons at 45 cents per hour; seven carpenters at 25 cents per hour; nine stonecutters at 50 cents per hour; eight bricklayers at 50 cents; seven quarrymen at from \$2.52 to \$2.75 per day, and twenty labourers at from 17½ to 20 cents per hour. The contractors, Messrs. Wright, McPhail & Co., are erecting two other buildings, one a wholesale store, costing about \$10,000, and the other a private residence, estimated to cost about \$9,000. Mr. Healy of Rexfrew, has a contract for the building of a hotel at *Sudbury* to cost about \$40,000.

Notes.

Keewatin.—Experts are engaged laying out the grounds, railway sidings and buildings for the Keewatin Flour Mills Co.

Fort William.—Up to July 1st, ninety-nine new buildings were reported by the

building inspector as having been contracted for, with a total valuation of over \$160,000.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

With the exception of one or two instances amongst skilled workmen, labour during July has been fully employed. For men to work on the railroad, section hands, extra gangmen and teamsters, there is a demand. This to a certain extent will be met by the release of a large number of men from employment at the close of the Dominion Exhibition being held in Winnipeg. For the latter a very large number of carpenters have been employed, and they will have difficulty in finding work, as the market, especially for those of indifferent skill, is well supplied. The rougher work on a large number of buildings is well advanced and the interior work demands a good standard of workmanship. Really good workmen for such are scarce, and in one or two cases contractors allege that the scarcity of good workmen is the cause of delay in finishing buildings.

The city council has passed a by-law which closes the important thoroughfare of Broadway, between Main street and the Red River. This action was taken at the instance of the Canadian Northern Railway, which company desired the location for the purpose of erecting a new passenger depot. It is understood that this building will be erected immediately. The closing of the street aforesaid places at the disposal of the company a considerable area without any obstruction thereon, and it will be used entirely for the purposes of the railroad for freight yards and depot. A condition of the agreement forming a part of the by-law is the erection in the city, in the district of Fort Rouge, of modern repair shops. These also will be erected immediately and will give employment to a large number of workmen in their building as well as of a large number of permanent employees when they are constructed.

A large departmental store firm of Toronto recently purchased a very extensive block of land on Portage avenue, for the purpose of erecting a store thereon. Work on the foundation has already commenced.

All trades are busy and many have been rushed by orders incident to the Dominion fair.

Commercially, the same general activity as was reported last month prevails. Bank clearings show for July an increase of \$5,000,000 approximately over the corresponding period of last year.

Retail trade is especially active, rendered so by the presence in the city of so many visitors to the fair. Another element which is favourably affecting the retail and wholesale trade is the extremely large number of men that are being employed on building operations. Transient visitors also have been unusually numerous and proportionately add to the volume of business.

Wages have not changed during the month. In the early part some of the commonest labour was being paid as low as 15 cents per hour. Towards the middle, however, the minimum rose to 17½ cents.

Relations between workmen and employers have been generally cordial. The carpenters' union called their men off one job early in the month. Only three or four men were affected. The action of the union was caused by the employment of non-union men by a contractor who was under agreement with the party for whom the building was being erected to employ none but union men. The contractor acceded to the demands of the men.

For the year ended June 30th, 1904, customs receipts were \$2,599,982.26, an increase of \$666,899.39 over last year.

Permits issued up to the end of June, 1904, call for the erection of buildings valued at \$6,072,450. Permits issued to the same date last year aggregated only \$2,782,300, and up to the same date in 1902. \$1,386,550. Among the many big structures under construction are the C.P.R. repair shops in the northwestern part of the city, at an estimated cost of \$2,000,000; the new C.P.R. depot and subway, estimated cost,

\$3,000,000; the new C.P.R. freight sheds, \$200,000; Union Bank block, \$400,000; *Free Press* building, \$150,000; addition to R. J. Whitla's wholesale dry goods warehouse, \$125,000; Scott furniture warehouse, \$100,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Attention is generally concentrated on crop conditions. Up to the present the indications are that more than an average yield will be obtained, but on the whole harvesting will not commence until from 5 to 10 days later than last year. Already, however, isolated instances of the cutting of fall wheat, rye and barley have been reported. No information is yet obtainable as to the demand for harvest help. It is, however, stated by employment agents that the extensive immigration will in a measure reduce the need of special labour for the harvest months.

Railroad construction.—For railroad construction there is a demand for men. So long, however, as there is hope for employment in the city a large number of men refuse to accept offers of work which necessitates their leaving the city for the summer months. In Winnipeg contractors are employing very large numbers of men on the new depot for the Canadian Pacific Railway, and also for the subway on Main street. The company itself is also employing a very large gang in raising the whole of their tracks five feet above the level of Main street.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building is exceptionally heavy. In some lines, such as stone-cutters, a shortage of men is reported, and bricklayers and rough carpenters are not all employed. In other lines the men available are generally well employed. Construction work on the buildings for the Dominion Fair was completed about July 25, and the men who were employed thereon will have difficulty in finding similar employment.

Metal, engineering and shipbuilding trades.—Iron workers of all classes continue

to be kept busy to their full capacity. They do not expect, however, to be so fully employed after the present rush is over. No lack of men is reported.

Woodworking and furnishing trades.—Woodworking establishments are busy and are taxed to their utmost.

Printing and allied trades.—Printers have been kept busy with business in connection with the Dominion Fair. They expect to be busy for the rest of the year, in view of crop prospects.

Clothing trades.—Journeymen tailors and other employees in the clothing trades continue to find steady employment. Conditions are unusually steady, but there are enough hands on the ground to do the work.

Food and tobacco preparation.—Bakers and others engaged in food preparation have been made extra busy by the presence in the city of so many strangers and visitors to the fair. Extra hands have been employed, and with the passing of the fair there will probably be more than enough hands for the normal needs of this particular industry. Tobacco workers have also been busy.

Leather trades.—In the leather factories activity has been the rule. The rate of wages, however, in this industry, would indicate a sufficient supply of labour.

Miscellaneous.—In miscellaneous classes of labour there is an unusually large number at present employed in the city, but there is also a large number seeking employment. Female workers of various kinds are in demand. Dining-room girls are at a premium. For the two weeks of the fair some hotelkeepers have offered \$10 per week salary. Others have failed to get the necessary help by offering as high as \$25 per month and \$5 per week bonus for the fair season. Laundry girls are also in request, as are all kinds of domestic help.

Transport.—In transport circles the men were busy and staffs are being continuously strengthened.

Unskilled labour.—Unskilled labour is in demand generally.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the latter part of July there was a marked increase in the employment of labour, both skilled and unskilled, and at the close there were very few mechanics idle.

Building operations were never more active in this city, improvements being forwarded in all parts, especially in the erection of dwelling houses, warehouses and business blocks. The only new industry started was by a company formed for the manufacture of concrete brick, made from sand and cement; very favourable reports are given of this product. There is a great scarcity of other bricks, which cost \$16 per thousand laid down here, and bricklayers find the supply very limited at the present time. Owing to this scarcity, work has been retarded on several buildings.

Transportation companies have had to increase their staffs, owing to the heavy shipments of all kinds of merchandise, particularly agricultural implements of every description. The Brandon Machine Company has orders on hand for thirty threshing engines, and is employing a large staff of men on repairs of threshing engines manufactured by outside companies.

Wholesale and retail merchants report trade very satisfactory at present, with expansion evidenced in all lines.

There were no changes in rates of wages or hours of labour, and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the grain-growing belt in the Territories and Manitoba show magnificent prospects for the 1904 wheat yield. Beneficial rains have occurred in all parts of the province, and this, together with the warm weather, has put the grain in excellent condition.

Lumbering.—Lumber dealers report trade more active than in any previous year. The

Rat Portage Lumber Company has opened an extensive lumber yard here.

Manufacturing.—Planing mills and manufacturers of builders' supplies state that orders on hand exceed those of any previous year. Flour mills report trade excellent, and are running day and night to supply the demand.

Railroad construction and employment.—The Canadian Northern Railway Company is furthering construction work on all its lines from Kamsack, where a divisional point is being established. A branch line is being built from Carberry to Brandon, and from Arizona to Carberry, and the Greenway and Ridgwill branches are being pushed ahead. The Canadian Pacific Railway Company has six construction trains and a large staff of men at work on its lines from Kirkella West, one hundred and twenty miles has been graded.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and stonemasons were fully employed; there will be some openings for bricklayers next month, but at present trade is quiet, owing to a scarcity of brick. Carpenters, joiners, lathers and plasterers, plumbers and builders' labourers were very busy. Painters, decorators and stonecutters reported trade good.

Metal, engineering and shipbuilding trades.—Iron moulders, steam engineers, blacksmiths and boilermakers were fully employed. Sheet metal workers were very busy. Pattern-makers and machinists found good employment.

Woodworking and furnishing trades.—Upholsterers were well employed.

Printing and allied trades.—Printers and pressmen were a little slack.

Clothing trades.—Journeymen tailors, garment workers, and boot and shoe workers were actively employed.

Food and tobacco preparation.—Bakers and confectioners found business very good, and much the same condition prevailed with butchers, meat cutters, and ice-handlers. Cigarmakers and tobacco workers were well employed.

Leather trades.—Tanners and curriers were actively employed, but saddlers found trade a little slack.

Miscellaneous.—With barbers trade was good. Clerks, stenographers and delivery employees were very busy. Furriers found trade slack. Hotel and restaurant employees, and laundry workers were active.

Transport.—All engaged in the railway service, and teamsters and kindred trades were exceptionally busy.

Unskilled labour.—The steady influx of new-comers tended to overcrowd the unskilled labour market. Since July 1 the railway companies have found employment for a considerable number of men, and the farmers of the district are making inquiries for experienced farm help. Such men may find steady employment at good wages. The large number of men that are idle here at present do not belong to this experienced class.

Notes.

Farm property in the Portage la Prairie district sold lately at good prices. One half section bringing \$11,200, and another \$10,000, from local buyers. Another farmer sold 320 acres for \$11,200, or \$35 per acre. Quite a number of American capitalists are passing through the district looking for improved farms. Reports from the district show that business is in a very satisfactory condition. Considerable building is going on in the different towns.

Calgary.—A fire station to cost \$4,000 and a bridge over the Bow River to cost \$9,000 will be built by the municipality. A project involving the erection of a beet sugar factory and the location of from 500 to 900 families on the lands tributary to the C. P. R. irrigation system was submitted to the company.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

‘Not an idle man’ is the report for July from every section of the Kootenay-Bound-

ary districts of British Columbia, the whole country being at present in the midst of its busiest season. Out-door mining, railroad construction and lumbering have reached their maximum of activity for the year, while building is proceeding at various points, although a minor issue as compared to the other departments of industry. The whole country is enjoying prosperity, and the outlook for a continuance of these satisfactory conditions is bright.

Rossland.—The mining of low grade ore for concentrating is at last an accomplished fact, and the results in respect to the increased employment of skilled labour are quite up to expectations. At the War Eagle-Centre Star mines seventy-five men have been added to the crews during July to break ore for milling purposes, while the force engaged in the extraction of smelting ore has not been decreased. It had been contended that this would be one of the first results of the inauguration of milling operations, and the outcome has given marked satisfaction. It is admitted that Rossland has more to expect from this source than from any one other factor in building up the population of the city. Next month will see similar low grades of ore utilized at the White Bear mine, and more men engaged. Several mines have rejoined the working list in the camp and the local situation is excellent. The superintendent of one of the leading mines here was reported as saying on the 21st instant ‘We have had difficulty in the past few days in securing first-class machine men.’ These are expert miners commanding wages of \$3.50 per diem and upwards for eight hours work underground.

The principal building operations under way in the city are at the armoury for the Militia Department. Twenty men are employed, being stonemasons and miners in the quarry. Later, bricklayers and carpenters will be engaged. There is a marked scarcity of bricklayers, and men will be brought in for the work. A Chinese trading company is erecting a large warehouse and employing a dozen white men. Union wages are paid.

Trail.—A marked increase in activity was reported at the Canadian Smelting Works during the month. An additional lead stack was blown in requiring the addition to the force of a number of skilled furnace men. A large and costly machine for the manufacture of lead pipe is now being set up in the works, and is expected to be in operation during August. The machine will be run by a couple of highly paid experts with several labourers, but its special interest is from the fact that no lead pipe has been previously manufactured in the Dominion. The company is also closing a contract for the establishment of corroding works at Montreal, with a branch plant at Trail. This is another new industry in Canada, the product entering into all points save iron and mineral products.

Boundary.—After a short close-down pending general overhauling the big Granby smelter at Grand Forks is again in full operation. Plans are in contemplation for a further increase in the plant, which is now the largest and most complete of its kind in British Columbia.

Fifteen hundred men are engaged in extending the Great Northern railroad tracks from Grand Forks to Phoenix, while surveys are being made for a further extension to Midway, an additional distance of twenty miles or thereabouts. The large pay roll incident to railroad construction has materially stimulated business throughout the district.

Slocan.—Reports of general activity are to hand; the silver-head industry continues to benefit from the influence of the Federal bounty on lead.

Lardeau.—Work in the district is largely in the prospecting line, several hundred men being engaged in opening promising mines on a small scale. All properties are busy and the district is prosperous.

East Kootenay.—The section is very active from end to end. Commencing at the east, *Moyie* is busier than ever before in both mining and lumbering. The *St. Eugene* mine and affiliated properties are producing a heavy tonnage of lead concentrates

and working approximately 300 men. The lumbering enterprises of the town are working at full capacity and maintaining a large pay-roll.

All along the line of the *Crow's Nest railway* lumbering plants are working at top speed to keep up with the demands of the export business with the North-west Territories.

Coal mines at Fernie, Morrissey, Michel and adjacent points are producing largely and expanding continually. No labor troubles have cropped up to interfere with the prosperity of the section.

It was reported that final arrangements for the construction of the zinc and smelter plant to cost \$100,000 had been entered into at *Fernie*.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

General activity prevailed in the labour market during July, a demand being made for both skilled and unskilled labour.

After several months of comparative slackness the shingle mills are again running to their full capacity to keep up with the orders which have been pouring in for the past two or three weeks.

The Canadian Pacific Lumber Company's saw-mill plant at Port Moody was destroyed by fire; the loss is estimated at about \$80,000, and 75 men are thrown out of employment. The company has decided to at once start the erection of a large modern mill, to replace the one burned.

Customs returns for year ending June 30, 1904, were as follows:—Imports, dutiable goods, \$623,092; free goods, \$323,749; total \$946,841. Duty collected, \$184,831.23; other revenue, \$359.60; total collected, \$185,190.83. Increase over 1903, \$43,364.18. Total exports, \$3,418,486. With the steady increase of manufacturing establishment at this point a still further increase in trade is looked for.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the district are that the grain and hay crops are very good. Roots are also good. The farmers have experienced difficulty in securing help for haying, and were offering \$2 to \$2.25 and board for men. Fruit is plentiful. Gooseberries bring 6 cents per pound; cherries, 6 cents per pound; red currants, \$1 per crate, and strawberries, \$1.50 per crate.

Fishing.—Up to the present the run of salmon has been very light, and a large number of men are engaged with poor results. Reports from the fisheries office show that the number of licenses issued is still under 1,500. The Japanese, who are fishing this year, are fully one-third less in numbers than they were in 1903. Preparations have been made by the canneries to pack 300,000 cases, and it is not by any means expected that that number will be exceeded, as this year is considered likely to be one of the small years.

Lumbering.—A good export trade is being carried on, and the local trading is good. Several new lumbering camps are being started.

Railroad construction and employment.—A large number of men are being employed by the Vancouver, Westminster and Yukon Railway Company in making connection with the approaches of the new bridge and the company's line on the south side of the river. The new steel bridge across the Fraser River was formally opened by His Honour the Lieutenant Governor on July 23. Operations on the work commenced in August, 1902, and the cost was approximately \$1,000,000, the whole of which expense is borne by the government of British Columbia. The total length of the steel work is 2,400 feet; of railway approaches, 7,715 feet, and of the highway approaches, 380 feet, making a total of 13,915 feet, or two and one-third miles. The weight of steel used in construction of the bridge is 4,000 tons, and 15,500 barrels of cement were used on foundations and piers. A large number of men have found employment on this work during the past two

years, and only two fatal accidents occurred during the whole of the work.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the building trades were busy, with a demand for carpenters, plasterers and painters.

Metal, engineering and shipbuilding.—Those engaged in these trades report work plentiful. Several branches, such as machinists and engineers employed in shops, were working overtime. Shipbuilders and caulkers report work satisfactory with considerable repair work under way. Blacksmiths and horse-shoers were busy, with good prospects for the season.

Woodworking and furnishing trades.—These trades were steadily employed, with orders ahead. A number of extra hands secured employment during the past month. Car and carriage builders are steadily employed, and there is a demand for a few good men.

Printing and allied trades.—All the members of the printing trade are busy, a large amount of job printing being done.

Clothing trades.—Tailors report work good with no idle men.

Food and tobacco preparation.—Butchers are all employed with prospects good for the season. Cigarmakers are all busy, several new men having secured employment of late.

Transport.—Since the fishing season commenced there has been a scarcity of tugs for general purposes, a large number being under contract to tow for the canneries. The demand for tugs has had the effect of increasing the earnings of captains, engineers and firemen. Street railway employees report work plentiful, a large amount of passenger and freight being carried.

Unskilled labour.—There is a steady demand for unskilled labour.

DISTRICT NOTES.

Phoenix.—In the neighbourhood of 1,000 men are employed on the construction of the V. V. & E. branch of the Great Northern

Railway from Grand Forks to Phoenix, and labourers are still in demand.

Cranbrook.—The Electric Light Company that has charge of the telephone lines in this district, is making preparations to extend its lines to Moyie and Wardner.

Throughout the district a large number of new residences are being erected; also a number of new barns.

At *Ladner* several new houses are in course of erection, and several barns are being put up. The farmers are experiencing an era of prosperity. The hay crop is about all in, and the root and grain crops are doing remarkably well.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The building trades were well employed with the exception of stonemasons. As compared with last month the demand for men has been equally good, but the supply of labour somewhat exceeded the demand. Building permits issued during June, by the city, amounted to about \$100,000; July will probably equal this amount.

Retail business was somewhat inactive, local retailers complaining that collections were not promptly met. The price of provisions remain unchanged, though a rise in the prices of cured meats was reported, as a result of the Chicago meat packers' strike. The price of different brands of flour showed a slight reduction, which may be partly accounted for by the good crop prospects in the North-west. No new hay has appeared yet, and prices for that commodity remain unchanged. The hardware trade continues fair, despite the closing of many logging camps, the business with the interior points making up for any other deficiency.

Publication of the *Independent*, a weekly paper published 'in the interests of the masses' was resumed on July 9.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the Fraser Valley districts are that the hay crop will be short on account of dry weather.

Fishing.—A conference between the executive of the Puget Sound Salmon Association and the members of the Fraser River Cannery Association was held in the rooms of the latter at Vancouver on July 21.

Mr. J. A. Russell, chairman, welcomed the visitors and stated the objects of the meeting. Action was taken upon a number of important matters relating to the Sockeye industry on Puget Sound and Fraser River tending to the mutual advantage of both, amongst which were the question of a close time during the packing season, which was referred to a joint committee of three from each of the associations duly elected, who are to report to meetings of the respective associations and the decision referred to a joint meeting to be held at the call of the respective secretaries.

It was agreed that for mutual protection a patrol boat be placed on each side of the boundary line by the respective associations or governments, with the view of co-operating to prevent thefts of fish and gear.

The matter of hatcheries was laid over until the next meeting, in order that it might be taken up with the Hon. Minister of Fisheries during his anticipated visit to the coast.

It was further agreed between the two associations that no British Columbia canners should buy fish on Puget Sound, and no Puget Sound canners should buy fish in Canadian waters, except from and through the authorized representatives of the respective canners and independent trap owners.

Harmony and good feeling were manifested throughout the conference.

Lumbering.—Conditions were very dull, with prospects uncertain.

Mining.—Reports from the Princess Royal Island group of mines, off the northern coast of Vancouver Island, were to the effect that the company was shipping ore in sacks, the value of which runs from \$50 to \$300 to the ton. Arrangements are being made to build a wharf and train line. The Britannia Mines Company, on Howe Sound,

is doing development work, and has let a contract to build an aerial tram. This is a gold-copper concern.

CONDITION OF PARTICULAR TRADES.

Building trades.—Conditions were reported generally fair. Bricklayers report men well employed, with masons only partly employed. Carpenters and joiners were fairly well employed, and lathers, plasterers, painters, plumbers, stonecutters and builders' labourers were well employed.

Metal, engineering and shipbuilding trades.—The metal trades report business fair, but with a number of men out of employment, and prospects not bright. Electrical workers were fairly well employed. Shipwrights report that work has been good, but prospects are uncertain.

Woodworking and furnishing trades.—Work is dull and prospects not assuring. Quite a number are out of employment. Carriage and wagon makers were very busy, with plenty of orders ahead. Shingle weavers are experiencing a dull season.

Printing and allied trades.—Printers reported trade slack in job offices, but fair on newspapers. There are about twelve idle men, and prospects are uncertain. Pressmen were fairly well employed, but there is no demand for men.

Clothing trades.—These trades were dull, especially tailors.

Food and tobacco preparation.—Bakers and confectioners and cigarmakers report no demand for men and a few workmen idle. Butchers were busy.

Leather trades. The leather trades were fairly active.

Miscellaneous.—Barbers report business good. Clerks were not well employed, there being a large number seeking positions.

Transport.—In transportation branches traffic on the water front has been good, and prospects are fair. There is a surplus of longshoremen. Teamsters were not well employed, and the prospects are not assuring.

Unskilled labour.—A large number of men were reported idle.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fairly well employed during July but compared unfavourably with the same month in the past two or three years. This was particularly noticeable in some branches of the building, metal and shipbuilding trades. The large amount of civic work on hand, in the shape of street paving, permanent sidewalks and sewer construction, gives a large force of unskilled labour steady employment. The Canadian Pacific Railway Company is calling for tenders for the construction of the foundation of the tourist hotel to be erected here.

As a result of the strike of the packing house employees in the United States the prices of canned meats have advanced. There is a heavy consumption of American canned goods in this province.

Plumbers, steamfitters and gasfitters were granted an increase in wages from \$3.50 to \$4 per day of eight hours.

The differences between the canners and Indians in the North, which threatened to limit seriously the pack of fish on the Skeena River, this season, have been settled. Both parties to the dispute made concessions. The Indians agreed to accept 8½ cents for sockeyes, which is a cent and a-half more than they had been offered by the canners in the first place, and a cent and a-half less than what they had demanded. A settlement was reached on the 11th. Many of the natives had then left for the Fraser River and others for the interior, which has left the canners short-handed for the rest of the season, but as the fish are running exceptionally well there is reason to believe that the pack will yet be a substantial one.

The annual meeting of the Board of Trade was held on Friday, July 8, with 187 members present. Mr. S. J. Pitts was elected president, and Mr. F. Elworthy, secretary. The improvement of Victoria harbour, an all-Canadian route to the Yu-

kon, and the commerce and business outlook of the city were among the different topics discussed.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Some good hauls of salmon have been made in the traps recently erected on the southern shore of Vancouver Island, but it is too early in the season to announce what the outcome of the experiment will be. Purse seines have also been laid in the waters adjacent to the traps. Reports from the northern rivers announce a big run of fish, but the trouble between the Indians and the cannery men in the early part of the season will curtail the pack for this year.

Lumbering.—While there is no marked activity displayed about the mills of the city, employment is active, and several of them are making extensive alterations and additions to their plants to meet the growing demands of the trade. The number of timber licenses issued by the provincial government for the first half of the present year far exceeds that issued in the same period of any previous year. Logging operations have practically stopped, owing to the large surplus stock that the Loggers' Association have on hand.

CONDITION OF PARTICULAR TRADES.

Building trades.—Employment is fairly good, but there is not the same activity displayed this season that has been the rule for the past two or three years. Bricklayers, masons, carpenters, joiners and stonecutters were fairly well employed. Lathers and plasterers were busy. Painters and decorators, plumbers and builders' labourers were fully employed.

Metal, engineering and shipbuilding trades.—Iron moulders were busy, while

machinists were only partially employed. Steam engineers, electrical workers and linemen, and carriage blacksmiths in the machine shops reported fair employment. For the first half of the month work was scarce with boilermakers, but during the latter half was active. Shipwrights and caulkers reported a lack of employment, while sheet metal workers were busy.

Woodworking and furnishing trades.—Woodworkers were well employed. Carriage and wagon makers were very busy.

Printing and allied trades.—Printers, pressmen and bookbinders were well employed throughout the month.

Clothing trades.—Custom tailors report employment fair. Garment workers were busy.

Food and tobacco preparation.—Bakers and confectioners report trade as good, with butchers' business dull. Cigarmakers were well employed.

Leather trades.—Harness makers and saddlers reported trade dull.

Miscellaneous.—Barbers reported conditions satisfactory and employment good. Clerks and delivery men were well employed. Laundry workers are endeavouring to establish better conditions for themselves and have laid a new schedule of wages and hours of labour before their employers.

Transport.—Steamboat men, steamboat firemen, ship labourers and longshoremen were well employed, and street railway employees report similar conditions prevailing. Hack drivers, draymen, teamsters and expressmen were fully employed.

Unskilled labour.—Employment was good for this class of labour, but the supply is quite equal to the demand.

SETTLEMENT OF STRIKE OF IRON AND STEEL WORKERS AT SYDNEY, N.S., UNDER CONCILIATION ACT.

THE strike of the employees of the Dominion Iron and Steel Company at Sydney, N.S., which commenced on June 1, was terminated on July 22, as the result of a settlement effected by the intervention of the

Department of Labour under the Conciliation Act, 1900. This strike was the largest and most serious of any strike which has occurred in the Dominion during the present year. Between 1,500 and 2,000 em-

ployees were immediately concerned, and, for a considerable time after the strike commenced, work on the company's plant was all but completely suspended. During the month of July the militia were called in by the local authorities, and were stationed near the company's works from the 4th of July until the settlement of the dispute on the 22nd, the force at that time numbering between 150 and 200 men. The strike had a very depressing effect upon industrial and business conditions, not only in Sydney and Cape Breton but also throughout other parts of the Maritime Provinces, and had a settlement not been effected during the course of the month the losses to individuals and firms would have been most serious.

An account was given in the July number of the *Labour Gazette* of the causes of the strike and progress of the dispute during the month of June* ; also of the communications which had passed between the parties to the dispute and the government during that time.

Correspondence with the Government.

During the month of July additional correspondence took place between the committee acting on behalf of the strikers and the government, which resulted finally in the Deputy Minister of Labour being sent to Sydney to act as mediator. The following are copies of communications sent by wire between the parties to the dispute and the Minister of Labour, and which have a direct bearing on the settlement negotiations:—

Sydney, July 4, 1904.

Hon. William Mulock,
Minister of Labour.

Am instructed by Council P. W. A. to request government to appoint royal commission to investigate and settle labour difficulty here. Matters look threatening. Please reply immediately.

(Sgd.) JOHN MOFFATT,
G. Sec. P. W. A.

Ottawa, July 4, 1904.

John Moffatt,
Grand Secretary, P. W. A., Sydney, N.S.

Royal commissions are never issued in connection with labour disputes. Arbitration seems to me the appropriate procedure, and if

* See July (1904) number of the *Labour Gazette*, Vol. 5, No. I, page 87.

men wish it, I will gladly propose to company that mode of dealing with the difficulty, and government will continue to press company to accept arbitration.

(Sgd.) WILLIAM MULOCK.

Sydney, N.S., July 13, 1904.

Wm. Mulock,
Ottawa, Ont.

Whereas the P. W. A. requested the Minister of Labour to appoint a commission to investigate, decide and settle the Sydney labour dispute, we in joint meeting assembled in the Sydney rink regret that so far Minister Mulock has been unable to put our request in force. Moved John Moffatt, seconded Alex. McKinnon.

(Sgd.) JOHN MOFFATT.

Ottawa, July 14, 1904.

John Moffatt,
Grand Secretary, P. W. A.,
Sydney, C.B.

Government greatly regrets existence of trouble between Dominion Iron and Steel Co. and employees, and would rejoice if able to render any assistance in settling dispute. Was therefore greatly disappointed when, in answer to my telegram to you of June 3, offering friendly intervention of government to bring about harmony, you replied as follows: 'We prefer to be left to settle this dispute in our own way. Thanks for kind offer.'

Doubtless you read in press my letter to secretary, Sydney Board of Trade, renewing offer made to you whenever intervention of department desired. Labour Department is still willing to lend its best services towards work of settling dispute, and if agreeable to men, Deputy Minister King will at once go to Sydney to act as intermediary.

Am aware of no government having ever issued royal commission to settle a dispute between employers and employees. Such a procedure, uninvited by both parties to a labour dispute, would probably be regarded as a high-handed measure, calculated to intensify feeling and widen breach. Friendly arbitration and conferences appear to me the only method likely to bring about good understanding.

(Sgd.) WILLIAM MULOCK.

Glance Bay, N.S., July 14, 1904.

Hon. William Mulock,
Ottawa, Ont.

No action of government more calculated to intensify feeling and widen breach than placing armed force on steel plant without adequate cause. Wired you since June 3 to appoint commission. You replied favouring arbitration through intermediaries. Unconditional arbitration was proposed through steel company, they refused it. Did government ask them to arbitrate? What answer did they give?

(Sgd.) JOHN MOFFATT.

Ottawa, July 15, 1904.

John Moffatt,
Sydney, N.S.

Troops were not called out at Sydney at instance of the government. The militia law in force under all governments since the beginning of confederation, nearly forty years ago, provides the machinery for calling out the

force in case of threatened disorder. The responsibility for action devolves upon municipal authorities and local magistrates, who are charged with the preservation of order, and whom the law considered the best judges of what force is necessary for that purpose. The stipendiary magistrate and two other magistrates of Sydney, acting within their powers as laid down in the Act, applied to the commanding officer of the district, who was under the law bound to furnish the desired aid. Government has continuously advised representatives of company to submit dispute to arbitration and at an early stage had hopes that this might have been accomplished if assurances had been given that workmen were disposed to accept such a solution, but you positively refused to consider the matter. In your telegram of third June, in reply to my suggestion of arbitration, you said: 'We prefer to be left to settle this dispute ourselves in our own way. Thanks for kind offer.'

At a later stage, on July 4, I wired you as follows:—'Arbitration seems to me appropriate procedure, and, if men wish it, I will gladly propose to company that method of dealing with the difficulty, and government will continue to press company to accept arbitration.' I have never received any intimation from you in answer to that telegram that the men desired arbitration. In my telegram of yesterday I offered to send the Deputy Minister of Labour to Sydney. You have ignored that offer. In view of these facts, I am unable to understand the complaint now made that government have failed to interest themselves in obtaining a settlement. If your men are satisfied to make use of his services, I will at once send Deputy Minister of Labour to visit Sydney to do what he can to bring about better understanding.

(Sgd.) WILLIAM MULOCK,
Minister of Labour.

Dominion No. 1,

Via Glace Bay, N.S., July 16, 1904.

Sir William Mulock,
Minister of Labour,
Ottawa.

As apparently the government cannot appreciate or understand through correspondence real situation here, I would suggest that Deputy Minister of Labour be immediately despatched to Sydney for benefit of all concerned.

(Sgd.) JOHN MOFFATT.

Ottawa, July 16, 1904.

John Moffatt,
Dominion No. 1 (via Glace Bay),
Sydney, N.S.

Pleased to learn from your telegram just received that you have decided to accept offer contained in my telegram of 14th inst., and repeated in telegram of the 15th inst., that the Deputy Minister of Labour proceed to Sydney to render any possible assistance towards ending unfortunate labour dispute. He will leave for Sydney by first train, and in difficult and important task I bespeak hearty co-operation of both parties to dispute. Am telegraphing company to like effect.

(Sgd.) WILLIAM MULOCK,
Minister of Labour.

Ottawa, July 16, 1904.

J. H. Plummer,
Steel Works, Sydney, N.S.

Mr. King, Deputy Minister of Labour, at suggestion of government, is leaving for Sydney for purpose, if possible, of effecting settlement of difficulties between your company and men, and government expresses hope that both parties to dispute will give him their cordial assistance in his work.

(Sgd.) WILLIAM MULOCK,
Minister of Labour.

Conciliation Proceedings.

Mr. King, the Deputy Minister of Labour, left Ottawa on July 17, and arrived in Sydney on the evening of the 19th. On the following morning he met the committee acting on behalf of the strikers and had a lengthy interview with them, followed in the afternoon by a lengthy interview with the president and other officials of the Dominion Iron and Steel Company. These interviews were followed by others on the evening of the same day and the day following, with the result that Mr. King was in a position to inform the men and the company as to the attitude of the parties towards each other and to give certain definite assurances as to what would be done in the event of the strike being declared off.

Negotiations up to this point having justified the belief that a satisfactory settlement could be forthwith effected, a meeting of the sub-council of the Provincial Workmen's Association was called for the day following, the 22nd July, in order that the committee representing the strikers might make known to the sub-council the results of the negotiations conducted by the Deputy Minister between the parties, and that the sub-council might give a final decision in the matter.

After the sub-council had convened on the morning of the 22nd the committee of the strikers notified Mr. King in writing that the sub-council of the Provincial Workmen's Association was prepared to call the strike off in the event of the assurances given the committee being made to the sub-council in a form which they might regard as satisfactory. Mr. King thereupon wrote the company, setting forth what he

understood the company's attitude would be, and asked for a written assurance as to the correctness of his view of their representations. Having received from the president of the company a reply confirming his understanding of the company's position, he informed the grand secretary in writing of the assurances given him by the company. The written statement sent by Mr. King corresponding with the verbal assurances given to the committee of the strikers, the sub-council of the Provincial Workmen's Association declared the strike at an end, and an official communication to that effect was given to Mr. King by the grand secretary, Mr. Moffatt.

The Settlement.

The assurances given by the company to its employees, through the Deputy Minister, were to the effect that the company would (1) reinstate employees in their former positions in so far as their positions might have remained unfilled up to the conclusion of the strike—this, however, without prejudice to the right of the company to decline to re-employ men who, prior to June 1, had been deemed inefficient or ineligible because of misconduct; (2) give employment to as many men as possible by operating the plant to the fullest extent to which it was profitable to run it. In this connection the company stated that they could not hold out much hope of getting the coke ovens and blast furnaces at work for some little time, but that it would be the company's policy, as far as possible, to give employment at other work at the wages paid for such work to men temporarily deprived of their regular employment; (3) not discriminate against any man because of his being a member of the Provincial Workmen's Association, or for the reason solely of his having been a participant in the strike; (4) express to the local magistrates, who had called out the militia, the opinion that they would be justified in procuring the immediate recall of the troops stationed on or near the company's works.

No increases in wages were granted, and it was understood that in future the com-

pany would receive only committees of the company's own employees in connection with any questions arising on the plant, this being a policy which the company announced shortly after the strike commenced.

The Militia.

The calling out of the militia was a feature added to the strike situation during the month of July. As reported in the July number of the *Gazette*, there were practically no disturbances of importance during the month of June. When, however, the company made efforts early in July to recommence operations under the protection of the local police force, the police commissioners reported that the circumstances were such as to render the local police inadequate to give the protection required. At the request of three local magistrates, made to the district officer commanding, the local militia were called out, in accordance with authority given by statute, to assist in maintaining peace and order. On the following day the authorities asked for reinforcements, and about 200 additional troops were despatched from Halifax, arriving at Sydney early on the morning of the 6th. On July 12, on representation being made that the troops might be required for some time, the local militia were replaced by regulars from Quebec, so that the members of the militia would not be obliged to be absent from their customary employments for any length of time.

The replacing of the local militia by members of the permanent force, gave rise to the impression in some quarters that the government would meet the expenses of their maintenance while in Sydney, whereas the Act requires the municipality calling out the militia in aid of the civil authorities to bear all expenses in connection therewith. To prevent any misconception on this point, the Deputy Minister, while in Sydney, wired to Ottawa for exact information as to any understanding which might exist, and received a reply from the Honourable the Minister of Militia stating that all expenses in connection with

the troops, whether members of the local militia or permanent force would have to be borne by the municipality. The telegram received by the Deputy Minister of Labour from the Honourable the Minister of Militia and Defence was as follows:—

Ottawa, Ont., July 21, 1904.

To W. L. Mackenzie King,
Sydney, N.S.

There is no understanding of any kind exempting municipality from payment of any part of expenses connected with attendance of local militia and permanent force at Sydney. Consequently municipality must in compliance with the law pay all expenses such as pay of men, subsistence and transportation of both local militia and permanent force.

(Sgd.) F. W. BORDEN,
Minister of Militia.

Before the settlement of the dispute the Deputy Minister of Labour received assurances from the company that the company would use its influence to have the troops immediately withdrawn in the event of the strike being declared at an end, and assurance was also given by the local magistrates that they would authorize the immediate

withdrawal of the troops in the event of the strike being declared at an end. The strike was declared off at half-past six on the evening of Friday, July 22, and at 7 o'clock the following morning the regulars returned to Quebec.

The Numbers Affected.

Various estimates appeared in the press from time to time after July 4, as to the numbers of men who had returned to work after the company had decided to re-commence operations. On July 7, it was reported that as many as 300 men were at work, and this number was augmented from day to day until the date at which the strike was declared at an end. The Provincial Workmen's Association maintained that of those who had gone to work only a few were members of the association, and that until the day when the strike was formally declared at an end, practically all of its members had remained out.

REFERENCE OF THE DISPUTE BETWEEN THE GRAND TRUNK RAILWAY COMPANY AND THE ORDER OF RAILROAD TELEGRAPHERS UNDER THE RAILWAY LABOUR DISPUTES' ACT.

DURING the month of July a dispute between the Grand Trunk Railway Company of Canada and certain telegraphers in its employ was referred by the Honourable the Minister of Labour for settlement under the provisions of the Railway Labour Disputes' Act, 1903,* this being the first occasion on which application has been made to the Minister under the Act, for the reference of an existing dispute to a committee of conciliation or board of arbitration with a view to preventing a strike.

The action of the Minister was taken under the section of the Act† which provides that whenever a difference exists between a railway company and its employees, and it appears to the Minister that

a strike is likely to occur with consequent loss or danger to the public or employees of the railway, the Minister may cause an inquiry to be made into the difference and the cause of it by a committee of conciliation, mediation and investigation. The committee is to be composed of three members, one each being named by the employers and the employees who are parties to the difference, and the third, who is to act as chairman, by the two so nominated, or by the parties themselves if they can agree, the Minister being empowered to appoint the third or other members of the committee, in case the parties themselves fail to agree or appoint. The duty of the committee is, briefly, to assist in bringing about an amicable settlement to the satisfaction of both parties, and to report its proceedings to the Minister of Labour, the latter being empowered, in case of the failure of the

* Statutes of Canada, 3 Edw. VII., Chap. 55.

† Sec. 3.

committee, to further refer the difference to arbitration under terms set forth in the Act. §

The following is a brief statement of the circumstances under which action was taken in the case above mentioned by the Minister, and of the procedure of the Department of Labour in calling the Act into operation.

Origin of the Dispute.

The beginning of the dispute between the Grand Trunk Railway Company and its telegraphers dates back to May, 1903, in the latter part of which month a committee of the Order of Railroad Telegraphers representing the lines of the company east of the Detroit and St. Clair rivers, applied to their superintendent for a conference. This request, after a month's negotiations, was refused. Some time later, however, application was again made for a conference by a general committee representing the whole system, and, though the request was not immediately granted by the manager, a meeting after a lengthy correspondence was arranged to take place on November 4 between the committee for the lines east of Detroit and St. Clair rivers, and the manager of the company. For several days following that date the committee remained in conference with the manager and superintendents in Toronto, and, though no improvements in rules were granted, increases in the wages scale in 267 positions, amounting to \$1,012.96 per month, were granted. On November 10, however, the committee refused to accept this proposition and the conference was closed indefinitely. An effort to appeal the matter to the general manager some time after was unsuccessful, and, though correspondence took place between the parties during the winter months, no further conference was obtained.

Appeal to the Minister of Labour.

On April 25, 1904, an appeal was made to the Honourable Sir William Mulock,

Minister of Labour, to refer the dispute to arbitration under the Act, it being stated that all efforts for settlement of the difference between the parties themselves had been futile, and, as a consequence, a strike of the company's employees affected was imminent. Before applying the provision of the Act as to the constitution of the committee of conciliation, the Minister sought to arrange for further conferences between the parties and succeeded in bringing about a meeting between the general manager of the company and a representative of the men on June 1. At this conference it was agreed that Mr. McGuigan, the manager, would meet a committee from the lines east of the rivers and later a committee from lines west of the rivers, and any matters upon which it was then found impossible to agree were to be submitted to Mr. Hays, general manager. In the conference with the manager which followed and which was extended over six days, it was agreed that all points accepted by the parties were to be subject to final acceptance as a whole. It was shown that the manager had increased 139 salaries since last December, which had not been proposed by the committee, making a total of 495 increases, amounting to \$2,048.67. In addition also increases to 45 persons who received previous increases aggregating \$124.50 per month were offered, with 89 new increases, aggregating \$241.11 per month. Various improvements in the rules of the schedules were also granted, an agreement being arrived at on 19 points, including increases in the pay for attending lamps, for overtime and for relief agents. It was agreed also by the company to keep platforms clear of snow and to make certain increases in the main line territory.

On three points, however, viz., the payment for Sunday work, the allowance of an annual vacation without loss of time, and an increase in minimum salaries, no concessions were obtained.

An appeal with regard to these points was made to the general manager in accordance with the arrangement above mentioned, but no further concessions were ob-

tained, the heavy losses of the company, owing to the exceptional severity of the past winter, being urged as a reason why the proposed changes could not be granted.

A settlement of the differences not having been effected as a result of the conferences between the parties brought about by the intervention of the Minister, the application of the telegraphers for reference of the dispute to conciliation and arbitration under the Act was renewed, the telegraphers maintaining that a strike would ensue unless an immediate reference were made.

Reference Under the Act.

In accordance with the provisions of the Act the Minister of Labour, in ordering the establishment of a committee of conciliation for the settlement of a railway labour dispute, is required to notify each party to the difference in writing to name a member of this committee, fixing a time in the notice not later than five days after its receipt within which the appointment is to be made.* In the present case notice was served on the Grand Trunk Railway Company and on the telegraphers on July 21, and July 26 was named as the date prior to which the appointments had to be made. The full text of the notice served was as follows:—

DEPARTMENT OF LABOUR, CANADA.

Ottawa, July 21, 1904.

Notice is hereby given to the Grand Trunk Railway Company of Canada, hereinafter called 'the Company,' and to certain telegraphers employed by the said company, hereinafter called 'the Telegraphers' and hereinafter more particularly referred to ;

That it has been made to appear to me that a difference exists between the said company and the said telegraphers, being the employees of the said company ;

That the said company and the said telegraphers are unable satisfactorily to adjust the said difference ;

That by reason of such difference remaining unadjusted a strike on the line of railway of the said company is likely to be caused, or that the regular and safe transportation of mails, passengers or freight may be interrupted, or that the safety of any person or persons employed on any train or car of the company, is likely to be endangered ;

That application has been made to me on behalf of the said telegraphers to cause an inquiry

to be made into the said difference and the cause thereof, and for that purpose to establish a committee of conciliation, mediation and investigation to be composed of three persons to be named in the manner provided by the Railway Labour Disputes Act, 1903 ;

That I have decided to cause such inquiry to be made into the said difference, and the cause thereof, and for that purpose to establish such committee.

I, therefore, hereby notify the Grand Trunk Railway Company to name to me a member of the said committee on or before the 26th day of July, 1904.

And I also hereby notify the telegraphers to name to me a member of the said committee on or before the 26th day of July, 1904.

(Sgd.) WILLIAM MULOCK.

Minister of Labour.

Two copies of the above notice were sent to representatives of the company and of the telegraphers with a request in each case that one copy be returned to the Department of Labour endorsed with the acceptance of the party on whom it had been served, the duplicate original being retained. In both cases the service in question was duly accepted.

Appointment of Members of the Committee.

A communication was received from the telegraphers on July 22, notifying the department that they had appointed Mr. J. H. Hall, Ottawa, Ont., as their representative on the conciliation committee, and the company on July 26, named Mr. Geo. F. Shepley, K.C., Toronto, as its representative.

Further Proceedings.

Notices were sent by the department to both of the persons named informing them of the appointments to the committee, and requesting that they should meet at the Department of Labour, Ottawa, on Friday, July 29, for the purpose of appointing the third member of the committee. The parties to the dispute themselves were also notified on the same day to a like effect.

In accordance with this notice at 10 o'clock on Friday, July 29, Mr. D. Campbell, 3rd vice-president of the Order of Railroad Telegraphers, and Mr. J. H. Hall, the appointee of the telegraphers on the committee of conciliation, appeared at the office of the Deputy Minister of Labour.

* 3 Edw. VII., chap. 55, sec. 3.

The Minister of Labour was present and presided, the Deputy Minister acting as secretary. There was no representative present on behalf of the Grand Trunk Company, but a telegram from the firm of Macdonald, Shepley, Middleton and Donald, which had been received, was read, as follows :—

Toronto, July 29, 1904.

Hon. Sir William Mulock,
Minister of Labour, Ottawa.

Replying to telegram, Mr. Shepley at Pacific Coast, returning, leaves Victoria 29th, arriving here 4th or 5th. Mr. Biggar advised of this last night.

(Sgd.) MACDONALD, SHEPLEY,
MIDDLETON & DONALD.

Mr. Hall and Mr. Campbell, of the telegraphers, suggested, in order to meet the convenience of the Grand Trunk Railway Company and its representative Mr. Shepley, the time for naming the third member of the committee by the parties or their representatives be extended to Monday, 8th August, at 10 a.m., at the Department of Labour, Ottawa. The Minister approved of this recommendation, and agreed that it be acted upon.

Regulations under the Act..

Section 24 of the Act provides that the Minister of Labour may from time to time make or alter regulations as to the time within which anything authorized in the Act shall be done, or as to other matters which appears necessary to the effectual working of the Act. Under this provision, the Minister on July 28 issued a body of regulations which appeared in the *Canada Gazette* of the following day. The full text of the regulations in question as published

in the *Canada Gazette* for July 29 is as follows:—

RAILWAY LABOUR DISPUTES.

The Honourable the Minister of Labour, in virtue of the provisions of the Act 3 Edward VII, chap. 55, intituled 'An Act to aid in the Settlement of Railway Labour Disputes,' hereby makes the following regulations :—

1. The person to be named as the third member of the Committee of Conciliation, Mediation and Investigation, referred to in the third section of said Act, shall be named by the parties to the difference, or by the two members of such committee appointed thereto by the said parties respectively, within three days after being required by the Minister so to do, or within such further time as, on application to the Minister and cause shown, he may grant.

2. The time to be allowed the committee under section four of the Act to effect an amicable settlement by conciliation and mediation, and to report the same before the difference may be referred to arbitration shall not exceed seven days from the date of the establishment of the committee, or such additional number of days as the Minister from time to time, on cause shown, may grant.

3. If the committee fails to effect an amicable settlement the parties to the difference shall, within three days after such failure, signify in writing to the Minister whether or not it is acceptable to them that the said committee act as a board of arbitrators.

In case of objection by either party to its representative on the said committee acting as a member of the board of arbitrators, or to the chairman of said committee being a member of the board of arbitrators, a new representative or new representatives as the case may be on the board of arbitrators shall be appointed in place of the member or members of the committee objected to in like manner and time as is provided in respect of the appointment of the original members of the said committee.

4. Whenever it becomes necessary to appoint a successor to a member of the committee or board, such appointment shall be made in like manner and time as is provided in respect of the original member of the committee or board.

5. Any extension of time as aforesaid may be granted either before or after the expiry of the time specified as aforesaid, and shall be in writing signed by the Minister.

W. MULOCK,

Minister of Labour.

Department of Labour, Canada,
Ottawa, 28th July, 1904.

DOMINION LEGISLATION AFFECTING LABOUR, 1904.

(To be continued.)

ON July 18 final assent was given at Ottawa by the Deputy Governor General to a number of measures passed during the present session of the Dominion Parlia-

ment, making the total number of Bills assented to since the opening of parliament ninety-nine. Of these the great majority were Acts relating to the incorpora-

tion of railways or industrial companies. though five measures may be said to have a direct bearing on the condition of labour.

The National Transcontinental Railway Act.

The ratifying of the agreement of February 18, 1904, between the Government and the Grand Trunk Pacific Railway Company, for the construction of a new transcontinental railway will exercise a very far-reaching influence on the state of employment in Canada, not only temporarily during the construction of the line, which will considerably exceed three thousand miles in length, but permanently in connection with the operation of the road.

With regard to the former branch, the present Act provides for the simultaneous commencement at Moncton, Quebec, the point of junction with the branch running northward from near North Bay, and at Winnipeg, of construction operations on the Eastern Division, the work to be pushed forward in such a way that the sections between Winnipeg and Quebec, and between Quebec and Moncton shall be completed as nearly as practicable at the same time. The balance of the Act relates entirely to the terms of the agreement between the government and the company, the chief changes in which, from the original agreement signed on July 29, 1903, in so far as they are of primary concern to labour, are as follows:—

The time for the completion of the western division is extended to December, 1911, and 'strikes' are added to the list of circumstances which may be regarded as legitimate excuse for delay.

In the event of default by the company in the payment of interest on the prairie and mountain section bonds, the government is entitled to take possession of the western section of the railway through the appointment of an agent or manager whose duties shall be to manage the divisions, receive the revenue thereof, disburse working expenses, and distribute any surplus among the bondholders. This officer is to be appointed by the government with the

concurrence of the company, or, if they are unable to agree, by a majority of the Supreme Court. Government possession is to terminate as soon as the surplus amounts to a sufficient sum to meet the arrears of interest.

With regard to the operation of the eastern division, an addition is made to the provision relating to the renewal of the lease to the company, whereby, in the event of the government determining to undertake the operation of the division on the expiry of the 50 year lease to the company, the latter is to be granted such running rights for fifty years as may be necessary to continuity of operation between the western division and other portions of the company's system and the Grand Trunk system. The government engages to take over any branch lines that may be constructed at the end of the lease should it decide to operate the division.

The construction of the eastern division by the government is to be in charge of four commissioners instead of three, as originally provided.

Responsibilities of Pilots, Shipping Casualties, &c.

The remaining four measures referred to as of interest to labour relate primarily to water transportation companies and their employees. Of these the most important was an Act to amend the Shipping Casualties Act of 1901, which, after defining 'pilot' as 'any person not belonging to a ship who has the conduct thereof,' considerably enlarges the scope of the old Act in the matter of preliminary inquiries into shipping casualties. As the law now reads, if the officer appointed by the government to make a preliminary investigation of this nature finds that the misconduct or default of a pilot was responsible for the casualty, he may suspend the license of the pilot for a period of three days unless the Minister notifies the pilot within that period that a formal investigation into his action is to be held. It is further added that the license of a pilot is subject to cancellation and suspension in the same way as the

certificate of a master, engineer or mate, and the pilot may be fined a sum not exceeding half of his earnings during the previous year, though when an investigation or inquiry into the conduct of a pilot has been once made under this Act the matter may not be taken up again under the 'Pilotage Act.'

The employment of pilots is also affected by an Act amending the Pilotage Act, which constitutes the Minister of Marine and Fisheries as the supreme pilotage authority for that district whenever it appears in the opinion of the Governor in Council to be in the interest of navigation. The Minister, however, may not sit as a tribunal for the trial of offences of which pilots may be accused under the Pilotage Act.

Prevention of Accidents.

Two other Acts of the session were framed with special reference to the prevention of accidents. By an Act to amend the Act respecting the navigation of Canadian waters, the Governor in Council is given power to enact new regulations or repeal existing regulations for preventing collisions in the inland waters of Canada, determining also the waters to which such regulations shall apply. In an amendment to the Steamship Inspection Act of 1898, an addition is made to the Act giving the Governor in Council power to make rules and regulations for the inspection of the machinery and equipment of steamboats propelled by steam, gas, naphtha or electricity, or any other mechanical or chemical power.

ONTARIO LEGISLATION AFFECTING LABOUR, 1904.

THROUGH the courtesy of the Provincial Secretary for Ontario, a copy of the statutes passed during the session of the Ontario Legislature of the present year was received at the Department of Labour, Ottawa, during July, distribution having been delayed by the fact that the third readings of the bills were burned in the extensive fire which took place in Toronto shortly prior to the prorogation of the Legislature on April 26. A reference to the Acts, which are of particular interest to labour, is as follows :—

The Factories' Act Amended.

Perhaps the most important enactment of the year, from the standpoint of labour, was the amendment of the Factories' Act¹ which introduced a number of alterations and additions to the original measure. These may be classified as follows:—

Mode of wearing hair by female employees.—By a new section² female employees in factories are required, while at

work, to wear their hair rolled or plaited and fastened securely to their heads, or else confined in a close-fitting cap or hat, so as to lessen the danger of contact with moving machinery. Managers or those in charge of factories are required to see that their employees are notified of this provision of the Act.

Hours of labour.—The section of the Act ~~regulating the hours of labour of children and females~~ and forbidding these classes to be employed for more than ten hours a day or sixty hours per week, unless a different daily apportionment of working time is made to allow of a shorter day on Saturdays, has an addition made to it prohibiting their employment later than the hour of half-past six in the evening, unless by the special written permission of the factory inspector.³

Sanitation.—Several changes and extensions in the Act are put into force with regard to the proper sanitation of factories, the two leading sections of the original

(1) Chapter 26.

(2) Chap. 26, sec. 1.

(3) Chapter 26, sec. 2.

measure in this connection being repealed, and more comprehensive provisions inserted in their place. A sufficient number of water-closets, including separate sets with separate approaches for male and female employees, must be provided, the owners of factory buildings being held responsible for this, and for the proper maintenance of drains and plumbing and a supply of pure drinking water.⁴ Employers on the other hand, whether owners or tenants of factory buildings or not, are held responsible for keeping their premises in a clean and sanitary condition and in proper repair. Factories also must be kept at a temperature above 60 degrees Fahrenheit by employers and properly ventilated, mechanical means being employed to insure the latter in factories in which dust is generated, and provisions to prevent overcrowding, (one employee to have three hundred feet of room space) being expressly inserted. The inspector may also require a sufficient number of spittoons to be placed by employers in factories, with a supply of wholesome drinking water with proper drinking cups.⁵

Regulations as to elevators.—The provision of the original Act regarding the protection of hoistways by trap doors, self-closing hatches, safety catches, &c., is repealed, and a much more comprehensive paragraph inserted in its place. In addition to the protective devices named in the original provision, automatically-closing gates of specified dimensions are now to be allowed; shafts not guarded by gates must be protected by enclosures at least six feet high; the operating ropes of elevators must be secured with locks; the word 'dangerous,' in letters not less than four inches high, must be affixed on the bottom rail of every gate where it will be plainly visible from the outside; and tops of elevator platforms must be provided with a guard to protect the occupants.⁶

Health of Work-people, Fair Wages, &c.

The health and wages of work-people are expressly protected by a section inserted in

an Act 'respecting aid to certain railways'⁷ which provides that in the case of the two railways concerned, viz., the Huntsville and Lake of Bays Railway, and the Grand Trunk Pacific Railway, camps engaged in construction work must have proper sanitary regulations under the provincial Board of Health, with accommodation for patients suffering from a contagious disease. The wages of the same labourers, it is further provided, must be such as are currently payable to workmen engaged in similar occupations in the same district. Only fair and reasonable prices for board, clothing and other necessities may be charged by these companies to the men in their employ engaged on construction work, any exorbitant charge being deducted from the service.

Aid to Certain Industries.

Among other measures passed for the purpose of assisting certain industries, chapter 19, which relates to the Algoma Central Railway and the associated industries of Sault Ste. Marie, and chapter 3, giving further encouragement to the Sugar Beet Industry, are important. Under the former the government guarantees a loan of \$2,000,000, payable on May 1, 1906, to the Canadian Improvement Company, the corporation which undertook the reorganization of the associated industries at Sault Ste. Marie on the default of the Lake Superior Consolidated Company. The conditions required before the delivery of the guaranty are, the completion of construction and equipment of the Algoma Central, as far as the Canadian Pacific Railway, the operation of the railway for the carriage of passengers and freight, the organization of a company to take over and operate the associated industries at Sault Ste. Marie, Ont., and the providing of security for the government. In the Act to encourage the Beet Sugar Industry, the sum of \$150,000 is voted in addition to the special fund of \$225,000 previously set apart for the purpose of encouraging the growth of sugar beets and the establishment of factories for the manufacture of sugar.

(4) Chapter 26, sec. 3.

(5) Chapter 26, sec. 4.

(6) Chapter 26, sec. 5.

(8) The amount of bounty is fixed at $\frac{1}{2}$ cent per pound during the first five years' operation of a factory, instead of the graded scale previously in force. At the same time the length of time during which companies must pay the specified rate of $33\frac{1}{3}$ cents per ton for beets is enlarged to cover the second, fourth and fifth years of the operation of the factory, instead of only the second and third years as previously.

Encouragement of Colonization.

The section of the Act above referred to 'respecting aid to certain railways,' requires the Grand Trunk Pacific Railway Company to settle at least 400 male colonists every year for ten years after January 1, 1906, each colonist to build a house fit for habitation, sixteen feet by twenty feet, and other necessary buildings, and in other respects to fulfil the conditions of a *bona fide* settler. Workmen employed in constructing the road are not to be regarded as settlers brought in by the company. (9) In the Act granting aid to the James Bay Railway, provision is also made as to the rates to be charged settlers for transportation. (10) In other cases the placing of a certain number of settlers by railway companies to whom aid is given is provided for. (11)

The time allowed to locatees under the Act, provided for the appropriation of lands for volunteers who served in South Africa or on the frontier in 1866, wherein to have proved that they are the persons designated under the Act, is enlarged by six months, namely, from January to July, 1903. (12)

The sum of \$19,325 was included in the estimates for 1904 to defray expenses of colonization and immigration. (13)

The property of Immigration Aid Societies is mentioned in the list of exemptions under the new Assessment Act. (14)

Provisions respecting Aliens.

No alien, it is expressly provided, shall be employed in the construction of the Grand Trunk Pacific and the Huntsville and Lake of Bays Railways in contravention of the Dominion Alien Labour Act, or of the provisions of the Railway Act of Ontario, respecting the employment of alien labour. (15) So also in the Act respecting aid to the James Bay Railway it is stated that subjects of any country which has an Alien Labour Law in force against Canada must not be given employment on construction work. (16) In certain Acts of incorporations the rights of aliens to be shareholders, whether resident in Canada in person or not, and to vote on their shares, and to hold office as directors of the companies, are laid down. (17)

Weather Insurance.

An important measure is the new Act respecting weather insurance, which is to be read and construed in conjunction with the Provincial Insurance Act, and is of more particular interest to the agricultural industry. Under its provisions mutual companies to insure agricultural property against loss from atmospheric disturbances, &c., may be organized, following the same procedure as an ordinary mutual insurance company. No contract, however, may be undertaken by a weather insurance company for a term exceeding three years. Under 'agricultural property' is included farm buildings, and their contents, tools, implements, wagons, harness, furniture, clothing, provisions, libraries, live stock, growing crops, crops severed from the land, fruit trees, plants, live or standing timber, &c. (18)

Of special interest also to the agricultural industry is an Act amending the law respecting the destruction of noxious weeds. (19) Owners or occupants of farms are now required to cut down weeds to the centre line of the highway.

(8) Edw. VII., Chap. 11.

(9) Chap. 18, sec. 15.

(10) Chap. 20, sec. 7, sub-sec. 10.

(11) Chap. 21, sec. 5.

(12) Chap. 6.

(13) Chap. 1.

(14) Chap. 23, sec. 4.

(15) Chap. 18, sec. 6.

(16) Chap. 20, sec. 7, s. s. 5.

(17) Chap. 81, sec. 2; chap. 84, sec. 13.

(18) Chap. 16, sec. 2.

(19) Chap. 27.

Under the Assessment Act, the income of a farmer derived from his farm, all fixed machinery used for manufacturing or farming purposes, with certain exceptions, is declared exempt from taxation. (20)

Taxation of Railways, Telegraph Companies, &c.

The taxation of railways is dealt with under a special Act amending the Supplementary Revenue Act of 1890. (21) Until the present year railway companies in Ontario were taxed a maximum of \$5 per mile for each mile of railway between terminus and terminus, the measurement not including switches or sidings, or double measurement in case of double tracks. Electric railways were exempted. Under the new Act steam railways are required to pay a tax of \$30 per mile for one track, and \$10 per mile for each additional track in any county of the province, and \$20 per mile for one track, and \$5 per mile for each additional track in districts outside of county organization. In cases, however, where the railway is less than one hundred and fifty miles in length from terminus to terminus, only \$15 per mile for one track, and \$5 per mile for each additional track is to be charged. As under the old Act, the total amount of taxation is never to exceed the sums named, even though more than one company owns or operates trains on the line. Switches and sidings also, as before, are not included in the measurement, and by implication the provisions do not refer to electric railways or tramways.

Reference has been made about to various provisions of the new Assessment Act. (22) An important section of this Act deals with the taxation of telegraph and telephone companies by cities, towns, villages and townships, full details being included as to the computation of the length of wires, &c., and the tax being made a lien on the lands of the company. (23)

Exemption of Personal Income.

Under the same Act personal income is exempt from taxation to the amount of \$1,000 in cities and towns having a population of 10,000 or over, and the sum of \$700 in municipalities of less population, provided that the person is a householder. In the case of those who are not householders, income to the amount of \$400 is exempt. (24) Employers are required to furnish assessors full information as to the names and places of residence, &c., of their employees in cases where the income of the latter are liable to taxation. (25)

Sunday Operation of Electric Railways Prohibited.

By a statute law amendment it is forbidden to operate a street railway, tramway or electric railway on Sunday, except for the purpose of keeping the track clear of snow and for other work of necessity, an exception being made in the case of companies which have, prior to April 1, 1897, regularly run cars on Sundays, and all such as have had the right to run cars on Sundays secured by charter or by special Act of the legislature. The penalty for violation of these provisions is placed at \$400, to be divided equally between the plaintiff and the municipality in which the train or cars start. The conductors on cars run in violation of the Act are also liable to a penalty of not more than forty dollars or less than one dollar and costs. (26)

Miscellaneous.

A few miscellaneous provisions may be noticed, as follows:—

An addition is made to the Education Department Act allowing an apportionment of money to be made for free text books in rural districts. (27)

The Act respecting statute labour (28) deals in detail with exemptions, performance, commutation, &c.

An amendment to the Act respecting innkeepers, provides that keepers of livery

stables or boarding stables shall have a lien on horses or vehicles left in such stables for the amount charged for boarding or keeping such vehicle. (29)

(29) Chap. 10, sec. 44.

A notable feature of the session was the number of Acts passed relating directly or indirectly to transportation companies. These in all numbered twenty-nine, of which ten had to do with electric railways of an interurban character.

THE QUEBEC LAND ACT, 1904.

FOR some years past complaints have been reported in connection with the administration of the Crown Lands' Act in the province of Quebec, arising for the most part out of the relations of settlers and the holders of timber licenses in the newer sections of the province. In order to secure a proper understanding of the problem as a preliminary to legislation, a commission was appointed in 1902 under a special Act of the Legislature* 'to investigate and report on matters pertaining to colonization and the forest industries of the province.' This commission, after an extended inquiry, reported to the Legislature during April, 1904† and on June 2, an Act 'to amend the law respecting the sale and management of public lands, woods and forests' received the assent of the Lieutenant-Governor. A brief *resume* of the more important alterations in and additions to the previous legislation affected by this new measure will be found under the following headings:—

Inspectors of Crown Lands and Agencies to be Appointed.

An addition is made to the statute authorizing the appointment of an inspector of Crown lands and timber agencies, and fully defining his duties, as to number of visits to be paid, examination of agents' books, reports, &c. The agency service of the department, it may be remarked, was severely condemned by the commission in

its report, the majority of the officers being described as careless and negligent.

Grants to Parents of Twelve Children.

The section of the original Act dealing with free grants of public lands has an addition made to it to cover the case of such as are entitled to a grant of land in virtue of the Twelve Children's Act, but who have not as yet selected their lots. These may obtain a gratuitous grant of one hundred acres for the purpose of clearing and cultivating the same, or they may select a lot in a territory covered by a timber license in their own or nearest unorganized township, and obtain from the holder of the license, upon complying with certain prescribed formalities, a premium of \$50. For example, they must declare whether they wish to settle on the land or to obtain a payment of the premium; the timber license holder being required in the latter license, under penalty of cancellation of his license, to forward the sum to the department within thirty days. On payment of this premium the lot may not be cultivated within fifteen years, remaining in the license during that period unless the license is sooner cancelled.

Classification and Sale of Public Lands.

In connection with the sale and management of public lands by the Lieutenant-Governor in Council, a provision is added permitting a classification of the public lands be made into: (1) Lands suitable for cultivation; and (2) Lands for forest industries. No sale of lands for colonization purposes, once this classification is carried

* 2 Edward VII, 1902. Chap. 3.

† A review of this report, together with a statement relating to the organization and proceedings of the commission, was published in the May, 1904, issue of the *Labour Gazette*, at page 1125.

out, is to be made outside of lands suitable for cultivation and classified as such.

The old provisions with regard to the granting of location tickets by agents are abolished, and a section included requiring agents to sell to any *bona fide* settler who applies for it a quantity of land not to exceed two hundred acres out of the land classified as suitable for cultivation. A declaration under oath as to his *bona fides* is required of the settler. With regard to registering transfers, several alterations of a more or less technical nature are made in the law, the scope of the Act being considerably enlarged. It is also forbidden that anyone should obtain by means of transfers letters patent from the Crown for more than three hundred acres of land for colonization purposes, and transfers of lots obtained by the same person for more than three hundred acres before the issue of the letters patent are null.

Several verbal alterations are made in the provisions referring to cancellation of sales, grants, leases, &c.

Obligations of Settlers.

The *bona fides* of settlers is secured by a new provision compelling the fulfillment of the obligations specified in the location tickets. A declaration must be made by the settler within a year and fifteen days, counted from the day of the location ticket, to the effect that he has fulfilled these conditions, and this must be renewed each year during the period allowed the settler for clearing his land until the letters patent are issued. On the failure to carry out these provisions the sale of the lot may be declared null by the department.

Obligations of Saw-mill Owners.

An important addition to the section of the Act which deals with woods and forests on public lands is that of a title and article requiring saw-mill owners and every person carrying on a lumber business, other than holders of licenses from the Crown, to declare under oath, if so requested by the government, whence they have obtained

the timber owned by them or in their possession, and to prove that such timber is exempt from Crown dues. Failure of such proof is to be considered a valid reason for the seizure of the timber as having been cut on Crown lands in contravention of the Act.

The Cutting of Timber by Settlers.

The cutting of timber by settlers is dealt with in the new Act by rescinding the various provisions previously enforced with regard to the collection of dues, &c., and permitting the settler to dispose of his timber without further obligations, provided the timber is cut in good faith during clearing operations.

The provision relating to the taking out of timber licenses, such lots as have been sold for settlement, has an important addition made to it, for the purpose of further defining the relations between timber license holders and colonists. A timber licensee is now required to give to settlers, during the period which their license remains in effect, the preference to cut for him the merchantable timber on the settlers' lots at the same price he is paying for similar work in the locality. At the same time limit owners are entitled to purchase by preference all merchantable timber cut in the clearing process by the settler at the same price paid by timber holders in the same locality.

Sugaries, Firewood Lots and Building Timber.

Licenses to work sugaries on Crown lands may be granted by the government in territory under a timber license. Permission may also be granted to cut firewood and timber for the construction of houses, buildings and fences, in the case of any person needs the same for himself and not for purposes of trade. Public lands not under license may be sold for industrial purposes by the Lieutenant Governor in Council.

Protection of Forests against Fires.

As a final provision, several new clauses are added to the Act to insure improved

protection of the forests against fire. A change is made, in accordance with the recommendation of the commission, in the period during which settlers are permitted to set fires for clearing purposes. Previously the setting of fires was prohibited only between June 15 and September 15. Under the new provision the prohibition is extended so as to cover the periods from June 15 and September 1, and from November 15 to March 15. The power to prohibit the setting of fires in times of continued drought was also enlarged by withdrawing any mention of a specified period within which such interference by the Minister is permitted, though the Minister may allow the setting of fires after heavy rains during the prohibited seasons. In defining the precautions to be observed by persons making fires, an enlargement is made in the Act whereby the precautions prescribed are to be taken at all times in the year instead of between the 15th day of May and the 15th of October, as previously required. Similarly the authority of the Commissioner of Crown Lands to employ men to carry out this provision of the Act with regard to fire protection is made to apply to the whole year instead of the period between April 1 and November 1. The repeal of certain sections of the old Act has also the effect of increasing the efficiency of the system of fire protection in the forest lands of the province.

The new Act went into operation from the date at which it was assented to.

PROCEEDINGS OF THE ROYAL COMMISSION TO INVESTIGATE THE IMPORTATION OF ITALIAN LABOURERS INTO MONTREAL.

PROCEEDINGS under the special commission* issued on the recommendation of the Honourable the Minister of Labour to His Honour Judge Winchester, to inquire into the circumstances attending the large

importation of Italian labourers into the city of Montreal during the present year and the methods employed in encouraging this immigration, were begun during July immediately upon the conclusion of the taking of evidence in the matter of the alleged employment of aliens by the Grand Trunk Pacific Railway Company.

The Taking of Evidence.

The taking of evidence was entered upon by the Commission on July 21, at 10 a.m., Mr. H. M. Mowat, K.C., representing the Dominion Government as counsel, and the evidence being recorded by Mr. G. G. V. Ardouin of the staff of the Department of Labour, Canada. Counsel were also present on behalf of the Italian Immigration Aid Society of Montreal, and of certain employment agencies whose operations had been called into question. Sittings were continued in the afternoon of the same day, and on the mornings and afternoons of the 22nd, 23rd, 25th and 26th of the month. In all over sixty-three witnesses were examined, among them being the Italian Consul, the Mayor of Montreal, the President of the Italian Immigration Aid Society, Mr. Honore Gervais, M. P., Messrs. Antonio Cordasco and Alberto Dini, Italian Employment Agents, Mr. G. E. Burns, special labour agent of the Canadian Pacific Railway Company, as well as a number of Italian labourers, and others.

The report of the commissioner will be prepared and forwarded to the Minister of Labour as soon as the report on the employment of aliens by the Grand Trunk Pacific is completed.

PROCEEDINGS OF THE ROYAL COMMISSION TO INVESTIGATE THE ALLEGED EMPLOYMENT OF ALIENS BY THE GRAND TRUNK PACIFIC RAILWAY COMPANY.

THE investigation begun by His Honour Judge Winchester, under the term of the Royal Commission issued on

* A special reference to the appointment of the Commissioner appeared in the *Labour Gazette* for July at page 55.

May 23* into the alleged employment of aliens in connection with the surveys on the Grand Trunk Pacific Railway, was continued during July, witnesses being examined at Ottawa on July 2, at Montreal on July 4, at Toronto on July 8, at Kingston on July 16 and following days, with a sitting at Montreal for the purpose of certain re-examinations on July 20.

In all over thirty witnesses were examined, in addition to the ninety whose evidence was taken during June, together with a number of re-examinations, the general manager and other officials of the company being included in the latter.

Interim reports by the commissioner were forwarded during the month to the Department of Labour, naming a number of employees and officials of the Grand Trunk Pacific as liable to deportation. These reports were transmitted at once to the Department of Justice for the purpose of securing the deportation of the parties therein named, and warrants were issued by the Attorney General, under the Act for their apprehension and deportation.

A further session of the commission will be held in Toronto during August.

REPORT OF CANADIAN MANUFACTURERS' ASSOCIATION ON CONDITIONS OF EMPLOYMENT IN CANADA.

DURING the month of July a statement was received at the Department of Labour from the Secretary of the Canadian Manufacturers' Association relating to the supply of skilled labour at present available in Canada. According to this statement a total of 6,717 additional work-people are required. The report relates only to the establishments of members of the association.

By provinces the demands of the associated members for additional help are stated as follows:—

Province.	Men.	Boys.	Females.	Total.
Ontario.....	1,494	816	2,979	5,289
Quebec.....	380	32	179	591
N. S., N. B. & P. E. I.....	386	11	44	441
Manitoba.....	6		135	141
British Columbia	255			255

In the following table the reported requirements of members, according to the different branches of the manufacturing industry, are set forth:—

Branches.	Men.	Boys.	Females.	Total.
Agricultural implements.	87	25	...	112
Beet sugar industry.....	200			200
Biscuits and confectionery.....		9	35	44
Boat and canal builders..	11	1	...	12
Boots and shoes.....	78	4	115	193
Brooms and brushes.....	6		4	10
Buttons and buckles.....			12	12
Canners.....	320	510	2,100	2,931
Carriage and sleighs.....	57			57
Clothing.....	25	8	357	390
Cordage.....	24	7	82	113
Cottons.....	24	20	144	180
Electrical supplies.....	20	10		30
Flour and meal.....	7			7
Furs.....	25	3	53	81
Glassware.....	2			2
Iron and steel.....	316	69		385
Jewellers and silversmiths	55			55
Leather and manufactures	73			73
Lumber.....	443			443
Paints, oils, &c.....	9			9
Paper and manufacturers.	66	21	42	129
Pianos and organs.....	19	29		48
Pork packers.....	10			10
Printers, lithographers & engravers.....	39	17	33	89
Stoneware.....	160			160
Tinware.....	3			3
Woodenware.....	166	39		205
Wire goods.....	8	10	16	34
Woolens.....	56	59	176	291
Miscellaneous trades.....	46	3	168	217
Labourers.....	166	12		178
Total.....	2,521	859	3,337	6,717

UNIONS FORMED DURING THE MONTH OF JULY, 1904.

The department has received notice of the following organizations having been formed during the month of July, 1904:—

* Special articles referring to the appointment of the Commission and its proceeding during month of May and June appeared in the *Labour Gazette* for June at page 1228 and in *Labour Gazette* for July at page 55.

Quebec—

Peauport—Masons.

Quebec—Tailors.

Ontario—

St. Catharines—Metal Workers.

Manitoba—

Brandon—Carmen.

**TRADE DISPUTES AND ARBITRATION
IN GREAT BRITAIN.**

There has been a steady decrease in the number of trade disputes in Great Britain for some years past. In the report of the Labour Department of the British Board of Trade on strikes and lockouts in the United Kingdom in 1903, received at the Department of Labour during July, it is stated that during that year there were only 387 disputes, while the average for the five years, 1898 to 1902, was 632, and the average for the previous five years was 816. The number of working people affected by disputes last year was 117,000, being about one per cent of the entire industrial population, exclusive of agricultural labourers and seamen. The loss of time through these causes amounted to about 2,300,000 working days, which was less than one-fourth of a day per head. The most important causes of disputes were questions of wages. Those arising out of questions of trade union principle were fewer than in the preceding year, but comprised nearly one-fifth of the total number. Disputes as to hours of labour were of slight importance, and were chiefly concerned with the arrangement of hours. The proportion of work-people who were entirely successful was nearly 31 per cent, while 47 per cent ended in favour of the employers, and over 20 per cent ended in a compromise. Out of 49,557 work-people engaged in disputes as to wages, only about 8 per cent were entirely successful, and 71 per cent failed. The trade most affected by disputes was that of coal-mining, which involved over 60,000 work-people, and accounted for a loss of about 1,215,450 working days.

With regard to the methods of settlement, 266 were terminated through negotiations

between the parties concerned, 18 by arbitration, and 8 by conciliation. In 36 cases the strikers returned to work on the employers' terms, in 47 cases they were replaced by other work-people, in 5 cases the works were closed, and 7 disputes remained unsettled, or ended indefinitely.

Conciliation and Arbitration.

There were 21,768 work-people affected by the 26 disputes which were settled by conciliation or arbitration. Of these disputes, 6 were settled by arbitration under the Conciliation Act of 1896, 7 were brought to an end through trade boards of conciliation and arbitration, and 13 through the mediation and arbitration of individuals. The work of conciliation and arbitration, however, was not confined to the settlement of disputes which had culminated in strikes and lockouts, but consisted largely in arranging differences before a stoppage of work had taken place. Seven cases not involving stoppage of work were settled by arbitration under the Conciliation Act, and 1,633 cases were considered by 73 permanent boards, of which 788 cases were settled by the boards or by arbitrators appointed by them; 785 were withdrawn, referred back or settled independently of the boards, and 60 were still under consideration at the end of the year. The great influence exercised by these boards is shown in the fact that one case affected 270,000 work-people engaged in the coal trade of England and Wales, and the changes in wages arranged by the coal trade boards in Durham and South Wales affected 107,500 and 150,000 persons respectively.

Various other means exist for the settlement of differences by conciliatory means. In the cotton weaving industry, disputes are referred to a joint committee of employers and operatives, which is not authorized, however, to pronounce a final decision on the matters in question. In the cotton-spinning trade of Lancashire disputes are referred to the secretaries of the local employers' and operatives' organizations, and failing settlement by them, to a joint committee of these organization, and

finally to a joint committee of the Federation of Master Cotton Spinners' Associations and the Amalgamated Association of Operatives' Unions.

CANADIAN TRADE AND REVENUE DURING THE MONTH OF JULY, 1904.*

The following article, intended as supplementary to the general summary of industrial labour conditions, is based on statistics furnished by courtesy of the Department of Customs and Finance, Canada, on the latest weekly reports issued by the Department of Trade and Commerce, Canada, on current information collected from reliable trade and financial journals, and on the references contained in the reports of correspondents of the *Labour Gazette* published in the present issue.

Though the month of July was characterized on the whole by a falling off in revenue and by some inactivity in domestic trade, the outlook for the coming fall and winter season is regarded as promising, more particularly in view of the exceptionally favourable crop reports. In Imperial trade also good openings for Canadian products were reported. A statement in more detail with regard to the general trade situation in Canada will be found under the following headings, relating respectively to Imperial Trade, Domestic Trade and Canadian Revenue and Expenditure.

Imperial Trade—Reports of Commercial Agents.

Recent reports of the Board of Trade, Great Britain, show the following imports into Canada during the month of June:—

	Amount.	Value.
Cattle.. . . .	20,499	£364,025
Sheep.. . . .	2,389	4,052
Wheat, cwt.. . . .	1,384,100	497,490
Wheat meal, cwt.. . . .	242,700	110,468
Peas, cwt.. . . .	1,050	379
Bacon, cwt.. . . .	88,713	196,058
Hams, cwt.. . . .	30,672	73,967
Butter, cwt.. . . .	16,627	72,172
Cheese, cwt.. . . .	134,051	205,601

In the weekly reports of commercial agents and trade inquiries published by the Department of Trade and Commerce,

Canada, trade prospects with the West Indies, more especially with Jamaica, were reported excellent, with good openings for Canadian producers and manufacturers. The imports from Canada into Trinidad, however, though above the average of many years, showed a decline during 1903-04, chiefly in fish, flour, cordage, butter and cheese. In the case of South Africa, unfavourable conditions were reported, a difficulty having been experienced in securing proper transportation facilities to inland towns. A good demand, however, was reported for Canadian tinned goods, and prices for other manufactured products were on a profitable basis. The various agencies in Great Britain reported favourably, the market being favourable in Birmingham for the prospective Canadian fruit crop, especially for apples and plums.

Conditions were also reported favourable for Canadian barley and malt, with a demand for Canadian baby carriages, ready-made doors, mouldings and Canadian eggs at Leeds and Hull. In one report a condemnation was reprinted from *Commercial Intelligence*, London, Eng., that the Canadian fruit barrel is an unsuitable package, both on account of its size and other qualities.

A new office, that of superintendent of commercial agencies, was created by the Department of Trade and Commerce, Canada, during July, and Mr. F. C. T. O'Hara appointed to the position. Mr. W. A. McKinnon, formerly chief of the fruit division of the Department of Agriculture, was appointed commercial agent for Bristol, Eng.

An Order in Council extending the British preference to the colonies of Cape of Good Hope, Natal, Orange River, the Transvaal and Southern Rhodesia, to take effect from July 1, was approved on July 7.

* The statement with regard to foreign trade is not included in the present article, as complete returns were not procurable from the Department of Customs at the close of the month.

The text of the Preferential and Reciprocal Trade Act recently adopted by the government of New Zealand, the provisions of which are applicable to Canada, was received during July.

Domestic Trade.

Mid-summer inactivity in many mercantile lines was a general characteristic of domestic trade throughout July, and in the more important commercial centres trade was only fair. Markets, however, though dull, showed considerable firmness, and there was no evidence, especially in view of the very favourable crop reports, of anything approaching a general depression, or a more than temporary falling off in trade activity. In the dry goods branches a fair sorting trade was reported, though with less activity than a year ago, and orders for autumn goods were very satisfactory at many important wholesale centres, though in others again the returns are behind those of 1903. The warm weather in the closing weeks of the month, however, caused some improvement. Money was generally tight and remittances somewhat slow. On the whole the month was characterized by conservatism, though a satisfactory autumn and winter retail trade is regarded as assured.

The bank statement for June showed an increase in total assets of \$9,434,842 over May, with an increase of \$10,575,692 in total liabilities. There was a gain of \$2,241,333 in circulation, and of \$33,281,338 in deposits. Current loans showed an increase of \$4,181,905.

The commercial activity of the province of Ontario during the past year is shown in the annual report of the provincial secretary, issued during July. The following statement shows the number of charters and licenses issued during the past twelve years, together with the fees:—

1891, 152, \$5,030; 1892, 158, \$6,780; 1893, 138, \$8,465; 1894, 139, \$7,729; 1895, 174, \$10,000; 1896, 154, \$14,335; 1897, 358,

\$34,650; 1898, 295, \$23,820; 1899, 416, \$60,817; 1900, 438, \$71,179; 1901, 450, \$75,782; 1902, 591, \$95,330; 1903, 578, \$107,166. There were 492 charters of incorporation issued during the year.

Canadian Revenue and Expenditure.

According to the latest official statement issued by the Department of Finance, Canada, the total revenue of the Dominion during June amounted to \$5,895,163.45 as against \$6,013,888.49 in June, 1903. For the fiscal year ending June 30, the total revenue was \$68,613,280.84 as against \$63,739,271.89 last year. The month, accordingly, shows a decrease as compared with last year, but the year shows an increase of close upon \$5,000,000. The month shows a decrease also as compared with May.

Expenditure on consolidated fund during June amounted to \$3,102,885.59 or \$44,726,446.26 for the fiscal year, an increase in both cases being shown as compared with the previous year. On capital account a total expenditure of \$680,871.75 was recorded for June, and a total of \$9,106,553.00 for the fiscal year. The chief items of expenditure under the latter heading during June and for the fiscal year were as follows:—

Expenditure on Capital Account, &c.	Month of June, 1904.	Total to 30th June, 1904.
	\$ cts.	\$ cts.
Public Works, Railways and Canals	451,862 16	4,546,570 52
Dominion Lands	63,072 21	668,633 03
Militia, Capital	58,782 59	972,720 10
Railway Subsidies	17,842 85	2,005,721 70
Bounty on Iron & Steel	90,399 46	922,104 72

It is estimated that, when complete returns are available, a surplus of \$16,500,000 will be shown in the total revenue as compared with expenditures on consolidated fund during the fiscal year.

IMMIGRATION AND COLONIZATION MOVEMENT.

LARGE numbers of immigrants of an exceptionally desirable class continued to arrive in Canada during July, the great majority passing through to Manitoba and the North-west Territories. The increased extent, however, to which the province of Ontario has absorbed the immigrant arrivals of the present season is shown by statistics published by the Crown Lands Department of the province during July, which indicate that during the first six months of the present year 8,403 arrivals were registered at the Government Immigration Office, conducted at the Union Station, Toronto, as against 6,678 last year and 2,729 in 1902. These figures, of course, do not include the thousands who have proceeded directly to places of employment throughout the province. On the whole, the movement during July showed a slackening tendency.

Immigration Returns for June.

The following statement of immigration returns for the month of June, and for the first six months of the present year is published by courtesy of the Department of the Interior, Canada:—

	Total for June.	Total from 1st January.
British	6,841	31,942
Continental, &c.....	4,379	22,209
United States.....	4,932	21,741
Total.....	16,152	75,892

For the fiscal year the total arrivals were 130,329, to which there will probably have to be added one or two thousand late arrivals, as against 129,364 for the previous twelve months. The total is made up of 50,915 from the British Isles, an increase of 9,123; 36,241 from the continent of Europe, a decrease of 858; and 43,173 from the United States, a decrease of 6,300, the

decrease under the last heading being attributed to the late spring, which materially hampered the movements of settlers.

A statement of immigration received at the Department of Labour from the Board of Trade, Great Britain, shows that a total of 7,911 immigrants left the United Kingdom during June for British North America, as against 5,231 in June last year. For the six months ending June 30, the total was 39,694, as against 35,472 last year.

Notes of the Month.

A number of immigrants affected with trachoma were deported.

Representatives of a number of Boer families in South Africa visited Canada during July, in order to discover a suitable location for a party of immigrants.

Estimates amounting to \$822,15, including further supplementaries for last year, were passed by the House of Commons for the assistance of immigration during the fiscal year of 1904-5.

A deputation consisting of the President of the Dominion Trades and Labour Congress of Canada, the President of the Montreal Trades and Labour Council, and the Solicitor of the Trades and Labour Congress of Canada waited upon the Right Honourable the Premier and the Honourable the Minister of the Interior on July 5, with regard to several matters relating to immigration.

Homestead Entries for June, 1904.

The following statement, published by courtesy of the Department of the Interior, Canada, shows the number of homestead entries, according to the various agencies, made during the month of June, 1904, as compared with the month of June, 1903 :

TABLE OF HOMESTEAD ENTRIES DURING JUNE.

Agency.	1904.	1903.
Alameda	150	355
Battleford	316	342
Brandon	34	49
Calgary	248	240
Dauphin	38	64
Edmonton	297	414
Kamloops	26	12
Lethbridge	344	180
Minnedosa	18	52
New Westminster	7	2
Prince Albert	280	505
Regina	1,006	1,356
Red Deer	196	174
Winnipeg	75	137
Yorkton	615	809
Total	3,600	4,691

It will be seen that there has been a net decrease in the number of homestead entries made during June, 1904, of 1,091.

A statement of the homestead entries made during the fiscal year 1903-04, is as follows:—

TABLE OF HOMESTEAD ENTRIES, JULY-JUNE.

Month.	1903.	1902.	Increase	Decrease.
July	3,438	2,622	816	
August	2,288	1,904	384	
September	1,845	1,416	429	
October	1,958	2,142		184
November	2,406	2,482		76
December	1,570	1,640		70
	1904.	1903.		
January	1,240	1,109	131	
February	1,128	1,165		37
March	1,330	2,325		995
April	2,322	5,778		3,456
May	2,948	4,109		1,161
June	3,600	4,691		1,091
Total	26,073	31,383	1,760	7,010

It will be seen that the net decrease for the last year amounted to 5,310.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of June, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS DURING JUNE.

Nationalities.	Number of Entries.
Canadians from Ontario	550
" Quebec	48
" Nova Scotia	13
" New Brunswick	6
" Prince Edward Island	15
" Manitoba	127
" North-west Territories	69
" British Columbia	4
Persons who had previous entry	312
Canadians returned from United States	48
Americans	1,038
Newfoundlanders	1
English	497
Scotch	163
Irish	42
French	36
Belgians	15
Swiss	13
Italians	3
Roumanians	4
Greeks	
Syrians	1
Germans	136
Austro-Hungarians	302
Hollanders	6
Danes (other than Icelanders)	5
Icelanders	30
Swedo-Norwegians	66
Russians (other than Mennonites and Doukhobors)	24
Mennonites	16
Doukhobors	2
Chinese	
Australians	4
New Zealanders	4
Total	3,600
Representing 9,306 souls.	

Of a total number of 1,086 entries made during June by persons coming from the United States to Canada, 222 were from Minnesota, 361 from Dakota, 64 from Wisconsin, 48 from Washington, 44 from Iowa, 42 from Michigan, 28 from Montana, 23 from Nebraska, 28 from Kansas, and 28 from Illinois.

Lands Patented in June, 1904.

An abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of June, 1904, is as follows:—

TABLE OF LANDS PATENTED IN JUNE, 1904.

Nature of Grant.	Number of Patents.	Number of Acres.
British Columbia homesteads...	2	211.09
British Columbia sales.....	13	1,169.55
Coal land sales.....		
Commutation grants.....	2	127.36
Homesteads.....	553	87,828.82
Manitoba Act grants.....	1	51.00
Military homesteads.....	2	480.00
Mineral rights.....	1	20.00
North-west Half-breed grants...	29	6,464.21
North-west Mounted Police grants.....	1	160.00
Parish sales.....	1	232.00
Quit-claim special grant.....	2	
Railways—		
Calgary and Edmonton Ry. Co.....	1	320.00
Canadian Northern Ry. Co....	4	221.72
Canadian Pacific Ry. grants....	57	211,590.76
Can. Pac. Ry. grants (Souris branch).....	31	74,794.67
Can. Pac. Ry. nominees.....		
Can. Pac. Ry. roadbed and station grounds.....	1	3.04
Manitoba South-west'n C'l. Ry. Qu'Appelle, Long Lake and Saskatchewan Rd. and S. Co.	28	6,369.29
Sales.....	5	2,558.00
School lands sales.....	30	3,853.32
Special grants.....	6	960.00
Yukon Territory sales.....	9	489.00
Yukon Territory special.....	4	186.52
	1	9.47
Total.....	784	398,099.82

In June, 1903, the number of patents issued was 597, covering an area of 145,499.89.

TRADE DISPUTES DURING THE MONTH OF JULY.

THE industrial situation in Canada was comparatively undisturbed by new disputes during the month of July. Only six arose in the course of the month, but one of which proved to be of great magnitude or importance. The localities most seriously affected by trade disputes were Sydney, N.S., where the strike of steel workers, which began on June 1, was not concluded until July 22; Merritton, Ont., where a strike of papermakers, which began on May 4, continued throughout July without change; and the Skeena River District, B.C., where a refusal of Indians to

supply the canneries with sockeye salmon at the prices offered, resulted in a great loss, although a settlement was reported on July 6.

Analysis of Trade Disputes during the Month.

Number and magnitude.—There were in existence during the month of July, 14 disputes which began previous to the 1st of the month and 6 after, making a total of 20. This is a decrease of 4 compared with the month of June, and 19 less than the number in existence in July, 1903. About 68 firms and 4,250 employees were directly affected by the disputes.

The magnitude of the new disputes, including one which began in June, but was only reported to the department in July, is indicated in the following table, according to the number of work-people involved:

Magnitude.	Number of Disputes.
From 1,000 to 2,000.....	1
From 200 to 300.....	1
From 100 to 200.....	1
From 50 to 100.....	1
From 25 to 50.....	2
From 6 to 25.....	1

Loss of time in working days.—The loss of time to employees through trade disputes during the month of July was, approximately, 46,500 working days. This is a decrease of about 16,000 days compared with the previous month, and about 250 days compared with July, 1903. The greatest loss of the month was incurred at Sydney, N.S., where about 28,500 were lost, owing to the strike at the Dominion Iron and Steel Works.

Trades affected by new disputes.—The following trades were affected by new disputes:—

Trades.	Number of Disputes.
Fishing.....	1
Lumbering.....	1
Mining.....	2
Metal.....	1
Clothing.....	1
Textile.....	1

Causes of new disputes.—The following were the causes of new disputes:—

Causes.	Number of Disputes.
For increase of wages.. . . .	3
For decrease in hours.. . . .	1
Against employment of certain persons..	2
Against decrease in wages for a short working day.. . . .	1

Methods of settlement.—Of the 20 disputes in existence during the month, settlements were reported in 9 cases. Of these, one was settled through conciliation by the friendly mediation of the Department of Labour under the Conciliation Act, and three by negotiations between the parties immediately concerned. The remaining five came to an end without any negotiations. In one case the strikers returned to work on the former terms, in another their grievance was removed, and in the remaining three normal conditions were gradually resumed.

Results of disputes.—One dispute ended entirely in favour of the employers, and one in favour of the employees. Compromises were effected in three cases, in one the strikers were partially successful, and the remaining three, which were terminated, ended indefinitely, the strikers securing work and the employers securing workmen on their own terms.

Disputes commenced prior to the beginning of the Month.

The most important dispute of the month was the strike of employees of the Dominion Iron and Steel Co. at Sydney, N.S. An account of its origin and progress during the month of June is given in a special article in the July number of the *Labour Gazette*, and on another page of the present issue there is an account of its settlement under the Conciliation Act. Apart from this dispute, there are few events of importance to relate in regard to industrial disturbances during the month.

Strikes of Papermakers and Others at Merritton, Ont.

The situation with regard to the strikes of papermakers and others employees of

the Riordan Paper Mills Company, at Merritton, Ont., which began on May 4, remained practically the same throughout the month. An attempt was made by the reeve of Merritton to bring about a settlement of the dispute, but it was unsuccessful. On his invitation, Mr. R. Glockling, secretary of the Ontario Bureau of Labour, with the president of the Dominion Trades Congress, visited Merritton on July 25, in order to act as mediators in the dispute. At a meeting of the strikers, held on that evening, they were informed that the men refused to work on Saturday evenings and wished to work 65 instead of 75 hours a week, being willing to accept pay *pro rata*. Mr. Glockling, on the following day, interviewed the manager of the company, who agreed to negotiate with a committee of the strikers providing that the men composing it were satisfactory to him. He objected, however, to members of a committee which had been appointed by the strikers at their meeting to negotiate with the company. As no other committee was appointed the negotiations fell through, and no settlement was made during the month.

The disputes in the building trades at Montreal and Quebec, which began in May, practically ceased to exist. The marble workers at Montreal returned to work on July 17, at the old rate of wages of 22½ cents an hour, having failed to secure an increase to 27 cents, which they had demanded. Many of the original strikers, however, had left Montreal, and many of those who remained had found work at good wages. In the case of the plumbers and stonecutters at Montreal and carpenters at Quebec, nearly all the men who were still out of work on July 1 owing to the strikes obtained employment in the course of the month on the terms which they had demanded.

On June 28, a strike took place at D'Israeli, Que., affecting two saw-mills and about 200 employees. The cause of the dispute was the refusal of the mill-owners to grant a ten hour working day instead of one of eleven hours. After brief negotia-

TABLE OF TRADE DISPUTES OF THE MONTH OF JULY.

Province.	Locality.	Occupation.	Alleged Cause or Object.	No. of Establishments affected.	Approximate No. of Employees affected.	Date of commencement.	Date of termination.	Result.

Ottawa					
Demand for increase in wages from \$2.25 to \$2.50 per day.					

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

tions a compromise was reached and work was resumed on July 4, the parties concerned having agreed to a day of ten and a half hours.

In the case of all the other existing disputes which began before July 1 no changes were reported.

NEW DISPUTES.

Disputes of Fishermen at Skeena River,
British Columbia.

The only new dispute of the month involving a large number of men was one affecting Indian fishermen on the Skeena River, B.C. In the month of June, before the sockeye salmon had appeared, the canneries, according to their custom, announced the prices which they were prepared to offer for fish during the season of 1904. These were 7 cents apiece for sockeyes and 25 cents apiece for red springs. The fishermen on this river are mainly Japanese and Indians. While the former were satisfied with the prices offered, the Indians demanded 10 cents apiece for sockeyes and 35 cents for red springs. It is reported that the majority of the Japanese refused to fish pending a settlement with the Indians, and the white fishermen also remained idle. It is difficult to state exactly when the canning industry began to be affected, as it depended upon the run of the fish, which commenced towards the end of June. About 800 Indians in all refused to fish, and their women also left the twelve canneries which were in that district to the number of about 200. When the salmon appeared on the Fraser River in July, several hundred Indians left the Skeena and went to fish there. On July 6 the canneries offered $8\frac{1}{2}$ cents each for sockeyes, and the fishermen who remained agreed to this price. The absence of the Indians, however, who had gone away, affected the catch of salmon and consequently the output of the canneries for the whole of the season.

Other Disputes of the Month.

On July a strike took place involving 39 cloakmakers at Montreal, and indirectly

17 other employees. The cause of the dispute was the objection of the cloakmakers to the employment of non-unionists. During the month a striker was arrested on the charge of intimidation, and convicted. The dispute was still in existence at the end of the month.

On July 13, 6 coal pit labourers and 2 surface labourers at Joggins Mine, N.S., refused to work, throwing out of employment 187 miners. The cause of the trouble was due to the labourers stopping work at a quarter to four o'clock instead of remaining until a quarter to six. For this reason they were only given $\frac{2}{3}$ of a day's pay. Negotiations were immediately begun with the lodge committee of the Provincial Workmen's Association, and the company agreed to give the labourers a full day's pay with the assurance from the lodge committee that they would prevent individuals from stopping work in the future.

On July 16, 43 stonecutters at Queens-ton, Ont., stopped work on account of dissatisfaction with their foreman, who had discharged a number of men. Ten days later the company dismissed the foreman and the strikers returned to work on July 27.

The only other disputes of the month were one affecting 18 carpet weavers at Guelph, Ont., which began on July 28, owing to a refusal of the company to grant the women weavers an increase of 12½ cents to 15 cents par hour, and a strike of 35 iron moulders at Ottawa, who demanded wages of \$2.40 per day instead of \$2.25. Both of these disputes were still in existence at the end of the month.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of July, and which have been reported to the department.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia to the office of the Factories Inspectors of the province of Ontario, to one of the Factory Inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with a statement of returns of accidents made to them.

The Department of Labour has received notice of 248 accidents to individual workpeople which occurred in different parts of the Dominion during the month of July. The loss of life through these accidents amounted to 75 persons, and the people injured numbered 173.

In comparison with the month of June, there was a decrease of 33 in the total number of accidents, there having been one fatality less, and 32 fewer accidents not resulting in death.

The following is the record of the month by industries and groups of trades:—

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	17	13	30
Fishing.....	2	2
Lumbering.....	5	21	26
Mining.....	4	5	9
Building trades.....	1	23	24
Metal trades.....	4	28	32
Woodworking.....	5	5
Textile.....	1	1
Clothing.....	3	3
Food and tobacco preparation.....	10	10
Railway service.....	26	21	47
General transport.....	10	16	26
Unskilled labour.....	1	6	7
Miscellaneous.....	5	21	26
Total.....	75	173	248

In addition to the above, there were also reported to the department 19 industrial accidents, resulting in 2 deaths which took place previous to July 1, information of

which had not been received by the department before.

Nature of Fatalities and Accidents.

The greatest number of accidents, both as regards loss of life and number of persons injured, was in the railway service, as may be seen from the above table. The only disaster involving a great loss of life was in connection with this branch, and took place on the new Canadian Pacific Railway line from Sudbury to Toronto, about four miles south of Romford. At that point 7 men were killed and 2 injured by an explosion of dynamite on July 6.

The following is a brief description of this accident so far as the facts were ascertainable:—

Dynamite Explosion near Romford, Ont.

On July 6 a premature dynamite explosion took place on the Canadian Pacific Railway line which is being built from Sudbury to Toronto. The scene of the accident was four miles south of Romford, which is situated a few miles east of Sudbury. A construction gang was engaged in blasting, and a charge of dynamite was being placed in a hole which had just been drilled for the purpose when the explosion occurred, killing 6 labourers and the walking boss, and wounding a foreman and a labourer. The cause of the explosion is not known, as all who were on the spot were killed, but it is supposed to have been due to the heat in the hole, the heavy tamping of the charge, and perhaps a sharp knock in fixing the percussion cap.

The Record by Trades and Industries.

The table published herewith shows the following record for the month by industries and groups of trades:—

Agriculture.—There were 17 deaths and 13 other accidents during the month among persons engaged in agriculture, being an increase of 8 accidents in this industry compared with the previous month. There were 25 accidents to farmers, 4 to farm hands, and 1 accident to a rancher. With regard

to the causes of death, 2 persons were killed by lightning, 2 by trains, 4 by falling off carts, 2 fell from barns, 2 were killed by a cave-in, and other deaths were caused by a falling tree, by a kick from a horse, and by slipping on wet grass.

Fishing.—The only disaster to fishermen reported during the month was the drowning of two men on July 13 in the month of the Fraser river, B.C., owing to the capsizing of their boat in a gale.

Lumbering.—Of the five fatal accidents in the lumbering industry, 2 were caused to loggers, who were crushed by logs, 2 saw-mill hands were killed by a boiler explosion and 1 was struck by a deal end which flew from an edging machine. Seventeen of the other accidents happened to employees of saw and planing mills, entailing in most cases the loss of fingers or limbs by saws or machinery.

Mining.—Of the 4 fatalities in the mining industry, 2 were due to the falling of stone and coal, 1 to a cave-in, and the fourth was due to a miner falling in a mine and striking his head against a rail. Six accidents occurred in coal mines, 2 in gold mines, and 1 in a quarry.

Building.—There was only 1 fatality in the building trades, which was due to the drowning of a labourer who was constructing a crib at Niagara Falls. Of the other 23 accidents reported, 1 was suffered by a contractor, 1 by a foreman, 5 by carpenters, 6 by roofers, 4 by painters, and 4 by labourers.

Metal trades.—In the metal trades, 2 deaths were caused by falling from staging, the victims being a structural iron worker and a machinist. An engineer died through a fall from a beam when repairing pipes, and a gas-fitter was killed by being struck by a lever when capping a gas well. Those who suffered from accidents which did not result fatally were 2 moulders, 10 iron workers, 2 stationary engineers, 1 electrical worker, 3 electrical linemen, a stove-mounter, a blacksmith, a blacksmith's helper, 2 boilermakers, 4 machinists and a cement worker.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY.

DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES F, No. 9.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Agriculture</i>						
Farmer.....	St. Evariste de Forsyth, Que.	July 8	1		Skull fractured.	Crushed by a falling tree.
"	Chatham, Ont.	" 4	1			Fell 20 feet at a barn-raising.
"	Sheel Lake, Man.	" 6	1			Fell off cart and was run over.
"	Glanford, Ont.	" 11	1			Instantly killed.
"	Seaford, Ont.	" 12		1		Struck by lightning.
"	Branchton, Ont.	" 15		1	Collar bone and several ribs broken; seriously hurt.	Struck by a train when driving across the tracks.
"	Near Chatham, Ont.	" 4	1		Died of heart failure from shock.	Fell off a load of hay.
"	Near Roseville, Ont.	" 7		1	Head seriously injured.	Fell backward off hay cart.
"	Nicolet, Que.	" 6		1	Hands badly burnt and flesh torn.	Struck by a falling brace at a barn-raising.
"	Welland, Ont.	" 4	2			By an explosion of powder when blasting a rock.
"	Near Ancaster, Ont.	" 19	1			Killed by a cave-in when digging in a pit.
"	Maryboro' Tp., Ont.	" 6	1		Skull fractured, and injured internally.	Struck by lightning.
"	Lambton, Ont.	" 10	1			Fell off wagon and was trampled on by two teams.
"	Guelph, Ont.	" 2	1			Fell from roof of barn when slunging it.
"	Hespeler, Ont.	" 8		1	Back injured.	Fell on wet grass, died same day from injuries.
"	Nassagaweya Tp., Ont.	" 5		1	Arm injured.	Fell from hay cart; horses ran away.
"	Hespeler, Ont.	" 20		1	Head injured.	Kicked by a horse.
"	Erin, Ont.	" 23		1	Bone in foot broken.	Fell when unloading cart.
"	Ottenshoff, Ont.	" 7		1	Back injured.	By upsetting of a load of hay.
"	Bedford, Que.	" 28		1	Crown pierced.	Fell from a land roller.
"	Otonabee Tp., Ont.	" 18		1	Chest crushed, seriously hurt.	Fell from load of hay on times of pitchfork.
"	Paslinch, Ont.	" 29		1		Fell off a load of hay and wagon passed over him.
"	North Kingston, N.S.	" 26		1	Three ribs fractured.	Struck by a train, killed instantly.
"	Near Port Hope, Ont.	" 28		1		Run over by a team of horses with a mowing machine.
Rancher	Indian Head, N.W.T.	" 19		1	Back broken and hips crushed.	Struck by a train when driving across track.
Farm hand.	Near Regina, Asst.	" 2		1		Fell off a railway car when loading it with horses.
"	Sherkston, Ont.	" 12		1		Was kicked by a horse when exercising it, and instantly killed.
"	Near Campbellford, Ont.	" 15		1	Had concussion of the brain, died following day.	Was struck by lightning.
						Fell 18 feet when unloading hay.

"	St. Paul's, Ont.	"	19	"	1	Spine injured. Paralyzed. Fell from a load of hay.		
"	"	"	13	"	2		Drowned, boat capsized in gale.	
Fishing—								
Fishermen	Mouth of Fraser River..							
Lumbering—								
Shantyman	Marbank, Ont.	"	28	"	1	Knee sprained	Hurt by a fall.	
Logger	Cheminists, B.C.	"	20	"	1	Was crushed to death.	Crushed by a log when loading a car.	
"	Coatesville, N.B.	"	19	"	1	Lost a thumb, two fingers and part of a third.	Logs began to roll when he was on them.	
Saw-mill owner	Near Sandy Bay, Man.	"	7	"				
"								
Sawyer	Walkerville, Ont.	"	18	"	1	Head injured.	Cut off when working in mill.	
Saw-mill hand	Amrior, Ont.	July 18	18	"	1	Lost both legs.	Struck by a piece of wood flying from saw.	
"	St. John, N.B.	"	2	"	1		Run over by a freight car.	
"	Haliburton, Ont.	"	5	"	2		Was struck by a deal end which flew from an edging machine.	
"	Buckingham, Que.	"	5	"	1	Thigh badly wounded.	Killed by explosion of a boiler in a saw-mill.	
"	Rockland, Ont.	"	2	"	1	Both legs badly fractured.	Was struck by a board from a saw.	
"	Le Mecca, Que.	"	7	"	1	Foot badly cut.	Legs caught in a chain when placing logs on slide.	
"	Hawkesbury, Ont.	"	8	"	1	Right leg broken.	Cut by a circular saw.	
"	Spanish River, Ont.	"	10	"	1	Eye ball injured; may lose sight.	"	
"	Rockland, Ont.	"	21	"	1	Lost a leg.	By bursting of a steam gauge of boiler in the mill.	
"	Huntsville, Ont.	"	7	"	1	Finger badly torn.	Fell off car and was run over.	
"	"	"	8	"	1	Arm broken.	Caught under a self-feeding rip-saw.	
"	Fredericton, N.B.	"	22	"	1	Lost four fingers.	Struck by a board.	
"	St. John, N.B.	"	27	"	1	Lost tops of three fingers.	Cut by a circular saw.	
Planing mill hand	Niagara Falls, Ont.	"	23	"	1	Lost three fingers.	Cut by stove-jointer saw.	
"	Guelph, Ont.	"	22	"	1	Left arm broken.	Caught in a machine.	
Saw-mill hand	St. Camille, Que.	"	26	"	1	Hand crushed, amputated.	Caught in machinery when adjusting a belt.	
"	Atsoue, Ont.	"	27	"	1	Arm badly crushed.	Caught in machinery.	
Shingle sawyer	Mangerville, N.B.	"	5	"	1	Lost two toes.	Cut off by a saw.	
Shingle mill hand	Little Metis, Que.	"	2	"	1	Lost four fingers.	Cut off by a shingle saw.	
Mining—								
Mines (gold)	Bonanza, Yukon T.	"	14	"	1	Legs severely scalded.	Killed by a cave-in.	
"	Dawson, "	"	11	"	1		Pipe burst in the shaft of a mine worked by steam.	
"	Ladysmith, B.C.	"	14	"	1		Badly hurt by a fall of coal.	
"	Michel, B.C.	"	11	"	1		Fell when re-timbering a mine, head struck track rail, died instantly.	
"	Coal Creek, B.C.	"	18	"	1	Leg broken and head bruised.	Struck by coal which fell owing to lack of props.	
"	New Aberdeen, N.S.	"	1	"	1	Crushed to death.	Crushed by a large stone falling from roof of mine.	
Pit driver	Glac Bay, N.S.	"	8	"	1	Leg crushed, recovery doubtful.	Killed by a fall of coal and stone.	
Pan oiler in coal mine	Coal Creek, B.C.	"	20	"	1			
"								
Quarryman	Brandon, Man.	"	11	"	1	Hand blown off, eye badly hurt and body bruised.	Run over when helping to couple cars.	
Building Trades								
Contractor	St. Catharines, Ont.	"	26	"	1	Had two severe scalp wounds.	Hurt by an explosion of dynamite when blasting.	
Contractor's foreman	Niagara Falls, Ont.	"	2	"	1	Both legs broken.	When repairing a chimney it collapsed and he fell 30 feet.	
Carpenter	Humberstone, Ont.	"	5	"	1	Injured internally & bruised.	Struck by a swinging bucket.	
"	Sydney, N.S.	"	23	"	1	Head crushed.	Fell 18 feet off a building.	
							Fell from scaffolding, died instantly.	

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Building Trades—Con.</i>						
"	Port Dalhousie, Ont.	1904.				
"	Quebec, Que.	" 26	1	1	Had serious internal injuries.	Fell 35 feet from roof.
"	"	" 7	1	1	Head and face badly hurt.	Struck by a piece of falling timber.
"	Sherbrooke, Que.	" 27	1	1	Lost a finger.	Cut off by a planer.
"	Otonabee Township, Ont.	" 15	1	1	Head seriously injured.	Struck by a falling rafter when raising a barn frame.
Roofer	Norway, Ont.	" 19	1	1	Legs paralyzed and otherwise dangerously hurt.	Fell through a roof, head struck ground.
" (cement).	Hamilton, Ont.	" 15	1	1	Head & body badly crushed, dangerously injured.	Concrete roof collapsed and he fell 25 feet.
"	"	" 15	1	1	Head badly hurt.	"
"	"	" 15	1	1	Face and head cut and leg crushed.	"
"	"	" 15	1	1	Had several cuts and badly shaken.	"
"	St. Eugene, Que.	" 30	3	3	Badly bruised and injured internally.	"
Painter	Quebec.	" 15	1	1	Arm broken & badly injured.	Scaffold gave way and they fell 24 feet.
"	Chatham, Ont.	" 18	1	1	Back injured.	Fell from a roof.
"	Vancouver, B. C.	" 13	1	1	Leg fractured.	Fell 15 feet, striking a post.
"	Montreal, Que.	" 22	1	1	Both ankles broken.	Scaffolding gave way and he fell.
Labourer	Winnipeg, Man.	July 8	1	1	Severe scalp wound.	Fell from a ladder.
"	Hamilton, Ont.	" 9	1	1	Nose crushed, head and body cut.	Struck by falling bricks.
"	"	" 2	1	1	Arm badly shattered.	Fell from a ladder.
" (cerib work)	Brantford, Ont.	" 12	1	1	Arm badly shattered.	Fell from a ladder.
"	Niagara Falls, Ont.	" 8	1	1	Arm badly shattered.	Fell into the river and was drowned.
<i>Metal Trades—</i>						
Structural iron worker	Sydney, N. S.	" 28	1	1	Back severely burnt.	Fell from staging.
Moulder	Amherst, N. S.	" 19	1	1	Badly burnt.	Came in contact with hot iron.
"	St. Catharines, Ont.	" 7	1	1	Leg broken.	Struck by a heavy piece of iron.
Iron worker	Hamilton, Ont.	" 2	1	1	Wrist badly cut.	By steel in a smelter.
"	"	" 9	1	1	Finger crushed.	Caught in a cutter.
"	"	" 28	1	1	Right hand torn.	When boring a hole in a corner slot.
"	"	" 29	1	1	Seriously hurt.	Caught between two iron girders.
"	Walkerville, Ont.	" 11	1	1	Lost one finger.	Caught in empty wheel.
"	"	" 11	1	1	Right hand badly cut.	Cut with knives of a binder when putting it together.
"	Hamilton, Ont.	" 21	1	1	Hand badly cut.	Caught in a machine.
"	"	" 26	1	1	Hand badly cut.	Caught in a machine.

Stationary engineer	" Longue Pointe, Que Toronto, Ont.	" 24 25 17	1 1 1	Finger crushed Arm crushed Spine dislocated, died next day.	Crushed by a falling rake frame. When working in locomotive works. Fell from a beam when repairing pipes.
"	" Penetanguishene, Ont. Hespeler, Ont.	" 16 25	1 1	Badly scalded Chest, arm and leg severely scalded.	By bursting of a steam pipe in a box mill. Elbow of pipe blew out when he was caulking a leak in it.
Electrical worker	" Niagara Falls, Ont.	" 15	1	Hand badly cut.	While stripping wire.
Lineman	" Hamilton, Ont.	" 22	1	Seriously injured.	Fell 30 feet from pole.
"	" Montreal, Que.	" 26	1	Had concussion of the brain.	When at top of pole it broke and he fell with it.
"	" Jordan, Ont.	" 25	1	Knee cap dislocated and leg fractured.	When working in a foundry.
Stovemounter	" Toronto, Ont.	" 10	1	Three fingers crushed.	Was struck by fuller when welding metal.
Blacksmith	" Stratford, Ont.	" 6	1	Seriously injured in abdomen.	
Blacksmith's helper	" Brantford, Ont.	" 27	1	Lost three fingers.	Caught in some gearing when drawing iron from furnace.
Rollermaker	" Galt, Ont.	" 11	1	Two bones of foot broken.	Furnace door fell on foot.
"	" Kingston, Ont.	" 7	1	Leg broken.	When working at a boiler it fell on him.
Gasfitter	" Kohler, Ont.	" 6	1		Struck by a lever while capping a gas well.
Machinist	" Vancouver, B.C.	" 18	1	Cause of death not known.	Fell ten feet from a staging and died instantly.
"	" St. Thomas, Ont.	" 12	1	Foot badly crushed.	A 500-pound weight fell on foot.
"	" Kingston, Ont.	" 14	1	Left wrist cut open.	When working on a lathe machine.
"	" Hamilton, Ont.	" 9	1	Hand cut.	When working on a machine.
"	" Webster, Que.	" 27	1	Two ribs broken.	Caught between two machines.
Cement worker	" Marlbank, Ont.	" 8	1	Right foot burnt.	With hot ashes.
Woodworking Trades—					
Basket factory owner	" Walkerville, Ont.	" 19	1	Head badly wounded.	Was struck by a flying block of wood.
Factory hand	" St. John, N. B.	" 6	1	Top of finger cut off.	By a circular saw.
Box factory hand	" Toronto, Ont.	" 14	1	Left shoulder cut.	Fell on a lumber truck.
Carriagemaker	" Brantford, Ont.	" 5	1	Lost two fingers.	When working on a jointer.
Carpenter in foundry	" Toronto, Ont.	" 13	1	Lost 3 fingers of left hand.	Crushed in a planing machine.
Textile Trades					
Woolen mill hand	" Campbellford, Ont.	" 2	1	Two fingers badly crushed.	When turning gear of a garnet machine.
Coating Trades					
Dressmaker	" Peterboro', Ont.	" 6	1	Ankle broken and leg fractured.	Elevator cable broke and they fell 60 feet.
"	"	" 6	1	Ankle broken.	
"	"	" 6	1	Ankle sprained.	
Food and Tobacco Preparation—					
Butcher	" Montreal, Que.	" 8	1	Lost a thumb.	When cutting meat.
"	" Morriston, Ont.	" 4	1	Three ribs broken.	Fell down cellar stairs when at work.
Baker	" St. Catharines.	" 22	1	Head and neck seriously injured.	Struck by a heavy bake pan which fell from a high shelf.
Biscuit maker	" Toronto	" 27	1	Hand lacerated.	Caught in cable of elevator.
"	" London, Ont.	" 22	1	Finger crushed.	
"	"	" 7	1	Finger cut deeply.	
"	"	" 9	1	Lost part of hand.	Caught in the cog wheel of a biscuit machine.
Cheese factory hands	" Near Barford, Ont.	" 9	3	Seriously burnt and shocked.	Struck by lightning.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF JULY—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Railways—</i>						
Conductor.	Waterford, Ont.	" 10	1	1	Lost a finger.	Hand crushed when coupling cars.
"	Gorham, Que.	" 15	1	1	Three ribs fractured.	By derailling of train.
" (electric car).	Toronto, Ont.	" 22	1	1	Leg broken.	Jumped off car and fell when fuse blew out.
" (mail car).	Gorham, Que.	" 15	1	1	Badly cut on head, arms and legs.	Railway car was derailed and he was thrown out of a window.
"	Niagara Falls, Ont.	" 16	1	1	Right foot crushed.	Crushed when coupling cars.
" (electric car)	St. John, N.B.	" 10	1	1	Collar bone broken.	Caught between two cars.
"	Beechville, Ont.	" 6	1	1	Hip badly bruised.	Struck by an open gate when on step of car.
"	London, Ont.	" 27	1	1	Side badly bruised, internal injuries.	Struck by a post when on step of car.
Engineer.	Hochelega, Que.	" 12	1	1	Hands severely scalded.	Was crushed between two cars when coupling them.
Brakeman	St. Thomas, Ont.	" 6	1	1	Hands severely scalded.	When drawing water from a locomotive injector overflow pipe.
"	Campbellton, N.B.	" 6	1	1	"	Was caught between cars when coupling them.
"	Hamilton, Ont.	" 8	1	1	"	Fell off a freight train and was run over.
"	Gananoque, Ont.	" 11	1	1	Hip broken and injured internally.	Was caught between two cars when coupling them.
"	Newcastle, N.B.	" 14	1	1	Leg was severed and body crushed.	Fell in front of an engine and was run over.
"	South River, Ont.	" 12	1	1	"	Was run over by a train.
"	Toronto, Ont.	" 2	1	1	"	"
"	Burlington Station, Ont.	" 18	1	1	Fell off train and was run over.	"
"	Near Broadview, Man.	" 7	1	1	Arms and legs broken and injured internally.	Fell off a moving train.
"	New Hamburg, Ont.	" 5	1	1	Leg badly crushed. Amputated.	Was struck by train when sitting on track.
"	Toronto, Ont.	" 25	1	1	"	Caught between two freight cars.
Fireman	Levis, Que.	" 21	1	1	Lost a leg.	Fell under a moving train.
"	Toronto, Ont.	" 30	1	1	Injured internally: soon after.	Touched an electric wire and was killed by shock.
"	Burlington, Ont.	" 30	1	1	Died	Struck by a train when standing on tracks.
Railway baggage man.	Gorham, Que.	" 14	1	1	Head injured.	By derailling of train car upset.
Railway oiler.	Niagara Falls, Ont.	" 16	1	1	Head and hands burnt	By explosion of an oil car.
Sectionman.	Near Burlington, Ont.	" 4	1	1	"	Struck by a train.
"	"	" 4	1	1	Back injured.	"
"	Near Marlen, Ont.	" 8	1	1	Badly bruised and knee hurt	Fell off hand-car which ran over him.
"	Outremont, Que.	" 19	1	1	"	Struck by a train.
"	Toronto, Ont.	" 26	1	1	Foot crushed.	Caught between rails, when operating a switch, and run over.
Yardman	"	" 20	1	1	Heart ruptured.	Crushed by a stake when helping to move an engine with it.
Railway shop hand	"	" 20	1	1	"	"

Railway shop hand	Montreal, Que.	"	11	1	Seriously burnt.	When helping to put out a fire.
"	Niagara Falls, Ont.	"	21	1	Foot and ankle crushed.	Caught under a car.
Railway machinist	Hochelega, Que.	"	12	1	"	Crushed under a car when crossing a track.
"	Revelstoke, B. C.	"	26	2	"	Struck by a train when on a hand-car.
Construction foreman	Near Rimford, Ont.	"	6	7	"	Badly injured by a dynamite explosion.
Railway labourers	"	"	6	1	Leg broken and injured internally.	Killed and badly injured by a dynamite explosion.
"	Near Hamilton, Ont.	"	20	1	"	Fell off a bridge which was being built.
"	"	"	"	"	"	Crushed when loading rails on cars.
General Transport	Montrose, Ont.	"	19	"	Lost two fingers.	"
Captain of a barge	Quebec.	July	9	1	Skull fractured.	Was struck by a piece of timber which was being put on barge.
Sailor	Montreal.	"	1	1	Neck broken, foot almost torn off, and injured internally.	When working a steam crane he was caught in the gearing.
"	"	"	12	1	Left leg and right thigh fractured.	Fell from bridge to hold of ship.
"	Thousand Island Park, Ont.	"	11	1	Drowned.	Fell when trying to board a moving boat.
Steamboat engineer	Quebec.	"	15	1	Arm badly burnt.	By escaping steam.
Pantryman on steamboat	Nagara River, Ont.	"	14	1	Neck dislocated.	Fell down pantry steps, died instantly.
Longshoreman	Montreal, Que.	"	11	1	Had compound fracture of left leg.	A pile of lumber fell on him.
"	"	"	19	1	Had two dangerous scalp wounds.	Crushed between two cars when crossing track.
"	"	"	25	"	"	Struck by plank when working on wharf.
"	"	"	23	1	Seriously injured internally.	Fell between a wharf and barge.
Teamster	Hochelega, Que.	"	4	"	Paralyzed; died 3 weeks later.	Horse ran away and he was thrown from wagon.
"	Hamilton, Ont.	"	5	1	"	Fell from wagon when crossing car tracks and was run over.
"	Toronto, Ont.	"	16	1	Collar bone broken.	Fell from a dray.
"	Guelph.	"	23	1	"	Crushed against stall by his horse.
Carrier	Quebec, Que.	"	22	1	Leg fractured, dangerously hurt.	Fell from a load of wood and was run over.
"	"	"	22	1	"	"
Wagon driver	Berthierville, Que.	"	29	1	Skull fractured.	A load passed over his body.
"	Montreal, Que.	"	29	1	"	Thrown from wagon by collision with street car. Killed instantly.
"	Valleyfield, Que.	"	6	1	Foot badly sprained.	Horse ran away and he was thrown from wagon.
"	"	"	6	1	Neck cut, shoulder bruised and injured internally.	"
"	"	"	8	1	Leg broken.	"
"	Toronto, Ont.	"	28	1	Had concussion of the brain.	"
"	Montreal, Que.	"	11	1	"	Fell from wagon, died next day.
"	Toronto, Ont.	"	6	1	"	Fell from wagon when trying to rein in horse.
"	Hamilton, Ont.	"	6	1	Arm crushed.	Killed by cave-in of a gravel pit.
"	"	"	29	1	Right leg fractured, and head severely injured.	By a cave-in at a gravel pit.
Cabman	Montreal, Que.	"	6	1	Arm broken.	Horse ran away and he was thrown from cab.
"	"	"	"	"	"	"
Elevator boy	Peterboro, Ont.	"	6	1	"	Cable broke and elevator fell 60 feet.
Amusement	"	"	"	"	"	"
Circus employee	Near London, Ont.	"	9	1	"	Fell off train and was run over.
Civie fireman	Toronto, Ont.	"	18	1	Lost one finger and broke others.	Fell from a ladder when at a fire.

"	(in steel works).....	Sydney, N.S.....	"	11	1 Seriously hurt.....	When hoisting ore out of vessel.
ACCIDENTS HAPPENING IN PREVIOUS MONTHS, BUT ONLY REPORTED TO THE DEPARTMENT IN JULY.						
Furniture factory hand	Ottawa, Ont	June 6	1	Two fingers injured	When cutting out part of files.	
"	"	" 13	1	Lost part of finger	Out off in a press when making shovel blades.	
Shingle mill hand	Nassagaweya Tp., Ont..	" 30	1	Hand badly cut	When running a saw.	
Iron worker	Woodstock, Ont	May 31	1	End of finger cut off	When operating a buzz planer.	
Longshoreman.	Humboldt, Ont	June 27	1	Badly crushed	Caught between boat and wharf.	
Horse-shoer.	Port Colborne, Ont..	" 25	1	Foot crushed	Horse stepped on it.	
"	"	" 25	1	Shoulder injured	Kicked by a horse.	
Dredge engineer	Welland, Ont	" 28	1	Arm and hand lacerated.	Cable slipped off drum.	
Labourer	Niagara Falls, Ont..	" 29	1	Badly bruised and strained.	Struck by falling rock.	
"	Port Colborne, Ont..	" 30	1	"	Struck by derrick boom which broke.	
Bisoni maker.	London, Ont	" 24	1	Finger crushed.	Caught between cog-wheels.	
Furniture factory hand.	Woodstock, Ont	" 30	1	Right ankle sprained	Slipped while filling binder.	
Machineist	Hamilton, Ont	" 25	1	Right hand cut off	Caught in a cutting machine.	
"	"	" 29	1	Finger burst	Fell off the boom of a derrick.	
Iron worker (elevator works).	Toronto, Ont..	" 29	1	Collar bone broken. Killed.	Was struck by a chisel.	
"	Hamilton, Ont	" 28	1	Left leg fractured	Slipped when filling brick.	
"	"	" 30	1	Right knee sprained.	When putting a shingle over a saw.	
Shingle mill hand:	Penetanguishene, Ont..	" 29	1	Lost a finger..		
Miner	Nanaimo, B.C	" 28	1	Head and face severely hurt		

Woodworking trades.—In the woodworking trades there were only 5 accidents, none of which were fatal. In 3 cases fingers were lost by a circular saw, a joiner and a planing machine. In another case a basket factory owner was badly wounded on the head by a flying block of wood, and a box factory hand was cut on the shoulder by falling on a lumber truck.

Textile trades.—In the textile trades the only accident reported was that of a woollen mill hand at Campbellford, Ont., whose fingers were crushed when turning the gear of a garnett machine.

Clothing trades.—The only accident in the clothing trades took place at Peterborough, Ont., on July 6, when 3 dress-makers were injured by the falling of an elevator in which they were descending from the third story of a building. The accident was due to the breaking of the cable, which caused the elevator to fall sixty feet. The cashier of the establishment, and the elevator boy were also injured by the fall.

Food and tobacco preparation.—There were no fatal accidents in the food and tobacco trades during the month. One butcher lost a thumb, and 4 biscuit-makers had their hands injured. Three cheese factory hands were struck by lightning on July 9, near Burford, Ont., and received severe shocks. A butcher at Morriston, Ont., had three ribs broken by falling down stairs when at work, and a biscuit-maker was seriously injured by being struck on the head by a bake pan which fell from a high shelf.

The railway service.—During the month 1 railway engineer, 9 brakemen, 2 firemen, 2 sectionmen, 1 railway shop-hand, 3 railway machinists, and 8 railway labourers were killed. Seven of the deaths were caused by the explosion of dynamite near Romford, Ont. Three men were crushed to death when coupling cars, 11 were killed by being run over or struck by trains, 1 fell off a train and was killed, 1 death was caused by an electric shock, 1 man man fell

off a bridge, and 1 was crushed by a stake when trying to move an engine with it.

General transport.—The persons engaged in trades relating to general transport, who were killed by accidents during the month, consisted of a barge captain, 2 sailors, a ship's pantryman, a longshoreman, a teamster, a carter, and 4 wagon drivers. Four deaths were due to falling from wagons and carts, 1 man was drowned, 1 was crushed between two cars when crossing railway tracks, 1 was killed by a steam crane, 1 by a cave-in at a gravel pit, and 1 by falling down steps.

Miscellaneous trades.—There were 5 fatalities among persons engaged in miscellaneous trades. These included 3 circus employees, all of whom met their death by falling off trains. The other 2 were an aeronaut, who fell from his balloon at Montreal, on July 16, and was drowned in the St. Lawrence river, and a soldier at Laprairie, Que., who was kicked by a horse, on July 4, and died two days later from the effect. Among the injured were 4 civic firemen, 3 paper mill workers, 2 laundresses, 2 window cleaners, and others.

The Protection of Hoists and Teagles in Great Britain.

A report on the proper construction, arrangement and fencing of hoists and teagles for the prevention of accidents has recently been issued by the British Home Office.* The report contains a large number of illustrations showing the various systems of hoists, teagles, and safety contrivances, with recommendations as to their use. A summary is given of hoist and teagle accidents which occurred in the United Kingdom in 1902. During that year there were 653 such accidents, of which 42 were fatal.

A teagle is defined as a fixed lifting appliance in the form of a derrick-pole, jib or derrick, in combination with a winch by

means of which goods are hoisted without the use of a cage. The following recommendations are made for their construction and use:—

1. Efficient brakes should be provided for all winches used for the purpose of working teagles.
2. All teagle doorways should be provided with doors, or with secure bars or chains, and at each side of the doorway, with efficient hand-bars.
3. The floor openings of all teagles should be securely fenced.
4. Life belts and radius ropes should be provided for the use of all persons employed at open teagle doorways, and no person should work at any open teagle doorway unless he is secured with a life belt and a radius rope.

A hoist is defined as an appliance for the conveyance of persons or goods by means of cages or cradles travelling in vertical or inclined shafts on fixed guides with or without the aid of mechanical power. In connection with them, the following recommendations are made:—

1. Stops should be provided on all hand ropes, starting ropes, rods, or chains, to stop the cage automatically at the highest and lowest points of travel, and all drum hoists should, in addition, be fitted with automatic stop motion, to prevent overwinding.
2. The maximum load that may be carried by any hoist should be clearly marked on the cage and on each landing.
3. All hoist cages in which any person travels should be suspended by not less than two independent ropes or chains.
(This, however, would not apply in the case of directly supported hydraulic ram hoists.)
4. All ropes, cables and chains used for the suspension of hoist cages should be periodically examined, and chains and cables should be periodically examined and tested and also annealed at least once in every twelve months. The safe loads indicated by the test and the times of annealing should be entered in a register kept on the premises.
5. All projections in hoist wells, including door lintels, if the doors are not flush with the side of the hoist well, should be bevelled by sloping boards, and the sides of all hoist wells should be made smooth.
6. All hoist wells and landings should be efficiently lighted.
7. A clearance of at least three feet should be left at the top and bottom of the hoist well between the top and bottom of the cage respectively when the cage is at the points of its highest and lowest travel.
8. The tops of all hoist cages should be covered with an efficient roof or with stout wire netting.
9. Where cages are worked in an open hoistway, the cages should be securely fenced by doors or other efficient means to prevent persons or goods inside the cage from falling out.
10. Except in cases where a competent person is appointed, whose sole duty is to attend to the hoist, the hoist openings should be securely

* Report on the Construction, Arrangement and Fencing of Hoists and Teagles, by William Sydney Smith, Esq., one of His Majesty's Inspectors of Factories, London, Eyre & Spottiswoode, 1904.

fenced by efficient gates or doors, which should be automatic in action.

In other cases efficient locks, or other secure fastenings on the well side of the door should be provided, and the keys placed in charge of a responsible person.

The doors or gates should not be less than six feet in height, and should be so marked as not to be mistaken for ordinary doors.

11. All hoist cages should be provided with efficient safety gear.

12. Suitable locking grips should be provided for the hand-starting ropes, rods or chains of all hoists where these pass through the cage.

13. No person under the age of eighteen years should work or be in charge of any hoist.

ENFORCEMENT OF FAIR WAGE RESOLUTION BY THE POST OFFICE DEPARTMENT, JULY, 1904.

During the month of July the following orders were given by the Post Office Department for the supplies mentioned. All were given subject to the regulations for the suppression of the sweating system and securing employment to the workmen and women of fair wages, and the perform-

ance of the work under proper sanitary conditions :—

Nature of Order.	Amount of Order.
	\$ cts.
Making and repairing metal dating and other stamps and type and brass crown seals	434 44
Making and repairing rubber dating and other hand stamps and type.....	20 25
Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and post marking and cancelling ink	797 90
Making and repairing post office scales ..	147 00
Supplying mail bags	2,214 65
Repairing mail bags.	809 22
Repairing mail locks and supplying mail bag fittings	534 80
Supplying letter boxes and railway mail clerks' tin boxes and repairing railway clerks' tin boxes and portable tin letter boxes	186 48
Miscellaneous orders for making and repairing postal stores	7 65
Making up and supplying articles of official uniform.....	5,699 35

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during July, 1904:—

DOMINION REPORT.

Forestry in Canada.

Report of the Superintendent of Forestry for the year ended June 30, 1903. Ottawa. King's Printer, 1904. Pages, 24.

The quantity of merchantable timber on lands owned and controlled by the Dominion is now estimated at approximately 192,000,000,000 feet. The value of this timber in the tree may be placed at \$1 per thousand feet at the lowest figure, which would make a total value of \$192,000,000. The area controlled by the Dominion consists of 722,578 square miles in Manitoba and the Territories, and 20,000 square miles in British Columbia. In the other parts of Canada the forests are under the control of the various provinces. The annual increment of growth is estimated at 13,440,000,000 feet, representing an annual return of

\$13,440,000, providing that the cutting of saw-logs is limited to trees above twelve inches at the butt, and pulpwood to trees of seven inches.

The only district reported to have been greatly injured by forest fires during the year was the Turtle mountain timber reserve, adjoining the Dakota boundary, which suffered from a conflagration in May that began in Dakota and was blown into Canada by a strong south wind.

Much work has been done in assisting prairie settlers to grow trees. In 1901, 44 settlers were supplied with 58,800 trees, in 1902, 415 settlers received 468,900, and in 1903, out of 1,006 applicants, 616 were supplied with 920,000. Seven hundred pounds of maple and ash seed were also distributed to settlers.

ONTARIO REPORTS.

The Dairying Industry in Ontario.

Annual Reports of the Dairymen's Associations of the Province of Ontario. 1903. King's Printer, Toronto. 1904. Pages, 190.

The Annual Reports of the Dairymen's Associations of the province of Ontario, for 1903, contain the papers and addresses delivered at the annual meetings of the two associations of western and eastern Ontario, which were held in January, 1904. At the meeting of the former association it was stated that the value of dairy products of Canada produced in 1903 amounted to \$51,000,000, an increase of \$6,000,000 over the previous year. The territory covered by the western association includes twenty-six counties or districts, with 246 cheese factories, which handled 52,000,000 gallons of milk, and made 24,000 tons of cheese, which realized about \$5,000,000. In order to improve the quality of cheese it was decided to divide the factories into groups of about twenty each and to place each group under the supervision of an instructor appointed by the association, to assist the makers and to impress upon the milk producers the importance of sending pure milk to the factory. In addition to reports of the dairymen's associations, this volume also contains reports of the central eastern and western dairy schools of the province, which show that valuable work has been carried on in these institutions in instruction, cheese and butter making, and domestic science.

Factory Conditions in Ontario.

Sixteenth Annual Report of the Inspectors of Factories for the Province of Ontario. 1903. Toronto. King's Printer, 1904. Pages, 64.

The volume of reports of Ontario Inspectors of Factories, for 1903, contains reports of the inspectors of the western, central and eastern districts and of the Female Inspector of Factories, and also a list of the accidents reported during the year, and a copy of an Act to amend the Factories Act, which was assented to on April 26, 1904. The inspector for the western division reports that industrial and commercial conditions were very satisfactory during the year, there having been large investments of capital, remunerative agricultural yields, and a large output from the factories. There were many applications for overtime permits, of which twenty-six were issued to

factory employers and five to master bakers. Nearly all the master bakers also received permits to set a sponge on Sundays. The law forbidding the employment of children under fourteen years of age was stringently enforced and there was one prosecution for the violation of this law. There were 397 accidents in this district, of which 21 were fatal. Among the causes of accidents, 13 occurred through elevators, 21 through buzz-saws, 12 through circular saws, 19 through rip-saws, one through emery wheels and 10 through the bursting of gears and pulleys. The report deals with a number of other subjects, among them being causes of spontaneous combustion, recommendations as to the construction of shafting and the care of boilers.

The Inspector of Factories for the central district recommends the passing of a new Act regulating elevators, as the present one is not applicable to many now in use. He also recommends that the age limit of the employment of girls in factories be raised to sixteen years. There were no prosecutions in this district during the year, as the instructions of the inspector were always complied with. There were few applications for overtime permits, as it is stated that the system of working overtime has been found to be unprofitable by most manufacturers. The conditions of bake-shops were found to be satisfactory. With regard to laundries it is pointed out that Chinese laundries do not come within the scope of the Act, and are not, therefore, subject to inspection.

There were 237 industrial accidents reported in the central district, which was a larger number than in previous years, owing to the greater promptness of the manufacturers in reporting them. The report concludes with a summary of some legal decisions affecting manufacturers and their employees, delivered in 1902 and 1903.

The Female Inspector of Factories reports that factories and work-shops were very much improved since the previous year. The working hours are well observed. In many factories work is begun at 7.30 or 8

a.m., ending at 5.30 or 6 p.m., and the owners of these establishments stated that their employees accomplished as much work with these hours as if they were forced to labour sixty hours per week. Most of the tailors' work-shops improved very materially during the year, but there is still much to be desired in the workrooms of clothing contractors. There were no gross cases of overcrowding, although there is always a certain amount. The introduction of electricity has brought great relief to the garment worker. There was a marked improvement in the conditions prevailing in laundries, some of the old ones having moved to larger and better premises. The increased use of electricity has also proved of great benefit to this industry. Several laundries connected with religious institutions were also visited, and the premises were found to be clean and well ventilated and the workers seemed well cared for and contented.

The chief difficulty in enforcing the law relating to the employment of children was due to the parents falsely declaring that their children were over fourteen, and it is recommended that the inspectors should bring prosecutions against them.

The inspector for the eastern division reported that he found a number of saw-mills and factories with dangerous boilers, but they did not employ a sufficient number of hands to subject them to the operation of the Factories Act. All the factories inspected were kept very clean, and were provided with proper accommodation, and sufficient fire extinguishers, exits, and fire escapes.

UNITED STATES REPORTS.

Illinois Free Employment Offices.

Fifth Annual Report of the Bureau of Labour Statistics of the Illinois Free Employment Offices, for the Year ended October 1, 1903. Springfield, Ill. State Printers. 1904. Pages, 81.

In the Fifth Annual Report of the Illinois Free Employment Offices it is stated that from their establishment, on August 2, 1899, until October 1, 1903, the total number of

applicants at the offices for employment was 166,397, of whom 141,119, or nearly 85 per cent, secured positions through their agency. In the same time the total number of applications for help was 169,092, and 83.46 per cent of the applicants were supplied with the help sought for. In the year ending October 1, 1903, there were 43,510 applications from employees and 47,559 from employers. Positions were secured in 39,227 cases, of which 934 were of persons who had filed their applications for employment last year.* The applicants for work included 29,414 males and 14,096 females. The percentage of female applicants who secured work was 89.52, and the percentage of males was 87.28. Sixty-eight employers who applied were furnished with 78.35 per cent of the female help required, and 73.20 of the male. Applications were received from 10,533 general labourers, 2,984 railroad labourers, 1,936 factory hands, 1,337 porters, 3,956 women for general housework, 1,020 chambermaids, 1,071 cooks, 1,002 dishwashers, and many others. There were in all 171 occupations represented by male applicants, and 52 represented by females.

Industrial Statistics of Virginia.

Sixth Annual Report of the Bureau of Labour and Industrial Statistics for the State of Virginia. 1903. Richmond, Va.: Superintendent of Public Printing. Pages, 206.

The sixth report of the Bureau of Labour and Industry of Virginia contains returns on the conditions of their trades from contractors and other employers in the various building trades, and also returns from manufacturers of agricultural implements, and owners of canneries and tanneries, and statistics relating to accidents to railway employees, the number of railway employees according to their occupation and the wages and salaries paid to them. Another portion of the report contains an account of the legislation enacted by the States of Illinois, Louisiana, Massachusetts, New York, and Ohio, providing for State boards of arbitration and conciliation. This is followed by a synopsis of the laws of various States relating

to labour passed since January 1, 1902, a synopsis of legal decisions relating to labour, and extracts from the laws of Virginia relating to the rights and interests and providing for protection of wage-earners.

Conciliation and Arbitration in Massachusetts.

Annual Report of the State Board of Conciliation and Arbitration for the Year ending December 31, 1903. Boston: State Printers, 1904. Pages, 419.

In its eighteenth annual report, the Massachusetts Board of Conciliation and Arbitration states that the confidence of employer and employed in it continues to increase. Seventy-nine controversies were submitted for arbitration, and fifty-one decisions rendered by the Board, all of which were complied with, twenty being settled by agreement under the advice of the Board, and the remaining eight being still pending at the end of the year. It is remarked that in recent years both employers and employees have manifested a growing disposition to define their relations by industrial trade agreements, with a provision that controversies arising should be submitted to the State Board of Conciliation and Arbitration for settlement, and that pending such settlement, no strike or lockout should occur. The report contains detailed accounts of the seventy-nine controversies submitted to it for arbitration, and of the principal cases in which it acted as mediator.

An appendix to the report contains an account of the Federal and State legislation of the United States with regard to arbitration and conciliation. Twenty-four states have made provision for mediation in the settlement of industrial disputes, and seventeen contemplate the administration of conciliation and arbitration laws through permanent state boards. The constitution of Wyoming directs the legislature to establish courts of compulsory arbitration, and provides for appeals to the Supreme Court of the state from their decisions. In Kansas, Iowa, Pennsylvania and Texas, the law courts are authorized

to appoint tribunals of voluntary arbitration. In Maryland the Board of Public Works is empowered to investigate industrial controversies affecting corporations indebted to, or incorporated by the state, to propose arbitration, to the two parties, and when it is accepted to provide the means, and if arbitration is rejected, it is required to report the causes of the dispute to the legislature.

BRITISH REPORTS.

Employment in Textile Factories and Laundries.

Supplement to the Annual Report of the Chief Inspector of Factories and Workshops for the Year 1902. Return of persons employed in factories, workshops and laundries:—Textile factories. Laundries. London: Eyrie & Spottiswoode. 1904. Pages, 40. Price, 5d.

The report on the number of persons employed in textile factories and laundries in the year 1901 is based on returns obtained from all occupiers of these establishments in the United Kingdom. Compared with the report for the years 1898-9, there was an increase in the number of returns of the textile industries from 10,767 to 13,129, and a decrease in the number of persons employed from 1,036,579 to 1,029,353. Since the second annual return covering the year 1896, when the employees in the textile industries numbered 1,077,687, there has been a steady decline. With regard to the age and sex of the workers, males under eighteen years of age, amounted to 8.6 per cent of the total number employed, and females under eighteen amounted to 16.4. Returns received from 1,774 factory laundries and 3,876 workshop laundries, show that in the former there were employed 6,746 males and 52,821 females, and in the latter there were employed 1,688 males and 29,652 females.

Lead Poisoning in Earthenware and China Works.

Return of the cases of lead poisoning reported as occurring in china and earthenware works during the Years 1899 to 1903. London: Eyrie & Spottiswoode. 1904. Pages, 8.

According to the return on cases of lead poisoning in Great Britain in china and

earthenware works for the years 1899 to 1903, there were 97 cases reported in 1903. There were 517 cases reported for all other industries under the Factory and Workshop Act. In the North Staffordshire Potteries district, in which 75 cases occurred, the proportion of cases to persons employed was 1'5. With regard to the severity of the symptoms, 25'6 per cent of the men suffered severely and 24'1 per cent of the women. Out of a total of 19 deaths in earthenware and china shops 3 were from lead poisoning. The returns give statistics of the cases according to the different classes of workers in the most important districts, and also statistics according to the main symptoms of poisoning.

Inspection of Explosives.

Twenty-eighth Annual Report of His Majesty's Inspectors of Explosives: being their Annual Report for the Year 1903. London: Eyre & Spottiswoode, 1904. Pages, 236. Price, 1s. 11d.

The Inspectors of Explosives report that during the year 1903 there were only five

deaths from accidents by fire or explosion in the manufacture of explosives in Great Britain. Since the passing of the Explosives Act, in 1875, the average number of deaths has greatly decreased in the manufacture of explosives, but there is an increase in the number of fatal accidents from explosives under conditions to which the Act does not apply. There was no accident by fire or explosion in connection with any magazine during the year. There were in all 325 accidents during the year caused by explosives, in which 45 persons were killed and 380 injured. In addition, there were 29 accidents which did not cause any loss of life or bodily injury. The report contains a list of accidents produced by explosives, with their causes, which had been reported to the Department both from Great Britain and abroad, a table of explosives authorized to be manufactured, particulars with regard to the importation of explosives into Great Britain, and other information.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

THE following synopses of cases affecting labour are based upon the latest law reports and other legal records of the different provinces of Canada:—

NOVA SCOTIA CASE.

Action involving the Rights of a Workmen's Association and its Members.

An action arising out of disagreements between a workmen's association and one of its members, was recently tried in Nova Scotia. It is said to have been the first case of that nature in that province. The action was brought by N. Ferguson against Lodge No. 31, of the Provincial Workmen's Association, the charge being that the lodge and certain of its members wrongfully prevented F. from obtaining work.

The evidence showed that F. was a coal miner in the employment of the Acadia Coal Company at Stellarton, and a mem-

ber of, the lodge of the P. W. A., at that place. In the early part of 1903 a dispute arose between Ferguson and the members of the lodge over an alleged violation by him of a resolution of the lodge to the effect that a miner should not start at work cutting coal in a 'new place' in the mine until the rate of wages for that place had been settled by agreement between the managers of the mine and the committee of the lodge. This, it was claimed, F. had done. He, on the other hand, claimed that, before starting work, he had applied to the committee to settle the rate and had been directed by them to go on with the work until the rate was settled. The upshot was that a fine was imposed on Ferguson, which he refused to pay. Accordingly the lodge resolved to cease work to compel the company to dismiss Ferguson unless he paid his fine, and written notification to that effect was served on the company. The

company protested against being involved in a matter over which they had no control, and Ferguson offered to pay the fine under protest, if granted an investigation before the grand council of the P. W. A., and an undertaking to repay the fine if he should be proved innocent. The lodge, however, thought the matter had gone too far, and all the men in the pit, some four hundred in number, stopped work and remained idle two days, at the end of which time the company discharged Ferguson. Since then F. had been practically out of employment, although he had tried to obtain work. He had obtained employment in another colliery, but had been dismissed after working two days. His earnings previous to his dismissal, averaged \$850 a year; since then he has only been able to earn about \$75. The action was brought against the lodge, and a large number of the members, including the managing committee and other officers. A great amount of time was spent in proving the resolution to cease work and other proceedings of the lodge, and identifying the different defendants with the strike. The question was also raised whether the lodge, not being an incorporated body, could be proceeded against. The judge gave his opinion that the lodge could not be sued, but reserved his opinion as to whether the objection did not come too late, and allowed the case to proceed against the lodge and the individual defendants. On the point as to whether the defendants were justified in their conduct by the refusal of F. to pay his fine, the judge held that they were not, and refused to allow the parties to go into the question as to whether or not F. had broken any resolution of the lodge as being immaterial.

The questions submitted to the judge by the jury and the answers thereto were as follows:—

(1) Were the men called out for the purpose of preventing the plaintiff from being employed unless he paid a fine claimed by the Buller Lodge? Yes.

(2) Did the defendants quit work and cease working for that purpose and to effect

that object: and did they so effect that purpose by compelling the manager of the mines to discharge plaintiffs? Yes.

The jury awarded F. \$1 damages.

(Ferguson v. Buller Lodge No. 31 of the Provincial Workmen's Association. Action tried before Mr. Justice Weatherbe, at Pictou, N.S., June, 1904.)

ONTARIO CASES.

Accident Caused by Alleged Defective Construction of Wall.

V., the employee of C., was engaged in F.'s boiler house, putting in machinery under a contract which C. had with F. While V. was at work in the boiler-house the end fell in, killing him instantly. V.'s widow and children brought an action against F., and also against G., a contractor, who did the brick-work in the erection of the boiler house. It was claimed that both F. and G. had been guilty of negligence which rendered them liable for damages.

In the course of the evidence it appeared that F. had no architect to prepare plans for the building in question, but had adopted the plans prepared by a well-known Chicago firm of architects and contractors for a building belonging to another company. F. had these plans copied by a Mr. Pooper, who was no architect by profession, but, who had had considerable experience in contracting work of that nature. It also appeared that on the day of the accident the building was completed with the exception of the putting in of some machinery.

The wall, which fell down while a strong gale was blowing, was near the edge of a lake which faced a stretch of two or three miles of open water. The court was of the opinion that while it could not be expected that the wall should withstand a cyclone or tornado, yet it was reasonable to expect that, on account of its position, it would be sometimes subjected to more than ordinary wind strain; it was also held that as a matter of fact the wall was not sufficiently strong to meet such ordinary wind pressure. Nevertheless the court was of

the opinion that F. was not liable and could not be made so unless it was proved that he knew or ought to have known of the defect in the wall, or that he had employed an incompetent superintendent or one who was guilty of negligence. There was no obligation on the part of F. to guarantee the absolute safety of the building.

It was also held that it was not unreasonable for F. to adopt the plans of another building, or to employ a person who was not an architect to take charge of the construction.

As regards the claim against G., it was held there was no evidence of any negligence on his part.

The action was therefore dismissed, but without costs.

(Valiquette v. Fraser. Action tried before Mr. Justice Teetzel, 11th July, 1904.)

Employee Fined for Breach of Contract.

A case in which an employee was charged with breach of contract was recently tried by the police magistrate at Hamilton.

Elizabeth Leonard signed in Liverpool, England, an agreement with the Hamilton Cotton Company, whereby that company undertook to pay her passage to Canada, and to give to her \$5 a week for work there, the passage money to be gradually repaid out of the wages, and the girl being at liberty to leave the company as soon as same was repaid in full. She worked for a short time for the Hamilton Cotton Company, but when she had only repaid about \$7 of her passage money she left in order to take a better position.

It was argued that no such action could be taken upon this agreement, because it had been signed in England, but the magistrate ruled against this contention. It was held that the girl had deserted her employer without any reason or excuse, and in direct violation of the signed contract. A fine of \$25 was therefore imposed.

(The Hamilton Cotton Co. v. Leonard. Action tried before the Police Magistrate at Hamilton, 7th June, 1904.)

THE LABOUR GAZETTE

THE JOURNAL OF THE DEPARTMENT OF LABOUR

Vol. V—No. 3

SEPTEMBER, 1904

Price Three Cents

The LABOUR GAZETTE wishes to draw the attention of its readers to the fact that, while every care will be taken to have information as complete and impartial as possible, it does not in its accounts of proceedings, abstracts of reports, legal decisions, quotations or other records of matters of concern to labour, necessarily endorse any of the views or opinions which may be expressed therein.

DEPARTMENT OF LABOUR, CANADA,
September 15, 1904.

Prominence is given among the special articles of the present issue of the *Labour Gazette* to the result of an investigation recently conducted by the Department of Labour into the subject of employment agencies, and the nature and extent of their operations in Canada. A statistical table of private employment agencies, of whose existence the Department was able to obtain a record, is given, setting forth the information obtained with regard to various particulars, such as class of labour dealt with, fees charged, date of establishment, etc. In the accompanying article reference is also made to the farm labour employment bureaus for immigrants and others conducted by the governments of Ontario, Manitoba and the North-west Territories. Special account is also taken of employment bureaus assisted by municipal funds, and agencies conducted under the auspices of trade unions.

The Committee of Conciliation, Mediation and Investigation appointed under the Railway Labour Disputes' Act, 1903, in the matter of the dispute between the Grand Trunk Railway Company and certain telegraphers in its employment, failed to effect a settlement during August, reporting to the Honourable the Minister of Labour to that effect on the 24th of the month. The matter was accordingly referred for adjustment to a board of arbitrators under the Act, the members of the Conciliation Committee being retained, with the consent of the parties to the difference, to act as the board in question. A report of the proceedings of the Conciliation Committee and of the organization of the Board of Arbitrators is contained in the present issue.

With the prorogation of the Dominion Parliament on August 10, forty Acts were assented to, bringing the total number for the session to 142. The special article dealing with this legislation, in so far as it affects the condition of labour, which was begun in the August number of the *Labour Gazette*, is continued in the present issue, covering more particularly the Acts which received the Royal assent since August 1.

A special report of a Departmental Committee appointed by the Home Office, Great Britain, to inquire into the working of the law relating to compensation for injuries to workmen, is reviewed in a separate article. Special mention is also made of the union meeting at Montreal of the Canadian division of the Brotherhood of Locomotive Engineers.

LABOUR AND INDUSTRIAL CONDITIONS DURING THE MONTH OF AUGUST, 1904.

I.—General Summary.

A GENERAL survey of labour conditions throughout Canada during August shows on the whole a decline in employment in the provinces east of Lake Superior and in British Columbia, whereas a decided improvement in tone was evident in the province of Manitoba and in the North-west Territories. Certain of the correspondents' reports within the former districts, as for example, St. John, N.B., Sherbrooke, Que., St. Catharines, Ont., and Windsor, Ont., show conditions equally as favourable as, if not more active than in July, and Sydney, N.S., and Sault Ste. Marie, Ont., show a marked increase in the activity of the labour market. In the majority of cases, however, including the larger cities of Ontario and Quebec, employment has been on a somewhat lower level, though no case of more than local stagnation or of a serious set-back affecting large numbers of employees was reported. In Manitoba and the Territories, as stated, the improvement in the condition of the labour market was of a decided nature, the influx of labour during the earlier months of the season having been well absorbed, and a demand for additional help being prevalent. These conditions are especially reflected in the report of the Winnipeg correspondent, which describes a condition of exceptional activity with a keen demand for labour in almost every department of industry. In British Columbia the comparative failure of the salmon run, and an influx of labour were responsible for quietness in the larger centres, though the New Westminster and Rossland correspondents report favourably of the leading branches of industry represented in their respective districts.

Changes in Wages and Hours.

The general quietness of the month in the eastern provinces was reflected in the wages movement, which has been on the whole, in view of recent

developments in the lumbering industry, of a downward tendency, though a strong upward movement was reported from Manitoba and the West. Employees of the several lumber companies operating in the Ottawa Valley, who constitute the largest body of work-people affected by a change in wages during August, had their wages arranged for the coming season on the basis of a maximum rate of \$28 per month, *choppers, teamsters and first-class rollers* being reduced to that rate from the scale of \$30 and \$35 per month, which prevailed last year. *Road cutters* will be paid \$20 to \$22, and *cooks* \$40 to \$45. The high priced labour engaged in the square timber trade, which received \$50 and \$55 per month last year, will be employed only to a very limited extent during the coming season, owing to the unfavourable conditions prevailing in the British market. Prospects at the close of the month were stated to be for still further reductions in the wages of these classes as the season advances, in spite of the fact that the supply of men is not notably in excess of the demand.

Wages of farm labour during August continued on a high level, from \$30 to \$40 per month or \$2 per day being a common rate throughout the West, with as high as \$35 per month with board offering in some localities of Ontario, though the general level throughout the east was from \$25 per month upwards.

The most important increase of the month was recorded at *Winnipeg, Man.*, where the wages of *labourers* were advanced from 17½ cents to 20 cents per hour, as the supply of labour of this class on the market became absorbed. *Railway labourers* throughout the West were also raised from \$1.50 to \$1.75 per day, those who were previously receiving \$1.75 being increased to \$2 per day.

At *Winnipeg*, also, negotiations were in progress between the Brotherhood of Rail-

way *Carmen* and *Machinists* and the C.P.R. Company, looking towards an increase in scale.

Other advances of the month were, an increase in the wages of *stonecutters* at *Ottawa* to 43 cents per hour, and an advance in *painters* and *builders' labourers'* wages reported at *Peterborough, Ont.*, *Drug clerks in Ottawa* were affected by a Sunday closing agreement of the employers, by which shops are to be closed on Sundays except for three hours in the evening.

Some objection to an early closing by-law affecting *barbers* in *Toronto* was expressed.

At *St. Thomas* the introduction of a piece work system was reported in the *M. C. R. shops*.

The payment of certain employees on the *I. C. R.* by check instead of by cash was inaugurated at certain points during August.

Cost of Living.

A general advance in the price of *flour*, following the upward movement and scarcity of milling wheat, was the most notable occurrence of August affecting cost of living in Canada. In the opening week of the month notice of an advance of twenty cents per barrel on all grades of flour, was sent out to the agents of the *Ogilvy Milling Company*, and several specific instances of advances, ranging as high as forty cents a barrel at *New Westminster, B.C.*, may be seen in the reports of local correspondents. At *London, Ont.*, flour is quoted at a price nearly \$1 higher than ruled at this time last year. The price of bread has not been generally affected, though an advance was reported at *Montreal*. *Eggs* were scarce and dear during August throughout *Ontario, Quebec* and *Manitoba*. On the other hand, the high price reported a few weeks ago for choice *meats* at *Hamilton, Toronto* and other points in *Ontario*, have shown a decline as a result of a decrease in cattle shipments.

Interruptions to Industry.

From the standpoint of industrial unrest, August compared favourably with July and

with the same month a year ago, the total number of labour disputes in existence being fourteen as compared with twenty in July, and twenty in August, 1903. With the exception of *Toronto* and *Hamilton, Ont.*, where strikes in the building trades were in progress, the labour market throughout Canada may be said to have been almost wholly free from serious unrest.

The occurrence of the month attended with chief loss to Canadian industry was the prevalence of forest fires in *British Columbia*, following the general drought of the past few weeks in that province. Many millions of feet of valuable timber were destroyed, the loss being variously estimated. The *Crow's Nest Pass*, the *Kootenays*, and the coast, were the chief districts affected, the towns of *Fernie* and *Michel* being threatened in the first, and several logging camps burned out in the last. On *Vancouver Island* also the damage was heavy. Inconvenience was caused to other industries by the smoke, which at *Michel* interfered with the proper ventilation of the coal mines and led to a temporary shut down. In *Alberta*, in the neighbourhood of *Frank*, in *Northern Ontario*, chiefly in the *Temagami* region, and in *New Brunswick*, forest fires also inflicted severe losses. The *Provincial Director of Colonization and Forestry of Ontario* conducted an investigation into the cause of the fires in the *Temagami* district.

Eastern and Central Canada suffered considerably during August from exceptionally heavy wind and electrical storms. In *Nova Scotia* the most severe summer gale in years swept over the province on August 20th, causing much damage to the fruit crop in the *Annapolis Valley*, and to other property at *Halifax* and elsewhere. Shipping on the coast also sustained much damage. Thunder storms in *New Brunswick* caused damage to crops and other property. In *Quebec* a heavy wind storm in the opening week of the month caused losses, especially in the neighbourhood of *St. Hyacinthe, Monmartre, L'Original* and *St. Martins*. In *Ontario* two exceptionally severe electrical storms visited the province, burn-

ing several barns and causing loss of life in one or two localities. The southern and western peninsula was the section chiefly affected, York county also suffering severely. On August 22 an electrical storm did considerable damage in Manitoba, and Eastern Assiniboia

Among industrial establishments destroyed by fire during August, the following as reported in the press of the Dominion may be mentioned. A sash and door factory at Sydney, N.S., loss \$30,000; a saw mill, handle factory, shingle factory and stores at Mack's Mills, Que., loss \$15,000; a saw mill and flour mill at Rigaud, Que., loss \$15,000; the street railway company's car barns and a broom factory at London, Ont., loss \$30,000; seventy houses and several stores at Dresden, Ont., loss \$20,000; a stationery warehouse at Toronto, loss \$75,000; a planing mill at Tilbury, Ont., loss \$7,500; a furniture factory at Waterloo, Ont., loss \$125,000, and eighty-five men thrown out of employment; a pork-packing establishment at Brantford, Ont., loss \$50,000, and fifteen men thrown out of employment; a dry kiln at Rat Portage, Ont., loss \$6,000; several stores at Carberry, Man., loss \$35,000; a C.P.R. oil shed at Brandon, Man.; the car works of the British Columbia Electrical Railway Company at New Westminster, loss \$40,000 and forty men thrown out of employment; and the Albion Iron Works and 50-70 houses at Victoria, B.C., loss \$150,000. A saw mill at Langton, Ont., and a paper mill at St. Catharines, Ont., were damaged by boiler explosions.

Some depression in employment was reported at Montreal as caused by the going on half time of the Montreal Woollen Mills Company, and the Excelsior mills. At Brantford, Ont., also, the closing down of the Massey Harris establishment threw a number of men out of work. At St. Croix and Marysville, several hundred employees of the cotton mills were in idleness. The falling off in shipments of refrigerator beer caused by the strike of meat workers in

Chicago affected railway employment to a certain extent in western Ontario.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada as indicated by the reports of local correspondents to the *Labour Gazette* for August, and by information received at the Department from other sources, may be briefly summarized as follows:

Agriculture.

Harvesting operations made the month an extremely busy one throughout all sections of the Dominion, the season being on the whole from one to two weeks later than last year. In certain sections of Eastern Canada the crops had been for the most part gathered by the closing week of the month; in the West, however, harvesting was at its height on August 31. Farm labour accordingly was in very general and active demand, the need of extra men for the western harvest being placed approximately at 12,000, on August 12. The demand was as usual met by excursions conducted by the railway companies. In Ontario and Quebec wet weather interfered to some extent with harvesting, and electrical storms, as above stated, caused some destruction of farm property; but in the West, and especially during the latter half of the month, excellent weather was the rule.

With regard to the probable crop yield of the season, it was impossible at the close of the month to estimate with precision. In Western Canada, on which interest in this connection was centered, reports of the most favourable kind were received up to the middle of the month. During the third week of August, however, alarming reports of damage done by rust were received, but earlier these reports were proved to have been greatly exaggerated, and during the closing days of the month a much more buoyant tone was evident in the crop reports of the railway companies, milling companies and others. Authoritative estimates placed the average yield throughout the West at from eighteen to twenty

bushels, which with the prevailing high price of wheat would insure an exceptionally prosperous season. In Ontario an estimate compiled by the Department of Agriculture on August 1 showed a falling off in the total yield of wheat by 7,899,975 bushels as compared with last year, with a decrease of 870,814 bushels in rye. Barley, however, showed an increase of 757,818 bushels and hay an increase of nearly 1,000,000 tons. In fruit, apples, it is stated, will be a fair crop, being exceptionally free from fungus diseases, and with the outlook for good market conditions in Great Britain. Pears will be a light crop. Peaches and plums will be a failure. Reports with regard to the dairy output in Quebec and Ontario were conflicting the railways estimating a decline. Certain private reports, however, anticipated an output of butter and cheese equal to that of last year, owing to the superior pasturage prevailing.

Fishing.

Operations in the Maritime Provinces were generally confined to cod fishing, and small catches were reported in many localities. On the Great Lakes also the season has been generally dull. In British Columbia the salmon pack for the year is estimated at 70,000 cases, which is less than one-third that of 1903, the run of salmon being stated as the poorest in many years. The experiment of fishing with traps off Vancouver Island, in spite of the circumstances connected with the season, is reported as having been fairly successful, the minimum wage paid for the labour employed being \$45 per month and board, with an average of \$54 a month and board, and a maximum of \$75 a month and board. White labour only was employed.

The Honourable the Minister of Marine and Fisheries visited British Columbia during the month for the purpose of inspecting hatcheries and otherwise inquiring into conditions relating to the industry. While in Vancouver a memorial was presented to him by the Fraser River Cannery Association on the 15th, relating to the close season, the construction of hatcheries,

the cleaning of spawning grounds, and other matters. On the 24th the Minister announced that the close season for sockeye should be from August 25 to September 15, that two hatcheries would be constructed, one at Morris Creek; that more efficient police patrol would be provided and that the question of a commission to investigate conditions in the industry was under consideration.

An experimental shipment to New York of Canadian herring cured by the Scotch process, realized an increase of about 50 per cent on the price under the old method.

Instead of the proposed payment of bounties for the destruction of dog-fish, the Honourable the Minister of Marine and Fisheries, it was announced, will erect three factories in the Maritime Provinces for the reduction of dog-fish and fish offal into oil, glue, &c. The factories will cost about \$9,000 each.

Lumbering.

Speculation as to the probable volume of next year's lumber cut and consequent activity of employment received a good deal of attention during August, the indications pointing generally to a reduction in the output in view of the prevailing depression in the leading markets for lumber. Especially is this true of the output of square timber which in the Ottawa valley will be discontinued or very largely curtailed. The wages of shantymen accordingly, as above noted, are for the coming season much lower than last year, \$28 per month with board, being the maximum offered. The number left without employment owing to the contemplated reductions, however, will not be large. In British Columbia and New Brunswick, as already stated, forest fires caused very heavy losses during August. Saw milling throughout Ontario and Quebec has been exceptionally active, and in British Columbia also the mills, where not interfered with by forest fires, had for the most part a good month.

The Ontario Crown Lands Department received a report showing the amount of timber cut during last winter on the lands

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet,

* One firm closed down. + Plumbers quiet.

of settlers in the Temiskaming district. The sum of \$232,788 was divided among 300 settlers, cedar, pulpwood and spruce being the most valuable products.

The question of the protection of the Quebec forests against fires as between the government and limit holders was discussed at Ottawa during the month.

An interview was held between the provincial government of New Brunswick and a delegation of lumbermen, who requested a reduction in the rate of mileage for timber licenses from \$8 to \$4, the existing depression in the lumber market being advanced as a circumstance justifying the change.

According to a statement recently issued by the Dominion Statistician with regard to the wood pulp industry in Canada, there were thirty-nine mills with an output of 275,619 tons of wood pulp in operation in Canada in 1903, an increase of 34,630 tons over 1902. The value of the output was \$5,219,892, of which \$3,013,441 was exported. Great Britain took \$865,826 of the export and the United States \$1,890,448.

Mining.

Generally active conditions were reported, though the Nova Scotia collieries showed slackening employment and a diminished output. In Ontario, however, conditions showed an improvement on last month, and in British Columbia there was no abatement in activity.

The total mineral output for Ontario for the year 1903, as given in the report of the Bureau of Mines of the province just issued, was \$12,870,593, as against \$13,391,634 for 1902. The decrease was wholly in metallic products, while in the non-metallic there was a large increase. The decrease is largely accounted for by the shut-down of the Sault Ste. Marie industries, reducing the demand for iron ore. There was also a diminution in the output of the precious metals.

The annual report of the Acadia Coal Company, Halifax, showed total sales amounting to 344,260 tons. A dividend of

three per cent was paid and a balance of \$107,000 carried forward.

Manufacturing.

Correspondents' reports show general activity to have prevailed during August, with the exception of a few industries and localities. Woollen and cotton mills, for example, report depression, and the boot and shoe trade continues slack at Quebec. Any local instances of diminished employment in manufacturing, however, were off-set by the revival which took place in the manufacture of steel at Sydney, N.S., and Sault Ste. Marie, Ont. In the former city the contract for building a new rail mill was awarded by the Dominion Iron and Steel Company during August, and heavy shipments of iron ore cargoes for manufacturing purposes were received. At a meeting of the directors of the Dominion Iron and Steel Company held in Montreal on August 13, reports from the works at Sydney were received stating that the steel rod and washing mills were in full operation, and that the rail mill would be in a position to produce upwards of 500 tons of steel rails a day by about the end of the year. In the closing week of the month blast furnaces at Sydney mines and No. 4 of the Dominion Steel Company were blown in. At Sault Ste. Marie the steel plant of the Lake Superior corporation resumed operations for the first time since December last, turning out steel rails on the 24th of the month. In this connection an important step taken by the government with regard to the duty on iron and steel was announced in the *Canada Gazette* of August 27, which contained a notice of the imposition of a duty of \$7 per ton on all iron or steel railway bars or rails imported into Canada. The enactment is by authority of legislation passed in 1903, allowing such duties to be imposed in the event of the Governor-General in Council being satisfied that steel rails of the best quality suitable for Canadian railways are being manufactured in Canada from steel made in Canada in

sufficient quantities to meet the ordinary requirements of the market.

Reviews of the progress of manufacture in Toronto during the past few years show a very material expansion in business. Eleven factories representing the hardware industry for example, now employ two and a half times the number of men they had ten years ago, the number having increased from 732 to 1,836 artisans. Wages in the same time have increased from ten to one hundred and twenty per cent and factory buildings are stated to be three and four times as large as they were ten years ago. Twelve other hardware factories employ 2,495 men as compared with 910 ten years ago, the total increase in this branch, amounting to about 166 per cent. Six manufacturers in other lines in giving a comparison of the number of their employees now with ten years ago, stated that their pay roll showed an increase of 553 or more than double. In the same lines eight new factories had been established in the city giving employment to 586 hands; the output had largely increased, one firm reporting it as ten times that of ten years ago. The industries include the manufacture of soap, boot and shoes, biscuits and other products.

Transport.

Railway construction continued very active, especially in Western Canada. Construction on the Grand Trunk Pacific Railway, it was announced, will begin at both ends of the line from Winnipeg West and from the Pacific Coast towards Winnipeg, as well as from Winnipeg East and Moncton West. The commission of construction was named by the government during the month.

Railway employees were well employed, though the tourist trade has been less active than a year ago.

Some depressions in the shipping trade of the Maritime Provinces was reported.

At the annual meeting of the C.P.R. directors on August 8, the results for the fiscal year to June 30, were shown as fol-

lows: Gross earnings, \$46,469,132; working expenses, \$32,256,027; net earnings, \$14,213,105; income from other sources, \$1,691,269; total net income, \$15,904,374; net revenue available for dividends, \$8,088,277. After payment of all dividends declared the surplus for the year carried forward is \$1,666,204. It was stated that at the annual meeting of the C.P.R., to be held in October, the stockholders will be asked to authorize the executive to increase the capital stock by \$25,000,000 in pursuance of the expansion policy of the company.

The half yearly reports of the Grand Trunk Railway shows gross receipts of £2,559,300. The working expenses were £1,895,600, and the net receipts £663,700. The net revenue charges, less credits, were £519,700, leaving a balance of £144,000.

The organization of the Grand Trunk Pacific Railway Company was completed at Montreal on August 10. Mr. Chas. M. Hays was appointed president, and Mr. Frank W. Morris appointed 2nd Vice-president and general manager.

From the opening of navigation to August 1, an increase in the number of ocean going vessels from 388 to 407 was reported at Montreal, though tonnage fell from 922,000 to 941,000. In inland shipping the number of vessels decreased from 4,822 to 4,284 and the tonnage from 1,056,000 to 991,000.

The freight traffic through the Sault Canals during July broke all previous records, amounting to 5,609,079 tons, an increase over August last year, which previously held the record. Of this amount 719,876 tons passed through the Canadian canal.

The commission appointed by the Ontario government has been investigating the question of railway taxation in the United States during the month.

Several decisions governing freight rates and classification were handed out by the railway commission on August 1. The commission held sittings throughout Manitoba and the West later in the month.

Conditions in the Trades.

The *building trades* in nearly every locality continued very active during August, Toronto and Hamilton being the chief centres of importance from which favourable conditions were not reported. In the *metal trades* there has been on the whole a decline, a number of correspondents reporting slack conditions, though several sections continued active. The *woodworking* branches were well employed, *coopers* being especially busy on fruit boxes. Few changes were reported in the *printing trades* from last month, the labour market showing on the whole a good tone. In the *clothing trades* *tailors* were generally dull, and *boot and shoe makers* quiet. *Garment workers*, however, had a very good month. Under the heading of *food and tobacco preparation*, *bakers* and *confectioners* had an exceptionally active month, but *cigarmakers* report somewhat of a diminution in employment since July. *Miscellaneous trades* had a very good month. *Unskilled labour* in Manitoba and throughout the Territories was in keen demand; in many other districts, however, a slight falling off in employment was on the whole noted.

Meetings of Associations, &c.

At the convention of the International Typographical Union held at St. Louis, M., Toronto, Ont., was selected as the next place of meeting.

The fourth annual convention of the Union of Canadian Municipalities was called during August for September 20, 21, and 22, at London, Ont.

A circular was sent out during August convening the 20th annual convention of the Trades and Labour Congress of Canada on Monday, September 19, at Montreal. The circular requests a large attendance as an exceptionally important list of subjects is to be discussed, among them the proposal to establish a legal defence fund and national law bureau for the benefit of trade bodies in Canada, free text books, the immigration problem, &c.

The second annual convention of the National Trades and Labour Congress will

be held at Ottawa, beginning September 27. Alien labour and the legalizing of the Canadian union label, are among the many subjects that will be discussed.

The Canadian Association of Stationary Engineers held its annual convention at Hamilton during August. The name of the association was changed to the 'Canadian Association of Steam Engineers.' The per capita tax was increased from 70 cents to \$1 for all branches within four hundred miles of the place of meeting. A proposal to establish a sick benefit fund was rejected. The officers elected for the coming year were F. J. Sculthorpe, Hamilton, president, and W. Ingles, Toronto, secretary.

The Canadian Master Bakers' Association held its annual convention at Hamilton, Ont., during August. A large growth in membership was reported. In the address of the secretary it was stated that a feature of the year had been the call for a standard three pound loaf in Ontario. The hope was also expressed that legislation would be granted allowing bakers to make whatever sized loaves they choose so long as they were stamped. Sunday labour was stated to be a necessity. Objection was made by some of the smaller bakers to city bakers shipping bread into country places, and a resolution was passed suggesting that those shipping bread outside their own localities should co-operate with the local bakers, where the organization existed, so that harmony should prevail. 'The employer and his relation to the employee' was also discussed. Mr. A. A. Lees, Hamilton, was elected president, and James Acton, Toronto, secretary.

Notes of the Month.

During July thirty-seven new *post offices* were opened in Canada.

Preparations for the celebration of *Labour Day* were actively in progress in many localities.

Successful tests were carried out at *Yarmouth, N.S.*, of *peat coke*, as a fuel. The coke in question was made at *Tusket, N.S.*

Arrangements for sites were carried out by the *Anglo-Canadian Cold Storage Company* during August. Toronto, Ottawa,

Montreal, St. John, and Halifax are the points at which warehouses will be established.

The system of *pilotage* in operation on the St. Lawrence river was discussed during the month. It was stated that the desire on the part of masters and pilots to make time was the most fruitful cause of accident on this route.

The first annual report of the lighting and power system of the city of Guelph, under municipal ownership, as adopted by the city council during August, showed a profit of \$10,146, after providing for maintenance, interest on debentures and depreciation. The average sale price of gas was \$1.35 per thousand, and a better quality was provided than before. The expenses of management were \$500 less than the average of five years under the old company.

With regard to the result of the investigations of the municipal commission on the distribution of *Niagara power*, among Ontario municipalities, the chairman of the commission was quoted during the month as saying:—

The report of this commission will be most complete and exhaustive. It will deal with every phase of the situation, and each municipality will be placed in possession of information in detail as to what the cost of supplying it with Niagara power will be, and the probable demand. It will contrast the various schemes that are open to the municipalities, the transmission of purchased power and the generation and transmission of power, either by purchasing existing Niagara companies or by constructing new works. There will also be expert opinions as to how the money necessary to either scheme can be provided, how any scheme which a municipality may have entered into may be dovetailed into the larger plan, or companies at present in operation be taken over. There will be everything requisite should the municipalities desire to go on with the project and give to the world its greatest object lesson in municipal ownership.

The prevention of the *smoke nuisance* in Montreal was discussed during the month, a report being made to the city council by the Boiler Inspector, deputed to enforce the Act. Locomotives and steamboats were

stated to be potent causes of the nuisance. It was advised that the department continue the work of suppressing the nuisance within the city limits.

The *commission* appointed by the government of New Brunswick to take evidence as to the need of a provincial Factories' Act, held its opening session at St. John, N.B., on August 11. Several manufacturers and employees were examined, and the commission personally visited a number of factories. Later in the month sessions were held at Campbellton, Newcastle and Chatham. No official statement had been presented at the close of the month.

The total assessment of ward 3 of *Toronto* which forms the basis of the taxation of 1905 in other parts of the city amounted to \$61,191,159, an increase of \$1,259,656, not including the loss in assessment on buildings in the fire district amounting to \$1,181,150. There are 145 factories and manufacturers giving employment to 13,422 persons in the ward.

During August a number of infractions of the provisions of the Ontario Factories' Act, prohibiting the employment of children under fourteen years of age were proceeded against by the factory inspectors. A complaint was made against eighteen parents or guardians in the town of Cornwall, who gave false birth certificates of children employed in the cotton mills, and fourteen convictions were secured. In the Western district prosecutions were instituted at Woodstock, where both the parent and the employer in a manufacturing establishment were proceeded against for a violation of the Act. The chief difficulty experienced in enforcing these provisions was stated by the inspectors to be with the parents, who frequently give false certificates concerning the age of their children in order to secure employment for them.

II.—REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were more favourable during August than in July. The gradual starting up of the different parts of the steel plant gave employment to many of the idle employees. Six open hearth furnaces are now in operation. Two batteries of ovens are being supplied with washed slack from the new wash plant, half of which is completed. A better quality of coke will be produced when the ovens get up to their normal temperature. The contract for a rail mill of 500 tons daily capacity has been let to an American firm. The mill is to be completed and turning out rails by July, 1905.

The blast furnace of the Nova Scotia Steel & Coal Company was blown in during the closing week of the month. The four open hearth furnaces, which take up the full product of the blast furnace, will be heated later on. No 47 blast furnace of the Dominion Steel Company was also blown in.

The wholesale and retail trade of Sydney is gradually improving; around the colliery district the retail trade is fairly good.

There is an abundant supply of labour of all kinds owing to the broken time at the collieries. Numbers of British miners are leaving, some going back to Scotland and England, others to the west.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The hay crop has been gathered and averaged about the usual crop. Grain and roots will be an average crop.

Mining.—The coal industry, as in July, remains rather dull for this season of the year. The cause of this, is the increased capacity of the collieries and the depressed state of the steel industry in the United States. The Sydney strike in a greater or

less degree affected the output of the Dominion Coal Company. An English syndicate has taken control of the Cape Breton Coal, Iron and Railway Company, and is actively opening up the coal areas; a slope is down 200 feet, and cross sections are being driven. The new shafts near the Lourdes are being rapidly but carefully sunk down to the coal; the work will take upwards of two years to complete. A large number of men will not be required, the present force being sufficient during the sinking process. Work has begun on the branch line connecting No. 6 colliery with the Sydney and Louisburg Railway. The shipments for August show an increase over July, owing to the ore vessels of the steel company resuming their ordinary trade.

Railroad construction.—The electric tramway running from New Glasgow to Trenton, by way of Stellarton, Lourdes and Westville, is almost completed, and will be ready for travel early in September.

CONDITION OF PARTICULAR TRADES.

Building trades. Bricklayers and masons were fairly well employed. Carpenters, joiners, plumbers, gas and steamfitters were active. Lathers and plasterers, painters, decorators and paperhangers, and builders' labourers were not very active.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists and engineers, steam engineers, electrical workers and linemen were busy. Stove mounters were fairly busy. Blacksmiths, boilermakers, and horseshoers were busy. Jewellers experienced a slack month.

Woodworking and furnishing trades.—Woodworkers, car builders, pattern makers and coopers were busy. Carriage and wagon makers were active.

Printing and allied trades.—Printers and pressmen were active.

Clothing trades.—Journeyman tailors, garment workers and hat makers were satisfactorily employed.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were busy.

Miscellaneous.—Barbers were busy. Clerks and stenographers were not busy. Delivery employees were fairly active.

Transport.—All employees of the transportation service on the railways were fairly well employed. Steamboat men, steamboat firemen, ship labourers, longshoremen and street railway employees were actively employed.

Unskilled labour.—There are more labourers than employment.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the month of August the condition of the labour market was fairly good, though not quite as active as during the previous month. Many branches of labour have had continued activity, but others have shown relaxation. Painters have not been as active as during the previous month, and some cases of idleness are reported. Commercial activity has been a marked feature of the month, the tourist travel causing considerable stir. Wholesale and retail business has been good, and with the opening of the provincial exhibition much activity is anticipated. The labour field is entirely free from unrest, and in this respect the entire season has been satisfactory. A number of men engaged as unskilled labourers have been employed during the past month in various occupations.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Nearly all branches of this industry will show an abundant yield. The root crop has been good. Hay has not been up to the standard.

Fishing.—This industry during the past month has shown an improvement. Mackerel have been taken in goodly quantities, while cod and herring fishing have been fairly successful.

Railroad construction continues to provide much employment, and large numbers of men are engaged.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, were busy. Painters showed relaxation, with some men idle. Plumbers and steamfitters were normally busy. Stonecutters were busy, as were builders' labourers.

Metal, engineering and shipbuilding trades.—Moulders were fairly busy. Machinists and engineers were active. Blacksmiths were normally active. Shipwrights and caulkers and electrical workers were busy. Horseshoers reported conditions dull.

Woodworking and furnishing trades.—Upholsterers and carriage and wagon makers were busy. Coopers were fairly active.

Printing and allied trades.—Printers were only fairly busy. Pressmen reported conditions unchanged.

Clothing trades.—Tailors were busy. Boot and shoe workers were dull.

Food and tobacco preparation.—Bakers were busy and butchers fairly active.

Leather trades.—Leather workers were fairly busy.

Miscellaneous.—Barbers, clerks, delivery wagons and laundry workers were busy.

Transport.—All branches reported work brisk. Longshoremen are fairly busy.

Unskilled labour found employment active.

CHARLOTTETOWN AND DISTRICT.

Mr. F. J. Nash, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during August was very similar to that of July, the supply being a little in excess of the demand, and contractors stating that they have had no difficulty in securing men. The month saw a new machine shop placed in full operation, and a new foundry building in connection therewith made ready. The building trades continued active, but

the completion of the new market house removed a source of employment for forty men.

Business men report a good month with a healthy tone to trade. There were no changes in the rates of wages or hours of employment, and harmonious relations between employers and employees remained undisturbed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to dry weather hay and grain were little more than half an average crop. Harvesting was almost completed at the end of the month.

Fishing.—The lobster season closed last month and cod fishing was the only fishing carried on. Quietness prevailed.

Manufacturing.—The few manufactories in this almost exclusively agricultural province were carried on about as last month, with supply and demand well balanced.

Railroad construction and employment.—The work of filling in the approaches to the Hillsborough bridge was rushed day and night, good progress being made with the steam shovel. At the bridge site dredging was carried on to furnish material to protect the riff-raff or the bases of the piers. One span of the superstructure was almost completed, and another wharf is under way, so that the assembling of two spans may go on simultaneously. Forty men are employed at the latter work. The laying of rails was commenced on the road from Murray river to Murray Harbour South, and a survey was started from Emerald through the New London district.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons had a quiet month. Carpenters and joiners, lathers and plasterers, painters, decorators and paperhangers were busy. Plumbers had a quiet month, and builders' labourers were fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders had steady employment. Iron workers and helpers were busy. Machinists and engineers had a good month.

Linemen were busy. Bicycle workers had a quiet month.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers, and car builders were steadily employed.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeyman tailors, garment workers, boot and shoe workers were steadily employed.

Food and tobacco preparation.—Bakers, confectioners and tobacco workers were busy.

Leather trades.—Tanners and saddlers had a good month.

Miscellaneous.—Barbers, clerks, delivery employees, and hotel employees were steadily employed.

Transport.—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, trainmen, freight handlers and longshoremen, were busy. Truckmen had a good month.

Unskilled labour.—The demand was a little below the supply.

ST. JOHN, N. B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market continued active during August, with a slight decrease in business along the harbour front. The building trades were all well employed, and work is progressing rapidly on the Canadian Bank of Commerce and other new buildings. The New Brunswick Southern Railway has placed orders with the Dominion Bridge Company for four new steel bridges to replace the wooden bridges at New River, Lepreau, Meadow Brook and Lily Brook. Mr. George McArthur has been awarded the contract to erect the building and plant on Partridge Island, from which it is proposed to furnish acetylene gas to light the different government buildings; also to build the proposed new hospital and detention buildings on the island. The transportation companies report that business

continued good during the month, and that it will probably increase in September during exhibition week. Wholesale and retail trade is active, and the prospects are that it will continue so during the autumn. There has been no change in the rates of hours or wages, except that during the months of June, July and August the clerks in the various establishments enjoyed the Saturday half holiday. The Factory Act Commission held three sessions in St. John and three in Chatham, and it is the intention of the commission to visit St. Stephen in the near future.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—Fishing is quiet, and the market is very slimly stocked. Herring is reported plentiful, and cod scarce.

Lumbering.—The weekly report of the Fredericton Boom Company shows that 3,367 joints were rafted. At the Douglas boom 134 hands were employed, and at the Mitchell boom, 99.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers continued active. Painters and decorators were well employed. Plumbers, gas and steamfitters report work good. Stonecutters and builders' labourers continue busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists and engineers, electrical workers and linemen report business active. Boilermakers and sheet metal workers report work plentiful.

Woodworking and furnishing trades.—Woodworkers and carriage and wagon makers say work is good. Shingle weavers report work as only fair.

Printing and allied trades.—Printers, pressmen and bookbinders report a falling off of business during the month.

Clothing trades.—Journeyman tailors report business fair. The strike has not yet been called off, but only three of the strikers remain idle.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers report trade active.

Miscellaneous.—Brush and broom makers continue active. Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen, railroad switchmen, railroad trackmen, freight-handlers, report business very active. Steamboat men and steamboat firemen were actively employed.

Ship labourers were fairly well employed. Street railway employees were very busy, and new men are being trained for the rush during exhibition week. Cab-drivers and hackmen were well employed and teamsters and expressmen busy.

Unskilled labour. Unskilled labour is fairly well employed

DISTRICT NOTES.

Moncton.—The John A. Humphrey Company, Limited, with a capital of half a million dollars, has been organized for the purpose of taking over the woollen mill and business of J. A. Humphrey & Son, and extending operations. A deputation of railway car men waited on the Minister of Railways August 29, and asked for the adoption of a new schedule of wages. Mr. Emmerson promised a reply by September 15. A deputation of machinists was also to have waited on the Minister the same day, but arrangements miscarried.

Woodstock.—The Woodstock Press has been purchased by a newly formed joint stock company, to be known as the Press Printing Company. The foundry business and stock of Connell Bros., owned by Hon. H. A. Connell, has been sold to a new company, which will retain the name of Connell Bros., Limited. The price paid was about \$40,000.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, correspondents, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Little or no change in labour conditions has occurred since July, general quietness

prevailing. The heavy rains caused loss of time. Two new works of considerable magnitude were begun, namely, the construction of a water works system at Lévis, and the commencement of a new wing of the Jeffrey Hale Hospital. Labour Day was celebrated by the National Trades and Labour Congress on Monday, August 22, by a procession through the city streets with sports afterwards.

A number of workmen from Fall River, Mass., thrown out of work by the strikes in the mills there, have arrived in the city during the month seeking work.

The third crib for the foundation of the extension of the breakwater was sunk in position on the 13th inst. There are three more cribs under construction. A large number of barges with material for the construction of the Quebec bridge arrived.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have finished hay making and the crop will be above the average, though in a few places below it. Rains delayed agricultural operations during August.

Lumbering.—The large saw mills are all working and the most of them will be hard pressed to finish the season's cut before the frost sets in. The number of logs received this year included many which were hung up last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—Quietness prevailed, though lathers, plasterers and plumbers had a good month.

Metal, engineering and shipbuilding trades.—Moulders and machinists had a good month, but boiler makers were slack. Iron ship builders were very busy for about two-thirds of the time, but for the rest of the month were slack. Electrical workers and linemen were somewhat quiet.

Printing trades.—Printers and pressmen had a good month, with plenty of men to meet all demands. Bookbinders were active.

Clothing trades.—Tailors, furriers and glove makers were busy, but in the boot and shoe trades the month was very dull.

Food and tobacco preparation.—Cigar-makers had a fair month.

Leather trades.—Quietness prevailed.

Miscellaneous.—Hotel and restaurant employees were busy, though the tourist trade fell below that of a year ago.

Transport.—Ship labourers and long-shoremen were dull. Cab drivers, carters, draymen, &c., were well employed.

Unskilled labour.—A fair month, considering weather conditions, was reported.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market was very active during August, and few men were idle. There has been a great demand for labourers for the country, and mining centres. The exhibition which runs for ten days, and opened on the 27th, gave employment to many, and all outside trades are fully employed. Work is being rushed on the new court house, and the corner-stone was laid on August 30, by the provincial Minister of Public Works. A large new sash and door factory is nearing completion on the Lennoxville Road, and the site has been chosen for a new building for the Modern Bedstead Factory. The transfer of a site to the Militia Department for a drill shed has also taken place, and it is expected that the work of construction will be commenced shortly. The transportation companies arriving and passing through Sherbrooke, say that the tourist traffic this year is very much below that of last year.

Wholesale and retail traders report business as being very good, especially the latter, who do a large business during fair week.

On the first of the month the ratepayers voted by ballot on the question of raising \$200,000 either to purchase the plant of the Sherbrooke Heat, Light and Power Company, or to install a plant at Wesbury. The question of municipal ownership was defeated by nine votes. This is the second time that the municipal ownership party

has been defeated, but a clause in a contract made between the city and the company, in 1887, states that the city may take over the property by arbitration, so that the question will be before the citizens for some time yet.

The only unrest reported during the week was in the Paton mill, when about eighteen of the darners in the finishing room went out on strike for an advance in the scale of piecework. The management did not grant the demand, and have about filled the places of the strikers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The wet weather during a portion of the month interfered somewhat with haying, and while some of the outlying districts of the townships have been visited by severe storms which ruined the grain crops, the farmers say the crop has not been injured in this district so far. The rain beat it down in some places, but the grain has not been injured. The great complaint of the farmer is the scarcity of labour. Root crops will be a good yield.

Lumbering. The industry is very active.

Manufacturing.—Manufacturing industries generally well employed, although a small woollen mill is running on short time, and orders in the worsted mill, in connection with that of the Paton Company, have fallen off. The Modern Bedstead Factory Company intends erecting a modern and up to date factory. The Sherbrooke Heat, Light and Power Company is deepening the tail-race to give more power, as the demand is steadily increasing for power and light. Some twenty men will be employed for some time. The liquidator on the estate of the Dominion Carpet Company, Limited, has declared a dividend of 75 cents on the dollar. This concern was run from London, England, and went into liquidation over a year ago. The works were taken over by Canadian capitalists, and are now running full time, and securing a good part of the trade.

Mining.—The mining centres give ready employment, and in some cases men had to

be brought out from Montreal to work in the asbestos pits.

Railroad construction.—Work on the different railways in repairing the track gives employment to many along the line.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, stonecutters and builders' labourers were fully employed, and there are no idle men in these lines. Plumbers report business good, as do painters, but paperhangers are slack.

Metal and engineering.—Moulders, machinists, engineers, blacksmiths and electrical workers were well employed.

Woodworking and furnishing trades.—All sections have been well employed.

Printing and allied trades.—The printing and allied trades have been busy during the month on exhibition and railway work.

Clothing trades.—Custom tailors report business exceptionally good, but complain of a scarcity of good coat and vest makers. Garment workers had a good month.

Food and tobacco preparation.—Bakers and confectioners have been very busy, especially during the latter part of the month. The other sections of these trades are well employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant and laundry workers had steady employment.

Transport.—Street railway employees, cab drivers, hackmen, carters, and expressmen had an exceptionally good month.

Unskilled labour is in good demand at all times, and there is no necessity for any one being out of employment.

DISTRICT NOTES.

Mansonville.—The rails of the Orford Mountain Railroad were laid across the town line between Bolton and Potton. The government has subsidized the line only to the point now reached.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, sr., correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during August and the demand compared favourably with that of the previous month. All branches of industry were well employed, and there was no necessity for any one to be idle. The shipping trade has been less active than last year, but expects to make up the difference during the fall.

The machine shops and building trades are very busy, and the various factories and industrial concerns are working full time, wholesale and retail trade has been very good, showing a considerable advance over the last two months. Banks report business very good.

Re the Girard & Goden fire, the city council has unanimously voted a bonus, towards rebuilding, of \$35,000, at 4 per cent interest, to be paid yearly, with \$1,000 on account of capital yearly. This will have to be ratified by the electors.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural outlook in this section is very bright, and the indications are that the farmers will have an exceptionally good year. The hay crop has been all harvested and shows in some cases an increase of 25 per cent over last year. The oat crop is about the same as last year. The other crops are promising well.

Lumbering.—Lumbermen have not yet completed the drive owing to the low water in July and August. The water has risen lately and they will no doubt succeed in completing the drive. There will be 4,500,000 logs this season.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been fairly busy and the reconstruction of the coffin manufactory which was burnt last month will give work to a large number. Carpenters and joiners report work plenti-

ful. Painters are fairly well employed. Plumbers, gas and steamfitters, stonecutters and builders' labourers report a fairly good month.

Metal, engineering and shipbuilding trades.—Blacksmiths are very busy. Bicycle workers have been doing fairly well.

Woodworking and furnishing trades.—Carriage and wagon makers have sufficient work on hand repairing.

Printing and allied trades.—Printers and bookbinders have been steadily employed.

Clothing trades.—Journeyman tailors report trade quieter than last month. Glove makers are all well employed. Boot and shoe workers have abundance of work at fair prices.

Food and tobacco preparation.—Cigar-makers and tobacco workers report excellent business.

Leather trades.—Tanners and curriers are doing well.

Miscellaneous.—Hotel, restaurant and theatre employees have plenty of work.

Transport.—Cab drivers, hackmen, carter, and draymen are all busy.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during the month of August was in general fairly satisfactory. Work in the different manufactories was not as active as in some of the preceding months, but men employed on outside work report conditions fairly good. On or about September 15 next, the distillery will resume operations, after an interruption of six weeks. Since the beginning of August the corporation is making cement and tar sidewalks. In some of the streets where damage was done by the conflagration last May, old sidewalks are being replaced by cement work. This is giving employment to a good number of labourers, at wages ranging from \$1 to \$1.25 per day. Increased activity also pre-

vails in the sash and door factories, tanneries and organ shops.

Wholesale and retail business has been quiet during the month.

There were no changes in wages or hours of labour reported, but some of the manufacturers are now giving half a day holiday on Saturdays to their employees, and in others, they stop work at 3 p.m. on Saturdays. This new system is to be carried out during summer months only.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers report that the harvest will be very good notwithstanding the recent heavy rains, if the weather permits the gathering of the crops without accident.

The most active branch of industry for the farmers in this vicinity is the butter and cheese factories, although some of the latter have suspended work of late on account of a decrease in the price of cheese. The farmers are selling their milk to the different butter factories.

CONDITION OF PARTICULAR TRADES.

Building trades.—All in these classes are fairly well employed. Plasterers are exceptionally busy.

Metal, engineering and shipbuilding trades.—Men employed in these trades report work fair. Electricians and linemen are very busy, but blacksmiths are not very active.

Woodworking and furnishing trades.—Woodworkers, upholsterers, carriage and wagon makers enjoy fair activity.

Printing and allied trades.—Conditions in these branches are reported good.

Clothing trades.—The tailors and the garment workers are busy for the season. Boot and shoe workers had a dull month, but increased activity is anticipated for September.

Food and tobacco preparation.—Bakers and confectioners are doing a good business. Butchers are fairly well employed. Cigar-makers had a poor month.

Leather trades.—Saddlers report conditions fair.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees are active, while laundry workers are busy.

Transport.—Every one employed in these trades reports conditions favourable.

Unskilled labour.—Labourers were well employed.

MONTREAL, QUE., AND DISTRICT.

Mr. Thos. J. Griffiths, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Few noteworthy developments have taken place during the past month in labour conditions; it may be said that all classes of labour have been fairly employed. Work on the harbour has been fairly satisfactory, though not as abundant as this time last year.

The C. P. R. works at Rosemount suspended about two hundred mechanics and helpers, due probably to the rapid closing of the old shops at Delormier avenue. These men, however, were largely absorbed by the new Montreal locomotive works at Longue Point, which appear to have a steady demand for locomotive men.

The Simplex Railway Appliance Company has purchased 40 acres of land in Montreal west for the purpose of erecting a factory for the manufacture of bolsters, steel springs and other steel products, and will also have a special plant for the construction of railway cars. It is stated that the company will eventually give employment to about 1,000 men.

Building operations still continue to show activity. The Sovereign Bank of Canada is putting up a ten story building on St. James street, and the Bank of Montreal has a branch building in course of erection on Morrow street, Rosemount, near the Angus locomotive shops of the C.P.R.

Relations between employers and employees may now be said to be tranquil, the last of the labour disputes of the past season having closed by the suspension of the

plumbers' strike on August 30. This strike was for 35 cents per hour and 8 hours per day. The men had been receiving 25 cents per hour for 9 hours. The strike has been maintained for upwards of 16 weeks.

The shoe trade is busy at the present time, and garment workers who had been complaining of lack of work report considerable improvement.

There is no change to report in hours of labour or wages.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades were all well employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists and engineers, and steam engineers, were fairly employed. Electrical workers were active. Metal polishers, buffers, platers, brass workers and blacksmiths were fully employed. Tool sharpeners, horseshoers, jewellers and watch case makers were well employed.

Woodworking and furnishing trades.—These trades are all well employed.

Printing and allied trades.—All were well employed.

Clothing trades.—Trade was reported as improving.

Food and tobacco preparation.—All branches were well employed.

Miscellaneous.—Barbers, hotel, restaurant and theatre employees, laundry workers &c., were all well employed.

Transport.—Railway employees were all fully employed. Ship labourers and long-shoremen were fairly well employed.

Unskilled labour was in good demand.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was good during August, especially in the building trades, in several branches of which workers were scarce.

It is stated that a large company will soon be formed in Montreal for the manufacturing of cars. It will be known as the Canada Car Company. This company is now stated to be negotiating with the G. T. P. R. Company for an important contract, which will give a large amount of employment for several years to come. The C. P. R. Company has just concluded a contract with the United States Steel Corporation and the Pennsylvania Steel Company for 65,000 tons of steel rails at \$22 to \$28 per ton. This is the largest contract of the kind in some time. The Simplex Railway Appliances Company has acquired 40 acres of land in Montreal west; the property is situated between the G.T.R. track and the Lachine Canal, where the company will erect a new plant for the manufacture of steel axles, springs, and car supplies, and other railway material, its present premises in St. Henry, affording insufficient accommodation. The Montreal Street Railway Company is renewing rails on part of its line, thus giving employment to more than 600 labourers, the majority of whom are Italians, who arrived here last spring.

Trade in general was fairly good during August, with importations and exportations very active. Navigation was busier than during the previous month.

The clothing trades are not very busy at present, as a result of the holiday season.

A summary of the different strikes declared in Montreal, since April last, is as follows:—

On April 1 the *granite cutters*, to the number of 25, went on strike for the recognition of the union. They returned to work on June 16, without change in conditions.

The *marble cutters* went out on April 4, because the masters were employing stone-cutters to perform their work. A settlement was effected on April 7.

The *painters* declared a strike on April 19, for the recognition of the union, and the admission of their business agent on the jobs. The strike was suspended on May 17, the largest part of the men finding work elsewhere.

On May 2 the *plumbers* made a demand for 35 cents per hour and 8 hours per day, and 400 of them went on strike, nearly all of them are now employed, but the strike has not yet been officially called off.

On May 2, 100 *marble polishers* declared a strike for an increase of wages of 27½ cents per hour instead of 22½ cents per hour as heretofore. They resumed work about July 18.

The *stonecutters* commenced a strike on April 9. All of them are now working, and the difficulty can be called settled, though a few employers have refused to sign articles of agreement.

The *bookbinders* commenced a strike on April 16, and suspended it on March 18, without any change taking place.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Lumber merchants declare their business more active than a year ago; this shows that the increasing immigration has created a scarcity of dwellings, which has given an impetus to the work of construction.

Manufacturing.—Woollen manufacturers report depression, several having been compelled to work only from 3 to 4 days per week. The Excelsior Company has dispensed with 300 employees, owing to a break in machinery, and lack of activity in orders.

Railway construction.—The C.P.R. Co. is employing 800 labourers on excavation work. Nearly all the men thus employed are Italians.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in these trades are more active than during July.

Metal, engineering and shipbuilding trades.—Iron moulders, coremakers, machinists and steam engineers are quiet. Electrical workers and blacksmiths were fairly well employed. Horseshoers are busy.

Woodworking and furnishing trades.—In this branch workmen are enjoying activity.

Printing and allied trades.—Men in this branch report condition fairly good.

Clothing trades.—Business is reported quiet.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters were active, while cigarmakers and tobacco workers were fairly well employed.

Leather trades.—The different branches show good activity.

Miscellaneous.—Busy conditions were reported in all branches.

Transport. Steamboat men and steamboat firemen were very busy. Ship labourers, longshoremen and street railway employees were well employed. Cab drivers, carters and draymen report conditions good. Teamsters and expressmen are busy.

HULL, QUE., AND DISTRICT.

Mr. R. Laferriere, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour were well employed during August. There was a scarcity of hands for shanty operations, owing to the comparative low scale of wages offered for the coming winter. The reduction on last year's schedule is from 12 to 15 per cent, and before the close of the engagement season, there may be a further depression in the rate of pay. Another inducement offered to the working class to remain in the city, is the abundance of work available or soon to be made available by the erection of new factories in and around Hull. J. R. Booth's large pulp industry at the Chaudiere, which is partly in operation, employs already a great many hands from Hull. The starting up of the cement works will keep people here also. During the month the Dominion Mattress Company, started manufacturing in this city; forty girls and a dozen men are employed. The handle factory, which has been running on a small scale for a few months, has suspended operations. All factories are very busy. The match shop resumed work after the customary thirty days summer holiday.

Pulp making continues. Pork packing, which is becoming one of Hull's foremost sources of labour, is now employing over one hundred hands at good wages. Butchers and dressers are paid from \$10 to \$13.50 per week; while the girls average \$3.50 per week; there are over fifty of them. This firm, like the Cement Company, intends to acquire large tracks of land around their respective factories, and build modern cottages for their workmen.

The corporation has about \$30,000 to spend in public works this fall, the largest part of which will be paid in wages, there being hardly any supplies to buy in connection with the improvement of the streets and waterworks.

Bankers and traders are well satisfied. Money lenders disposed of all their spare money readily in the city and paper is generally well met. The building operations going on all over the city, have created a call on available money. The impetus given to building operations is a boon to all the building trades. Plenty of work and fair wages is ruling. To sum up, Hull has the most favourable prospects for an active fall season in the labour market, and is just now enjoying marked prosperity.

CONDITION OF PARTICULAR TRADES.

Building trades.—All of the building trades were busy, working either in Hull or Ottawa, at the following wages: Bricklayers and masons, \$3 per day; carpenters and joiners, \$1.75 per day; lathers and plasterers, \$2 to \$2.25 per day; painters, decorators, and paperhangers, \$2 to \$2.25 per day; stonecutters, \$3 per day; builders' labourers, \$1.25.

Metal, engineering and shipbuilding trades.—Machinists and engineers were satisfactorily employed, receiving \$2 and \$3 per day. Electrical workers and linemen were fully employed, the former receiving \$1.25 to \$1.50 per day, and the latter \$1.10 and \$1.25 per day.

Woodworking and furnishing trades.—The few men employed as woodworkers are fairly well supplied with work at the fol-

lowing wages, \$1.75 per day of 9 hours. Mill hands receive from \$1.25 to \$1.50 per day; factory hands all the way from \$1.25 to \$4 per day; girls, at mica cutting, average \$3.50 per week.

DISTRICT NOTES.

Business is very active, saw milling being at its height just now. Mica mining is suffering temporary depression, but farm reports are very encouraging.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

In nearly all lines there was general activity during August, the exceptions being the iron and clothing trades, which are especially affected by the summer months. There was a brisk demand for unskilled labour for the farms and shanties, but among mechanics there was no scarcity reported.

The strike of the moulders for an increased minimum wage, which was in progress at the beginning of the month, was still on at the close, no special negotiations having been made for a settlement. This was partially due to the slackness of the trade. The men in the Ottawa Furnace and Foundry Company's employ returned to work, the firm paying the \$2.50 minimum demanded.

In mercantile circles there was experienced the usual summer quietness, but the August settlements at the banks were well met, merchants, both city and district, redeeming paper with satisfactory promptness. This was all the more satisfactory as August is considered a crucial month.

Bank clearings showed a steady increase and reflected the prevailing prosperity.

Some important regulations affecting plumbers went into effect.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farm operations in the district made satisfactory progress, and on the whole the yield in all lines was up to the

average and in some lines more. Farm help was somewhat scarce, and very high wages were paid, running as high as \$35 a month and board.

Lumbering.—The lumbering operations were active, the unsatisfactory market conditions evidently not materially affecting the output. Lumber is regarded as too staple and the demand too sure to permit of momentary fluctuations altering the plans of the mill operators. There was some talk of a reduced output for next year in order to clear out present supplies, but Mr. J. R. Booth and some of the larger operators sold the entire season's cut before sawing began in the spring. There may be a decrease in the cut of square timber to meet the dullness of the British market. The supply of labourers for the shanties may be more plentiful this year, and if the men can be obtained the high wages of last season are not likely to be repeated. The expense of getting out the timber has largely increased within the past few years, and as a result the cost to the consumer has made a proportionate increase.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were active, all available mechanics being employed steadily. The stonecutters received an increase in wages, the minimum being increased from 36 to 42 cents an hour, this being an additional boon to the granting of an 8 hour day on May 1.

Metal, engineering and shipbuilding trades.—The metal trades were quiet, a condition incidental to the season. Brighter times are looked for next month.

The Master Horseshoers Association, including this city and district, met during the month and reached an agreement as to a uniform scale of charges. Mr. D. Clifford is president and Mr. I. Morgan corresponding secretary of the association.

Woodworking and furnishing trades.—The woodworking trades were fairly busy, but not so active as in previous years.

Printing and allied trades.—The printing trades were active, the job offices reporting

an unusual quantity of work for the season.

Clothing trades.—The clothing trades were quiet, with anticipations of a brisk fall trade.

Leather trades. The leather trades report uniformly favourable conditions, the demand for harness being particularly heavy in the west. Competent harness and collar makers would find no difficulty in obtaining steady and remunerative employment.

Miscellaneous.—Barbers report a good summer.

Transport.—All railway men were steadily employed. The street railway company continued the policy inaugurated last year, and during August paid a bonus of ten dollars to men who had earned the necessary good conduct record for the year past.

DISTRICT NOTES.

Arnprior, Ont.—Fifty-six persons wrote on the Ontario Saw Log Cullers' examination during August, of whom forty-two were passed.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Opportunities for employment in nearly all branches of labour were abundant during August. The building trades continued to be well employed, alterations to the separate and public schools, a large Methodist church, a number of business places, and the erection and alteration of a number of residences contributing to this end. Extensive alterations to the public offices in the city building and at the dairy school also afforded considerable employment. The Sisters of the House of Providence and a number of merchants are calling for tenders for a number of extensions to their various premises. Tenders are also requested for a four story mill building and additions to the power house of the Frontenac Cereal Company.

Surveyors representing the G. T. R. Company have been looking over the fair grounds to find out if it would be suitable for a city station and shops, provided it was decided to bring the main line into the city.

The Bell Telephone Company has considerably extended its business in Kingston of late. Nearly two hundred long distance phones have been installed, most of them replacing older ones. Twenty-five new telephones have been placed in residences and business places.

Now that the city has acquired the lighting plant, it is said that a by-law will be submitted to the ratepayers asking them to allow an expenditure of \$100,000 for improvements to the plant acquired.

The establishment of a provisional school of instruction for officers and non-commissioned officers at Kingston has been authorized. The school will be opened on October 1, and maintained for a period of six weeks.

Sunday street cars, which have been in operation for some time past, although looked upon with strong disfavour by some citizens, are largely patronized. Just now steps are being taken by counsel for the Lord's Day Alliance to summon employees of the street railway company for operating the cars on the Sabbath, in order to test the statute in behalf of Sabbath day observance.

In the matter of transportation, or traffic on the water, the season is fast drawing to a close. On the whole the season was not equal to that of a year ago, but the companies with headquarters here report having done very well. During the month the number of freighters become less day by day, and some vessels tied up for a time as a result of the falling off of business. This has applied particularly with regard to the transportation and transfer of grain. It is felt that the deepening of the Welland Canal would increase the shipping business at Kingston and other ports.

On the 24th of the month the ward scavengers of the city received orders to cease work, as the board of works had no more

money to expend on this work this season. It is felt that the service already performed will be sufficient to keep the streets presentable until the snow flies. Only a few men were affected; these will be provided with other occupation.

The civic finance committee has at present under consideration a revision of the salaries paid civic officials; also the fixing of salaries to be paid new officials. The committee will report later to the city council.

There were no changes of rates of wages or hours of labour during the month. The changes in the rates of wages here during the first half of 1904, were confined to the painters, plumbers, masons, bricklayers, and their helpers, and the sheet metal workers, as stated in previous reports.

Two small strikes occurred here during the month. Several union men had some difficulty at the Davis dry dock over the caulking of the schooner 'Collier,' and left. Non-union men completed the work. About a dozen of the waiters on the steamer 'Kingston' had some trouble with the steward, and when the steamer reached here on the 23rd of the month at 4 o'clock they left the boat. The cause of the trouble was said to be of a union nature, and the strikers returned to Toronto on the steamer 'Hamilton' in hopes of effecting a settlement.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are well advanced with their harvest, although the heavy rains somewhat retarded operations. Generally speaking, the yield is a bountiful one.

Fishing.—Fishing is quiet at present.

Lumbering.—Lumbering, not a large enterprise at any time, is quiet at present. On the 18th a raft of pine timber left Garden Island for Quebec. This may be the last to go down this season. The company at this island has a large amount of oak on hand, but the price has fallen so low on account of over-production that the timber is likely to be kept here all winter. This oak comes from Virginia by rail to Toledo, and thence by water to Kingston and Garden Island.

Mining continues active.

Railroad construction and employment continues steady.

CONDITION OF PARTICULAR TRADES.

Building trades.—Nearly all branches of the building trades are steadily employed. There has been little or no loss of time during the season. Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paperhangers; plumbers, gas and steamfitters, and builders' labourers have all been fully employed. Stonecutters had some loss of time and a few have gone elsewhere to get employment.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and their helpers, coremakers, machinists and engineers, steam engineers, electrical workers, linemen, blacksmiths, boilermakers, shipbuilders, shipwrights and caulkers, sheet metal workers, bicycle workers (in repairing), tool sharpeners, horseshoers, and jewellers, report abundance of work throughout the entire season.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, pattern makers, and gilders, have been fully employed.

Printing and allied trades.—Printers, pressmen, and bookbinders report excellent business.

Clothing trades.—Tailors and boot and shoe workers (repairing), report good business.

Food and tobacco preparation. Bakers and confectioners, butchers, ice cutters and drivers, and cigarmakers report business only fair.

Leather trades.—Tanners and curriers and leather workers have not had a good season.

Miscellaneous.—Barbers, broom makers, clerks, delivery employees, furriers, hotel, restaurant and laundry employees have been busy.

Transport.—Railroad conductors, locomotive engineers and firemen, telegraphers,

trainmen, switchmen, trackmen, freight-handlers, steamboat men, longshoremen, street railway employees, cab drivers, hackmen, livery stable employees, carters, draymen, teamsters and expressmen report a good season's business.

Unskilled labour.—Unskilled labour has been fully employed.

DISTRICT NOTES.

On the morning of the 25th about 150 persons from this city and district left on the farm labourers' excursion to the Northwest.

Cornwall, Ont.—By-laws were passed to exempt the Coloured Cotton Company's new mills from taxation for ten years, and to lend Mr. J. B. Atchison \$17,500 to rebuild.

BELLEVEILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of August has been exceptionally busy and the demand for labour very active. There was no necessity for any man willing to work to be idle in this city or vicinity. The opening of the hop-picking season is giving employment to a large number of men and women, and good wages are being paid. One hop-yard employs about 200 hands, and 40 cents a box is paid with free transportation to and from the city by rail. The rolling mills are in full operation, and a large amount of bar iron is being manufactured. About 75 men are now employed, and as they are mostly highly paid men, the starting of these works has been of decided benefit to the city. The cement works are also fast nearing completion and a large number of carpenters, bricklayers, masons and labourers are employed at high wages. Coopers are also very busy making barrels for the large quantities of apples which are annually shipped from this port. There are still a large number of men engaged in building new granolithic pavements for the city. The new improvements being built by the Grand Trunk Railway Company are also giving

employment to a large number of men. There have been no changes in the rates of wages or hours of labour, and no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers in this district have their crops safely housed and the weather has been favourable. Tomatoes and corn have not been as good a crop as usual; farmers will be compensated, however, by the favourable conditions prevailing in the cheese industry, owing to the abundant pasture.

Fishing.—Fishermen report a poor business for the month, mainly owing to the exceptionally high water.

Lumbering.—This industry was formerly an important one here, but each year sees the season's run of logs grow less owing to the depletion of the forests in the northern part of the county.

Manufacturing.—All local manufacturers are busy.

Mining.—North Hastings mines are rapidly being opened up, especially around Cordova and Bancroft.

Railroad construction and employment.—The Grand Trunk Railway Company is enlarging its yard and building new coal chutes, which when completed will do away with a large number of coal handlers, as the coal will pass from the cars direct to the tenders of the engines.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were all busy and report abundance of work. Carpenters and joiners never had a better month's work. Lathers and plasterers also reported trade active. Painters, decorators and paperhangers were busy. Plumbers, gasfitters and steamfitters reported a good month, with no idle men. Stonecutters were all working. Builders' labourers were in good demand at fair wages.

Metal, engineering and shipbuilding trades.—Iron moulders had a good month. Machinists and engineers are all working,

the former were exceptionally busy. Blacksmiths had a rather quiet month.

Woodworking and furnishing trades.—Woodworkers and upholsterers were all working and reported a very busy month. Carriage and wagon makers reported full time. Coopers are very busy making barrels for apple packing.

Printing and allied trades.—Employment with printers and pressmen is usually dull during this month, and August was no exception. Bookbinders had a fair month.

Clothing trades.—Journeymen tailors were very busy, all hands working full time at good wages. Boot and shoe workers experienced a good month.

Food and tobacco preparation.—Bakers and confectioners, butchers, and meat cutters, cigarmakers and tobacco workers all experienced a satisfactory month.

Leather trades.—Leather workers and saddlers have been working overtime and reported a splendid month.

Miscellaneous.—Barbers, clerks, delivery employees, hotel and restaurant employees, and laundry workers were all busy.

Transport.—All railway employees were fairly busy (although August is not considered a busy month here) as steamboat navigation is in full operation, both passenger and freight. Steamboat men and steamboat firemen have had a splendid month's work at good wages. Ship labourers and longshoremen are busy, especially the former. Cab drivers, hackmen, carters and draymen had an exceptionally busy month.

Unskilled labour.—A good demand exists for unskilled labour, the rolling mills being in need of this class of labour.

DISTRICT NOTES.

Much activity is being shown in mining circles in North Hastings, especially in corundum. Several American capitalists are interested and have recently purchased one mine for \$11,000, and secured options on several other properties which they are now opening up.

PETERBORO, ONT., AND DISTRICT.

Mr. W. J. Johnstone, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During August all outside labour was well employed, especially in the building trades. A few manufacturing shops are getting a little slack, especially in the iron working departments. The new pump and windmill factory which was burned is being rapidly rebuilt and will soon be ready for work again. The corporation is busy putting down cement sidewalks; already four miles have been laid this season, and this will be doubled before the frost sets in. The cost is 9 cents per foot. All outside trades were exceptionally busy. Transportation was very active, both passenger and freight. Banks reported business very good. Wholesale trade is active, as merchants are getting in fall shipments, and are very busy. Retail trade in all branches is very busy. There were no changes in rates of wages or hours of labour. Labour in all branches appears to be well employed with the possible exception of painters, who have recently organized, and whose wages have changed very favourable to them. Builders' labourers have also during this month asked for an increase from 20 to 25 cents per hour, their request has been readily granted for the same.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in general report the work of harvesting very active, but there is a great scarcity of men, as help of this class at this season leaves for the Northwest in large numbers. About 100 left here during August on harvesting excursions.

Lumbering.—Business is running to full capacity and saw logs are being rushed through the river in large numbers.

Manufacturing.—In most shops manufacturing is not so active as in previous months, excepting shops manufacturing farm implements, which were exceptionally busy.

Mining. A great many tests and surveys are being made in the mineral districts.

Railroad construction and employment.—The new line of street railway is completed and will be formally opened by September 1. The new branch line of thirty-eight miles running from Burketon to Bobcaygeon is just completed, and will be a great boon to the district through which it passes.

Other industries.—It is estimated that as many as 1,000 people from other parts, not including residents, spend the summer months in and around Peterboro. The J. J. Turner tent and awning dealers are very busy just now getting ready for fall trade.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were very busy; wages are 35 cents for masons, and 42 cents for bricklayers. Carpenters and joiners keep busy, with no change in rates of wages, which are 22½ to 30 cents per hour. Lathers and plasterers, painters and paperhangers, and plumbers keep busy. Gas and steamfitters, especially the former, have been very busy replacing pipes with others of larger dimensions in all parts of the town. Stonecutters were fairly busy in three monumental shops; also on the Y. W. C. A. building, which requires cut stone for arches over openings and foundations. Builders' labourers were very busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, and coremakers were slack, excepting in implement shops, which are fairly busy. Machinists and engineers were not very busy. Steam engineers, electrical workers and linemen, and all brass workers in all branches were very active. Blacksmiths and horseshoers reported work very good. Boilermakers were not so active. Sheet metal workers were very active. Bicycle workers experienced a dull month, and tool sharpeners were slack. Jewellers reported business for the month exceptionally good.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and

polishers reported work very favourable, but wood carvers were not busily employed. Carriage and wagon makers were very active in some shops, and extensive repairing is being done to the cars of the old street railway, for service on new street railway. Pattern makers and coopers were very slack.

Printing and allied trades.—Printing in all departments is fairly active for this season of the year and from now on will become more so.

Clothing trades.—Journeyman tailors are not very active just now, and garment workers are slack. Hat makers are becoming more active on fall trade. Boot and shoe workers report trade fairly good.

Food and tobacco preparation.—Bakers, confectioners, butchers and meat cutters were very busy. Ice handlers were also busy. Cigarmakers are doing an average trade.

Leather trades.—All branches are doing a fairly good wholesale and retail trade.

Miscellaneous.—Barbers are doing a good business. Broom makers were busy. Clerks and stenographers were fairly active, delivery employees, furriers and hotel and restaurant employees were busy. Laundry workers and dye workers were all doing a fairly good business.

Transport.—Railway men in all departments were very active. The tourist business has been heavy, and there have been extensive importations for manufacturing purposes; fuel and coal is also being handled in large quantities here just now. Steamboat hands were very busy. Street railway employees in all probability will be active after September 1. Cab drivers, carters, teamsters and expressmen are all well employed.

DISTRICT NOTES.

During August 2,006 boxes of cheese were sold throughout the district, but there was not much change in market prices. Vegetables are plentiful. Apples bring 50 cents a bag; potatoes, 60 cents a bag; chickens, 50 cents per pair; eggs, 16 cents per dozen; butter, 22 cents per pound.

Nearly all farmers in the district report crops excellent. Hay has been a tremendous crop, and fall and spring grain is turning out well.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The most salient feature of the labour situation at present is the uncertainty and unsettlement caused by the strike in the building trades, which in addition to the number of men directly thrown out of work has necessarily affected other forms of industry to some extent, and will do so in a greater degree should the difficulty be protracted. Otherwise conditions are highly favourable. The holding of the Canadian National Exhibition, formerly known as the Toronto Industrial Exhibition, which opened on August 30, and will continue until September 10, has as usual given a great stimulus to many branches of industry.

A large number of new factories are in course of construction. The Canada Brass Rolling Mills Company, Limited, is installing machinery in its new factory, and will employ about 200 men. This industry is new in Canada. The Toronto Laundry Machine Company, at present employing a staff of thirty men, has a new factory in course of erection near the Dundas street bridges in the northwestern part of the city, which will enable them to increase their force to 100.

The Canada Foundry Company has an extensive contract with the Canadian Northern Railway for the construction of a steel bridge over the North Saskatchewan river northwest of Battleford. The bridge will consist of eleven spans and its length, exclusive of approaches, will be about 1,870 feet. The total weight of the steel used will be approximately 3,500,000 pounds.

The government breakwater along the south shore of the Island is to be extended westward another 1,000 feet at a cost of about \$40,000.

The street railway company is augmenting its power supply by the installation of eight new boilers of 2,000 horse-power capacity each, and will install a second new 16,000 horse-power dynamo. All told there will be about 30,000 more horse-power available during the coming winter than last season.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. The farmers are seasonably busy with prospects of good crops. Although the fall wheat throughout the province has generally turned out badly, this district has been relatively fortunate as compared with other sections east and west, and averages well as regards other crops. The harvest is from ten days to two weeks late as compared with other seasons, and work has been hindered by frequent rains. The hay crop was an abundant one.

Manufacturing.—In nearly all branches of the manufacturing industry there is continued activity, and a marked tendency towards expansion. The outlook for a busy fall and winter season is generally favourable.

CONDITION OF PARTICULAR TRADES.

Building trades.—The strike of the builders' labourers for an increase of pay from 25 cents to 28 cents per hour on the 15th instant resulted in the suspension of brick-laying operations on the great majority of contracts. In a number of cases, however, work was continued by contractors who were willing to pay the advance asked, the men being allowed to work under permit. The members of the Bricklayers' Union refused to work with non-union labourers in cases where union men were available. On the 16th instant the Bricklayers' Union took a more decided stand in sympathy with the strikers and ordered all their men to the number of about 550 out on strike. The permits issued by the Builders' Labourers Union to those receiving the advanced scale were recalled and all the men ordered out. All attempts to settle the strike by arbitration have so far proved unsuccessful. A number of the bricklayers and

builders' labourers have left Toronto to find work elsewhere. All classes of the building trades are more or less affected. Carpenters have hitherto been fairly well employed, but work is getting scarce and a number are now idle. The same is the case as regards lathers, plasterers, &c.

Metal, engineering and shipbuilding trades.—Reports from all branches of these trades are satisfactory. There is plenty of employment for residents. Owing to the slackness of work in some portions of the United States, an influx of American workmen was anticipated, but so far there have been but few arrivals from that quarter seeking work. Galvanized iron workers are particularly busy, and electricians find plenty of work.

Woodworking and furnishing trades.—Conditions are generally favourable in these lines. The sudden popularity of the automobile has somewhat depressed the finer branches of the carriage trade, but the demand for ordinary vehicles is steady and the men well employed. Cabinet makers found trade rather quiet early in the month, but considerably better latterly. Piano workers are busy.*

Printing and allied trades.—The printing trade is fair, but conditions of labour have been somewhat unsettled so far as the jobbing branch is concerned, by the introduction into offices of the monotype machines, which reduces the number of workers required and can be learned by operators in a few weeks. Other branches afford steady employment.

Clothing trades.—Custom tailors are busier than last month and anticipate a good fall trade. Garment workers are also well employed. Boot and shoe workers have steady employment.

Food and tobacco preparation.—General activity prevails in most of these lines, owing to the exhibition. Bakers, butchers, confectioners and brewers are all well employed, except in the case of the striking meat-cutters at Harris' Abattoir, where the difficulty is still unsettled. There has been no report as yet from the arbitrators ap-

pointed to settle the differences between the brewers and the union. Cigarmakers are fairly busy.

Leather trades.—Harness makers have had a good month and have plenty of work ahead.

Miscellaneous.—Employment is generally plentiful and many extra helpers have been taken on during the fair.

Transport.—All the classes engaged in land transportation are busy except so far as the builders' strike has affected teamsters. Navigation, however, is quiet as compared with previous seasons, and longshoremen were frequently idle.

Unskilled labour.—With the continued influx of immigrants and the cessation of the demands of the farmers for temporary help, there is a surplus of unskilled labour on the market which is likely to be greatly increased as the season advances.

DISTRICT NOTES.

Toronto Junction. The Gasoline Engine Company, employing 80 men, are about to increase considerably the size of their factory, and will raise the number of their staff to 200.

The *motormen* and *conductors* of the Toronto Suburban Railway are asking an increase of wages from \$40 to \$50 per month.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were even more satisfactory than last month, as the abnormal demand for men in some lines is not so marked and the tone of industry generally is very healthy. Public works, the power developments, and city improvements continue to employ thousands of men. The building trades are very active, but the demand for men is well satisfied, and a few who came here during the extreme rush have left.

Trade and commerce generally are excellent and reports from all sources are very satisfactory.

No changes in wages or hours were reported, and no strikes of consequence.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have been busy with the grain harvest, and the fruit season is now on, causing great activity in the townships of Stamford and Niagara. There has been a great demand for farm labourers, and in some cases foreigners have been employed.

Manufacturing.—Factories of all sorts report plenty of orders to keep them running with full staffs.

Railroad construction.—Railroad construction employs many men in the city and district. Relaying of existing lines engages a number, while large gangs have been engaged in the construction of yards for the Pere Marquette Railway Company here, and at Bridgeburg.

Other industries.—Work on the power developments progress steadily, and continues to engage several thousand men. The end of heavy rock-cutting for wheel-pits, tunnels and forebays is not many weeks ahead. The Canadian Niagara Power Company's power-house will be inclosed shortly. The stone and steel work is finished and machinery is being installed in the wheel-pit. The provincial park, in which the works are situated, is being restored to its normal condition as fast as different parts of the transmission conduits, &c., are completed and covered up. The work of erecting poles for transmission lines outside the park goes on slowly.

CONDITION OF PARTICULAR TRADES.

Building Trades.—The building trades continue active; masons and bricklayers have all the work they can attend to. Carpenters are very busy, and a few good men are wanted by contractors. Lathers and plasterers are all engaged, and painters are rushed all the time. Plumbers, steam and gasfitters were very busy; stonecutters were

all working and builders' labourers were in demand.

Metal, engineering and shipbuilding trades.—Foundry employees are all working; machinists are busy. Steam engineers, firemen and pump runners have been wanted on the power works. Electrical workers and linemen are all working full time. Sheet metal workers have more work than can be handled promptly.

Woodworking and furnishing trades.—Wagon makers and coopers were all busy.

Printing and allied trades.—Business is good in the printing and allied trades.

Clothing trades.—Tailors are all working and work is plentiful.

Food and tobacco preparation.—Bakers, butchers, ice men and cigarmakers continue to find plenty of employment.

Miscellaneous.—Barbers are busy; office, delivery, hotel, restaurant, and laundry employees are all working steadily.

Transport.—Transportation is active, both freight and passenger traffic being heavy. Train and engine crews are well employed and yardmen, switchmen, trackmen, &c., have had a good summer. Steamboat men are fairly busy. Longshoremen are all working. The street railways employed large numbers of men all summer, and suburban lines have been doing a heavy business, running many extra cars. Drivers of all sorts of wagons are busy.

Unskilled labour. Unskilled labour is very fully employed.

DISTRICT NOTES.

Welland.—Cooper shops are busy. Industry generally is satisfactory.

Humberstone.—The number of men employed by contractors on canal improvements has been increased.

Bridgeburg.—Railway construction and improvements employ many additional men.

Port Colborne.—Estimates for harbour and canal works passed by the Dominion Parliament at the recent session insure extensive operations and consequent busy

times in this place for several years to come. The new brass works are now running.

Niagara on-the-Lake.—This has been a fairly busy summer. The gathering, shipping and canning of fruit now employs large forces of men and women in this section.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market remains much the same as in July, labour being generally well employed.

The building trades are busy, with plenty of work on hand for the season.

Contractors are not over anxious to take on new work, as they could not well get through with more work this season with their present staff of employees.

A large staff of workmen are employed on the construction of the new armoury, and good headway is being made.

The contractors who have the sewer construction work in hand are advertising for help. Labourers are especially wanted, but the scale of wages offered is below the prevailing rate in this city.

Transportation is quite active.

Business, wholesale and retail, is good and prospects are bright.

The labour market has seen no new disturbances during the month. The strike of the sawsmiths in the Welland Vale factory remains unchanged. The factory has declared for an open shop.

The striking papermakers, teamsters, firemen and labourers of the Riardon mills of Merritton, are still out, many having found employment elsewhere. The company has secured some unskilled labour, but have not succeeded in filling the places of all of the striking papermakers.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have the harvest well in hand, and about 40 farm hands have

left for the North-west to help in the harvesting there.

Manufacturing.—A number of the factories are running on short time, which is their usual custom at this season of the year, coming just between the busy seasons. But the majority are running full time. The canning factories are now quite busy, and have added largely to their staff of employees.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, lathers, plasterers, painters, decorators, paperhangers, plumbers, gas and steamfitters, stonecutters and builders' labourers are all fully employed with a good season's work in hand.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, report trade quiet. Machinists and engineers are fairly well employed. Steam engineers, electrical workers and linemen are fully employed. Metal polishers, buffers, platers and brass workers, blacksmiths and horseshoers, report trade fair.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers are busy and trade prospects are good.

Printing and allied trades.—Printers, pressmen, and bookbinders are well employed.

Clothing trades. Journeymen tailors are now in the midst of the slack season.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigarmakers and tobacco workers, find steady employment.

Leather trades.—Farmers and curriers, leather workers and saddlers report trade good.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and restaurant employees and laundry workers are fully employed.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad

trainmen, trackmen, freight handlers, street railway employees, cab drivers, hackmen, carters, teamsters and expressmen are all fully employed.

Unskilled labour is well employed.

DISTRICT NOTES.

Port Dalhousie.—Labour is generally well employed, especially in the building trades, as there is quite a lot of work in repairing and construction for these trades.

Merritton.—The labour market continues in the unsettled state it was in last month; the strike is still on between the papermakers, teamsters, firemen and labourers, and the Riardon Paper Mills Company. There are no new developments.

Thorold. The condition of the labour market continues quite satisfactory; labour is well employed, especially quarrymen and on the building trades; business generally is good.

Power Glen.—Construction work on the Cataract Power Company's plans continue to give employment to a large body of workmen.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during August; manufacturing was active, but the building trades were at a standstill owing to a strike among the bricklayers and masons.

The T. Eaton Company, of Toronto, which established a branch workshop in Hamilton about eighteen months ago, has closed down and ordered the manager and his staff to headquarters in Toronto. The firm engaged about twenty hands, the majority of them girls, who will, with few exceptions, remove to Toronto.

There have been changes in civic employees' wages engaged in construction work.

The machinists' strike at the Harvester Works is settled. The men returned to work, as a result of a referendum vote of

their international union. The issue was against one man operating two machines; the men now waive this objection.

During the month wheat reached the dollar mark. Owing to the advance in the price of wheat, flour has gone up 20 cents a barrel. Ontario flour is now selling at \$5.20 a barrel retail. First class meat cuts have been reduced.

Conventions of the Master Bakers and of the Stationary Engineers were held at Hamilton during August.*

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural workers are busy.

Manufacturing.—Manufacturing in the many branches is active.

Railroad construction.—Railway construction operations are in progress by the Grand Trunk near Burlington. The T. H. and B. Company is advertising for tenders for grading extensions near Welland. The Grand Trunk freight sheds at Hamilton are now completed; they are 40 feet wide and 1,198 feet in length.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were quiet among those employed by the Master Builders' Association, owing to the strike and lockout. Plumbers and painters, however, were not affected very much by the trouble. The bricklayers' trouble arose over a contractor refusing to pay a stonemason for work the architect would not pass. On the refusal of the contractor to pay, the bricklayers in his employ were called out. The masters' association then locked out all the men in their employ.

Metal, engineering and shipbuilding trades.—All iron workers are fairly busy. The machinists' strike at the Harvester Works has been declared off, and the men have returned to work. Blacksmiths and boilermakers are fairly busy; both of these crafts have formed unions. Sheet metal workers, horseshoers and jewellery workers are busy.

Woodworking and furnishing trades.—All woodworking trades, including furniture and piano workers, are well employed.

Printing and allied trades.—Printers and machine men, stereotypers, lithographers, bookbinders, &c., are all enjoying a busy season.

Clothing trades.—Trade among the journeymen tailors is very slack now. Garment workers are fairly busy with idle men here and there. Hatters and boot and shoe workers are busy.

Food and tobacco preparation.—Bakers, butchers, cigar and tobacco workers enjoyed a good month.

Leather trades.—Leather workers are still holding out in their strike with Jolley & Sons. The firm is advertising for men.

Miscellaneous.—Barbers are busy; broom-makers are very slack. Delivery employees are fairly well engaged. Hotel, restaurant employees and laundry workers are busy.

Transport.—All transportation employees, electric and steam, are well employed. Local street railway employees are negotiating for shorter hours and closed vestibules in winter. Longshoremen are not very busy. Eight deck hands on a local steamer went out on strike owing to a claim of not receiving good food. Their places were filled.

Unskilled labour.—Unskilled labour is not in great demand.

DISTRICT NOTES.

Dundas.—Trade and labour in general was active. The glove factory is working full time as are also the piano, axe, clothing and machine shops. During the month twelve labourers at the Bertram machine shop quit work, owing to the company engaging four Americans. The strikers were paid off and their places filled.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Activity in the building trades compared favourably with the month of June, and

* See reference in 'general summary' article.

was greater than during the corresponding month of last year; employment in the factories in some cases compared unfavourably with the preceding month, and the corresponding month of last year.

The Massey-Harris Company has practically suspended operations for the season, and will not commence before October 1. About 500 men were laid off. In several of the other factories, a few men were laid off for a short time. The Verity Plough Company, however, took on quite a number of extra men. The building trades, which as above stated, are unusually active, absorbed a few, and a large number went west to work in the harvest fields, thus reducing greatly the number of men thrown out of employment. Retail merchants have had an average month, but complain of a difficulty in collecting accounts, giving as reasons, the number of extra holidays and the numerous excursions taking place during the summer. The close of the month ends the Saturday half holiday for bricklayers, carpenters, moulders, blacksmiths, machinists, horseshoers, the printing trades, cigarmakers and labourers, and the Wednesday half holiday for clerks and barbers, affecting approximately about 1,500 persons. The half holiday is popular here and bids fair to be continued next year. The month closed with a few idle men on the market. Friendly relations between employers and employees continued during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists have been exceptionally active. Wet weather interfered with farm operations. Considerable damage to stock and buildings by lightning was done during the month.

Manufacturing.—With the exception of the Massey-Harris Company, the factories have run full time, the Verity Plough Company taking on a number of extra men. The plant of the Fox Bros. Packing Company was almost totally destroyed by fire on the night of the 22nd. The buildings were valued at \$45,000, and the stock at \$25,000, on which there was a total insurance of \$26,000. Fifteen men were employed.

Railway construction and employment.—Railroad construction continues to give employment to a large force of men. It is expected that operations on the Grand Trunk Railway will be completed by October.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have been active. Carpenters, bricklayers, plasterers and lathers had a very active month. Painters, decorators and plumbers, particularly the former, had an active month. For the first seven months of 1904 building permits totalled \$197,435.

Metal, engineering and shipbuilding trades.—Iron moulders in several of the large shops were slack, and a few men were laid off. Stove plate men were busy. There were also a few coremakers out of work during the forepart of the month. Machinists in nearly all of the shops had a steady month. Trade in some of the factories seems to be increasing. Electrical workers and line men had a steady month. Metal polishers, buffers and platers had a fair month. Stove mounters have been busy. Machinery, carriage and general blacksmiths worked full time. Boilermakers and sheet iron workers report an active month.

Woodworking and furnishing trades.—Carriage and wagon makers had steady employment. Pattern makers in some of the shops were slack; in others pretty busy. Millwrights were rather slack; coopers had a busy month.

Printing and allied trades.—Printers and pressmen had a steady month with all local men employed.

Clothing trades.—The clothing trades were a little quiet. Tailors had a fair month.

Food and tobacco preparation.—Bakers and confectioners report a continued brisk trade; butchers, cigarmakers and tobacco workers report a steady month.

Leather trades.—For leather workers and saddlers trade was fair.

Miscellaneous.—Barbers, clerks and delivery employees had steady employment. Hotel and restaurant employees had a busy

month. Laundry workers had an average month.

Transport.—Railway trackmen have been busy, and freight handlers have been steadily employed. For street railway employees a busy month was experienced. Teamsters, draymen and expressmen, particularly the former, were very busy.

Unskilled labour. Unskilled labour was fairly well employed.

DISTRICT NOTES.

Paris.—The building trades have been active, and the mills and factories have run steadily.

Blue Lake.—There has been ample employment for all local men.

St. George.—Labour generally has been fully employed. Extra labourers could have found employment with farmers. The agricultural factory is very busy and the management is advertising for machinists.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of labour shows improvement over July, especially in the factory trades. There is, however, no apparent demand for extra help. In the outdoor lines employment is very good. Retail trade has only been fair. Work on carriage springs has been started in an addition to the axle works. A total of nearly 600 students attended the Ontario Agricultural College in the college year just closed. There are no demands for changes in wage rates or hours, or other uneasiness at present amongst wage-earners in this city.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural operations have been much retarded by the excessive rains. There is no very extensive demand for farm help. A considerable number have gone from this section to work on the Manitoba harvest.

Railroad construction.—Work on the Guelph to Goderich extension of the C.P.R.

has commenced at both ends of the line, and a large number of men and horses will soon be at work. At present supplies of different kinds are being got on the ground.

Manufacturing.—Manufacturing has had only a fair month, owing to the season of the year and a surplus of stock on hand.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades generally had a good month with plenty of work on hand to make a long season. Bricklayers and masons were fully employed, as were also carpenters and joiners. Painters had only a fair month, with a limited amount of repair work. Plumbers had a good month with considerable work under way. Stonecutters have not had much work and a number have gone to other towns. Builders' labourers were well employed, with a slight scarcity of men.

Metal, engineering and shipbuilding trades.—Iron moulders had a better month than last, especially in some shops. Machinists and machinists' helpers had a fair month. The drawing to a close of the cream separator season, however, is showing an effect on these trades.

Woodworking and furnishing trades.—The woodworking trades picked up a little during the month. Woodworkers had a good month with prospects of betterment in the furniture trade. Piano and organ workers, and upholsterers were steadily employed. Carriage workers had a fair month.

Printing and allied trades.—Printers had a good month for the summer season.

Clothing trades.—Tailors have not had much to do. A considerable number of coatmakers have left for other cities.

Food and tobacco preparation.—Bakers and confectioners had a very good month. Cigarmakers had a fair month.

Miscellaneous.—Miscellaneous trades were generally well employed, but there is no noticeable activity or decline in the amount of work to be done. Textile workers and in-grain carpet weavers, to the number of 19, went on strike about the end of last month, for an increase in the rate of time worked

putting warp in the looms from 12½ to 15 cents an hour, and for time work weaving samples. They returned to work after 10 days, at the old rates. Brussels weavers have had only a fair month.

Unskilled labour.—Unskilled labour is very well employed. There has been difficulty in getting sufficient men for civic work, owing to the city's rate of pay being lower than is generally paid for the same class of work.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:

GENERAL CONDITION OF THE LABOUR MARKET.

Full employment of all classes of labour continued as in July, and there are very few idle men in the city. The chief activity prevails in the building trades, several houses being erected. The Crowe and Nichols chair factory, which will be four stories high, is being built of cement, the first large building of its kind in the city. The G. T. R. shops addition is being built of the same material; they have a number of men employed, mostly Italians, on the labouring work.

Business houses and banking institutions report conditions favourable. There were no changes in rates of wages or hours of labour, and no trouble in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are very busy with the harvest, which promises well, excepting fall wheat. Local market prices are: wheat, \$1 per bushel; barley, 38 cents; oats, 30 cents; peas, 60 cents; potatoes, 75 cents per bag; butter, 18 to 20 cents per pound; eggs, 17 cents a dozen.

Manufacturing.—All the factories are busy, and have been in full operation during the month.

CONDITION OF PARTICULAR TRADES.

Building trades.—All employed in the building trades were exceptionally busy, with prospects for a good fall trade, as contractors have plenty of work ahead.

Metal and engineering trades.—Iron moulders, machinists and helpers were busy. Blacksmiths and jewellers report a fairly good month.

Woodworking and furnishing trades.—Workers in these departments report conditions favourable, with steady employment.

Printing and allied trades.—Printers, pressmen and bookbinders report trade fairly active.

Clothing trades.—Journeyman tailors report trade somewhat quiet.

Food and tobacco preparation.—Bakers and confectioners are well employed, and cigarmakers are very busy.

Miscellaneous.—Barbers are doing a good trade, with no idle men.

Transport.—All railroad men are kept fairly well employed. Teamsters and draymen report plenty of work.

Unskilled labour.—This class of labour is well employed, with enough men to fill steady jobs.

DISTRICT NOTES.

Mitchell.—The flax crop was a good one; the mill has commenced operations for the season and will give employment to a number of hands.

Milverton.—Work on the Guelph-Goderich railroad extension has begun here, and it is expected that a considerable stretch of the road-bed will be levelled before the winter sets in. This will employ considerable labour.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Work in this city during the past month was not up to the standard of the past few years, and the continued influx of workers from Great Britain has more than provided for all demands. A number of these were induced to come here through misleading statements, and are now working for less

than they received at home, while several have returned.

There are no large buildings being erected this summer, therefore the building trades are not extra busy. In the metal and iron trades work is as plentiful as ever.

About 200 people from this district took advantage of the harvest excursions to the Canadian North-west.

The London Street Railway Company's car barns were completely destroyed by fire early in the month, but without loss of rolling stock.

The price of flour has increased to \$5.20 per hundred, about \$1 dearer than this time last year.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grain crops have all been harvested in this district, and the farmers are busy threshing. The wheat crop was not as good as usual this year.

Fishing.—Fishermen at Port Stanley, on Lake Erie, and Grand Bend, on Lake Huron, report a very poor catch of fish so far this year.

Railroad construction.—A large force of men are at work at present on the double tracking of the G.T.R., between London and Dorchester. The London Street Railway Company are building an extension to its lines in this city of about one mile.

CONDITION OF PARTICULAR TRADES.

Building trades.—A number of bricklayers left during the month for St. Thomas and Toronto, and although prospects are not extra bright, still there is plenty of work for all here. Carpenters are rushed with work, with plenty for some time in sight. Lathers, plasterers and painters have plenty to do. Plumbers, gas and steam-fitters are very busy. A large number of people are having gas put in their houses for cooking and lighting purposes. Stone-cutters are not doing much. Builders' labourers are all busy.

Metal, engineering and shipbuilding trades.—Iron workers report business as

rushing, with the number of workers at this trade steadily increasing. Iron workers are also rushed with orders, and machinists are busy. Metal polishers, brass workers and stove mounters have lots of work ahead. Electrical workers and linemen are busy at the fair grounds preparing for the fair.

Woodworking and furnishing trades.—Carriage and wagon workers are busy on orders to be shipped to the North-west. Car builders are busy on repair works. Coopers are exceptionally busy.

Printing and allied trades.—Printers and pressmen, in job offices, are exceptionally busy, and in most cases overtime is the rule. The 'Advertiser' is adding a new cylinder press, a new platen press, and a new cutter and binding machinery in its job department. The pressmen have their union in running order now, and have elected the following officers:—E. Chalcraft, president; J. McDonald, vice-president; W. H. Dyson, secretary. Most of the job printing offices have installed binding machinery of their own, and are doing their own binding, thus taking this class of work from the old binding firms.

Clothing trades.—Tailors are in the midst of their slack summer season. Garment workers are commencing to be rushed. The Helena Costume Company, employing about 200 girls, is very busy, and is working from 7 in the morning instead of 8, and three nights a week until 9 o'clock, with half an hour for supper. Boot and shoe workers report trade as rushing.

Food and tobacco preparation.—Cigar-makers are busy.

Miscellaneous.—Broommakers are busy. Brushmakers had a slack month, and were laid off two weeks. Furriers are exceptionally busy on winter stock. Hat and cap factories were very busy, and are paying \$5 per week to girls to commence with.

Transport.—On the G. T. R., through freight business was good; but on the C. P. R. it is only fair, with a corresponding amount of work for train crews.

Unskilled labour.—A number of men are engaged on civic works, laying cement walls, new roadbeds, sewers, &c.

DISTRICT NOTES.

Petrolia.—Several new oil wells have been struck about five mile west of this town, which has given a stimulus to business here, and drillers' rigs are being put up all through the district. The new wells are averaging from 2 to 50 barrels per day.

Ingersoll.—Building operations have been very active throughout the summer, a number of fine residences ranging in value from \$4,000 to \$6,000 going up, and a number of houses being built to rent from \$8 to \$12 per month. It is estimated that through the advance in wages and the cost of material, the cost of building has advanced at least one-third during the past two years in this place.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Opportunities for employment were very favourable during August. In the building trades there continues to be a shortage of mechanics. For unskilled labour the supply of workers is short of the demand, though the shortage is counterbalanced by a ready supply of foreign labourers, principally Italians, who secure employment through the agency of a boss, who it is said receives a per capita allowance per day for such service. These men are being used for railroad navy work, and on the construction work of the Southwestern Traction Company's tracks between St. Thomas and London; also on municipality drainage works in the county of Elgin. A few are being employed in the railway shops as mechanics' helpers. Commercial activity continues normal. Railway traffic was active during the month, while retail trade was rather dull. There were no important changes in rates of wages or hours of employment. Some unrest prevails among mechanics, evidenced by the fact

that many changes in staff are reported as occasioned by the outgoing and incoming of new men. A number of British workmen have found employment, taking the places thus vacated.

CONDITION OF LOCAL INDUSTRIES.

Agriculture. The grain crop has been harvested and farmers report a fair crop of spring grain. The wheat crop will scarcely yield sufficient for seed and bread. Flour milling is in an unsettled state, owing to fluctuations in the market, and the price of flour has advanced.

Manufacturing.—The stable condition of the market for manufactured wares during the past year is beginning to show signs of weakening, and enquiries are not so good. No reduction of staffs has yet taken place, but business is beginning to slacken in the iron moulding line; also in the wood bending and carriage supply trades. The cause is attributed to the larger importations of foreign goods.

Railroad construction and employment.—There is much activity in this line at present. Work on the Pere Marquette shops is progressing steadily. In the M. C. R. shops work is more active than during the preceding months of this year, but is well under control. The motive power equipment is said never to have been in better condition. The piece work system of working is being introduced in the erection of new freight cars to some extent; also on some lines of machine work. Many of the men regard the change of system unfavourably, while the advocates of it claim that the men work faster and increase the output sufficiently to allow of the fixing of a rate whereby they receive more money and also effect a saving to the employer.

CONDITION OF PARTICULAR TRADES.

Building trades.—There are no changes in conditions to report in the building line. Work is very active and builders are very busy. Many proposed buildings have been laid over until next season.

Metal and engineering trades.—Iron moulders are not so busy as during the pre-

ceding months, or as compared with the corresponding month of last year. Machinists are steadily employed, but many changes of employment are reported.

Woodworking and furnishing trades.—Factory woodworkers continue busy, with no change in conditions.

Printing and allied trades.—Printers report a much busier month than July, with plenty of work ahead. The same is true of bookbinders.

Clothing trades.—Journeyman tailors report a fairly good month considering the season of year.

Food and tobacco preparation.—Bakers report trade as only fair. Cigarmakers were busy, with normal conditions prevailing.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions show an appreciable change for the better over last month, the building trade being quite active, and nearly all men in this trade being fully employed. The supply is, however, equal to the demand, with the exception of plumbers; a few good men could find employment here at present. In other branches there is no lack of men to do the work offering.

The rather unfavourable reports of crop conditions had a tendency to somewhat diminish the prospects of employment for the fall months.

Transportation is about normal.

Wholesale and retail trade is fairly active, and there were no changes in the rate of wages. The principal commercial firms have closed their places of business at 6 o'clock p.m. for five days in the week during the summer months, which has been much appreciated by employees. There is an entire absence of labour troubles of any kind.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The wheat crop in this locality has been practically a failure, al-

though of late years this has not been considered an important crop, corn, oats, barley and beans being mostly depended upon. Oats have been a fairly good crop; hay has not been up to the average, while corn and beans do not promise very well.

Manufacturing.—All manufacturing concerns are fairly busy.

Railroad construction.—This class of work is confined to the repairing of tracks and switches.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, lathers and plasterers, painters, plumbers, gas and steamfitters, stonecutters and builders' labourers are all fully employed, with no idle men reported.

Metal and engineering trades.—Iron moulders, machinists and engineers, electrical workers and linemen report trade very good. Blacksmiths, boilermakers and sheet metal workers have steady work.

Woodworking trades.—Carriage and wagon makers were all busy. Coopers on apple barrels have all they can do.

Printing and allied trades.—Printers, pressmen and bookbinders had steady work.

Clothing trades.—Journeyman tailors, and boot and shoe workers report trade improving.

Food and tobacco preparation.—Bakers and confectioners had steady employment. Cigarmakers and tobacco workers report trade fair.

Leather trades.—Harness makers and saddlers were fairly busy.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees and laundry workers had plenty of work.

Transport.—All railroad men are fairly busy. Cab drivers, carters, draymen, teamsters and expressmen had plenty of work.

Unskilled labour is fairly well employed. There still exists a scarcity of farm labourers.

DISTRICT NOTES.

Rondeau.—The Pere Marquette R. R. Company is building a number of switches at the harbour. The Lake Erie Boat Company is enlarging the ship dock to accommodate its increasing trade. There is at present a daily line of steamers from Conneaut, O., bringing coal to its depot, and as soon as this slip dock is finished, it is the intention to put on more steamers. At present about 12,000 tons of coal per week are received.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was little change in the labour market since last month, all branches of industry and labour being active. Labour in the building trades and in the manufacturing and mechanical lines is employed to its fullest capacity. There has been more activity displayed in the building trades than in any other line, the increased cost of material and wages having had little effect, as the contractors and lumber men have got all the work they can handle. Just at present there are no new industries of importance being started, the principal work under way being the building of churches, schools and dwelling houses. Retail and wholesale trade never was as good as it is at the present time, and it continues on the increase. The most amicable relations exist between the different unions and the employers, and the public at large, evidence of which was the generous donations of the citizens to the Labour Day demonstration, which is to be held on September 5.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are all busy taking off the harvest. Hay was light, but oats are a fair crop, and the corn will be fairly good.

Lumbering. Lumber merchants report a big demand for lumber.

Railroad construction.—At present there is little or no railroad construction in progress.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had an exceptionally good month, with fine weather and no loss of time. No one connected with the building trades has cause to be idle.

Metal, engineering and shipbuilding trades.—The condition of the iron industry continues prosperous, and work was steady for moulders, machinists and blacksmiths. Bicycle repairers were very busy.

Woodworking and furnishing trades.—Carriage and wagon makers report trade good.

Printing and allied trades.—Printers and pressmen were very busy, the 'Record' Printing Company has enlarged its plant, and has put in a few new machines, and added more employees to the staff.

Clothing trades.—In the tailoring trade business is a little quiet just at present, but it is expected to be good in a week or two.

Food and tobacco preparation.—Bakers, confectioners, cigarmakers and tobacco workers were all steadily employed.

Leather trades.—Saddlers and harness makers were busy.

Miscellaneous.—Barbers report trade good and plenty of work. Clerks, stenographers, delivery employees, hotel and laundry workers had steady employment.

Transport.—Railroad men of all classes are working full time. At a large meeting of the street railway employees union on August 23, it was decided to make a demand to the company for 18 cents per hour, a raise of 1 cent per hour. Teamsters and expressmen are all fully employed.

Unskilled labour.—Unskilled labour is in demand.

DISTRICT NOTES.

Walkerville.—Walkerville is rapidly becoming a manufacturing as well as residential town. It is now adding one more industry to its list of manufactories, viz.,

the Ford Motor Company, manufacturers of automobiles, with a capital stock of \$125,000. The company has purchased the buildings formerly occupied by the Walkerville Wagon Company, and expects to have machines on the market in time for next season's trade. The town also shows much activity in building this summer, and there is a large number of houses being built. One will cost when completed over \$100,000. The board of works is spending thousands of dollars in paving the streets and building cement walks.

* SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. Edward Barry, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

After a partial suspension of ten months the large aggregation of industries now known as the Lake Superior Corporation, has once more resumed operations. The steel plant has been started up and rails were turned out for the first time since December, 1902, on the 24th instant.

The Algoma Central and Hudson's Bay Railway has about 300 men at work. The woods department at present employs in the neighbourhood of 800 men, which force will be increased later on. The mines are also in entire or partial operation and everything points to a very successful winter. The company, it is stated, has acquired some properties in Minnesota yielding bessimer ore; this will supply the necessary proportion with which to blend Canadian ore to produce good steel rails. They also seem to have contracts enough in sight to supply the hands now employed at the steel plant with work for several months, and the demand consequent upon the railway expansion in contemplation will assure continuous employment for several years. It is too early as yet to estimate the effect of the resumption upon the town beyond the spirit of optimism, which is inspired. One or two pay days will be necessary to give the place its former appearance.

The blast furnaces are not in operation yet, but as soon as there is enough ore on hand to insure steady work they will be blown in. When the latter are started it is estimated there will be no less than 1,000 men employed at the steel plant in all. The former superintendent of the charcoal plant has been re-engaged, and this department will very soon present its old time activity. In fact, everything is looking well, nor does any one here doubt but that in a very short time a very important industrial and commercial centre will be located on St. Mary's River.

The lumber business continues good throughout the district, but wages are not so high as last year. There is plenty of work for men in the camps at from \$22 to \$30 per month, but the cut will not be so heavy as last year.

At *Copper Cliff* the new plant is proceeding satisfactorily. The immense body of high grade nickel ore at the Creighton mine, 9 miles from Sudbury, is so easily mined that the management have shut down practically all its other mines, the supply from the Creighton being ample for all purposes.

A fatal accident occurred at the Shespeare on the 2nd instant, resulting in the loss of six lives. The coroner's jury found that insufficient ventilation was the cause. It was stated in extenuation that the accident was unforeseen, being without parallel in this district, although there are many other mines with no better system of ventilation.

The farmers report good crops; fully up to if not exceeding the average.

The contractors on the new post office still employ the same number of hands as last month, and at the same rate of wages.

Work is also progressing favourably both on the extension of the pier of the government canal and on the dock extension. The crushed stone for the latter is being supplied by contractors at a point along the A. C. R., eight miles from Sault Ste. Marie, Ont.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in the city of Winnipeg is the reverse of what it was in the months of May and June. All who really are looking for employment can procure it. In the two spring months mentioned there appeared to be a surplus of all classes of workpeople not excepting the skilled trades. Gradually, however, the demand has absorbed the entire supply, the actual conditions at the end of August and the earlier part of September being a shortage of common manual labour and the skilled trades generally being well employed. Last September the labour market was in a similar condition and a slight advance in wages took place. The same is occurring at the present time. Labourers who were glad to start work in the spring at 17½ cents per hour can now get employment at 20 cents, and in some cases of specially experienced men as high as 25 and 30 cents. These rates are the same as prevailed at the latter part of the working season of 1903. The shortage of labour is acute. The aggregate number of men wanted according to the order books of two reputable employment agents, was approximately 2,000. This number they say they could place themselves for regular employment, for at least three months.

General business conditions are excellent. Some little complaint is made regarding collections, but this is customary at this season of the year.

Several classes of employees of the Canadian Pacific Railway are negotiating for changes in their schedules. No agreement, however, had been arrived at up to the end of August. In the building trades a little uneasiness prevails as a result of the continued refusal of the largest contractors to recognize the carpenters' unions. The latter have exhausted all the powers they have to effect a settlement and have handed their case to the Building Trades Council. This

body it is understood has submitted the question to the individual unions affiliated with it.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The crop reports indicate that the yield will be quite as good as last year's, and cutting has already become general. The harvest help required is about the same as last year. Up to the end of August about 10,000 labourers had arrived from Eastern Canada. These are being distributed in the same way as described in September, 1902. Wages are identically the same as last year, that is, \$40 per month or \$2 per day. In the cases of men known to be exceptionally good workmen, slightly higher rates are being paid. It might be added that prominent grain dealers estimate the total product of wheat for the year will be 55,000,000 bushels. Last year the total was below this figure. This estimate allows for the damage through rust, which has affected the crop to an extraordinary extent this year. What is lost through this cause, however, will be in a measure compensated for by the price of wheat, which is considerably higher than last year at this time. On September 1, 1903, the price of cash wheat was 90 cents, and on August 29, 1904, the price is \$1.03 for No. 1 hard. The advances recently have not yet affected the price of bread. The opinion prevails amongst the dealers that prices will remain higher than last year.

Manufacturing.—All the manufacturing concerns in the city are busy. One or two new buildings in course of construction are intended for manufacturing purposes. A prominent manufacturer of bags for grain and flour visited Winnipeg recently with a view to locating there and establishing a branch of his manufacturing business. After carefully studying the conditions he concluded that while the supply of labour was not steady and certain, he might be able to obtain a sufficient staff, but that he would not be able to keep them long enough to acquire sufficient skill to make the business profitable.

Railroad construction.—Railroad construction is limited by the supply of labour. The wages for this class of work have strengthened during the last two weeks, and are now fully up to the point reached in the fall of last year. On the whole more men are employed this year on construction work than last.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building season is at its height. For the whole of last year the total permits issued by the building inspector exceeded slightly \$5,000,000. Up to the end of August of the present year the total permits issued aggregate over \$7,500,000. Loan agents and companies state that the applications in their hands for loans would indicate that there will be a very large addition to that amount of permits. In spite of the advance in the rate of interest for loans on all classes of property, there is no diminution in the rate at which buildings of all kinds are going up. Since September of last year the rate of interest has advanced fully $1\frac{1}{2}$ per cent. Two years ago loans were secured on choice central securities at rates as low as $4\frac{1}{2}$ per cent, but at the present time it is almost impossible to get a loan on the best class of securities at less than six per cent. For smaller classes of dwellings on the outskirts of the city the rate charged is about eight per cent. Buildings of all kinds, however, continue to be put up in all parts of the city, and it is estimated that the total for the year will be fully \$10,000,000.

It would be a mistake to infer from the above figures that there is a great demand for labour. As a matter of fact, for skilled work there is abundance of men on the ground. The immigration of carpenters in the spring from all parts of Canada and from foreign countries has not yet been absorbed. Where any shortage has been felt the contractors usually have means of quickly filling up the gaps. The only real shortage has been for experienced builders' labourers. At one time it was feared that some embarrassment would be experienced

by the lack of stonecutters, but the needed number of men were procured and the supply of dressed stone was forthcoming. The proprietors of one of the local quarries invited the city council and other prominent citizens to visit their quarry for the purpose of demonstrating to them that there was abundance of stone and quarry equipment to meet the demand. Two serious accidents occurred in the building trades during the month.

Metal, engineering and shipbuilding trades.—Activity continues in the metal trades. It can be said that all the jobbing shops are working to their full capacity.

Woodworking and furnishing trades.—In the woodworking trades business is in sympathy with the activity in the building trades.

Printing and allied trades.—The printing trades have not been as busy as was anticipated and the number of hands are sufficient, with the exception of women, for bindery work. The latter are at a premium at the present time. Printers are numerous enough, and the trade is barely adequate to the task of absorbing the continuous immigration of men.

Clothing trades.—The clothing trades, although between the summer and winter seasons, are enjoying steady business.

Food and tobacco preparation.—Bakers find lots of scope for their energies in keeping pace with the rapidly growing population. The extra demand is being met by the expansion of the existing bakeries rather than by the establishing of others.

Leather trades.—The leather trades are as usual fully employed and their business is increasing.

Miscellaneous.—Miscellaneous employment is not greater in volume than the demand for it. Large numbers are always waiting in the city for an opening. Laundry workers and domestic help are very scarce and high wages prevail as a result.

Transport.—In transportation circles the staffs have all been largely increased, and the volume of business by both the railway companies in the west is rapidly increasing.

Unskilled labour.—Unskilled labour is in demand, if the term includes those who can handle intelligently a pick and shovel. The city engineer says that the great difficulty at present is the short supply of labour. He is at present in need of 300 additional men, and in the fact of this the number of men in some of his gangs is diminishing by men leaving to work in the harvest fields. Recently they installed a new sewer excavator which assists greatly in that class of work, but even with this the sewers ordered by the council are so extensive that with the most modern appliances they are not able to keep up with the work.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

A noticeable improvement in the labour market took place during August, although there were a number of new arrivals, who had not found employment, among those who had no experience in farm work. There are no mechanics, however, looking for work. Quite a number of English carpenters have come into the city, and have found employment. There was a steady demand for experienced farm labourers at good wages. Several farmers are employing men by the year.

There has been no new industry started during the month. The binder twine factory has closed; the company has a large stock of twine on hand, and will not resume operations again until this surplus has been disposed of.

In all lines of the building trades there was exceptional activity. New business blocks are about to be constructed, and a number of residences built for business men. In all parts of the city new houses are being erected, yet there are scarcely any houses to let. Transportation companies are also doing a heavy trade in agricultural implements, and all classes of merchandise.

Wholesale and retail merchants report trade very active, owing chiefly to favourable crop reports.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—From nearly every district throughout the west reports are that the prospects for another splendid crop, except in certain localities, where rust was reported, are assured. The rain that fell in almost every part of the province and Territories during the latter part of July, did a great deal of good. In the Indian Head district cutting was general by August 20. Manitoba and the Territories will have nearly all wheat cut by the beginning of September. The outlook is bright, and business, in spite of the danger from rust, is active throughout Manitoba and the Territories.

Railroad construction.—The contractors on the Canadian Northern line to Edmonton are confident that the northern town will be reached this year. Rain has delayed operations east of the South Saskatchewan, where two large gangs are working. Grading has been completed west of the South Saskatchewan one hundred miles, and outfits are at work as far west as Battleford, it being found impossible to enter that town on account of the hills. There are four large bridges to be constructed over the south branch, one at Clark's Crossing, one at the Elbow, one at Battleford, and one at Edmonton. There is some delay being caused waiting arrival of the steel superstructure, which will be brought in over the new line.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners report trade very active, with openings for good men. Lathers and plasterers were exceptionally busy. Painters and plumbers found satisfactory employment. Steamfitters found work only fairly good. Stonecutters and builders' labourers were well employed.

Metal, engineering and shipbuilding trades.—Iron moulders were fairly well employed. Machinists, steam engineers and electrical workers found employment brisk. Linemen found work somewhat slack. Boilermakers and sheet metal workers were

exceptionally well employed. Horseshoers and jewellers were actively employed. Trade with blacksmiths was fairly good.

Woodworking and furnishing trades.—Woodworkers, upholsterers and pattern makers were well employed.

Printing and allied trades.—Printers and pressmen were actively employed.

Clothing trades.—Journeyman tailors were very busy, with boot and shoe workers fairly so.

Food and tobacco preparation.—Bakers and confectioners were exceptionally busy. Butchers, meat cutters, and ice handlers found trade active. Cigarmakers were very busy.

Leather trades.—Business with tanners and curriers was somewhat slack, with leather workers fairly well employed.

Miscellaneous.—Clerks and stenographers found business fairly good. Barbers were very active. Delivery employees, hotel and restaurant employees, and laundry workers (steam) were very busy. Furriers were somewhat slack.

Transport.—All men engaged in transportation were busy. Carters, draymen, teamsters and expressmen were very busy.

Unskilled labour. The supply of farm hands is not equal to the demand. Farmers are offering from \$25 to \$30 per month for experienced men. There is quite a number of new arrivals who have not found employment. The Canadian Pacific Railway Company have given employment to a large number of men in completing improvements in the city.

DISTRICT NOTES.

Reports from the surrounding districts were very encouraging, both from an agricultural and commercial standpoint, until the report that rust was affecting the wheat came in. There has been a number of American land-seekers passing through the district, with a view to buying out improved farms; and several sales have been effected.

ROSSLAND, B.C., AND DISTRICT.

Mr. Roland A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

Forest fires were an important feature in the industrial chronology of the Kootenay districts of British Columbia during August. Such fires occur every summer, but occasionally the conditions are such that they seriously affect industry. Such was the case this year. Not since 1886 have the fires been so numerous and so dangerous as in the past month. It was not until the close of the month that matters were materially improved. Many fires were then extinguished through lack of material upon which to feed, while in numerous other cases the efforts of organized parties succeeded in stopping further destruction. An estimate of the number of feet of timber destroyed is impossible. In many instances, however, lumbering concerns protected their berths by forming corps of forest rangers, who performed continuous patrols and prevented many fires that would have been costly if permitted to extend. At *Michel* the coal mines were compelled to close down because of the dense smoke being drawn into the air blowers and rendering the workings uninhabitable. In the *Slocan* and *Lardeau* districts a number of tramways used in conveying ore from mine workings to reduction works or to shipping points, were destroyed, the *Camborne* camp being especially unlucky in this regard. In other sections lumbering was interfered with through the density of the smoke and the necessity of detaching the men to fight fires. In *Lardeau* and on the international boundary line the work of the Federated survey parties was closed down until the air cleared sufficiently to permit of instrument and photographic work being resumed.

CONDITION OF LOCAL INDUSTRIES.

Mining and smelting.—But little change was reported during the month in connection with this industry. From all points, much activity is reported, although additional men have not been engaged in large

numbers. It is reported that the Kootenays are now producing as much lead as at any time in the history of the country.

Transportation.—Incident to the activity in mining, the transportation companies are busy. Full forces are employed on all the railroads, and extra gangs are common, especially since the frequency of forest fires has made it essential to protect bridges and trestles. *Boundary* is the centre of interest in railroading owing to the activity of construction work on the Vancouver, Victoria and Eastern extensions. Almost 2,000 men are engaged in the work on these additions.

Lumbering.—Lumbering plants throughout the country are reported busy, with the exception of the plants affected by the recent fires. It is likely that there will be further expansion in lumbering, at least one more company contemplating the installation of a milling plant at Nelson.

Agriculture.—The present summer has witnessed a wide expansion in agriculture throughout the Kootenays. Many small holdings have been opened up and set out with fruit trees, as a result of the success demonstrated by past experience. The provincial and Federal authorities protect the home grower by throwing safeguards about the concerns offering nursery stock for sale and by discriminating severely against the diseased fruit trees imported in the past from the United States.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions have not shown much change from July. The B. C. Electric Car shops were destroyed by fire on the 13th of the month, with a loss of \$40,000, and with 40 employees temporarily thrown out of work. The workmen lost all their tools in the fire. The work of replacing the building and plant will be commenced at once, and it is expected that it will be in full

running order in about three months. A demand is still made for carpenters and labourers. The Vancouver, Westminster and Yukon Railway Company has commenced to run a daily service between this point and Vancouver, four trains running each way at present. The company has a large number of men employed on the road. The B. C. Telephone Company has a large force of men at work on the land telephone lines, which will form part of the system between the mainland and Vancouver Island. The estimated cost of this work, including cable, will amount to \$100,000. Altogether about 18½ miles of cables and over 50 miles of land lines will be laid. The Dominion Government has awarded to a Victoria firm the contract of building a new snag boat for use on the Fraser river; the vessel will be a two decker, 150 feet long, equipped with powerful lifting machinery.

The price of flour increased during the past month 40 cents a barrel, with a tendency to a further increase.

There has been no change in the rates of wages, except in cases where the demand was in excess of supply, and no changes in the hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are very busy, having harvested a good hay crop, and cutting and threshing an abundant crop of wheat, oats and barley. The weather has been all that could have been desired, and the crops will probably be satisfactorily harvested. Many farmers this season have gone extensively into dairying with good results. The New Westminster Creamery Company has doubled its output during the past year; which amounted during the summer months to 1,150 pounds of butter per day.

Fishing.—The sockeye run of 1904 is practically over, and a number of canneries have closed down; the season has been a very poor one, many of the fishermen not having made ordinary wages for the season's work. The pack is estimated at 70,000, as against 237,125 in 1903. It is un-

derstood that a few canneries will remain open till the fall pack of cohoes is ended. A new salmon hatchery is to be erected by the Dominion Government; the structure will be 228 x 40 feet. It is to further assist in the preservation of the fisheries of the Fraser river.

Lumbering.—A good local and export trade is being carried on by the mills. The shingle industry is very active, with orders ahead, and some of the mills were running overtime. The Canadian Pacific Lumber Company, of Port Moody, has commenced the rebuilding of its mill, which was recently destroyed by fire; it will have a capacity of about 120,000 feet per day, as against 60,000 per day of the former plant. Bush fires have been raging owing to the dry weather and have destroyed much valuable timber.

Mining.—Statistics of the provincial mining output for the first half of 1904 show great increase over 1903, and prospects for the balance of the year are even better. Enderby, Kamloops and the Boundary country are all centres of extensive developments.

Railroad construction and employment.—A good many men are at present employed on railroad construction work, with prospects good for the balance of the year.

CONDITION OF PARTICULAR TRADES.

Building trades.—In all branches of the building trades work was plentiful, especially with painters and carpenters.

Metal, engineering and shipbuilding trades.—All engaged in these trades report work steady, with less rush than last month, and men at work making full time. Blacksmiths and horseshoers were satisfactorily employed. Shipwrights and caulkers find work slack at present.

Woodworking and furnishing trades.—Woodworkers are very busy, in some cases working overtime to keep up with orders. Shingle weavers report no men idle. Some of the mills have engaged Chinamen owing to the scarcity of white help.

Printing and allied trades. Printers report trade good, with members of the craft fully employed.

Clothing trades.—Journeymen tailors were busy, with prospects of a good fall trade.

Food and tobacco preparation.—Cigar-makers report trade satisfactory, with shops running full time. Several new men were employed in this trade during the month.

Transport.—All employed in the transportation service report work plentiful, especially in the handling of freight.

Unskilled labour.—A demand is still made for men, although after the fishermen leave the river the demand may be met.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Indications point to a decline in the labour market. At present all the building trades are fairly well employed, but owing to the number of new arrivals from the Sound cities in the neighbouring state of Washington, the supply exceeds the demand. Among the painters work is quiet, several being out of employment.

Wholesale merchants report that business keeps active for the season, and that prospects for the fall trade are favourable.

There has been a marked advance in all grades of coffees, especially in fine washed coffees. Hungarian flour was quoted at \$6 a barrel, and bakers at \$5.70.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons reported that work was good, but that there is a surplus of men, with prospects very uncertain. Plasterers were busy, with no special demand for additional men. Stonecutters reported conditions good, but expect a dull time next month. The High School is about finished, and the hospital job finds employment for a full gang, and in all probability will keep them employed all winter. Carpenters and joiners reported

a few idle men, and a slackening off in work. Builders' labourers reported a large number of men out of work owing to new arrivals. Everything considered, however, this has been the best building year in the history of this place for work and wages.

Metal, engineering and shipbuilding trades.—The metal trades are fairly well employed, but a large number of men are reported out of work. Electrical workers were on short time.

Woodworking and furnishing trades.—These trades were busy, with the exception of shingle weavers, who reported a number of men out of work. Wagon makers were exceptionally busy.

Printing and allied trades.—Printers reported trade at a standstill in the job offices. The 'Morning Ledger' has suspended, throwing about a dozen men out of work.

Clothing trades.—Regarding the clothing trades, work has been fair, but the tailors reported some men working on short time.

Food and tobacco preparation.—Bakers were fairly busy, with a few men idle. Cigar making was very quiet, with a few men unemployed.

Leather trades.—The leather trades were busy, harness makers especially so.

Miscellaneous.—Barbers reported a slight surplus of men. A number of clerks and stenographers are unemployed. Stenographers receive from \$8 to \$10 per week, and in some cases have to supply their own machines. Laundry workers were well employed.

Transport.—All employed in the railway transportation service, especially train crews, were busily employed, the latter in some instances working overtime and many locomotives were kept practically running continuously. Teamsters and expressmen were well employed.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market is favourable, but compared with the same

month of last year the amount of employment has diminished. Especially is this the case amongst the skilled trades, and were it not for the large amount of corporation work in the shape of permanent sidewalks, pavements, sewers, &c., under way, there would be a large surplus of unskilled labour also on the market. The corporation gives employment to about 400 men. The wages run from \$2 to \$4 per day, averaging \$2.50. This means a pay roll of about \$1,000 per week. The board of works pursues the policy of employing as far as possible only men who may be classed as permanent residents and comparatively few 'outsiders' are given employment. The supply is quite equal to the demand in all branches. Transportation of merchandise to the Yukon has been active. No changes in rates of wages have taken place, and general quiet prevails.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The run of fish in the northern rivers has proved better than was anticipated early in the season, but it is announced that the pack for the year will be short. The catch in the traps on the west coast is very satisfactory to the promoters, considering the short run of fish this year.

Lumbering.—The mills are all working full time. Early in the month the lumber association announced that a reduction of 10 per cent, in addition to the cash discount, would be given off the present price list on all rough lumber, laths and shingles. This decision will tend to stimulate building operations.

Other industries.—Work will soon be commenced on the land telephone line, which will form part of the connection between Vancouver island and the mainland. This connection is being furnished by the British Columbia Telephone Company, and the International Telephone Company. The proposed route of the line will be from Marietta, Wash., to Lummi island by cable, a line across the island, a cable from Lummi to Orcas island, and another cable from Orcas to Shaw island. The latter island will be connected with San Juan island by

cable and San Juan will be joined to Gordon Head by cable. Altogether there will be about 18½ miles of cable used and the land lines will be about 50 miles. The line from Marietta, Wash., will be brought into Vancouver by way of Blaine.

CONDITION OF PARTICULAR TRADES.

Building Trades.—For the season of year trade is quiet, only a few of the branches being busy. Bricklayers and masons are fairly well employed. Carpenters and joiners report a scarcity of work. Lathers and plasterers report fair employment. Painters and plumbers have had a good month, and builders' labourers are all employed.

Metal, engineering and shipbuilding trades.—Iron moulders are busy. Machinists and engineers are fairly well employed. Electrical workers and linemen are all employed. Carriage blacksmiths have had a busy month, while smiths in the machine shops have had fair employment. Boiler-makers and their helpers had a fair month, having been exceptionally busy the first half of the month on rush work. There has been little or no employment for shipwrights and caulkers, but sheet metal workers and horseshoers are well employed.

Wood working and furnishing trades.—Wood workers generally throughout the mills and factories are well employed. Carriage and wagon makers are fully employed.

Printing and allied trades.—The trade throughout has been well employed, there being no idle men in any of the branches.

Clothing trades.—With journeymen tailors trade has fallen off somewhat since last month, leaving a number of hands unemployed. Garment workers also report less trade than in July, with less employment.

Food and tobacco preparation.—Bakers were busy. Butchers report trade dull. Cigarmakers had a fair month.

Leather.—Harness makers and saddlers report trade good with full employment of all hands.

Miscellaneous. Barbers, clerks and delivery employers, reports conditions favourable and full employment for all hands. Laundry workers report improved conditions. With the establishment of another steam laundry that class of work is being gradually taken from the Chinese, and more employment given to white men and girls.

Transport.—Steamboat men and all labourers on the water front are fully employed. Street railway men report conditions favourable. Hack drivers, teamsters and expressmen were well employed.

Unskilled labour.—Work is plentiful for permanent residents, but the overflow from the American cities leaves a surplus, with some unemployed.

DISTRICT NOTES.

Ladysmith.—An enlargement of the iron-works in order to permit of the manufacture of stoves, was stated to be under consideration. The change would involve a large increase in plant and expenditure.

EMPLOYMENT BUREAUS AND AGENCIES IN CANADA.

DURING the past few months, the Department of Labour has been engaged upon an investigation with regard to employment bureaus in Canada, with a view to ascertaining what agencies are in existence, the manner in which they are conducted, and the nature and extent of the business which they have been carrying on. The investigation was commenced as a consequence of inquiries made of the department as to the existence of such

agencies in the Dominion, and also as a consequence of representations which have been made as to the manner in which certain of these agencies were conducting their business.

Sources of information.

In gathering its information, the department sent an official communication to all the agencies classed as employment bureaus or agencies in the directories of the

several cities and larger municipalities of the Dominion : a blank form was inclosed on which the agencies in question were respectfully requested to make a return to the department as to the nature and extent of their business, together with other particulars, which might assist the department in ascertaining the scope of the work which these agencies were carrying on in the Dominion. Official communications were also sent to the clerks of the chief municipalities, asking whether or not any employment bureaus, or agencies, existed in their municipalities which were assisted by municipal aid, and whether or not by-laws governing these agencies had been passed by the municipalities.

The correspondents of the *Labour Gazette* were also instructed to supply the department with a list of employment agencies in their cities and districts, and with particulars with reference to the nature of the business carried on by those concerns. From these and other sources the department has been able to make a fairly comprehensive survey of the number and nature of existing agencies in the Dominion at the present time, and the extent of the business which they carry on.

The results of the investigation are more valuable in view of the fact that a similar investigation has not, so far as the department is aware, been attempted either for the Dominion as a whole or for any of the provinces.

Provincial Bureaus.

In the United States as many as thirteen States have public employment bureaus maintained directly by the state, and similar public bureaus are also carried on under government control in other countries*.

In Canada, however, there do not exist any employment bureaus or agencies carried on or even financially assisted by Dominion or Provincial funds for the purpose of obtaining work for all classes of labour. The governments of Ontario, Manitoba and the North-west Territories, however, conduct

employment bureaus which are solely for the purpose of providing agricultural labourers with work, supplying them with information, and directing them to the localities where they are most required.

Ontario Labour Bureau.

The Department of Crown Lands of Ontario conducts a farm labour bureau at Toronto which is in the charge of the Bureau of Colonization. A blank form is sent to farmers throughout the province to be filled out by them and returned to the bureau. The following is a copy of the form which is sent out:—

Application for Farm Help, 1904.

P.O.

Date.

To the Commissioner of Crown Lands,
Toronto, Ont.

I desire to procure farm help as follows :—

When wanted.
(Number) Farm hand, single, experienced, who can plow, milk, etc.
Husband and wife (without children) ; man, experienced farm hand, and wife to do house work.

An experienced farm hand with wife and family, for whom cottage and. will be provided.

(Number) Inexperienced hand (from seventeen years of age upwards) on a year's engagement to learn farming.

Any other class needed.
Other remarks :

With a suitable party the undersigned will make. months' engagement at \$. . . . per month with board, or one month's engagement with board for \$.

(The above is not intended as a contract, but for our own information).

Did you send in an application for 1903 ?

If supplied, was the help satisfactory ?

Signature of applicant.

How to reach place of employment from Toronto :

In accordance with the information thus received, immigrants are distributed throughout the country from the railway station at Toronto as they arrive. During the present year it is stated by the Director of the Bureau of Colonization that about 3,000 have been placed. The government defrays the cost of transportation of the immigrants from Toronto to the railway station nearest to their destination.

The Manitoba Labour Bureau.

The Department of Agriculture of Manitoba conducts a bureau at Winnipeg where a record is kept of applications from farm-

* See Reports of Departments and Bureaus in the March number of the *Gazette*.

ers who desire help, whether experienced or inexperienced. The wages offered in each case are also noted down. These applications are shown to the new arrivals, and the government officer in charge helps to decide the situation for which each man is best suited. A reduced railway rate, equivalent to about half fare, is granted to the immigrants, who secure positions in this way, from Winnipeg to the station where employment is secured.

Farm Labour in the North-west Territories.

The latest account of the work of the government of the North-west Territories in procuring situations for farm labourers is contained in the Annual Report of the Department of Agriculture of the North-west Territories covering the year 1902, a review of which appeared in the *Labour Gazette* for November, 1903. The following extract from this Report shows the extent of the work accomplished during the year 1902.

'In previous years the responsibility for providing and distributing harvest hands for the great grain producing districts of the west has rested mainly on the Canadian Pacific Railway Company, which has been in the habit of running, each year, harvest excursion trains from points in Ontario to as far west as Moosejaw. Harvesters were booked indiscriminately, at cheap return rates, to whatever point in the west they might individually decide upon. The results could not be other than unsatisfactory, as some parts of the country got too many harvesters and others were left practically without any. From reports received from the department's crop correspondence staff, it early became evident last season that an enormous harvest was in prospect and that the allied labour problem would be of more than usual magnitude. It was realized that the time had arrived when the distribution of harvest help must be put on a better and more businesslike footing than had hitherto obtained, and negotiations having this

object in view were entered into with the Canadian Pacific Railway authorities. It was finally arranged that harvesters should be booked, in the first place, to Winnipeg only, and should be distributed from that point, free of charge, to places at which their services were required, under direction of officials of the department. The department at once placed in the hands of each railway station agent in the large crop districts of Assiniboia an employment register in which each farmer requiring help entered his name, residence, number of men wanted, and probable duration of employment. These registers were later on returned to the department and the information gleaned from them will, it is thought, prove useful, to some extent at least, in gauging next year's requirements. From these registers daily reports were made up and transmitted by the station agents to the office of the General Passenger Agent at Winnipeg. Mr. T. N. Willin, of the department's staff, and Mr. R. M. Mitchell, an experienced employment agent, were stationed at Winnipeg during the time in which the harvest excursions were arriving. These gentlemen met all the harvest trains and supervised the distribution of help to Territorial points in accordance with the information as to local requirements furnished to them from the General Passenger Agent's office. It was found that an unfortunate tendency existed on the part of many of the excursionists to crowd to certain points, the governing idea being, apparently, to get as much travelling for their money as possible. The consequence was that in spite of the untiring efforts of the department's representatives to counteract this tendency, points such as Moosejaw became congested with harvesters, about half of those who went there being compelled to return to more eastern points at their own expense.

'On the whole the arrangements made worked out satisfactorily and without friction, and the experience gained will be of great value in dealing with this important matter another season. As indicated by the subjoined table the requirements of the various points, as indicated by the registers, were more than met, and no complaints of lack of help reached the department. Although every effort was made by the department to give full publicity to the arrangements, it is evident, from the figures given, that only a little over ten per cent of the farmers took advantage afforded them of making their wants in the way of harvest help known. Fortunately the weather during the whole of harvest time was most favourable, hence any delay in the work owing to shortage of help was not so important as if conditions had been less favourable.

Employment Bureaus assisted by Municipal Funds.

Not only have there been no general employment bureaus or agencies assisted by provincial funds, but, with only one exception, there do not appear to exist any agencies maintained exclusively by the funds of municipalities. This exception is the Free Municipal Labour Bureau at Montreal. In two cases, Toronto and Hamilton, the municipalities have each an employment bureau conducted mainly for the purpose of securing labour for the municipality; indirectly they assist private individuals to secure help and positions.

The Free Municipal Labour Bureau at Montreal was established on October 15, 1896, at the request of the Montreal Trades and Labour Council. It is supported by a grant of \$700, voted yearly by the City Council on the recommendation of the Finance Committee, and the manager of the bureau is authorized to draw on the City Treasurer every month for an amount equal to one-twelfth of this appropriation.

When an applicant asks for a situation and cannot readily be supplied with one, his name and address, and the position required are registered, and a check is given to him. The number of the check is entered in an Index Book under the heading of the trade he represents, so that he can easily be found when an employer asks for one of his occupation.

When an employer of labour calls for help, his name and address, and the conditions of engagement in detail, are registered. No checks are given to the employer. Engagements have to be made directly between parties interested, the bureau never interfering as to conditions, except in suspected cases of frauds.

The bureau deals with all classes of employment, the larger proportion of applicants being shantymen, general labourers, and railway labourers.

The bureau was established by virtue of Article 300, clause 73, of the Montreal charter, which was sanctioned on March

10, 1899, empowering the municipality to establish, conduct and maintain a municipal labour bureau.

The report of the bureau for the six months commencing December 1st, 1902, and ending May 31st, 1903, contains the following statistics:—

	Situations wanted.	Situations offered.	Placed.
December, 1902.. . . .	567	142	118
January, 1903.. . . .	471	67	61
February, 1903.. . . .	447	95	74
March, 1903.. . . .	585	103	83
April, 1903.. . . .	641	249	226
May, 1903.. . . .	526	185	147
Total.. . . .	3,237	841	709
A diminution of.. . . .	1,606	766	776

on the corresponding six months of the previous year, mostly due to the small demand for railway labourers.

Later reports of this bureau have been received; one covering the three months from December 1, 1903 to February 29, 1904, and another covering the period from March 1 and May 31, 1904. During that period the number of situations offered was 243, the approximate number of applicants was 966, and the number of situations filled was 218. Positions were obtained for 61 labourers 46 printing compositors, 13 farm labourers, 21 woodcutters, 11 kitchen helpers, 10 general servants, and a few each in a number of other trades.

From March 1 to May 31, there were 1,256 applicants for work, and 388 applicants for help. Situations were obtained in 314 cases, which included among others 28 carpenters and joiners, 40 farm labourers, 35 compositors, 56 general labourers, and 41 kitchen helpers.

In Toronto and Hamilton there exist civic labour bureaus, but as they are primarily for the purpose of supplying labour to the municipal corporation, they can hardly be classed with the Free Municipal Labour Bureau of Montreal. In both places private individuals are allowed to examine the lists and obtain the names and addresses of applicants for work when their services are not required by the civic authorities.

The Civic Labour Bureau at Toronto was established in February, 1897, and it is

under the control of the Commissioner of Assessment and Property. The class of men applying for work to the bureau are chiefly general labourers. The number of applicants per month is given as follows :

During November, 1902..	119
" December, "	327
" January, 1903..	1,400
" February, 1903..	880
" March, 1903..	280
" April, 1903..	140
" May, 1903..	140
" June, 1903..	105
" July, 1903..	70
" August, 1903..	65
" September, 1903..	35
" October, 1903..	49
Total for year..	3,610

The Civic Labour Bureau at Hamilton was established for the purpose of obtaining employment for men who apply to the city authorities for work. The names of applicants are entered in a register, and the allotment of work is regulated by a committee consisting of the chairmen of the various committees of the city council. The various civic departments requiring workmen apply to the Labour Bureau, instead of engaging men directly themselves, which they only do when the Labour Bureau fails to furnish the number of men required. When the supply of labour exceeds the demand, married men, or those having others dependent upon them, are given the preference, and the men employed are changed in regular rotation at stated periods, long or short, according to the number of applicants on the list. It is reported that as many as 700 register in a winter. A list is also kept of women seeking employment, and all persons wishing to employ either men or women may obtain information at the bureau, and take from the register the names and addresses of the applicants for work.

It will be seen from this review that, in the Dominion as a whole, the public, except where the class of labour affected is agricultural labour, has given very little attention to the subject of employment bureaus or agencies, and left the matter almost entirely to individuals to undertake and carry on as a business enterprise.

Provincial Legislation Relating to Employment Agencies.

Ontario and Quebec appear to be the only provinces which have passed legislation specifically relating to employment agencies. The Ontario Municipal Act states that by-laws may be passed by the councils of counties, townships, towns and villages, and of cities having less than 100,000 inhabitants, and by the Board of Commissioners of Police in cities having 100,000 inhabitants or more:—

17. For licensing and regulating suitable persons to keep intelligence offices, for registering the names and residences of, and giving information to, or procuring servants, labourers, workmen, clerks or other employees for employers in want of the same, and for registering the names and residences of, and giving information to, or procuring employment for domestic servants and other labourers and any other class of servant, workman, clerk or person seeking employment, and for fixing the fees to be charged and recovered by the keepers of such offices.

18. For the regulation of such intelligence offices ;

19. For limiting the duration of or revoking any such license ;

20. For prohibiting the opening or keeping of any such intelligence office within the municipality without license.

By the councils of counties, townships, cities, towns and villages :—

21. For fixing the fee (not exceeding \$10 for one year) to be paid for every license required under by-laws passed under clauses 17 to 20.*

In the province of Quebec it is provided by law that the council of a municipality may make, amend and repeal by-laws 'to license and regulate keepers of intelligence or employment officers, and all persons doing the business of seeking employment for or furnishing employees to others and to require such persons to keep registers of their transactions, and to make reports thereof.†

Municipal By-Laws relating to Employment Agencies.

By-laws relating to employment agencies exist in London, Ont., Winnipeg, Man., and Vancouver, B.C., but other municipalities

* Statutes of Ontario, 3 Edw. VII., 1903, Chap. 19, Sec. 583.

† Statutes of Quebec, 3 Edw. VII., 1903, Chap. 38, Sec. XV.

do not appear to have passed any regulations affecting these agencies.

At London, a license fee of one dollar is charged to the keepers of employment agencies. At Winnipeg an annual fee of \$25 is imposed, and at Vancouver a fee of \$10 per annum.

As illustrating the need of regulation, arising out of possible abuses, the following sections of the by-law of the city of Winnipeg relating to employment agencies may be quoted in full :—

25. Every keeper of an intelligence office shall keep posted up in a conspicuous place in his office, as shall be determined by the Inspector of Licenses, copies of sections 26 to 30, inclusive, of this By-Law, which shall be supplied to the licensee by the Inspector of Licenses at the time of issuing the license.

26. Every person licensed to keep an intelligence office shall keep in a conspicuous place on the outside thereof a sign, showing his name and indicating his office hours.

27. Every person licensed to keep an intelligence office shall keep a book, in which shall be entered at the time of application the name and residence of any person who may apply for employment and the name and residence of any person who may make application to be supplied with male or female domestics, servants of any kind or other labourers, and also any and all sums which may be received from any person for any such services, and such book shall at all times be open to the inspection of the License Inspector, Chief of Police, or other person duly authorized to inspect the same.

28. Every person licensed to keep an intelligence office shall be entitled to receive at the time of application the following fees and no more :—

(1) From every male applying for place or employment a sum not exceeding one dollar.

(2) From every female applying for place or employment a sum not exceeding fifty cents.

(3) From every person making application for a male domestic servant or other labourer of any kind a sum not exceeding fifty cents.

(4) From every person making application for a female domestic servant or other female labourer a sum not exceeding twenty-five cents, for which said sums a receipt shall be given at the time of making application to the person so applying, and in the event of no place or employment being obtained as applied for or no domestic servant or other labourer of any kind being obtained as applied for within two weeks from the date of the application, one-half of the fees so paid shall be refunded on the demand of the person producing the receipt.

29. Every person licensed to keep an intelligence office, as aforesaid, who shall, directly or indirectly, or through any person or persons, make or use any improper devices, deceit, false representations, false pretense or any imposition whatsoever for any improper purposes or for the purpose of obtaining a fee, money or gratuity or other thing of value from any customer, person or persons, patron or patrons, or who shall be guilty of extortion or of taking or demanding any article or thing or any fees ex-

cept those authorized by this By-law shall be subject to the penalties of this By-law.

30. No person licensed to keep an intelligence office, as aforesaid, shall, knowingly, send any person to any house of ill-fame or house of assignation for employment, or shall in any way influence any person to go to any house of ill-fame or house of assignation.

31. No license taken out by any person to keep an intelligence office, as aforesaid, shall be the subject of transfer to any other person, nor shall any such license be issued to any such person for a proportional part of a year, but every such person shall pay the full license fee for the year imposed by this By-law, irrespective as to what portion of the year subsequent to the first of June shall have expired at the time of the issue of such license.

Existing Private Agencies.

Taking account of the private employment agencies mentioned in the directories of the several cities of the Dominion, it would appear that there are about one hundred of these agencies, which have been carrying on a business for some time. About one half of this number appear to be concerned primarily in supplying domestic servants to applicants and filling other positions open to women. Others, while carrying on this work, also undertake to secure positions for other classes of labour, usually the less skilled, as, for example, lumbermen required for the shanties, navvies for work on railroad construction, mining and general labourers. Only one or two agencies appear to fill positions among the skilled trades.

Trade Union Employment Agencies.

There are employment agencies at Quebec and Victoria, B.C., conducted by trade unions, which claim to have proved of great service to the unemployed.

The Labour Bureau at Quebec was established in May, 1902, by the Brotherhood of Shoe-machine Workers, and is supported entirely out of the funds of the Union. Since the date of its establishment until November 1, 1903, about 700 positions were obtained for applicants, who were chiefly shoe-workers, although a few belonged to other classes of labour. The cost of maintenance is about \$900 a year. No fees are charged to applicants, either employers or employees.

The Labour Bureau at Victoria, B.C., was established by the Labourers' Protective Union on August 22, 1902. The objects of the Bureau were : 1. To provide in a systematic manner employment for its members and others. 2. To provide a comfortable and convenient resort, where men seeking employment might remain in waiting pending a call. 3. To procure reliable information as to the condition of the labour market in British Columbia. 4. To make the employment office as attractive as possible by the introduction of games and literature, so as to minimize the attendance of its members at other centres which offer attractions less beneficial to workingmen.

In order to secure employment, circulars were sent to employers of labour in Victoria, setting forth the objects of the Labourers' Protective Union, and employers are asked continuously about the conditions of labour in their respective industries. All members of the Union report to the office immediately whenever they learn that any workingmen are required. The unemployed register daily and receive jobs in regular order, preference being given, however, to members of the Union. A complete record of applicants was not kept by the employment office, but from its commencement until the end of September, 1903, five hundred jobs had been procured for members of the Union through its agency. In order to obtain more work for its unemployed members, the Labourers' Protective Union recently organized a company, called the Union Excavating Co., which performs a general excavating business.

Analysis of Statistical Table.

The department publishes herewith a descriptive table, which contains, in a condensed and classified form, the particulars supplied to the department by about one quarter of the existing employment agencies in the Dominion. This table does not include all the returns sent in to the department, but such only as were fairly complete in the details given. The agencies which have supplied returns published, may

be taken on the whole as representing the classes which do the largest and most important business. For the sake of greater completeness the period covered by the table was limited to the year which ended on October 31, 1903.

Date of Establishment.

A noticeable fact in connection with existing agencies is the recent date at which most of them have been established. Out of 28 agencies which have sent in returns to the department, there appears to be one which was established in 1856, in St. John, N.B., and another in Hamilton, Ont., in 1868. With the exception of these two, which may be regarded as historical in a way, and the further exception of an agency in Winnipeg, founded in 1871, the remaining have all started business in the last two decades, and most of them within a period of ten years. Out of a total of 28, one was established between 1881 and 1890, ten between 1890 and 1900, and fourteen from 1900 to 1903.

Methods of Maintenance.

As to the maintenance of these agencies, it would appear that out of 28 reporting five are conducted free of charge, two of them being supported by municipalities, one by charitable funds, one by a labour organization at its own expense, and the fifth by a labour organization on premises placed at its disposal free of charge. Where fees were reported to be charged, in six cases they were obtained from applicants for work only, in five from applicants for help only, and in eleven cases from both parties. The charges vary from 25 cents to two dollars, the average being about one dollar. In two cases where fees are collected the employment bureau is carried on in connection with other work. Two agencies report that little work was being done, and another agency closed recently on account of lack of work.

Fourteen employment agencies gave returns for the year ended October 31, 1903, both with regard to the number of appli-

cants for work and the number of positions filled. In these agencies, the total number of applicants for the year amounted to 35,909, and the number obtaining positions amounted to 21,413. In addition to these, two agencies stated that they had received 1,191 applications for work, and five agencies gave a total of 6,353 persons who had

secured positions through their aid. Adding these to the previous amount, it would appear that in 21 agencies there were 43,793 applicants for work, of whom more than 28,066 obtained employment.

A reference to the table will show in detail the extent of the work carried on by the individual agencies.

DISPUTE BETWEEN GRAND TRUNK RAILWAY COMPANY AND CERTAIN OF ITS TELEGRAPHERS, REFERRED TO A BOARD OF ARBITRATORS UNDER THE RAILWAY LABOUR DISPUTES' ACT.

DURING the month of July, the differences in dispute between the Grand Trunk Railway Company and certain telegraphers in its employ, were referred to a committee of conciliation, mediation and investigation appointed under the Railway Labour Disputes' Act, 1903.* At the close of the month the establishment of this committee had not been completed, a meeting of the representatives of the parties affected for this purpose having been arranged for August 8, at the Department of Labour, Ottawa. To meet the convenience of the representative of the company on the committee, it was subsequently arranged to hold the meeting at Toronto instead of at Ottawa. A brief account of the organization and proceedings of the committee during August, and the subsequent reference of the matters in dispute to a board of arbitration appointed under the Act is as follows:—

Organization of the Committee.

As a result of a joint meeting at Toronto on August 8, of Mr. George F. Shepley, Esq., K.C., and Mr. J. H. Hall, Esq., the representatives appointed by the Grand Trunk Railway Company and the telegraphers respectively, as members of the Conciliation Committee. His Honour Judge

Teetzel, of Hamilton, was chosen as the third member and chairman of the Conciliation Committee. Judge Teetzel was absent at the time in British Columbia, but being communicated with by wire by the department, accepted the appointment and arranged to meet with the other members of the Conciliation Committee at Toronto, on Monday, August 22.

Report of the Conciliation Committee.

On August 22 and 23, the committee met at Toronto, and endeavoured to arrange an amicable settlement of the differences, through representatives of the parties to the dispute who appeared before the committee. The committee conducted its proceedings in private, but were unable to effect a settlement. The committee thereupon submitted the following report to the Honourable the Minister of Labour:—

TORONTO, August 24, 1904.

To the Honourable Sir William Mulock,
Minister of Labour,
Ottawa, Ont.

Honourable Sir,—In the matter of the Railway Labour Disputes' Act, 1903, and in the matter of the reference of certain differences between the Grand Trunk Railway Company and its telegraphers, to the undersigned, as a conciliation committee under the provisions of the said Act.

Your committee respectfully begs to report that on the 22nd and 23rd days of August instant, in the presence of F. H. McGuigan, manager of the said railway, W. W. Pope, solicitors' clerk, George C. Jones, superintendent Midland Division, representing said railway company, and D. Campbell, third vice-president of the Order

* An account is given in the August number of the *Labour Gazette* (Vol. 5, No. 2, page 168) of the differences in dispute between the Grand Trunk Railway Company and its telegraphers and of the action taken by the Department during the month of July towards establishing a committee of conciliation to which these differences were referred.

of Railway Telegraphers; D. M. Kennedy, and W. Faskin, telegraphers, representing the telegraphers in the employment of the said railway company, your committee endeavoured by conciliation and mediation to assist in bringing about an amicable settlement of said differences to the satisfaction of both parties, but your committee was unable to effect such a settlement.

Your obedient servants,

(Sgd.) J. V. TEETZEL,

Chairman of Conciliation Committee.

(Sgd.) J. H. HALL,

*Member named by Telegraphers
Employees of said Company.*

(Sgd.) GEO. F. SHEPLEY,

*Member named by Grand
Trunk Railway Company.*

Establishment of a Board of Arbitrators.

Having been notified by the Conciliation Committee of its inability to effect an amicable settlement of the differences between the Grand Trunk Railway Company and its telegraphers, the Honourable the Minister of Labour decided to refer these differences to a board of arbitrators under the Act, and the parties were requested to signify whether or not they were willing to accept as representatives on a board of arbitration, the persons who had been their representatives on the Conciliation Committee; also as to whether or not the chairman of the Conciliation Committee would be mutually acceptable as chairman of a board of arbitrators.

Each of the parties having expressed a desire to have their representatives on the Conciliation Committee, act as their representatives on the Board of Arbitrators, and having agreed to the chairman of the Conciliation Committee being the chairman of the Board of Arbitration, the Minister of Labour by an order of August 27, established the board to be composed of His Honour, J. V. Teetzel, J. H. Hall, Esq., and George F. Shepley, Esq., K.C., with all powers and duties conferred upon the Board by the Railway Labour Disputes' Act, 1903, in reference to the differences as referred to them.

The order establishing the Board of Arbitrators was as follows:—

DEPARTMENT OF LABOUR, CANADA.

In the matter of the Railway Labour Disputes' Act, 1903, and in the matter of certain differences between the Grand Trunk Railway Company of Canada and certain of its telegraphers.

Whereas under the provisions of the said Act the said differences were referred to a committee of conciliation, mediation and investigation, composed of the Honourable Mr. Justice Teetzel, J. H. Hall, Esq., and George F. Shepley, Esq., K.C., and that the committee was unable to effect an amicable settlement, and that, therefore, the Honourable William Mulock, Minister of Labour, decided to refer said differences to arbitration under the provisions of the said Act:—

And whereas the telegraphers have named J. H. Hall, Esq., to be a member of the said Board of Arbitrators, and the said company have named the said George F. Shepley, Esq., K.C., to be a member of the said Board of Arbitrators, and the said telegraphers and the said company have agreed in naming the Honourable Mr. Justice Teetzel to be the third member of such Board:

Now, therefore, it is witnessed that the said Minister hereby establishes the said Board of Arbitrators to be composed of the said J. H. Hall, George F. Shepley, and the Honourable J. V. Teetzel, the last named to be the third member of the said Board and chairman thereof with all the powers and duties of the said Act conferred upon them in respect of the differences so referred to them.

In witness whereof the said Minister hath hereunto set his hand and seal of office this 27th day of August, A.D., 1904.

(Sgd.) W. MULOCK,

Minister of Labour.

(Seal)

Additional Regulation under the Act.

At the time of establishing the Board of Arbitrators, the Honourable the Minister of Labour in virtue of the provisions of the 'Railway Labour Disputes Act' made the following regulation as to the time within which the Board was to make its report, in addition to the regulation made on July 28, 1904, and published in the *Canada Gazette* of July 30, 1904:

DEPARTMENT OF LABOUR, CANADA,

Railway Labour Disputes.

The Honourable the Minister of Labour, in virtue of the provisions of the Act, 3 Edward VII., Chap. 55, intituled 'An Act to aid in the settlement of railway labour disputes,' hereby makes the following regulations in addition to the regulations made July 26, 1904, and published in the *Canada Gazette* of July 30, 1904.

4. Subsection II. The report of the Board of Arbitrators shall be made within fourteen days from the establishment of the Board, or within such further time as on application to the Minister, and cause shown either before or after the expiry of the said fourteen days he may grant.

(Sgd.) W. MULOCK,
Minister of Labour.

OTTAWA, August 27, 1904.

Proceedings of the Board.

Immediately after the establishment of the Board, the parties to the difference were notified of its establishment, and it was expected that the Board would immediately enter upon its duties.

The section of the Railway Labour Disputes' Act, setting forth the duties of the Board is as follows:—

10. Forthwith after the appointment of the Board the chairman shall promptly convene the same, and the Board shall in such manner as it thinks advisable make thorough, careful and expeditious inquiry into all the facts and circumstances connected with the difference and the cause thereof and shall consider what would be reasonable and proper to be done by both or either of the parties with a view to putting an end to the difference, and to preventing its recurrence and shall with all reasonable speed make to the Minister a written report setting forth the various proceedings and steps taken by the Board for the purpose of fully and correctly ascertaining all the

facts and circumstances, and also setting forth said facts and circumstances, and its findings therefrom including the cause of the difference and the Board's recommendations with a view to its removal, and the prevention of its recurrence.

Other sections of the 'Railway Labour Disputes Act,' which are of interest as referring to the powers of the Board and the manner of proceedings, are as follows:—

13. For the purpose of such inquiry the Board shall have all the power of summoning before it any witnesses, and of requiring them to give evidence on oath, or on solemn affirmation, if they are persons entitled to affirm in civil matters, and produce such documents and things as the Board deems requisite to the full investigation of the matters into which it is inquiring, and shall have the same power to enforce the attendance of witnesses, and to compel them to give evidence as is vested in any court of record in civil cases; but no such witness shall be compelled to answer any question, by his answer to which he might render himself liable to a criminal prosecution.

19. No counsel or solicitor shall be entitled to appear before the Board except with the consent of all parties to the difference, and notwithstanding such consent, the Board may, if it deems it advisable, decline to allow counsel or solicitors to appear before it. The parties to the difference may appear in person or by agents.

21. Where the difference, which is being inquired into, affects a class of employees, it shall not be necessary for them all to take part in the inquiry, but the class may be represented by a limited number chosen by a majority or by agents other than counsel or solicitor.

22. If, in any proceedings before the Board, any person wilfully insults any member of the Board, or wilfully interrupts the proceedings, or without good cause refuses to give evidence, or is guilty in any manner of any unlawful contempt in the face of the Board, it shall be lawful for any other member of the Board or constable to take the person offending into custody and remove him from the precincts of the Board and retain him in custody until the rising of the Board.

23. It shall be in the discretion of the Board to conduct its proceedings in public or in private.

DOMINION LEGISLATION AFFECTING LABOUR, 1904.

ON August 10 the Dominion Parliament was prorogued by His Excellency the Governor General, the session having lasted since March 11. In the speech from the throne, reference was made among other matters to the duration of the session, the completion of the agreement upon which the National Transcontinental Railway will be built, the trade arrangement with

Mexico, the increasing revenue, the liberal aid granted towards river and harbour improvements and the construction of public works, and the general prosperity of the country. Assent was at the same time given to forty Acts, which in addition to those assented to on June 6, and July 13, brings the total number for the session to 142.

In the August issue of the *Labour Gazette* a special was published dealing with such Acts affecting labour as received the royal assent prior to July 31.* Among those assented to on August 10 were also a number affecting the condition of labour.

Calling Out of the Militia.

In view of the fact that the militia have been occasionally called out in connection with strikes or lockouts, the provisions of the new Militia Act (1) defining the conditions under which the militia may be called out to assist in the prevention or suppression of riots, are of considerable interest to labour. Under the terms of the new Act the assistance of the militia may be requested only in cases which are beyond the powers of the civil authorities to deal with. The procedure to be followed is by requisition in writing on the part of the civil authorities to the district officer commanding, or in case of his absence to the senior officer of the acting militia in any locality, who thereupon must call out as large a force as he thinks necessary, availing himself in so far as possible, of the permanent force before having recourse to other militia corps. Explicit regulations are also laid down as to the authorities who are entitled to make a requisition for troops. In municipalities, the right is restricted to the mayor or other head of the municipality, together with two justices of the peace. Where the place is not municipally organized, a country or district court judge or a judge of a superior court may make the requisition, the same official being also empowered to act in municipalities where the head is not willing or is unable to take action. A fixed form of requisition is prescribed, it being specifically enjoined that it must show that the riot has either occurred or is anticipated, and that the services of the militia are required for the aid of the civil power. The men thus called out must act only as a military body, though the officers and men are, by the mere fact of being called

out in this particular service, thereby constituted special constables. The municipality is to be liable for the payment at a specified rate, and maintenance of the force invoked to its assistance as well as for the cost of transport and lodging. Pending payment of this by the municipality, however, an advance of the sum is to be made by the Dominion, though this is not to interfere in any way with the liability of the municipality.

Among several persons named by the Act as exempt from liability to service in the militia are, telegraph clerks in actual employment, officers and clerks employed in the collection of the revenue, members of police forces and fire brigades, and pilots and apprentice pilots during the season of navigation.

The effect of the new provisions of the Act as above set forth is to put additional safeguards about the circumstances attending the calling out of the militia in aid of the civil power. This is shown particularly in the provisions as to who may make requisition for the militia, which was formerly the chairman or custos of the quarter sessions of the peace, or any three justices of the peace of whom the mayor or warden of the municipality might be one. The making of the requisition to the district officer commanding, in the first instance, and the injunction requiring the employment by preference of the permanent force in this service are further instances of the tendency to safeguard the employment of the militia.*

Protection of Railway Employees.

Two Acts of the session, in the form of amendments to the Railway Act of 1903, contain provisions bearing directly on the condition of employment on railways. One (2) of these deals with the question of the liability of a railway company for personal injuries received by its employees in cases where the injured employee was a member of an insurance or provident society, to the funds of which the company did or

* See the *Labour Gazette* for August, 1904, page .

(2) 4 Edw. VII, Chap. 31.

* See Revised Statutes, Canada, Vol. I, page 621.

did not contribute. No agreement of any kind, it is provided, between a company and an association of this kind, and no by-law or rule of the association itself relieves the company from liability for the personal injuries of the employees. The enforcement of the Act is made conditional on its validity being asserted by the Supreme Court.

The second amendment of the Railway Act (3) has to do with the question of *Sunday labour*. The Provincial Sunday Observance Laws, it is provided, are to apply to all railways, steam or electric street railways, which, though chartered by the Dominion Parliament, are wholly within a single province, and their employees are accordingly made subject to the legislation prohibiting or regulating labour on Sundays in force in the several provinces. This enactment, however, is not to be allowed to interfere with through traffic between two or more provinces, or between a province and a foreign country, or to apply to any railway between a port on the Great Lakes and a through railway. The Governor in Council, further, may by proclamation declare any railway exempt from the provisions of this section.

Assistance to Various Industries.

Several Acts of the session were in the way of providing assistance to different industries, and may, therefore, be considered as affecting conditions in the labour market. Among these were the following :—

An Act to Amend the Custom's Tariff Act, gives additional encouragement, by a readjustment of the tariff, to the *manufacture* of woollens, twine and cordage, crude oil, and other commodities.* Provisions are also inserted to prevent the 'dumping' of foreign manufactured commodities on the Canadian market (4).

Two Acts were passed relating to the payment of *subsidies to certain railways*, in one (5) of which it was provided that all rails used in the construction of the line were to be of Canadian manufacture, if procurable upon terms as favourable as other rails.

Five Acts related to the granting of aid in the form of *bounties* to certain industries. Under the Petroleum Bounty Act (6) a bounty of 1½ cent per imperial gallon is to be allowed on all crude *petroleum produced from wells in Canada after July 8, 1904* or held in storage on that date. An enlargement of the Act of 1903 (7) respecting bounties on steel and iron was also put into force. The Act of 1903, providing for the *payment of bounties on lead contained in lead bearing ores mined in Canada*, was amended in three separate Acts. (8) Payment of the bounty in question may now be made on all such ores as have been or may be delivered at a smelter on or after July 1, 1903, until June 30, 1908. The Act is also enlarged by allowing any portion of the \$500,000 annual allowance which may be unexpended in any year to be carried over.

The establishment of *whale factories* is encouraged in an Act to amend the Fisheries' Act. (9) The manufacture of oil and other commercial products from whales, or is forbidden except under license from the Minister of Marine and Fisheries. The site for a factory must be approved by the Minister, and an assurance given that the business will be satisfactorily conducted before a license is issued. The amount of the fee charged, and various regulations as to the methods to be employed in the fishing and manufacturing processes are stated in detail.

(3) 4 Edw. VII, Chap. 32.

(4) 4 Edw. VII., Chap. 11.

*For a more complete statement of the changes in the tariff affecting these manufacturers, see the *Labour Gazette*, July, 1904, page 76.

(5) 4 Edw. VII, Chap. 33.

(6) 4 Edw. VII, Chap. 28.

(7) 4 Edw. VII., Chap. 39.

(8) 4 Edw. VII, Chaps. 20, 21 & 22.

(9) 4 Edw. VII., Chap. 13.

Grain Inspection and Contagious Diseases of Animals.

Two Acts among those assented to on August 10 are of interest primarily to the agricultural industry, viz., an Act, 'respecting the inspection of grain' ⁽¹⁰⁾ and an amendment to the Animal Contagious Diseases' Act of 1903. The latter ⁽¹¹⁾ deals principally with the question of compensation for the slaughter of animals affected with contagious diseases, fixing it generally at two-thirds of the value of the animal, with a stated maximum valuation in the case of grade animals. The Grain Inspection Act provides for the establishment of inspection divisions, the appointment of inspectors and chief inspectors, their qualifications, salaries and duties, the establishment of grain standards, boards and their duties, the grading of grain, regulations as to elevators, the duties of way-masters, etc. Special provisions applying to the Eastern and Manitoba inspection divisions are inserted, and a section is devoted to a definition of the different qualities of grain, including spring wheat, goose wheat, winter wheat, corn, oats, rye, barley, peas, buckwheat, flaxseed and other grains. The inspection of foreign grain is also treated under a separate heading.

Legislation Relating to Transportation.

A prominent feature of the legislation of the session just closed was the number of Acts passed directly relating to transportation. These amounted to no less than sixty-eight separate statutes, out of a total of one hundred and forty-two. In the list was included an Act amending the National Transcontinental Railway Act of last year*. the Acts amending the Railway Act, 1903, and the Acts relating to the payment of railway subsidies referred to above; four Acts affecting water transportation in a general way†; two Acts relating to the

Act respecting the Canadian Northern Railway Company; an Act respecting the Grand Trunk Pacific Railway Company; and an Act respecting the Trans-Canada Railway Company. In addition to these measures, Acts were passed relating to transportation companies, in the several provinces as follows:—7 in Quebec, 26 in Ontario, 6 in Manitoba and the Territories, and 10 in British Columbia.

Three Acts were passed relating to bridge companies, viz., the Strait of Canso Bridge Company, the Interprovincial Bridge Company of New Brunswick, and the Welland and Grand Island Bridge Company.

Enlargement of Banking Facilities.

Five Acts were passed during the session relating to the incorporation or organization of chartered banks. The 'Farmers' Bank of Canada,' with a capital of \$1,000,000, and head office at Toronto, was given a charter of incorporation, ⁽¹²⁾ and the 'Northern Bank,' ⁽¹³⁾ 'Alliance Bank of Canada,' ⁽¹⁴⁾ the 'Pacific Bank of Canada,' ⁽¹⁵⁾ and 'Home Bank of Canada,' ⁽¹⁶⁾ were granted assistance in the matter of obtaining certificates for commencing business.

Miscellaneous Enactments.

Eight Acts of the session dealt with the rights of individuals or corporations to certain patents.

In the Act incorporating the *Canadian Credit Indemnity Company*, ⁽¹⁷⁾ the section defining the business in which the company may engage, contains a section expressly allowing the company to make contracts of insurance against the claims or demands of workmen or employees in respect to accidents or casualties whereby the insured may suffer loss or incur cost or expense.

⁽¹²⁾ 4 Edw. VII., Chap. 77.

⁽¹³⁾ 4 Edw. VII., Chap. 105.

⁽¹⁴⁾ 4 Edw. VII., Chap. 44.

⁽¹⁵⁾ 4 Edw. VII., Chap. 113.

⁽¹⁶⁾ 4 Edw. VII., Chap. 83.

⁽¹⁷⁾ 4 Edw. VII., Chap. 57.

The purchase of the *Canada Eastern Railway* by the government of Canada, and the taking over of the Fredericton and St. Mary's Railway Bridge was authorized by special statute. The railway and its branches are to be free from encumbrances, and with the bridge are to form a portion of the government railway system. (18)

Letter carriers in places enjoying a free letter carriers' delivery system may, under an amendment of the Post Office Act, be allowed a bulk sum not exceeding \$50 a year by the Postmaster General in lieu of paying street railway companies for their transportation, except in places where carriers are entitled to free street railway transportation.

UNION MEETING OF THE CANADIAN DIVISIONS OF THE BROTHERHOOD OF LOCOMOTIVE ENGINEERS.

The annual union meeting of the Brotherhood of Locomotive Engineers was held at Montreal, Que., on August 10 to 13. In the neighbourhood of 600 were present from different divisions of the Brotherhood, both in Canada and the United States, the number in attendance being considerably higher than usual. A similar union meeting was held in Montreal in 1889.

A number of business meetings were held, for the most part in secret session. During the continuance of the union meeting visits were paid to the new Angus shops of the Canadian Pacific Railway Company, to the Grand Trunk Railway shops at Point St. Charles, and to the Jubilee bridge. An excursion was also run to the city of Que-

bec for the benefit of those in attendance, and a luncheon tendered by the city council.

A public meeting, under the auspices of the Brotherhood, was held in the Academy of Music on August 10. The Honourable the Minister of Railways and Canals addressed those present, referring to the conservative methods pursued by the Brotherhood, the conditions of employment on the Intercolonial Railway, and the future of railway development in Canada. The Grand Chief Engineer of the Brotherhood, Mr. Warren S. Stone, spoke with regard to the work of the Brotherhood; the First Grand Engineer, Mr. W. B. Prenter, also delivered an address.

The Canadian divisions of the Ladies' Grand International Auxiliary to the International Brotherhood of Locomotive Engineers held meetings concurrently with those of the union.

UNIONS FORMED DURING THE MONTH OF AUGUST, 1904.

Quebec—

Quebec—Bookbinders.

Three Rivers—Carpenters.

Ontario—

Fort William—Tailors.

Guelph—Plumbers, gas and steamfitters.

Hamilton—Blacksmith and helpers, boilermakers and iron shipbuilders.

Stratford—Teamsters.

Toronto—Umbrella constructors, saw-filers, wood choppers.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

A MARKED decline in the number of immigrant arrivals in Canada was reported during August, with the advance in the season, although exceptionally low steerage rates were offered by several of the Trans-Atlantic steamship companies. A few parties of considerable size, however, were landed, among them one of 350 French

immigrants intended for a colony in Manitoba.

With the close of the present season in view, prospects for the continuance of the movement during 1905, are already beginning to be discussed, it being stated that the movement from Scotland and Northern Ireland will be a feature of the opening months of the coming season.

(18) 4 Edw. VII., Chap. 4.

(19) 4 Edw. VII., Chap. 30.

British Emigration Returns.

During the month of July, the emigration to Canada from the United Kingdom totalled 1,538 foreigners, 5,668 English, 321 Irish and 1,378 Scotch. The total for the seven months of this present year is 36,273 English, 1,796 Irish, 8,992 Scotch, and 14,522 foreigners.

Notes.

The beginning of the fall influx of land seekers from the United States was recorded during August in the North-west Territories.

About four or five hundred Barnardo boys arrived in Toronto during August, and were distributed throughout the province.

It was announced that the Salvation Army would purchase 5,000 acres of land in Canada in order to develop the immigration policy of the organization.

Negotiations were in progress during the month for the bringing out to Canada of a number of Scotch orphan boys, the children being reported of a good class.

The contract for the new immigration hall to be erected at Winnipeg has been let to the Manitoba Construction Company. The building will be of brick and stone, 200 feet long by 60 wide, with four stories and a basement. The cost will be \$200,000, and work on it is to be completed by January 1, next.

A large number of Syrians arriving by the steamer Lake Simcoe, were found affected with incurable tracoma and were ordered to be deported at once by the Canadian quarantine authorities.

At the monthly meeting of the management of the Montreal Colonization Society, a total of 340 colonists was reported as having enrolled during the month, being an increase of 84 over the corresponding month last year, and the highest total yet reached by the society. The colonists were distributed as follows: north of Montreal, 233; Lake St. John district, 27; Temiskaming, 42; Northern Ontario, 14; and Manitoba, 10.

The following is a statement of the arrivals at the Ontario Government Immigration

Office at the Union Station, Toronto, for the first six months of each year from 1890 to 1904, inclusive:—

1890..	780
1900..	913
1901..	1,289
1902..	2,729
1903..	6,678
1904..	8,403

The work of the Ontario Immigration officials in placing men on farms, as might be inferred from this table, has been more successful this year than ever before, fully three thousand men having been directed to farmers needing help.

The movement of harvesters into Manitoba and the North-west Territories was on a heavy scale during August.

By Order in Council the fee for homestead entries where the homestead entry is not greater than eighty (80) acres was reduced to one-half the fee for the original homestead—this to apply to entries within the railway belt in British Columbia.

Homestead Entries during the Month of July, 1904.

The following table issued by the Department of the Interior, Canada, shows the number of homestead entries during the month of July, 1904, as compared with July, 1903.

TABLE OF HOMESTEAD ENTRIES DURING THE FISCAL YEAR ENDED JUNE 30.

Agency.	1904.	1903.
Alameda.....	168	289
Battleford.....	277	305
Brandon.....	33	49
Calgary.....	189	251
Dauphin.....	42	47
Edmonton.....	306	311
Kamloops.....	22	7
Lethbridge.....	194	185
Minnedosa.....	26	48
New Westminster.....	3	2
Prince Albert.....	229	213
Regina.....	741	811
Red Deer.....	172	168
Winnipeg.....	72	120
Yorkton.....	537	632
Total ..	3,011	3,438

It will be seen that there has been a net decrease in the number of homestead entries made during the year of 427.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of July, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS DURING JULY.

Nationalities.	Number of Entries.
Canadians from Ontario.....	428
" Quebec.....	35
" Nova Scotia.....	13
" New Brunswick.....	8
" Prince Edward Island.....	11

WORKMEN'S COMPENSATION FOR INJURIES IN GREAT BRITAIN.

ON November 16, 1903, a committee was appointed by the Secretary of State for Home Affairs of Great Britain, 'to enquire and report upon (a) What amendments in the law relating to compensation for injuries to workmen are necessary or desirable, and (b) To what classes of employments, not now included in the Workmen's Compensation Acts, those Acts can properly be extended, with or without modification.' The first volume of the report of this committee has just been published.

from which the information in the present article has been obtained.*

Laws Relating to Workmen's Compensation.

Previous to 1880, workmen could only seek to recover damages for injuries incurred when engaged in employment, by recourse to common law, no special legislation having been enacted respecting the employers' liability. It was very difficult, however, for workmen to obtain any compensation under

* Home Office.—Report of the Departmental Committee appointed to inquire into the law relating to Compensation for Injuries to Work-

men. Vol. I.—Report and Appendices. London. Eyre & Spottiswoode, 1904. Price, 2s. 2d.

the common law, as the employer was exempt from liability when the injury was caused by the negligence of a fellow employee, even when the latter was in a position of superintendence of the injured person; when the injured workman was aware of the danger to which he was exposed, and which caused the accident; and when the accident was due to contributory negligence on the part of the victim.

In 1880, an Employers' Liability Act was passed, which made the employer liable for accidents caused by defective work, plant, or machinery, or by the negligence of persons entrusted by him with superintendence. This Act, however, was not very successful as a means of obtaining compensation for injuries to workmen, owing to the difficulty of producing sufficient proof of negligence, and to the risks of litigation. Compared with the number of accidents, the number of actions brought was very small, and in a large number of these the workman failed.

In 1893, a Bill was introduced to limit the doctrine of common law that knowledge of the risks on the part of the injured workman renders the employer free from liability, and to make void all contracts restricting the application of the Act. This Bill was amended by the House of Lords and was never passed.

In 1897, a Workmen's Compensation Act was passed, which went into effect on July 1, 1898, and is still in force. By this law the employer was made liable for any injuries to a workman in the course of his employment, which disabled him from work for at least two weeks, unless the accident was due to his own serious or wilful misconduct. These provisions completely superseded the three doctrines of common law of 'common employment,' *volenti non fit injuria*, and contributory negligence. Other provisions of the Act relate to the amount of compensation to be paid by the employer. In case of death the compensation is fixed at three years' wages, or £150, whichever sum is the larger, but in no case more than £300, when the workman leaves dependents wholly dependent upon his earnings. In

case of partial dependency, the amount is such sum, not exceeding the sum payable for total dependency, as may be agreed on or determined. In case of injury causing total incapacity, a weekly payment is required, commencing after two weeks' disablement, not exceeding half the weekly earnings, within a maximum limit of £1. In the case of partial incapacity, the same limits apply, but in fixing the amount 'regard shall be had' to the difference between the wages previous to the accident and the average amount which the workman is able to earn after the accident.

Permission is also granted to the injured to take such proceedings as were open to him before the commencement of this Act, instead of claiming compensation under it.

The Workmen's Compensation Act of 1900 simply extends the provisions of the Act of 1897 to include agricultural labourers.

Proposed Amendments to the Law.

The commissioners offer a large number of recommendations for the amendment of the Act of 1897, of which the following are some of the most important:

It is recommended that the sections permitting action to be taken under the laws in force previous to the passing of the Act be repealed.

That it be enacted that nothing in the Act shall prevent a workman recovering compensation under the Act for injury by accident while actually engaged on the duties of his employment, by reason only of the fact that such accident did not occur on or in or about a particular place, factory out-workers to be excepted;

That in fixing the weekly payments in cases of partial incapacity, the arbitrator should take into consideration the amount of wages the injured workman was able to earn after he had become less incapacitated, and the weekly payments should be diminished as his earning powers increased;

That special provision be made as to the right to and amount of compensation in the case of aged, infirm and maimed persons, that upon a certificate from the

medical referee, an employer may employ such a person upon special terms as to compensation in case of accident, the Act to provide a minimum rate of compensation;

That a number not exceeding six medical referees be appointed by the Secretary of State to act in selected districts, that they be paid salaries as public officials, instead of being medical men in practice remunerated by fees, and that powers be granted to obtain a reference to a medical referee without the necessity of a previous hearing before a Judge;

That the Act be extended to (a) carriers, not including foot carriers; (b) to workers in workshops where five or more persons are employed; (c) to persons employed in the care or management of horses and locomotives, including farriers;

That with a view to the extension of the principle of the Act to persons employed as fishermen, special inquiry be made in the case of this industry.

That power be given to the Secretary of State to extend after inquiry the application of the Act to other industries or kinds of employment, subject to the approval of parliament.

RECENT INDUSTRIAL INVENTIONS.

Particulars as to the inventions of which mention is made in this article will be found in the number of the 'Canadian Patent Office Record' issued by the Department of Agriculture during the month of August.

THERE were 621 patents issued in Canada during the month of March, being 88 more than the number issued in February. There were 39 inventions relating to the agricultural industry, 10 relating to forestry, lumbering and saw-mills, 8 relating to mining and 23 to manufacturing. In railway construction, including tracks and ties, there were 7 inventions, patents of interest to building trades numbered 71, and to the metal trades, 67. In the woodworking trades there were 18 inventions, of which 10 consisted in articles of furniture and 5 were tools. There were 64 electrical inventions, 12 of which were for systems of wireless telegraphy and 10

for systems of lighting. In printing and photography there were 9 patents, in the clothing industries there were 20, of which 15 consisted of various articles of apparel, and 4 were improvements in sewing machines. In the textile industries there were 9 new inventions. In food and tobacco preparation there were 14, and in the leather industry there were 4. There were 23 patents relating to railways, and 18 relating to other forms of transportation. Among the miscellaneous inventions there were 16 business utilities, 13 relating to systems of lighting other than electric, 5 systems of heating, 5 weapons, 4 explosives, 4 relating to fire protection, and 7 miscellaneous processes.

Among the *agricultural* inventions there were 22 relating to machines and implements, 5 to the dairying industry, and 3 to the fruit industry. The agricultural machines included 2 harrows, 3 harvesters, including a fruit harvester, and a combination seeder, cultivator and harrow. A process for the manufacture of butter is patented, which consists in subjecting sweet cream to the action of alum, pepsin, sugar of milk and saltpetre. The cream is then churned, and after the buttermilk is removed, the alum and other ingredients are washed out and the butter is salted and worked.

Patents relating to *lumbering* and cognate industries include two feed mechanisms for saw mills, a rotary saw mill, and a wood preservative compound consisting of cottonseed oil, which is mixed with bitumen and then saponified with a solution of caustic soda, and the mixture is impregnated with oxygen at a high temperature.

The eight inventions relating to the mining industry including two tools, a process for the reduction of ore, two ore roasters, a gold separator, an iron ore separator, and a process of extracting zinc and lead from an ore containing blende and galena. The tools are a coal mining auger and rock drill. The patents relating to various *manufacturing* industries included nine machines, two appliances, four new articles of manufacture, and eight processes.

Among the machines there were three for casting type, two pipe threading machines, and two for the manufacture of brick. In view of the greatly increased use of rubber during the last few years the production of a substitute for it is of importance. A process of manufacturing artificial caoutchouc, or rubber, which was patented in March, consists of mixing tar with boracic, hydriodic or phosphoric acid, fermenting it by a ferment derived from virgin caoutchouc, and subjecting it to oxygen at a temperature of 60 degrees centigrade.

The patents relating to *railway construction* included a machine, two ties, a track, a switch, a rail joint and a rail block. The machine is an apparatus for distributing rails and ties, and is composed of a construction car, a turn table mounted on wheels having radially disposed rollers, upon which the ties from the car are received, and a wagon containing endless carriers capable of being turned in either direction and fitted with means for removing the ties from the turn table and distributing them along the road bed.

The patents of interest to the *building trades* included 15 articles of manufacture, 16 tools, 9 inventions relating to carpentry, 7 to plumbing, 11 locks, 11 connected with fence construction, one with bridge construction and one machine. The articles of manufacture embraced 3 door closing devices, an emergency door, a retaining material for plaster, 2 weather strips, and a window and frame. Among the tools there were 2 bench vises, a screw jack, a square, a combination square and level, and a combination tool comprising pliers, a wire cutter, a burner tip grip, a cutter wheel, a glass tube, a hook and a screw driver.

The patents relating to the *metal trades*, of which there were 67, included 16 engines, 3 boilers and a boiler cleaner, 16 machines and parts of machines, as well as 4 valves, a bolt, a clamp and pipe coupling. There were also 5 patents relating to blacksmithing, 3 to the manufacture of steel and 7 metallurgical processes. A process of extracting zinc and lead from a complex ore containing blende and galena consists in

adding the necessary copper and fluxes, heating it to the vaporizing temperature of zinc, condensing the zinc, drawing off the lead, and recovering the copper from the sulphide.

Electrical patents were both numerous and important, there having been issued 64 in all. These include 12 relating to wireless telegraphy, 5 to telegraphy by wire, 10 systems of lighting, 7 new applications of electrolysis, and numerous other inventions concerning heating, telephony, signalling, steering, &c. Electrolytic processes were patented for the production of alkali metals and calcium carbide. Among the forms of electric lighting is a miner's lamp.

The inventions relating to the *clothing* industries consist of 15 articles of apparel, 4 sewing machines and a clothing drier. Those relating to the *textile* industries include 3 looms, and machines for spinning carding and velvet cutting. In the trades of *food and tobacco preparation* there were 14 patents, which include a bread-making machine, 2 candy-making machines, a cigar-making machine, a cigarette filler, and a meat slicing machine. In the *leather trades* there were 4 patents, of which one was for an apparatus for testing leather, and 3 for various kinds and portions of harness.

There were 23 patents relating to *railways*. Among these there were 7 brakes, 5 couplers, 2 sanders, a car, a buffer, a cattle guard, a railway gate, signalling apparatus, for electric railway and 2 trolley retrievers. There were 18 patents relating to other means of transportation, among which were shaft bearings, brakes, tires, trucks, an automobile, a dump wagon, and apparatus for extricating stranded vessels.

Among the *miscellaneous* inventions there were 16 business utilities, 13 systems of lighting not previously enumerated, 5 systems of heating, 7 industrial processes, 4 explosives, 5 military weapons, and 4 systems of fire protection. There is a process of making coke, which consists of mixing coal with the top dust of blast furnaces, or other ferriferous refuse, grinding the mixture, compressing it into cakes and coking the cake.

CANADIAN TRADE AND REVENUE
DURING THE MONTH OF
AUGUST, 1904.

The record of Canadian foreign trade during the fiscal year ended June 30 last, was an important return presented during August. Trade during the year, it will be seen, showed a falling off in exports, but a very material gain in imports, so that the level reached was higher by over \$5,000,000 than that of 1902-03. For the month of July, however, a falling off in both imports and exports was recorded as compared with last year; domestic trade as well was characterized by midsummer stagnation. Under the heading of imperial trade, favourable prospects are held out in the latest official reports. Fuller particulars as to these and other developments of the month are given under the following headings, relating respectively to Foreign Trade, Imperial Trade, Domestic Trade, and Canadian Revenue and Expenditure.

Foreign Trade Returns.

Tables are presented herewith, by courtesy of the Department of Customs, Canada,

of the imports and exports of the Dominion during the month of July, and for the fiscal year ended June 30, 1904. It will be seen that the year shows an increase of over \$17,000,000 in imports, with a decline of something over \$12,000,000 in exports, making a total gain for the twelve months over \$5,000,000. Under the heading of imports an increase is shown in both dutiable and free goods. Under exports the chief losses were sustained under the headings of agriculture (the heavy decline in wheat shipments being chiefly responsible for this), animals and their products, and forest products. Manufactures and fisheries showed only a slight decline, while mineral products showed an increase. From the standpoint of the countries affected, diminished sales to Great Britain more than account for the decrease in exports. Aggregate trade with Great Britain showed a decrease of about 5½ per cent. Aggregate trade with the United State, on the other hand, showed an increase of nearly seven per cent. The influence of the surtax considerably reduced imports from Germany.

For the month of July there has been a decline in both imports and exports, amounting to about \$1,400,000 in the former and \$4,300,000 in the latter.

Regulations giving effect to the 'anti-dumping' clauses recently sanctioned by the Dominion parliament were promulgated during August, by which a special duty is levied on goods sold into Canada at a price below the fair market value of the goods as sold for home consumption in the country of export. The new regulations require invoices to be made in duplicate, with a new and more comprehensive form of certification. The form of oath to be taken by importers is also changed. The regulations are to take effect on October 1, next.

The first report from a Canadian commercial agent resident in Japan was received and published by the Department of Trade and Commerce, Canada, during August. Market conditions with regard to Canadian flour and butter are particularly described, and are reported as on the whole favourable.

Imperial Trade.

During July imports into Great Britain from Canada, according to a return of the British Board of Trade, were as follows:—

	Amount.	Value.
Cattle..... head	14,391	£255,815
Sheep..... "	5,274	8,676
Wheat..... cwts.	814,000	292,379
Wheat meal..... "	235,830	110,893
Pease..... "	12,590	3,774
Bacon..... "	119,274	260,913

Butter..... "	36,728	157,695
Cheese..... "	272,951	571,525
Horses..... "	31	1,125

The Twenty-seventh Weekly Report of the Department of Trade and Commerce, issued on August 1, was devoted to 19 special reports of Canadian commercial agents stationed in Australasia, Great Britain and the West Indies, on the subject 'how to increase and maintain Canadian trade.' The reports dealt at length with the character of the different markets, the class of goods chiefly available for export, and the method of merchandising the same. On the whole, the prospects for increasing Canadian trade are regarded as favourable, and many practical suggestions to manufacturers and shippers are held out.

The annual report of the Canadian High Commissioner in London is a special feature of the Weekly Departmental Report of August 8, a resume being given of Canadian trade with Great Britain in various commodities, with a reference to methods of shipment, trade openings, &c. The report of the Curator of the Canadian section of the Imperial Institute, was also published during the month. Other reports of the month related to the Australian market for carbide, and the English market for fruit, the latter being stated to offer excellent prospects at the present time, especially in the neighbourhood of Leeds. In South Africa depression is reported as continuing, but the prospects for Canadian trade in wheat, flour, canned goods, butter, cheese, furniture, hardware, commodities used in municipal improvement works, &c., are stated to be promising.

Domestic Trade

Wholesale and retail domestic trade was largely of a midsummer character, and holiday quietness prevailed in some lines and localities. Uncertainty with regard to the crops was a prevailing influence, and it was generally conceded that with a fair yield in the west, business during the coming autumn would be active. The comparative lateness of the harvest tended to prolong this period of relaxation, and in the dry goods lines purchases were held back for the fall millinery and dress goods openings, which were held during the closing week of the month. On the whole, the general tone was hopeful at the end of the month, though collections were still somewhat backward. Canadian securities showed buoyancy, and business at the banks was of a satisfactory character.

The extension of branches throughout the Dominion has been a striking feature

of Canadian banking during recent years. According to the 'Monetary Times' there were 1,059 branches of 35 banks in Canada on July 1, 1904. The following table shows the increase by provinces at four points within seven years.

	1st July, 1904.	1st Jan., 1903.	1st Jan., 1902.	1st Jan., 1898.
Province of Ontario.....	498	420	349	306
" Quebec.....	174	147	137	117
" New Brunswick...	48	41	35	30
" Nova Scotia.....	105	102	89	69
" P. E. Island	11	11	6	6
" British Columbia..	51	47	46	47
Northwest Territories.....	80	54	30	18
Yukon District	3	3	3	3
Total.....	1,059	904	747	641

The growth has been relatively greatest in the prairie country.

Canadian Revenue and Expenditure.

The latest official statement of the Department of Finance, Canada, places the total revenue of the Dominion during July at \$4,761,291.25 as against \$5,146,303.42 in July last year. Current expenditure amounted to \$2,779,007.63, as against \$2,654,576.96 last year. Expenditure on capital account showed an increase of about \$50,000, the two items for the month being as follows: Public works, railways and canals, \$54,863.93; railway subsidies, \$93,300.

ENFORCEMENT OF FAIR WAGES RESOLUTION BY THE POST OFFICE DEPARTMENT, AUGUST, 1904.

During the month of August the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the re-

gulations for the suppression of the sweating system, and securing employment to the workmen and women of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.
	\$ cts.
Making and repairing metal dating and other hand stamps and type and brass crown seals.....	476 50
Making and repairing rubber dating and other hand stamps and type.....	13 45
Supplying stamping material, inclusive of making and repairing pads, also post marking and cancelling ink....	226 24
Making and repairing post office scales..	274 00
Repairing mail bags.	1,339 23
Repairing mail locks and supplying mail bag fittings.....	340 80
Supplying street letter boxes and railway mail clerks' tin boxes and repairing railway mail clerks' boxes and portable tin letter boxes.....	195 18
Miscellaneous orders for making and repairing postal stores.....	5 40
Making up and supplying articles of official uniform.....	206 75

INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST, 1904.

Account under this heading is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with the statement of returns of accidents reported to them.

THE Department of Labour received notice of industrial accidents to 239 individual workmen, which took place during August, involving a loss of 85 lives and serious injuries to 154 other persons. Compared with the returns for July, there was a decrease of 9 in the total number of accidents, but an increase of 10 in the number of deaths.

The following is the record of the month by industries and groups of trades:—

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	18	13	31
Lumbering.....	5	23	28
Mining.....	13	5	18
Building trades.....	8	12	20
Metal trades.....	6	30	36
Woodworking.....		6	6
Printing.....		1	1
Textile trades.....		2	2
Clothing trades.....		1	1
Food and tobacco preparation.....		2	2
Leather trades.....		1	1
Railway service.....	14	22	37
General transport.....	14	19	33
Unskilled labour.....	5	10	15
Miscellaneous.....	2	7	9
Total.....	85	154	239

In addition to the above, there were also reported to the department, 18 accidents involving the loss of 3 lives, which took place in previous months, information of which had not been received before.

Nature of Fatalities and Accidents.

There were two accidents during the month which involved a great loss of life, one of which occurred at the Shakespeare Gold Mine at Webbwood, Ont., on August 2, and the other, which was due to a railway collision, took place near Richmond, Que., on August 31. A brief description of these accidents is as follows:—

Accident at Shakespeare Mine, Algoma.

On August 2, a disaster occurred at the Shakespeare gold mine, about twelve miles north of Webbwood, Algoma District, Ont., in which four miners, the engineer in charge and the manager of the mine were suffocated by fumes arising from a blast. It appears that the ventilation of the lower workings of this mine was poor, and it was customary to blow air into them after each blast to remove the poisonous gases. From an investigation which was made by the Ontario Bureau of Mines, and from the facts stated at the inquest, it was shown that this precaution had been neglected. Four miners went down to the lower workings of the mine at about 7 o'clock a.m., and on feeling the effects of the fumes, they called for help. The engineer then

went down to their assistance, instead of turning on the air, and he was himself overcome. The manager of the mine was then notified of the accident by a surface man, the only remaining employee there, and with the help of the former superintendent, he turned on the air. After fifteen minutes, the manager entered the mine and was also suffocated. The bodies of two of the men were found at a distance from the shaft, where they had carried the air pump, and the others were lying at the bottom of the shaft, having probably been overcome when they were descending the ladder.

Wreck on the Grand Trunk Railway near Richmond, Que.

On the morning of August 31 a head-on collision occurred on the Grand Trunk Railway line near Richmond, Que., between a Sherbrooke fair special from Montreal, and the Island Pond express, in which nine persons were killed and about 25 were injured. It was shown at the inquest that the accident was due to a mistake of the conductor of the special train, who failed to wait at Richmond for the Island Pond express, according to instructions. It was supposed that he had mistaken another train for this one. Among the killed were a route agent of the Canadian Express Company, and a commercial traveller, and among the injured were a road foreman, a mail clerk, and an express messenger. The engineers and firemen escaped by jumping from the engines. The trains were going at full speed at the time of the collision. The two engines were completely wrecked, and the baggage car of the special was telescoped into the first passenger coach, in which most of the dead and injured were found.

The Record by Trades and Industries.

Agriculture.—In the agricultural industries there were 31 industrial accidents, resulting in the death of 18 persons and the injury of 13 others. Of the fatal accidents, four men were kicked to death by horses, four were struck by engines,

three fell from carts, and one man was run over by a cart when stopping a horse, two were struck by lightning, one man was thrown from his horse, one was killed by a threshing machine, one was run over by a binder, and one man was struck by a falling wall when pulling down a partition.

Lumbering.—There were 5 deaths and 23 injuries in accidents in occupations of lumbering and saw-mills. This is a decrease of 7 in the number of fatal accidents, and an increase of 12 in the number of other injuries, compared with July. The following were the fatalities :—A river driver was drowned at Buckingham, Que., through a dam giving way, two men were killed by a boiler explosion, one was struck by a board in a saw-mill, and another saw-mill hand had his skull fractured by fragments of an emery wheel which had burst. Most of the other accidents consisted in the loss of one or more fingers by coming into contact with saws or machinery. In two cases an arm was lost, two arms were crushed, a hand was lost and another crushed.

Mining.—In the mining industries there were 13 fatalities, and 5 other accidents, in one of which the victim was not expected to recover. Compared with July, this was an increase of 9 in the number of deaths, which is largely accounted for by the disaster at the Shakespeare mine, in which 6 lives were lost by suffocation. Of the other fatal accidents, three were caused by falling rock or coal, one by machinery, one by a fall from a coal box when driving it, one by a fall from the cage, and one by a drill which fell and crushed a quarryman's head.

Building trades.—In the building trades there were 20 industrial accidents involving the loss of 8 lives, an increase of 7 in the number of deaths, and a decrease of 11 in the number of other accidents. Three men were killed by electric shocks, two by falling from buildings, one was crushed by a falling wall, one by some concrete which fell on him, and one man was struck by a derrick boom, which crushed his head.

Metal trades.—In the metal trades there were 6 deaths and 30 accidents not fatal, an increase of two in the number of deaths, and a decrease of two in the number of other casualties. Those who were killed were one ironworker, who was caught by an engine; two machinists, one crushed by a fly-wheel when placing an engine, and the other killed by a revolving fly-wheel; two engineers, one of whom was crushed by an engine, and the other was caught in a fly-wheel; and an electrical lineman who fell from a pole when stretching a wire.

Woodworking trades.—There were 6 accidents in the woodworking trades, none of which proved fatal, being an increase of one over the previous month. Three of the accidents happened to box factory hands, who suffered the loss of fingers. A factory hand received a bad cut on the jaw from a fragment of a circular saw which flew to pieces. Two carpenters were injured, of whom one lost a finger when operating a planer, and another had his leg fractured by being caught in a moving belt.

Printing trades.—The only accident in the printing trades occurred to an employee in a wall paper factory, whose hand was crushed by the lever of a printing machine.

Textile trades.—In the textile trades there were only two accidents, in one case a finger was lost by the hand being caught in machinery, and a cotton mill hand had his hand pierced by a spindle.

Clothing trades.—In the clothing trades, the only accident happened to a shoemaker, whose hand was caught in a machine which cut off three fingers.

Food and tobacco preparation.—There were two accidents in industries connected with the preparation of food. A miller had his foot crushed by being caught in a machine at a flour mill, and a baker had his hand crushed in the cylinder of a dough-mixer, so badly that it had to be amputated.

Leather trades.—In the leather trades the only accident occurred to a cleaner in a tannery, whose flesh was torn off two

fingers by a machine for scraping hair off hides.

The railway service.—There were 14 persons killed and 22 severely injured during August among railway employees. Compared with July there were 12 fewer fatalities and one more accident not fatal.

Those who were killed included a civil engineer, a bridge inspector, two firemen, two brakemen, a signalman, a railway machinist, a sectionman, three railway labourers, a car repairer, and a railway employee, whose particular occupation was not reported to the department. Eight persons were killed by being struck by engines, two men were run over, one was struck and crushed by a car, one lost his life in a collision, one by the derailing of a car, and one by a premature explosion.

General transport.—Among persons engaged in trades relating to general transport there were 14 deaths and 19 other accidents, an increase of 4 in the number of deaths and of 3 in the number of other accidents compared with July. Two sailors perished through falling, one from a derrick and the other through the hatchway of a barge, a nightwatchman on a boat was drowned. Two longshoremen were killed, one was run over by an engine, and the other was struck by a gang plank when loading a boat. A route agent of an express company was killed in a railway collision. Two men were thrown from horses, two were thrown from wagons, one man fell off a truck, one wagon driver was crushed by ice which fell out of the cart, and one was killed by stone which was being blasted.

Miscellaneous trades. There were 2 deaths and 7 other accidents among the miscellaneous trades. The deaths were those of a commercial traveller, who was killed in a railway wreck, and a night constable who was killed by an electric shock when on duty. The other accidents happened to a charwoman, a store clerk, three civic firemen, a glassmaker and a potter.

Unskilled labour.—There were 5 deaths and 10 other accidents among unskilled

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F, No. 10

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Agriculture—</i>						
Farmer	Near London, Ont.	Aug. 3.	1	1	Skull crushed in	Kicked by a horse.
"	Holmfild, Man.	" 3.		1	Seriously injured, recovery doubtful.	Fell from a windmill.
"	Galt, Ont.	" 5.	1	1	Paralysed, died 3 days later.	Fell from a load of grain.
"	St. Mary's, Ont.	" 10.		1	Severely bruised on head and body.	Was upset out of a buggy.
"	Salen, Ont.	" 5.	1	1	Injured internally, died the next day.	Struck by a falling partition when taking down an old building.
"	Windsor Mills, Que.	" 9.	1	1	Three ribs dislocated.	Fell off a load of hay.
"	North Fashope, Ont.	" 4.	1	1	Arm broken and head severely hurt.	Fell when working in a barn.
"	Near Port Robinson, Ont.	" 15.	1	1		Struck by an engine when driving across a track.
"	Quxon, Que.	" 15.	1	1		Was trampled on by colts, died next day.
"	Tochuorden, Ont.	" 16.		1	Badly cut on forehead.	Kicked by a horse.
"	South Monaghan, Ont.	" 6.	1	1		Horses ran away and he was thrown from wagon.
"	Otonabee, Ont.	" 10.	1	1		Thrown from a horse.
"	Niagara Falls, Ont.	" 13.	1	1		Struck by a train when driving across tracks.
"	Westboro', Ont.	" 19.		1	Two ribs broken and side pierced.	Horses started and he was thrown on a binder by a kicker.
"	Hastings, Ont.	" 26.		1	Thigh broken.	Horses ran away and he was thrown from wagon.
"	Near Pembroke, Ont.	" 27.	1	1		Struck by lightning.
"	Sherbrooke, Que.	" 2.	1	1	Skull fractured.	Kicked by a horse.
"	Stanstead, Que.	" 8.	1	1	Body severely bruised.	Attacked by a cow.
"	Wellandport, Ont.	" 20.	1	1		Kicked by a horse.
"	Caledon, Ont.	" 8.	1	1	Ribs parted from back bone.	Fell when raising a barn.
Farm foreman	Toronto, Ont.	" 29.	1	1	Head crushed.	Fell from a car and was struck by an engine.
Farmer's son.	Belleville, Ont.	" 5.	1	1	Shoulder smashed and injured internally.	Fell from a wagon which went over him.
"	Near Humber, Ont.	" 16.	1	1		Struck by lightning.
"	Rose Hill, Man.	" 23.	1	1		Horses ran away and binder passed over him.
Farm hand	Welland, Ont.	" 3.		1	Ribs and shoulders broken.	Run over by a mower.
"	Near Montreal, Que.	" 9.	1	1	Leg badly lacerated.	Caught in a mowing machine.
"	Near Kettleby, Ont.	" 10.	1	1		Fell into the cylinder of a threshing machine.
"	Fond's Mills, P.E.I.	" 17.	1	1	Ribs dislocated, died almost immediately.	When stopping a horse he fell and cart passed over him.
"	Yonville, Que.	" 10.		1	Leg injured.	Run over by a mowing machine.
Driver.	Toronto, Ont.	" 28.	1	1		Fell from a railway car and was struck by an engine.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Lumbering</i>						
River driver.	Buckingham, Que.	Aug. 15.	1	1	Drowned.	Dam gave way and he was carried over falls.
Saw-mill hand.	St. John, N.B.	" 18.	1	1	Lost three fingers.	Caught in a circular saw.
"	Method's Mills, Que.	" 22.	1	1	Half of thumb cut off.	Struck by a board thrown from double edger's saws.
"	Deseronto, Ont.	" 24.	1	1	Part of two fingers cut off.	When taking out spaulst hand followed too far.
"	"	" 26.	1	1	End of second finger cut off.	Cut by a saw on single machine.
"	"	" 25.	1	1	Right hand crushed.	Cut on a chain.
"	Montreal, Que.	" 2.	1	1	Head dangerously cut.	Caught in a planer.
"	Langton, Ont.	" 11.	2	1	Lost three fingers.	Two killed and one badly injured by a boiler explosion.
"	Sorel, Que.	" 18.	1	1	Lost two fingers and palm of hand cut.	Came in contact with a saw.
"	Hawkesville, Ont.	" 17.	1	1	Arm crushed.	"
"	Hull, Que.	" 19.	1	1	Leg dangerously cut.	"
"	Penetanguishene, Ont.	" 12.	1	1	Lost four fingers.	When oiling a machine arm was drawn in by knives.
"	Hull, Que.	" 18.	1	1	Lost an arm.	Cut by a saw.
"	Kredington Falls, Que.	" 4.	1	1	Lost an arm.	"
"	Arthursville, Que.	" 22.	1	1	Lost four fingers.	Fell under a revolving saw.
"	Sault Ste. Marie, Ont.	" 22.	1	1	Skull fractured.	Cut by the knives of a machine.
"	Beloeil, Que.	" 5.	1	1	Right arm broken.	Left hand was crushed in a planer.
"	Hintonburg, Ont.	" 27.	1	1	Skull fractured.	Fell through a trap door.
"	Summerside, P.E.I.	" 25.	1	1	Left arm mangled.	Struck by fragments of an emery wheel which had burst.
"	New Westminster, B.C.	" 17.	1	1	Lost three fingers.	Caught in the cogs of a machine.
"	Chatham, Ont.	" 27.	1	1	Lost three fingers.	Cut by a buzz saw.
"	Niagara Falls, Ont.	" 11.	1	1	Lost a thumb.	Caught in a machine.
Planting mill hand.	Montmorency, Que.	" 6.	1	1	Lost left thumb.	Caught in a planing machine.
"	Guelph, Ont.	" 20.	1	1	Lost two fingers.	Caught in a turning machine.
"	Harrison River, B.C.	" 18.	1	1	Injured internally, recovery doubtful.	Cut by a saw.
<i>Mining</i>						
Mine foreman.	Thetford Mines, Que.	" 22.	1	1	Crushed between cars and a wall.	
Mine manager.	Shakespeare Mines, Ont.	" 2.	1	1	Suffocated by gas in mine.	
Mine Engineer.	"	" 2.	1	1	"	"
Miners.	"	" 2.	4	1	Skull crushed.	Struck by a falling stone.
Miner (coal).	North Sydney, N.S.	" 4.	1	1	"	When driving a line of coal boxes he fell off between pit-box and street, and was instantly killed.
"	Springhill, N.S.	" 6.	1	1	"	"

Miner (coal)	Ladysmith, B.C.	" 18	1	1	Back injured	Crushed by a fall of coal.
"	"	" 18	1	1	Back injured	Buried by a slide of rock.
"	Stellarton, N.S.	" 9	1	1	Back injured	Caught in machinery.
"	Michel, B.C.	" 29	1	1	Badly crushed	Caught between two cars.
Miner (gold)	North Sydney, N.S.	" 17	1	1	Crushed to death	Fell off the cage and was crushed against the side of the shaft.
Miner (coal)	Roseland, B.C.	" 29	1	1	Badly injured on body	Struck by a fall of coal.
"	North Sydney, N.S.	" 29	1	1	Shoulder dislocated	Fell off bank head.
Quarryman	Sherkston, Ont.	" 2	1	1	Head crushed	Struck by a falling drill.
Building Trades— Stonemason	Vancouver, B.C.	" 6	1	1		Killed by an electric shock, when working in an electric power building.
Masons' helper	"	" 6	1	1		Killed by an electric shock, when working in an electric power building.
Carpenter	Grand Valley, Ont.	" 16	1	1	Leg broken	Struck by a falling plank.
"	Point St. Charles, Que.	" 23	1	1	Cut cords of right foot	Fell from a roof.
"	Hespeler, Ont.	" 17	1	1	Seriously wounded in stomach	When working with an adze.
"	Island of Orleans, Que.	" 22	1	1	Both thighs broken	Struck by some timber when moving it.
Painter	Winnipeg, Man.	" 23	1	1	Hand crushed	Fell from an unfinished building.
"	St. Thomas, Ont.	" 1	1	1	Hip crushed	When working under a car, an engine bumped into it.
"	Hamilton, Ont.	" 18	1	1	Leg badly injured	"
Rofer	Quebec, Que.	" 12	1	1	Leg broken	Killed by an electric shock, when working in a building.
Derrickman	Montreal, Que.	" 23	1	1	Head and shoulders hurt	Fell from a scaffold.
Builders' labourer	Niagara Falls, Ont.	" 7	1	1	Head badly wounded	Fell from a roof.
"	Montreal, Que.	" 2	1	1	Collar-bone broken	Fell from a boom.
"	Winnipeg, Man.	" 1	1	1	Head crushed, died instantly	Struck by falling bricks when pulling down a wall.
"	Montreal, Que.	" 19	1	1	Head crushed, died instantly	Crushed by a falling wall.
"	Fortie, B.C.	" 24	1	1	Body crushed and bruised	Fell from a height of over twelve feet.
"	Sherbrooke, Que.	" 3	1	1	Spinal column fractured	Crushed by a piece of falling concrete.
"	Quebec, Que.	" 19	1	1	Face badly burnt	Struck by a derrick boom.
Metal Trades— Moulder	Montreal, Que.	" 9	1	1	Face badly burnt	Struck by a derrick.
"	Sydney, N.S.	" 15	1	1	Seriously injured internally	Fell 15 feet.
Iron worker	Galt, Ont.	" 8	1	1	Lost four fingers	Hurt by an explosion of molten iron.
"	Belleville, Ont.	" 24	1	1	Leg badly cut	Struck by a piece of iron.
"	Montreal, Que.	" 6	1	1	Foot crushed	Caught in the wheel of an engine.
"	"	" 2	1	1	Lost two fingers	Hand was crushed by a press.
"	Wingham, Ont.	" 5	1	1	Lungs pierced by bolts and body crushed by fly-wheel	When cutting iron with shears a piece struck his leg.
"	Montreal, Que.	" 20	1	1	Back seriously injured	Struck by a piece of iron.
"	Prince Albert, Sask.	" 10	1	1	Fingers crushed	When placing an engine, stays supporting the fly-wheel slipped.
"	St. Thomas, Ont.	" 20	1	1	Arm badly crushed	Struck by an iron beam which fell with him.
"	"	" 23	1	1	Finger crushed	Killed by a revolving fly-wheel.
"	Hamilton, Ont.	" 27	1	1	Right foot badly bruised	Caught between two large wheels when moving them.
						Struck by a piece of iron.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Metal Trades—Con.</i>						
Machineists.	Peterborough, Ont.	Aug. 6.	1	1	Two fingers cut off at first joint.	When operating power shears.
"	Longue Pointe, Que.	" 16.	1	1	Foot badly crushed.	When carrying a piece of iron, it slipped and fell on his foot.
Stationary engineer.	Wingham, Ont.	" 4.	1	1	Crushed to death.	Stays slipped when he was metalling an engine and he was crushed by it.
"	Sydney, N.S.	" 8.	1	1	Head crushed and left arm torn off.	Caught in a fly-wheel.
Steamfitter.	Toronto, Ont.	" 8.	1	1	Hands, face and neck badly scalded.	A boiler pipe burst and he was injured by the steam.
Electrical worker.	Niagara Falls, Ont.	" 11.	1	1	Hands burned.	When working on lines.
Electrical lineman.	Near Kemptville, Ont.	" 1.	1	1	Paralyzed and injured internally. Died on Aug. 27.	Fell from a pole, when stretching wire, which broke.
"	Hochelega, Que.	" 14.	1	1	Hands burned.	When working on a pole.
Blacksmith.	Toronto, Ont.	" 22.	1	1	Leg broken.	Horse fell on him when being shod.
Structural iron worker.	Winnipeg, Man.	" 19.	1	1	Foot crushed; amputated.	Struck by a piece of steel girder.
Truckman in steel rolling mills.	St. Henri, Que.	" 9.	2	2	Badly burnt.	By an explosion of hot slag.
Boilermaker.	London, Ont.	" 18.	1	1	Finger badly cut.	A steel plate fell on the finger.
Boilermaker's helper.	Vancouver, B.C.	" 11.	1	1	Wrist badly cut.	When punching holes in a sheet of iron it flew up and cut him.
Caulker.	St. John, N.B.	" 23.	1	1	Face, hands and legs badly burnt.	Tar pot boiled over and caused a fire.
Sheet metal worker.	Toronto, Ont.	" 2.	1	1	Hand crushed.	Caught in a press.
"	Hamilton, Ont.	" 3.	1	1	Lost a finger.	Cut off when adjusting a press.
"	London, Ont.	" 16.	1	1	"	Cause of accident not known.
"	Toronto, Ont.	" 23.	1	1	Fingers crushed.	Crushed in a press.
"	"	" 25.	1	1	Lost two fingers.	"
"	"	" 8.	1	1	Lost part of a finger.	Cut by trimming shears.
"	Marlbank, Ont.	" 5.	1	1	Sprained ankle.	Stepped on brick and fell.
Cement worker.	Toronto, Ont.	" 8.	1	1	Lost one finger; two others gashed.	Cut by a trimmer machine.
<i>Woodworking Trades</i>						
Box factory hand.	"	" 16.	1	1	Third finger cut off.	When working on a machine.
"	"	" 16.	1	1	Lost part of finger.	Cut by a rip saw.
Factory hand.	Brantford, Ont.	" 30.	1	1	Lower jaw badly cut.	Struck by a fragment of a circular saw which flew to pieces.
"	Sherbrooke, Que.	" 2.	1	1	Lost a finger.	Caught in a planer.
"	Sydney, N.S.	" 12.	1	1	Leg fractured.	Caught in a moving belt.
<i>Printing Trades</i>						
Wall paper maker.	Toronto, Ont.	" 23.	1	1	Hand crushed.	Crushed by the lever of a printing machine.

Charwoman	Guelph, Ont.	"	4	1	Badly bruised; ear nearly severed.	Fell in front of a barrel which rolled over him.
Commercial traveller	Near Richmond, Que.	"	31	1	"	Killed in a railway wreck.
Night constable	St. Mary's, Ont.	"	21	1	Both legs broken and badly bruised and cut.	Killed by an electric shock when on duty.
Fireman (civil)	Victoria, B. C.	"	9	1	Kneecap put out of joint, and badly bruised and cut.	Was thrown from seat and dragged by horses which had halted.
"	"	"	9	1	"	Fell from the roof of a house.
"	Sydney, N.S.	"	16	1	Right hand severely burnt.	When operating a chemical engine.
Glassmaker	Montreal, Que.	"	16	1	Head cut.	When cutting glass with a machine, a piece flew off and entered his head.
Potter	Pipetown, N.S.	"	7	1	Badly crushed.	Caught by a revolving wheel of an engine.
Labourer	Quebec, Que.	"	3	1	"	Caught in a derrick.
Labourer (civil)	Buckingham, Que.	"	19	1	Arm and leg broken and body dangerously bruised.	Trampled on by a vicious stallion when at work.
"	Montreal, Que.	"	12	1	Two ribs broken and injured internally.	Run over when repairing a road.
Contractor's helper	Salmon, Ont.	"	4	1	"	Crushed by a falling wall when helping to pull down a building.
"	"	"	4	1	Bone in ankle broken.	Struck by a falling wall when helping to pull down a building.
Handy man	New London, P. E. I.	"	17	1	"	Run over by a loaded cart.
"	Montreal, Que.	"	11	1	"	Fell when cleaning a third story window.
Labourer	Niagara Falls, Ont.	"	16	1	Had a bad scalp wound.	Injured in a premature explosion of dynamite.
"	"	"	15	2	Badly lacerated.	By an explosion of dynamite.
"	"	"	17	1	Face torn.	Struck by a derrick hook.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF AUGUST *Concluded.*

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Miscellaneous Trades—Con.</i>						
Labourer	Niagara Falls, Ont.	Aug. 21.	1	1	Thigh broken.	Struck by falling rock.
"	Montreal, Que.	" 31.			Neck broken.	Struck by a stone when blasting.
ACCIDENTS HAPPENING IN PREVIOUS MONTHS, BUT ONLY REPORTED TO THE DEPARTMENT IN AUGUST.						
Derrickman.	Point Am., Ont.	July 11.		1	Ankle broken and spine dislocated.	Fell 24 feet from scaffold.
Saw-mill hand.	Gull River, Ont.	June 29.	1		Lost a toe and cut foot.	Fell on circular saw; killed instantly.
"	Arnprior, Ont.	July 6.		1	Two fingers cut off at first joint.	Cut by slash saws.
Sheet metal worker.	Toronto, Ont.	" 22.		1	Both hands crushed.	When cutting shovels.
Lime kiln employee.	Shackleton, Ont.	" 30.		1	Hand crushed and thumb taken off.	Caught under a dump car.
Machinist	Belleville, Ont.	" 21.		1	Right hand badly crushed.	Caught in iron cutting shears.
"	Hamilton, Ont.	" 25.		1	Hand severely crushed.	Caught in a multiple press.
"	Belleville, Ont.	June 27.		1	Bones of foot broken.	Caught in machinery.
"	Galt, Ont.	" 11.		1	Finger crushed.	A heavy door fell on the finger.
"	Hamilton, Ont.	" 13.		1	Left arm scalded.	Fell when carrying hot lime water.
"	Toronto, Ont.	" 26.		1	Injured internally.	Fell 20 feet when climbing from staging to boat.
"	"	" 23.		1	Finger badly ground.	Came in contact with emery wheel.
"	Hamilton, Ont.	" 21.		1	Three fingers badly lacerated.	When operating a Yankee whittler.
Furniture factory hand.	Walkerville, Ont.	" 23.		1	Lost four fingers.	Fell on a saw.
Cooper.	Malone, Ont.	" 8.		1	Severely shocked.	Fell when working on dredge; died Aug. 22.
Dredgeman.	Montreal, Que.	July 23.	1			Struck by lightning.
Scow hand.	Humberstone, Ont.	" 28.		1		Fell from a platform.
Trick bicyclist.	Crystal Beach, Ont.	" 27.		1		

labourers in August. One man was killed by the breaking of a pulley when he was working on a pile driver. A boy who was helping a contractor to pull down a building was crushed by a falling wall. A handy man was run over by a cart when

attempting to stop a horse, and another fell from a third story window when cleaning it. The remaining death was that of a labourer who was struck by a stone when assisting at blasting operations.

TRADE DISPUTES DURING THE MONTH OF AUGUST.

THE only localities which were at all seriously affected by trades disputes during the month of August in Canada were Toronto and Hamilton, Ont., in both of which places there were disturbances in the building trades which greatly impeded the erection of new buildings. The effects of the disputes in Toronto were particularly serious owing to the fact that the disastrous fire which took place last May has greatly increased the amount of building to be done. Apart from the disputes in these places, there were only two other disturbances of importance reported to the department during the month. International labour organization were concerned in four new disputes of the month; in the remaining two the work-people involved belonged to no organization.

Analysis of Trade Disputes during the Month.

Number and magnitude.—There were 14 trades disputes in existence during the month, of which 8 began before August 1, and 6 after. This is a decrease of 6 compared with the previous month, and a decrease of 8 compared with August, 1903. About 88 firms were affected by disputes of the month, and 1,871 employees were affected directly and about 1,900 indirectly.

The magnitude of the new disputes is indicated in the following table, according to the number of working-people involved:

Magnitude.	Number of Disputes.
2,000 and over.. . . .	1
From 500 to 1,000.. . . .	1
From 100 to 200.. . . .	1
From 50 to 100.. . . .	2
From 6 to 25.. . . .	1

Loss of time in working days.—The loss of time to employees through trade disputes

during August was approximately 37,000 working days. This was a decrease of about 9,500 days compared with the previous month and an increase of about 6,400 days compared with August, 1903.

Trades affected by new disputes.—The following trades were affected by new disputes:—

Trades.	Number of Disputes.
Building.. . . .	5
Textile.. . . .	1

Causes of new disputes.—The following were the causes of the new disputes:—

Causes	Number of Disputes.
For increase of wages.. . . .	3
Sympathy with strikers.. . . .	1
Sympathy with employer—Lockout on account of strike.. . . .	1
Against withholding of wages claim- ed.. . . .	1

Methods of settlement.—Of the 14 disputes in existence during August, settlements were effected in 6 cases, and in another, the establishment ceased to be affected, leaving 7 still unsettled at the end of the month. Two of the disputes were settled by conciliation, through representatives of the labour organizations to which the strikers belonged, the remaining four came to an end without any negotiations or mediation.

Results of disputes.—Of the 6 disputes that were settled, two ended in favour of the employers and three in favour of the employees. In the remainder, which was a lockout, no change took place as it ceased on the termination of a strike, out of which it arose. To these should be added a dispute which practically ended in favour of the employers, most of the strikers having been replaced by others at the end of the month.

Disputes Commenced Prior to the Beginning of the Month.

There were few important developments in the eight disputes which began before August 1, and were in existence during that month.

The two strikes of employees of the Rioridan Paper Mills at Merritton, Ont., one of which began on May 4, and the other on June 3, continued throughout the month without change, except that the company had secured a number of non-unionists to replace the strikers.

A strike of machinists of the International Harvester Company at Hamilton, Ont., which began on May 25, owing to the dismissal of five men for refusing to work on two machines, was brought to a close on August 15, through the mediation of a conciliation committee of the Hamilton Trades and Labour Council. The company agreed to take back all their former employees who applied, as soon as possible, on the basis existing before the strike. Some of the workmen, however, had found other employment in the meantime.

A strike of cloakmakers employed by the Scottish Rubber Company at Montreal, which began on July 13, ended about August 2, on which date the company reported that all their machines were running full time. The cause of the dispute, which involved 39 employees directly, and 17 indirectly, was due to the employment of non-unionists. All the strikers were replaced by other workpeople, and by August 2, the conditions in the factory were the same as before the dispute.

A strike of 18 carpet weavers at Guelph, Ont., which began on July 28, owing to a refusal of the company to increase their wages from 12½ to 15 cents per hour, was terminated on August 8, the strikers returning to work at the old rate of wages.

The disputes of butcher workers at Toronto, saw-smiths at St. Catharines, and iron moulders at Ottawa remained unsettled. In the case of the saw-smiths at St. Catharines, the factory was declared an 'open shop'; but it was still affected by the dispute at the end of August. In the

case of the strike of iron moulders at Ottawa, one firm granted the demand of the men for an increase in wages from \$2.25 to \$2.50 per day, and their employees returned to work, but no general attempt was made to reach a settlement, largely owing to the small demand at present for this class of labour.

With regard to former disputes, which had ceased to affect industrial conditions materially, a strike of leather workers which took place at Hamilton during the months of April and May, was still felt by one firm which had failed to secure the amount of labour required. The arbitrators who had been appointed to settle the question of the wages of brewery workers at Toronto, after the dispute which ended on June 8, held some meetings, but had not given out their decision by the end of the month.

New Disputes.

The most important new disputes of the month were a strike and lockout of bricklayers and masons at Hamilton, Ont., and strikes of builders' labourers and bricklayers at Toronto. An account of these disputes is given below. The only other disputes were a strike of 20 woollen mill workers at Sherbrooke, Que., which began on August 19, and a strike of about 100 builders' labourers at St. Johns, Que., which began on August 15. Both strikes were owing to a demand for increase in wages, at Sherbrooke, the places of many of the strikers were filled, and at St. Johns the demand of the labourers for an increase from \$1.25 to \$1.50 per day was granted on August 16th.

Strikes in the Building Trades at Toronto.

On August 15, a strike was declared by the Builders Labourers' Union of Toronto, owing to a refusal of the members of the Builders' Exchange to grant an increase in wages from 25 cents to 28 cents per hour. The dispute continued throughout the month, with the result that building operations were almost completely sus-

pending, and great losses were incurred, not only by those who were engaged in the other building trades, but also by the numerous firms whose premises had been destroyed by fire, and who had been unable to secure sufficient accommodation for their business while their new buildings were being erected. Much inconvenience and hardship was also threatened in the case of the many people who as a consequence of the strike may be unable to secure houses to live in.

The Labourers' Union claimed that they had first presented their demand for an increase in wages in the month of March, and that the strike was only declared on the failure of the negotiations which have been carried on since that time. On August 3, representatives of the union waited on a committee of the Builders' Exchange and presented a formal demand for a minimum scale of 28 cents an hour. On August 12, the Federated Board of the Builders' Exchange sent the following official reply to the Labourers' Union:

The board is of the opinion that it is not advisable at the present time to increase the wages or to change the existing conditions in any way. We are now in the middle of the building season, and any change made now would seriously affect the building trade generally and cause much unrest and uneasiness in the trade. Again, many contracts have been taken at the present rate of wages, and if any increase were given at this time it would entail great loss upon the contractors. The board further desires to point out that the present rate is quite as high as is paid in any other similar city in Ontario or the United States.

In consequence of this refusal to grant their demands, a strike was declared by the union, which took effect on August 15. It is difficult to estimate the exact number of workmen involved in this dispute. There were about 800 members in the union, but as a number of employers were willing to pay the increased rate, about 70 permits were granted to labourers on the first day to return to work for these employers. In the course of the month many other permits were granted, and many of the strikers left Toronto to seek work elsewhere, so that the number involved was greatly diminished by the end of August. On the 23rd, it was reported

by the union that 400 of their members were at work and that many others had left on the harvesters' excursions for Western Canada.

Another feature of the situation was the refusal of the majority of union bricklayers to work with the non-union labourers, whom some of the contractors had engaged. On the 26th, the Bricklayers' Union declared a general strike in support of the labourers, and about 550 of its members were involved. Most of these, however, had already stopped work, owing to the lack of union labourers.

Various attempts were made to secure a settlement through the mediation of persons not immediately concerned, but they all proved unsuccessful, and both disputes were still in existence at the end of the month. On August 23, a committee from the Stonecutters' Union waited upon representatives of the Builders' Exchange, in an attempt to effect a settlement, but no result followed. Two days later, acting Mayor Ward invited the president of the Builders' Exchange and the president of the Labourers' Union to a conference in order to discuss the situation. The president of the Builders' Exchange, however, declined the invitation, stating that they were unwilling to arbitrate, and would only take back the men at the old scale. Representatives of the union met the acting Mayor, but did not definitely state their attitude with regard to arbitration. The Bricklayers' Union appointed a special committee to confer with the masons' section of the Builders' Exchange with regard to the strike, but on August 30 the employers refused their request for a conference.

Strike and Lockout of Bricklayers at Hamilton, Ont.

On August 6, a strike was declared by the Bricklayers and Masons' International Union of Hamilton, Ont., which involved one contractor and 25 workmen. The cause of the dispute was the refusal of the contractor to pay a mason for work which the architects of the building had refused to

TABLE OF TRADE DISPUTES OF THE MONTH OF AUGUST.

DEPARTMENT OF LABOUR, CANADA.

"	St. Jean	Builders' labourers.	Demand for increase in wages from \$1.25 to \$1.50 per day.	1	125	150	" 15 Aug. 16	Mens demand granted.	

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned. Mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

pass and had ordered to be pulled down. It was claimed by the union, that the matter in dispute had been submitted to a committee of the Master Builders' Association and the union, as provided in their agreement, but that as no settlement was arrived at, it was referred back to the union and a strike was declared against Mr. George E. Mills, the contractor concerned. On the following day, the Master Builders' Association declared a lockout of all the bricklayers and masons belonging to the union in their employ. There were then 8 firms and about 100 employees affected directly by this dispute. As there were three contractors who were not members of the Master Builders' Association, and who therefore were not affected by the dispute, building operations were not brought to a standstill in Hamilton. For some days no change in the situation occurred. On August 11, several officers of the Masters' Association attended a meeting of the Bricklayers and Masons' Union, in order

to discuss the question in dispute, but the meeting was broken up and no results followed from it.

The local union then applied to the Executive Committee of the International Union to send a representative in order to endeavour to effect a settlement. The employers' association requested the bricklayers' union to hold a conference with them on the 16th of the month, but the men declined to do so, as they were awaiting the arrival of an international officer, and did not wish to take further steps before he came. On August 22, the fourth vice-president of the International Union, who had been appointed to act as mediator in the dispute, reached Hamilton, and in the meantime the men went back to work pending a settlement. Three days later he gave a decision that Mr. Geo. E. Mills, the contractor, who was primarily concerned in the dispute, should pay the mason over whom the trouble arose, the \$6.40 owing to him and costs. This

was agreed to by Mr. Mills, and all the men who were out were ordered to return to work. The bricklayers, who had been locked out, raised another question at the meeting, claiming that the master builders or the International Union should pay them \$3,000 for lost time. The decision of the international officer was given against this claim, and after a long discussion his decision was adopted.

In the course of the dispute a number of bricklayers and masons, had left Hamilton to seek work elsewhere. The other building trades were more or less affected by the dispute, although as already mentioned, there was no complete suspension of building operations.

The table published herewith is a compilation of the trade disputes of the Dominion of Canada which began or were in continuance during the month of August, and which have been reported to the department.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during August, 1904.

ONTARIO REPORT.

Bee-keeping in Ontario.

Annual Report of the Bee-Keepers' Association of the Province of Ontario, 1903. Toronto: King's Printer, 1904. Pages, 64.

The report of the Ontario Bee-keepers' Association for 1903 opens with an address of the president delivered at its twenty-fourth annual meeting held at Trenton, Ont., on December 1, 2, and 3, 1903. It is stated in the address that according to the Ontario government statistics, there were in 1903, 207,936 colonies of bees in Ontario, an increase of about 5,400 colonies over 1902. The report also contains articles on 'The advantages of out-apiaries,' how when and where to move them; 'Forced or shaken swarms'; 'Bee-keeping experiments at the Dominion Experimental Farm Apiary,' and 'Chemical work in connection with bee-keeping, 1903,' by Frank T. Shutt, M.A., Chemist, Dominion Experimental Farms. There is a report of the Honey Exchange Committee, and a report of the Inspector of Apiaries of Ontario. An appendix contains the Ontario Act for the suppression of foul brood among bees, and a bill in amendment to this Act, proposed by a committee of the Bee-keepers' Association, which was appointed at the annual meeting of the Association in December, 1903.

MANITOBA REPORT.

Public Institutions in Manitoba.

Province of Manitoba.—Report of the Department of Public Works, for the year ending December 31, 1903. Winnipeg: King's Printer, 1904. Pages, 64.

The report of the Department of Public Works of Manitoba for 1903, contains reports on the various public institutions in the province, with statistical tables showing the numbers admitted during the year classified according to their civil condition, age, religious profession, occupation and

nationality, and the number of deaths with the causes in each case. The following is a list of the number of persons admitted into these institutions during the year:—

Asylum for the Insane, Selkirk.. . . .	76
Asylum for the Insane, Brandon.. . . .	107
Manitoba Deaf and Dumb Institute.. . . .	81
Home for Incurables.. . . .	24
Eastern Judicial District Gaol.. . . .	432
Central Judicial Gaol and Reformatory Prison.. . . .	124
Western Judicial District Gaol.. . . .	102
Winnipeg General Hospital.. . . .	3,094
St. Boniface General Hospital.. . . .	2,501
St. Joseph's Orphanage.. . . .	29
Morden Freemasons' Hospital.. . . .	237
Les Sœurs de Miséricorde (Maternity Hospital).. . . .	222
Salvation Army Rescue Home.. . . .	44

BRITISH REPORT.

Wages and Hours of Labour in Great Britain.

Report on changes in rates of wages and hours of labour in the United Kingdom in 1903, with comparative statistics for 1894-1902. London: Eyre & Spottiswoode. Pages, 140. Price, 7d.

In the report on changes in rates of wages and hours of labour, in 1903, published by the British Board of Trade, the scope of the inquiry with regard to wages is stated to be limited to those changes which indicate a rise or fall in the market price of the same quantity and quality of labour. The results of the investigation showed that in 1903, the changes affecting 874,073 persons took place in only 50 of the principal trades, the total number of persons affected in all trades being 896,598. The general effect of the changes in wages was a decrease, but the amount of the decline, measured by the weekly loss, was comparatively slight, being considerably less than in the two preceding years. Of the total number of workpeople affected, 874,721 sustained net decreases of about £39,868 per week, 21,327 obtained net increases of about £1,541 per week, and the remaining 550 had fluctuations in wages which left them in receipt of the same amount at the end as at the beginning of the year. Compared with these figures, the returns for 1902 showed that 793,041 workpeople sustained reductions amounting to £78,027

per week, and 91,812 obtained increases amounting to £5,326 per week. In 1901, 492,518 people had net decreases amounting to £118,132, and 429,715 received net increases amounting to £40,789 per week. In 1901 and 1902, the fall in wages was mainly confined to the coal mining, iron and steel and shipbuilding trades. In 1903, the downward tendency continued in these industries and spread to other trades, including the engineering and glass industries. The number of people affected by changes in rates of wages formed only 9·9 per cent. of the total industrial population in 1903. In 1901, the percentage was 10·6 and in 1902 it was 10. Since 1894, the coal mining industry has been the one most affected by changes in wages, over 90 per cent of those engaged in this industry having been affected each year since 1894. The wages of 23,119 persons were changed under sliding scales, those of 675,742 persons were arranged by conciliation boards, mediation or arbitration, and those of 197,737 persons were settled by other methods such as direct arrangement, negotiations, &c. The changes under sliding scales occurred in the iron mining and quarrying, and the iron and steel industries. The large number of persons affected by changes brought about by conciliation, mediation and arbitration, is mainly accounted for by the fact that the wages of 667,580 coal-miners were arranged by joint boards of employers and workpeople. Among the people engaged in trades in which changes were brought about by direct negotiation there were 71,680 employed in engineering. In recent years there has been a steady increase in the proportion of workpeople whose wages have been arranged by conciliation, mediation and arbitration. This is largely due to the establishment of conciliation boards in the coal mining industry. In 1903, the wages of 882,850 people were altered without any stoppage of work. There was only a stoppage of work affecting 13,748 persons whose wages were changed. There were, however, a number of strikes and lockouts which did not result in any changes in wages, that are not included in this estimate.

The changes in hours were unimportant, only 7,447 workpeople being affected, whose hours of labour were reduced by a net number of 15,427 hours per week. Of the 7,447 persons, the hours of 614 were increased, and the hours of 6,803 were decreased.

UNITED STATES REPORT.

Wages and Cost of Living in the United States.

Bulletin of the Bureau of Labour, No. 53—July, 1904—United States Department of Commerce and Labour, Washington, D.C.

The Bulletin of the United States Bureau of Labour for July, contains the results of an investigation conducted by the Bureau during the last four years relating to the cost of living in the United States in 1901, the retail prices of food from 1890 to 1903, and wages and hours of labour in the leading manufacturing and mechanical industries of the United States from 1890 to 1903. The Bulletin for November, 1903, an account of which is given in the December number of the *Labour Gazette*, contains a brief summary of the investigation relating to the cost of living, which was based on reports received from 2,567 families, scattered throughout the United States, the heads of which were wage-workers or salaried men earning not over \$1,200 during the year. It was ascertained that the average total expenditure of these families was divided in the following proportions:—

Food..	42·54	per cent.
Rent..	12·95	"
Principal and interest on mortgage on home..	1·58	"
Fuel..	4·19	"
Lighting..	1·06	"
Clothing..	14·04	"
Taxes..	0·75	"
Insurance..	2·73	"
Labour and other organization fees..	1·17	"
Religious purposes..	0·99	"
Charity..	0·31	"
Furniture and utensils..	3·42	"
Books and newspapers..	1·09	"
Amusements and vacation..	1·60	"
Intoxicating liquors..	1·62	"
Tobacco..	1·42	"
Sickness and death..	2·67	"
Other purposes..	5·87	"

The data regarding retail prices of food were obtained from the books of 814 retail merchants in the same localities from which particulars relating to family expenditures were secured, and they cover the prices of 30 distinct articles for each month during the fourteen years of 1890 to 1903 inclusive. The results of the inquiry show that the average cost of food per family in 1890 was \$318.20; in 1896, the year of lowest prices, the cost was \$296.76; in 1902, the cost rose to \$344.61, and in 1903, it fell slightly to \$342.75. Taking into consideration fluctuations in other items of expenditure, it is estimated that the increase in the cost of living, as a whole, in 1903, compared with the year of lowest prices, was less than 15.5 per cent.

The results of the investigation relating to rates of wages, and hours of labour, which embraced 519 distinctive occupations in 3,429 establishments representing 67 industries, showed that the rates of wages per hour in 1903 had increased 18.8 per cent, compared with 1894, the year of lowest wages; the hours of labour in 1903 had decreased 4.1 per cent, compared with 1890; weekly earning were 14.9 per cent greater than in 1894; 34.3 per cent more persons were employed in 1903 than in 1894; and 54.4 per cent more money was paid out in wages per week in 1903 than in 1894.

A detailed report on the cost of living in 1901, and the retail price of food, 1890 to 1901, is to appear in the eighteenth annual report of the Bureau of Labour, and the nineteenth annual report of the Bureau will contain a detailed account of the investigation relating to wages and hours of labour from 1890 to 1901.

The Growth of Industry in New York.

New York State Department of Labor. Report on the Growth of Industry in New York. Albany: The Argus Company, 1904. Pages, 670.

A report on the growth of industry in the State of New York, which has recently been issued as Part V of the Second Annual Report of the New York Department of Labour, contains a large amount of his-

torical and statistical information with regard to the principle industries of the State. In the first chapter a comparison is made between New York and the other States of the Union, and between New York and foreign countries. Out of fifteen groups of manufacturing industries New York is the leading State with regard to the amount of capital invested in eight groups, and with regard to the gross value of products, in nine groups. In capital invested New York does not fall below the third place in any group, and in the gross value of the products, New York does not rank below the fourth place, occupying this position in only two groups, namely the iron and steel industries, and the manufacture of vehicles.

Compared with foreign countries, only four possess a greater foreign commerce, only three handle a greater amount of mail matter, and Germany is the only country in which the amount of deposits in savings banks exceeds the savings bank deposits in New York.

Among the natural resources of the State an important place is assigned to the Niagara Falls, which are capable of producing six or seven million horse-power. The extent of navigable water supplemented by the construction of the Erie Canal between Buffalo and Albany has also largely assisted in the growth of the State by providing cheap and abundant means of transportation. There is relatively little mineral wealth in New York, with the exception of building stone, cement and clay deposits, and the industries built on these are of minor importance compared with leading New York industries. The only extractive industries of importance in New York are paper-making, saw-mills and tanneries, flour and grist mills, and butter and cheese factories. In agriculture, New York is the fourth State in the Union as regards both investment and production.

Other chapters of this report deal with the wealth and industry of the State in 1900, the rise and progress of manufacturing in New York, from the early colonial period to 1900, and the growth and distri-

bution of New York industries, with statistical tables covering the period from 1850 to 1900. In an appendix further tables are given containing the population of New York by counties from 1790 to 1900, the occupations of the people in 1900, the acreage and production of the principal cereals from 1867 to 1901, the animal, grain and fruit products in 1899, the number and acreage of farms, and the value of farm property and products in 1900, and various statistics relating to the manufacturing industries from 1850 to 1900.

Manufacturing Industries of Massachusetts.

Commonwealth of Massachusetts. Statistics of Manufactures, 1902-1903. (The Eighteenth Report of the Statistics of Manufactures, pages 1-77). Boston: State Printers, 1904.

The Eighteenth Annual Report on Statistics of Manufactures of Massachusetts contains particulars relating to the years 1902 and 1903, obtained from 4,673 establishments. It is arranged under the following five sections:—

1. Establishments and their management, showing the number of establishments controlled by private firms, corporations and industrial combinations, with the number of partners and stockholders interested in them.

2. Investment, materials used, and product, which contains the amount of capital invested for production, the cost, value of stock and materials, and the selling value of goods made and work done.

3. Labour and its compensation, in which are given the average number of persons employed, with increase or decrease in numbers and percentages; the smallest, greatest and average number of persons employed of both sexes; the range of employment and unemployment as shown by the excess of the greatest over the smallest number of persons employed; the number of persons employed by months, with percentages of employment and unemployment in nine leading industries; the total amount of wages for 1902 and 1903, with average

yearly earnings, and the weekly wages of adult males and females and persons under twenty-one years of age.

4. Working time and proportion of business done, which gives the average number of days in operation of each establishment, and the average proportion of business done, based upon a maximum production of 100 per cent.

5. General summary of industrial conditions, in which a review of the industrial situation is given for the two years, 1902 and 1903.

Labour Conditions in Massachusetts.

Labour and Industrial Chronology of the Commonwealth of Massachusetts for the year ending September 30, 1903. Boston: State Printers, 1904. Pages, 108.

The Report on Labour and Industrial Chronology of Massachusetts, which forms Part IV of the Annual Report of the Massachusetts Bureau of Statistics of Labour, contains a monthly diary of the principal industrial events and changes which took place in the various cities and towns of the State during the year ending September 30, 1903. The subjects treated are divided into the following five headings: Strikes and Lockouts, Wages and Hours of Labour, Trades Unions, Industrial Changes, and Workingmen's Benefits. The localities are arranged in alphabetical order, and each one is treated separately. The chronology is followed by an analysis of the strikes and lockouts which took place in Massachusetts during the year, and a copy of the Acts and resolves of Massachusetts affecting labour, which were passed during the session of 1903.

The analysis of trade disputes shows that there were 217 strikes during the year, 133 of which involved, 28,709 workmen, who incurred a loss of 1,316,859 working days. In 56 cases the strikers were successful, in 60 compromises were effected, and in 90 the employer were successful. Of the remainder, eight disputes were pending at the close of the period, and the results of three were not ascertained. There was a decrease of 59 strikes as compared with the following year.

EUROPEAN REPORT.

Statistics of Population in France.

Statistique Annuelle du Mouvement de la Population, année 1902. Tome XXXII. Paris: Imprimerie Nationale, 1903. Pages, 169.

The latest report on statistics of population in France, issued by the Department of Commerce and Industry, shows that there was a natural increase of 83,944 persons in France in 1902, compared with 1901, which was due to a decrease in the number of deaths. The number of marriages was 9,000

less than in the preceding year. There were 8,431 divorces, a larger proportion compared with the population of the country than for any year since 1898. The number of births of living children was 11,896 less than in 1901. The total population of France in 1902 was estimated at 39,060,000, compared with 38,980,000 in 1901. France furnishes the smallest annual increase of population of all the countries of Europe, and France and Ireland are the only countries, whose annual increase of population has shown a general tendency to diminish.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

THE following synopses of cases affecting labour are based upon the latest law reports and other legal records of the different provinces of Canada:—

QUEBEC CASES.

Conviction for Intimidation during Strike.

A case which recently attracted a great deal of attention in Montreal was that in which Hyman Schwartz was accused in the Court of Special Sessions of having, during the progress of a strike, intimidated certain employees of the Scottish Rubber Company, with the object of preventing them from working.

The evidence showed that Schwartz made a habit of taking up his stand near the entrance of the company's premises and of stopping men as they came out from work, using all means in his power to induce them to desert their employers. It was also proved that he even followed some of the men to their houses, calling them names on the way, and threatening them with future trouble if they did not yield to his wishes.

Schwartz himself admitted in evidence that he had been chosen by the union to which he belonged, to act as sentinel at the workshops of the Scottish Rubber Company.

The court found Schwartz guilty, and sentenced him to three months imprisonment without the option of paying a fine. In giving sentence, the judge said that he

did not give the option of a fine because the same would immediately be paid by the union. He also stated that any similar offender who might come before him in future would be treated in the same way, as the authorities were determined to prevent strikers illegally interfering with peaceful workmen.

(The Scottish Rubber Company vs. Schartz. Judgment given at Montreal by Judge Sicotte, July 27, 1904.)

The Rights of an Apprentice.

At the Recorder's Court at Montreal, two young boys were recently charged by the Montreal Biscuit Company with having deserted their employers.

It appeared from the evidence that the boys entered into a contract to serve the company for a certain period of time, in order to learn the trade. Some time later, upon the pretext that they were too slow in learning, they were given other work to do, such as sweeping, &c. This the boys refused to do, and consequently left the service of the company.

In giving judgment, the Recorder said that employers had no right to impose upon apprentices any other work than that which they were engaged to learn and especially so when there was a contract of service. The charge was therefore dismissed with costs.

(Judgment given in the Recorder's Court, at Montreal, July, 1904.)

ONTARIO CASES.

A Conviction Under the Alien Labour Law.

A charge of an infraction of the Alien Labour Law, was recently tried by the police magistrate of Hamilton.

J. Amberg, a tailor, who carried on business in Dundas, was charged with having brought two or more men from New York to work in his establishment. The charge was laid by F. Weaver, who formerly worked for Amberg.

The evidence seemed to show that Amberg had spoken to the two men in question in New York, and told them that he could give them work in Dundas. He paid, through his son, the railway fare of one of these men from New York to Dundas.

The magistrate held that it was a clear case of an infringement of the Alien Labour Law. As he could not impose a fine of less than fifty dollars (\$50), together with the costs, he allowed Amberg to go on suspended sentence, upon his paying costs of the prosecution.

(Case tried before the Police Magistrate at Hamilton, August 21, 1904.)

Non-registered Unions doing Insurance Business.

In the Hamilton police court recently, the secretary of the Local Barbers' Union was charged with a breach of the Insurance Act. It appeared that the private prosecutor had demanded from the union \$60 for the funeral expenses of his son. As the union did not pay the claim, he took an action in the civil courts and recovered judgment against the local union for the amount in question. As this judgment was not paid, he laid a charge against the secretary of the union, charging him with a breach of the Insurance Act, inasmuch as he acted as an agent for the union in getting people to pay money for insurance or funeral benefits, while the union was not registered in accordance with the provisions of the Insurance Act.

The magistrate held that the secretary of the union had committed a breach of the

law by so acting, and he accordingly imposed a fine of \$20.

(Bishop vs. Halford. Judgment given by the Police Magistrate at Hamilton, August 23, 1904.)

Conviction for Breach of the Factory Act.

In the police court, at Hamilton, recently, B, a baker, was charged by a former employee with a breach of that section of the Factory Act which says that no employee shall be obliged to work for more than 12 hours out of 24 without permission for such overtime having first been obtained by the employer from the Factory Inspector.

The former employee who laid the charge testified that he himself had been compelled to work once or twice for more than 12 hours. The principal charge, however, was in regard to the case of another employee, O'Neill. O'Neill himself swore that he started to work at 6.30 p.m. one evening, that he went home at 7 a.m., for an hour and then came back for two or three hours more; he stated that the bread was not coming out right and that as a matter of fact, he did not do more than 12 hours' actual work.

The employer stated that he did not knowingly infringe the law, but the magistrate was of the opinion that the evidence showed a breach of the Act, and he, therefore, imposed the lowest possible fine, namely, \$20.

(Burrows vs. Beckett. Action tried before the Police Magistrate, at Hamilton, July 25, 1904.)

BRITISH COLUMBIA CASE.**Action of Employers Against Union.**

A very important case, of interest to both employers and employees throughout the country, was tried in British Columbia, in the month of July. In 1901, there was a general strike in Rossland. For a considerable time work was entirely suspended at all the big mines in that district. The mine owners contended at the time that the strikers had acted illegally by intimidating men who were working in the mines, by inducing others to break contracts which

they had made, by persuading men willing to work in the mines not to do so, and by watching and besetting the mines and the approaches thereto.

The mine owners claimed that the strikers were liable for the pecuniary damage suffered by the suspension of work on account of the above mentioned conduct. A number of them brought actions on these grounds against the Rossland Miners' Union, No. 38, otherwise known as the Western Federation of Miners, Rossland Branch. These proceedings, however, were subsequently dropped except in the case of Centre Star Mine, which was the action tried in July, and the War Eagle, which was held over pending a decision in the Centre Star case.

The grounds of the action were substantially on the lines set forth above. The case was tried by a judge and jury, and lasted for a number of days. The mine owners put in a considerable amount of evidence, producing witnesses who swore that they themselves had been prevented from or persuaded not to work in the mines. Testimony was also given as to the general conditions in Rossland at that time, and the fact that the union closely watched new-comers and tried to induce them not to work. The union did not put in any evidence, but their counsel argued that there had been no breach of the law.

In summing up to the jury, the judge charged against the union. The jury answered all the questions submitted in favour of the mine owners, and came to the conclusion that the Centre Star Company had, as a result of the illegal acts of the strikers, suffered damage to the extent of \$12,500, for which amount they brought in a verdict.

The light in which the presiding judge regarded the case, is shown from the extract given from his charge; the questions submitted to the jury and the answers thereto are also given.

His Lordship, in his direction, said, in part: 'I shall endeavour, as far as I can to give you what seems to me to be the necessary legal assistance to enable you to get at the facts of this case. There are some observations that

I think I ought to make to indicate the general grounds on which the right of persons making such a claim as the plaintiffs in this action must rest, if the claim is to be sustained. The law protects every man in the disposition of his capital or his labour according to his best judgment. That is a legal right, which, however, is limited by this correlative duty, not to interfere with the legal right of others. That is to say that every man's right to do as he pleases with his own is limited by the right of others to do as they like with their own. While the law protects a man in this way, his right to dispose of his capital, skill or labour necessarily involves the proposition that he does not employ unlawful means in prosecuting his right. This doctrine is practically the right of competition, and the actual exercise of it inevitably interferes with other people's interests. When a man's right is thus interfered with the question arises as to whether the interference is actionable. If no unlawful means are used it is not actionable, and this is put very clearly in the Mogul case, quoted by Mr. Taylor, in which it was decided that a combination of steamship owners interested in the tea-carrying trade had a right to close out the competition of other steamship owners by reducing the shipping rate below what would pay.

'The general principles of illegality in these cases are such acts as intimidation, obstruction, the influencing of servants, &c. The right of any man to conduct his own business in his own way extends to any corporation or mining company. They have a legal right to engage servants and carry on their business without molestation.

'Now there is the question of the right of workmen to combine for their own benefit and to strike in order to enforce their demands. You are not to regard a strike as unlawful in itself. There is nothing to prevent a number of men agreeing among one another that they will refuse to work for any reason that they see fit to act upon. There is nothing to prevent them from agreeing that in a certain eventuality they will withdraw from work, nor in acting upon that agreement. That is the legitimate exercise of their right to dispose of their labour as they please, providing only that they do not thereby break a contract.

'When we come to apply these principles, we find that these trade disputes always imply something more than the mere withdrawal from employment, and the question arises as to whether their other acts have rendered the workmen liable at law. Then there is the question of conspiracy, and how far it alters the legal complexion of any acts of the men. You may proceed upon this basis that if in this case the members of this union agreed to strike or if the committee of the union agreed to bring it about and to make the men leave work or prevent them from returning to work by unlawful means, then not only the individuals, but everybody concerned, will be liable for every one of the illegal acts. For the purpose of ascertaining whether such a conspiracy did exist, you will have to look at all the circumstances. It is not often possible to prove the existence of a conspiracy by direct evidence, and it has often to be shown by circumstantial evidence. In this case it is clear that the men did enter into an arrangement of some sort, and for the purpose of ascertaining what that arrangement was you can consider all their acts during the strike.

'In regard to unlawful means. The question is: When it was agreed among the members of the executive or the members of the union that they should strike, did they, in order to make that strike effective and to maintain it, intend to use unlawful means? There are certain things sometimes done in connection with a strike which the law declares to be criminal, and if you find that these things were agreed upon to be done and were done, and that the plaintiffs suffered pecuniary damage thereby, that alone will be quite sufficient to sustain this action. The unlawful acts referred to are such as following a man about in a disorderly manner, besetting any one at his house, intimidating people, besetting the path along which the men would go to work with the object of preventing them from proceeding, and so on. The element of these offences is that they are done with a certain view, namely, to compel somebody to do something he should not do, or to prevent him from doing something that he should do. You have no direct evidence as to what these people intended to do. The strike having been determined on, the committee was authorized to appoint committees to carry it on. That is all the direct evidence that you have. If these people determined to carry on the strike by picketing and persuading people who might go to work not to do so, then their acts would come within the section of the code and be illegal. We have evidence of certain things that were done, such as the Horne incident, in which Woodside the secretary of the union, was active. Immediately after the strike was concluded upon, the executive committee got to work that same night and decided upon certain methods to carry on the strike. If you find that they decided to introduce the picketing and blacklist systems, then you can find that a common purpose existed to carry on the strike by those means.'

His Lordship then turned to another aspect of the case, as to the law regarding a 'nuisance'. 'A nuisance could be caused by a number of people acting in such a way as to injure another man's business, as in the case of what was known as a boycott. If the jury found that a nuisance had been caused, then the ultimate object of the union in calling the strike was of no importance, as the action could be sustained on that ground alone. Had a state of affairs been established by the union which amounted to a boycott of the Centre Star and other mines? Did the men who established the strike intend to carry on the strike by such methods? If the jury answered these questions in the affirmative there was no need to consider whether the object of the strike was lawful or otherwise. It might be noted that it was quite probable that the defendants did not know that in bringing about a state of boycott they were doing anything unlawful. But if they did those things it did not matter whether they knew them to be unlawful or not. It is charged that in concert with the Northport union a conspiracy was formed, having for its object the establishment of the power of the Western Federation of Miners in Rossland as against the right of the mine owners to run their mines in their own way, and that the question of wages paid to the muckers was a sham issue. There has been evidence of the interchange of views between Northport and Rossland union. It was said, also, that it was known on July 3 that on the following day, being a holiday, a number of the miners opposed to the strike would be away,

and it was decided to take a vote on the proposed strike on that occasion. Now, what was the reason of all that midnight activity? Was there any acute question between the mine owners and the muckers that required that hurried action? According to the rule of the union a strike could only be called by a three-quarter vote of the resident members of the union, and this was not obtained. The actual vote gave a three-quarter vote in favour of the strike, exactly out of the total vote polled, but that was not a vote of all the resident members. It was worthy of note that none of the defendants had thought it worth while to go into the box to explain these things. Five hundred men belonged to the union, thirteen hundred men worked in the mines and two hundred and fifty-eight voted in favour of the strike which practically wrecked the community.

'Did these men conspire to coerce the minority in the union and the workmen outside of it to go on strike by means of the power of the Western Federation and the blacklist method?'

Speaking as to damages, His Lordship pointed out that the jury were not asked to do anything vindictive. Counsel for the plaintiffs asked only for something substantial. In regard to the result of their judgment, the jury should not consider the remarks of either Sir Hibbert Tupper or of Mr. Taylor. 'It is not for you or for me,' said His Lordship, 'to consider the result of the judgment. Our duty simply is to administer the law. And it is because our courts, under the British crown, do administer the law without consideration of after results, that the administration of justice throughout the British empire is such that we are all proud of.'

The question submitted to the jury and their answers thereto follow:—

1. Did the principal defendants—or any and which of them—namely, the Rossland Miners' Union No. 38, Western Federation of Miners; the Western Federation of Miners, Rossland branch; Rupert Bulmer, William L. McDonald, Frank Woodside, W. G. Preston, the 'Carpenters' and Joiners' Union, No. 1, of Rossland, Peter R. McDonald, John McLaren, T. M. Beamish and James Wilks, maliciously conspire together to molest and injure the plaintiffs and other mine owners of Rossland in their business by unlawful means?

Answer—Yes; and all of them.

(a) And did the said defendants, or any of them, by acts done pursuant to the said conspiracy, cause the plaintiffs pecuniary loss?

Answer—Yes.

2. Has the Western Federation of Miners, Rossland branch, been carrying on its business in the name of, and has it been usually known as, 'The Rossland Miners' Union No. 38, Western Federation of Miners,' since the date of its incorporation.

Answer—Yes.

3. If you answer question 2 in the affirmative, did the defendants, the Western Federation of Miners, Rossland branch, otherwise known as the Rossland Miners' Union No. 38, Western Federation of Miners, unlawfully and maliciously procure employees of the plaintiffs to cease working for the plaintiffs on, from and after the 12th day of July, 1901, by calling out the said employees and compelling them to go on strike?

Answer—Yes.

(a) And did the plaintiffs suffer pecuniary loss by reason thereof?

Answer—Yes.

4. Did the defendants, the Rossland Miners' Union, the Western Federation of Miners, Rossland branch, and the Carpenters' Union, and their officers and members, or any of them, maintain or assist in maintaining the strike by unlawful means, that is to say:

(a) By molestation or intimidating men who were working for the plaintiffs or for other mine owners of Rossland, with a view to inducing them to cease from so working?

Answer—Yes.

(b) By inducing men who had entered into contracts with the plaintiffs to break such contracts?

Answer—No.

(c) By inducing or attempting to induce men who were willing to enter into contracts of service with the plaintiffs or other mine owners of Rossland, or to work for them, to refrain from so working?

Answer—Yes.

(d) By furnishing strike pay or other relief or assistance?

Answer—Yes.

(e) By unlawfully watching and besetting the premises of the plaintiffs and other mine owners of Rossland and the roads and approaches leading to the said mines, and the railway stations in Rossland?

Answer—Yes.

5. Did the defendants, Rupert Bulmer, William L. McDonald, Frank Woodside, W. C. Preston, Peter R. McDonald, John McLaren T. M. Beamish and James Wilks, or any and which of them, maintain, or assist in maintaining the strike by unlawful means; that is to say: By any and which of the means referred to in question No. 4?

Answer—Yes; all of them, by means of A. C. to D. E.

6. Did the said principal defendants, and the members of the Rossland Miners' Union, or any and which of them, conspire with each other to do any and which of the things mentioned in said question No. 4?

Answer—Yes; all of them except Section B.

7. Did the defendants, and the members of the Rossland Miners' Union, or any and which of them, unlawfully and maliciously conspire together to molest and intimidate the plaintiffs in the carrying on of their business, and were the plaintiffs so molested and injured?

Answer—Yes.

8. Did the plaintiffs sustain any substantial damages?

Answer—Yes.

9. The amount?

Answer—\$12,500.

INDUSTRIAL AND LABOUR CONDITIONS DURING SEPTEMBER, 1904.

I.—GENERAL SUMMARY.

COOL and rainy weather interfered somewhat without-of-dooremployment during September, especially in the province of Quebec. The month as a whole, however, witnessed a distinct improvement in the tone of the labour market as compared with August. Farming operations continued very active, though the pressure of work in Manitoba and the Territories was at the end of September somewhat relieved. Trade following to the close of the summer season, showed a marked upward tendency, being stimulated in the rural districts by the annual fall fairs, which were reported more than usually successful this year. With regard more particularly to the state of employment, the month marked the beginning of the transition period between summer and winter conditions. The building and saw-milling branches, for example, were approaching the end of their active season; other crafts, such as coopers, lumbermen, confectioners, &c., were either at the height of their activity or were entering upon it. The general effect of the month's developments was of an equalizing tendency in the labour market as a whole, conditions in the provinces east of the Grêat Lakes and in British Columbia having distinctly im-

proved, and the Territories and Manitoba having shown little change in the general demand for labour, whereas in August the latter divisions showed much greater activity in comparison with the first-mentioned group of provinces. Thus, although a few of the cities in Ontario and Quebec, such as Quebec, St. Hyacinthe, Three Rivers, Brantford, Guelph and St. Thomas, show a falling off, the larger centres, including Halifax, Sydney, St. John, Montreal, Sherbrooke, Belleville, Toronto and London show an improvement in general conditions. At Sault Ste. Marie the opening of the steel plant caused a revival in general industry which was felt at once over a large section of country. The British Columbia cities also showed improvement in general conditions.

Changes in Wages and Hours.

Comparatively few developments in the wages movement were reported during September. The early closing arrangements of the summer months, which affected a larger body of work-people this year than ever before, came to an end on September 1st, and as a consequence, large bodies of retail clerks and factory employees

worked longer weeks than in August.* The question of shorter hours, apart from temporary arrangements, was discussed at several points. At Hull a municipal by-law was passed requiring barber shops to close on Sundays. In Ottawa the druggist section of the retail merchants decided to close all shops on Sundays, except between 6.30 and 9.30 p.m. Later, however, it was decided to extend the period so as to cover from 1 p.m. to 7 p.m. At Toronto, on the other hand, the barbers' early-closing by-law was repealed by the city council, and at Vancouver, B.C., the police magistrate gave a decision quashing a by-law which provides a fine for merchants who knowingly keep their places of business open after 6 p.m.

The chief change in wages of the month was an increase granted to boilermakers, machinists and blacksmiths, numbering about 1,000 in all on the western division of the Canadian Pacific Railway.† At Guelph, Ont., an establishment employing 200 men, which has hitherto paid 60 hours pay for a 59-hour week's work decided to adopt the hour system of paying, and to pay in future only for the amount of time worked.

Cost of Living.

The most important variation in prices of the month affecting cost of living was an advance in flour, which went into effect over a wide section of Canada. At Brantford, Ont., for example, an advance of 25 cents per barrel was reported. Following this development, the price of bread at several points was advanced. At St. Thomas, Ont., and at St. Hyacinthe, Que., for example, an increase of 1 cent per loaf was reported. At Montreal, Ottawa and Winnipeg, also, it was decided at meetings of the master bakers, to announce a similar advance. Coal at some points showed a tendency to stiffen in price. At Montreal

also an advance in the price of milk was discussed by a number of dealers. Potatoes advanced in Ontario in anticipation of a partial crop failure.

Interruptions to Industry.

From the standpoint of industrial unrest, very favourable conditions prevailed throughout September. The strike of employees on the western division of the Canadian Pacific Railway Company, which resulted in the changes of wages above referred to, was the most serious new dispute of the month. In all 9 disputes were reported as in existence, of which 6, including the strike in the building trades at Toronto, were in existence during August. At the close of September only 3 disputes, and these of comparatively minor importance, remained unsettled.

Wind and electrical storms did some damage, especially to fruit and farm buildings in Nova Scotia and the west.

Among industrial establishments destroyed by fire during September, the following as reported in the press of the Dominion may be mentioned: Warehouses, stores, dwellings and wharfs at Halifax, N.S., (Sept. 14th), loss \$250,000; warehouses at Halifax, N.S. (Sept. 20th), loss \$60,000; manufactory and houses at Lawrenceville, Que., loss \$25,000; stores, &c., at Quebec, Que., loss \$35,000; stores and warehouses at Montreal, Que., loss \$500,000; manufactory at Ottawa, loss \$9,000; planing mill at Ottawa, Ont., loss \$2,000; woollen mills at Hungerford, Ont., loss \$3,000; carriage works at Perth, Ont., factory at Peterborough, Ont., 25 men out of work; pork factory at Toronto, Ont., loss \$20,000; lantern manufactory at Hamilton, Ont., 135 hands employed, loss \$4,000; stores at Hamilton, Ont., loss \$1,500; stores and warehouses at Chatham, Ont., loss \$10,000; brick-making plant at London, Ont., loss \$20,000; tannery at Huntsville, Ont.; livery stable at Winnipeg, Man., loss \$5,000; saw-mill at Kamloops, B.C., loss \$50,000; lumber mill at Fernie, B.C., loss \$25,000; saw-mill at Capilano River.

* See special article on the early closing movement elsewhere in the present issue of the *Gazette*.

† See report of Winnipeg correspondent in present issue.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada as indicated by the reports of local correspondents to the *Labour Gazette* for September, and by information received at the department from other sources, may be briefly summarized as follows:

Agriculture.

During the opening weeks of the month harvesting was in full operation, more particularly in western Canada where the season is in the neighbourhood of two weeks behind that of last year. Wet weather caused delays in some localities, but employment on the whole was very active, about fifteen thousand men having been brought by the railway companies from the eastern provinces to assist in the harvest in Manitoba and the Territories. Particularly noticeable this year in this connection was the number of farm labourers supplied by the provinces of Nova Scotia and New Brunswick. Later in the month threshing became general, and in Ontario fall ploughing was in the closing week already well under way.

With regard to the probable crop yield for the year, it was impossible at the end of the month to speak definitely in the absence of official returns. In the maritime provinces the yields are perhaps below the average, though root crops have turned out well. Frost did some damage during September, both to grain crops and garden stuff, especially in Quebec. The potato crop also in Ontario was much damaged by the wet weather, and rot very materially curtailed the yield in a number of localities. Wheat in Ontario it is stated, will not be more than half a crop; oats and barley, however, have turned out very well. From Manitoba and the west the returns of the railway companies and other authorities were very satisfactory, it being stated that in spite of some wet weather and occasional frosts, a fair average crop (conservative estimates ranging from 58,-

000,000 to 65,000,000 bushels) of wheat of good quality may be regarded as assured. This with the high price obtaining will insure a very prosperous season. Apples and other fruit were reported as meeting a somewhat lower market than had been anticipated. For cheese also prices remain low as compared with last year. Towards the close of the month the marketing of grain became very active.

Fishing.

According to reports from the maritime provinces, the Atlantic fisheries have had on the whole a poor season. Several vessels of the Nova Scotia bank fishing fleet returned from their summer's voyage during September reporting a disappointing catch, the season being but little better than last year, which was a very poor one. Owing to the high prices ruling, however, the catch will yield an average financial return. Herring and mackerel were also scarce, especially during the past few weeks. As a result, the demonstration at Canso of the Scottish method of curing and packing herring was considerably hampered, though experimental sales of Canadian herring cured by the new method were highly successful on the New York and St. Petersburg markets. It was accordingly determined to retain somewhat longer the services of the Scottish expert and his staff of female workers. In view also of the small catches of the past summer an extension of thirty days was granted for lobster fishing on the shores of the Magdalen Islands, beginning on September 9th, the measure being the result of the recommendation of an official commission of inquiry appointed recently and which held several sittings during the month. Oyster fishing opened favourably during the month in Prince Edward Island, and in the Bay of Fundy also a few good catches of sardines were taken; the latter, however, found a poor market.

The new fisheries protective cruiser *Vigilant*, for the use of the Dominion government on Lakes Erie and Huron, was launched on September 10th. The vessel

is 176 feet long and is valued at about \$150,000.

The run of coho on the Fraser river was reported very light, and the chief activity at the canneries was in connection with the transportation of the pack to the British market. The pack has been the smallest known in the history of the industry. It was announced by the Honourable the Minister of Marine and Fisheries that an increased effort would be made to protect the fish in future during the spawning season. As a result of a meeting between the Puget Sound Packers' Association and the Fraser River Canners' Association, the price of salmon, it is stated, will be kept up during 1905, which is expected to be a heavy year in the industry. Considerable activity prevailed in halibut fishing in British Columbia, with good results.

Lumbering.

Throughout Ontario, Quebec and the maritime provinces prospects are for a material reduction in the cut of logs during the coming season, owing largely to the decreased demand for lumber in the British market. This is particularly noticeable in the diminished preparations now under way in the Ottawa valley, and on the St. John river. The effect of the diminution in the demand for men for the shanties, however, has not been injuriously felt in the general market. Saw-milling still continued very active, though the close of the cutting season is in sight in some localities. In British Columbia the effects of the extensive bush fires of last month have been shown in diminished employment in the logging camps, and a reduced output of logs. The mills, however, have been running steadily and report good markets. An event of considerable importance was the withdrawal of the Mountain Lumber Mills Association from membership in the Northwest Retail Lumber Dealers' Association. The Mountain Association will establish independent lumber yards and an open market in Manitoba and the Territories.

Mining.

Reports from the Nova Scotia collieries were more favourable in September than in August, though the latter month in the case of the Dominion Coal Company's collieries showed in turn a heavier output by 34,524 tons than July.

The development of the oil territory in the maritime provinces is reported as having been stimulated by the bounty recently granted by the Dominion government. One company in New Brunswick reports 34 wells, producing fifty barrels of oil daily, with 11 additional wells which will soon be producing.

The metalliferous mines of Ontario had a good month, both in Hastings' county and in the Lake Superior region. The nickel mining industry in particular was reported as very active. Diamond drill operations were conducted by the Ontario government throughout September in the region north of Lake Superior.

In British Columbia the Crow's Nest Pass collieries were very active. Metalliferous mining throughout the province also showed an increase in output during August over both July of the present year and August, 1903.

According to statistical tables issued by the British Board of Trade the production of coal in Canada has increased from 3,847,070 tons to 7,996,634 tons in the past ten years.

Manufacturing.

A good month was reported throughout the Dominion, except in certain branches in a few localities, as in the case of iron manufacturers at Brantford and Peterborough, Ont. On the other hand, Montreal, London, Toronto and other of the larger centres had a very busy month. The resumption of activity in the steel making industry at Sydney, N.S., and more especially at Sault Ste. Marie, Ont., may also be mentioned in this connection, the latter plant, as will be seen from the cor-

respondent's report, having resumed operations with a large staff and excellent prospects after nine months idleness. The manufacture of woollen goods also showed some improvement in employment during the month, though quietness continued in the cotton mills. Biscuit, confectionery and canning factories were very busy.

Transportation.

Railway construction was very active throughout September, especially in Ontario and western Canada. Railway employment also showed an improvement over August, owing to the holding of fall fairs, harvesters' excursions, and in the moving of the crops.

It was announced at the half-yearly meeting of the shareholders of the Grand Trunk Railway Company that the company would adopt the recommendation of the general manager to acquire control of the Canada Atlantic Railway. The Canada Atlantic Railway, built twenty years ago, has a rolling stock of sixty-seven locomotives, forty-one passenger cars, and three thousand freight and miscellaneous cars.

As a result of the evidence given recently before the railway commission by representatives of the fruit interests, a reduction has been made in the rate on mixed car lots of fruit from the principal shipping districts in Ontario to the larger centres of distribution, such as Toronto, Montreal, Ottawa, Quebec and Winnipeg. A special rate for one-half car lots, or 10,000 barrels or over, has also been made. In addition, the flat rate for icing cars destined for Manitoba has been abolished, and hereafter shippers will only be charged for the actual amount of ice supplied.

The recent tour of the railway commissioners covered between 7,000 and 8,000 miles and lasted eight weeks.

In estimating the equipment of the Canadian Pacific Railway for moving the western wheat crop, it was stated that the company would have a total of 28,600 cars and 934 engines available for this service, a number largely in excess of last year.

The lease of the Guelph-Goderich Railway line to the Canadian Pacific Railway Co., was sanctioned on September 20.

The large shops being erected for the Canadian Pacific Railway at Winnipeg are nearing completion. The following are the measurements of the various buildings included in the new works.

	Sq. feet.
Locomotive shops..	134,800
Stores and office building.. . . .	21,200
Foundry..	10,800
Freight car shops..	40,800
Blacksmith shop..	21,600
Planing mill..	24,000
Passenger car shops..	24,000
Power house..	13,000
Dry kiln..	8,800
Oil house..	3,200
Total..	330,200

The net tonnage through the Sault Ste. Marie canals during August was 4,194,886, being 240,964 tons in excess of August of last year. Up to September 1, the total traffic was 14,843,007 net tons as against 22,628,170 last year.

The Canada Rolling Stock Company, Limited, Toronto, capital \$250,000, received a charter from the Dominion Government to manufacture and deal in locomotives and rolling stock of all kinds.

It was announced by the Transcontinental Railway Commission that surveys along the proposed line from Lake Abitibi to Moncton would be commenced at once, 27 surveying parties being organized as rapidly as possible. The work will be carried on throughout the winter, other surveying parties for the western end being organized as required.

Conditions in the Trades.

The weather in some localities interfered with operations in the *building trades*, though *lathers*, *plasterers* and *painters* had a very busy month, and the building season as a general rule promises to be more than usually extended this year, the amount of building at a number of points, notably at Winnipeg, Man., exceeding all previous records. The settlement of the strike at Toronto improved employment for

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

[This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet.

ers working to their utmost capacity on barrels, fruit-cases, &c. In the *printing* and *allied trades* little change was reported from August, the month being one of fair general activity. Under the *clothing branches*, journeymen *tailors*, with the advent of

cool weather, had a better month than August; with the fall millinery openings, also, employment was considerably stimulated in these branches. *Boot and shoe-makers* also reported improved conditions, though the season as a whole for the latter

class has been inclined to quietness. The *leather branches* had a better month than August. *Cigarmakers* and *tobacco workers* had a good month, and *bakers* and *confectioners*, especially during the exhibition season, were very busy, the latter class, also, beginning, in the case of those employed in factories, to be very active in anticipation of the Christmas demand. *Ice handlers*, with the close of the summer season, were somewhat dull. Among the other miscellaneous trades affected by the close of the summer season were *hotel* and *restaurant* employees, who report that the past tourist season compares unfavourably with 1903. *Theatre employees* on the other hand, began to be busy. *Canning factories* were running to full capacity during the month, and a scarcity of labour was experienced in some sections of Ontario. *Unskilled labour* had, on the whole, a busy month, and may be said to have been generally in demand, except at a few points where outside employment was affected by wet weather, or by the conclusion of works undertaken earlier in the season.

Proceedings of Associations, &c.

During September a large number of associations, the proceedings and resolutions of which were of direct interest to labour, held their annual meetings. The proceedings of the more important of these, including the Dominion Trades and Labour Congress, the National Trades and Labour Congress, the Manufacturers' Association, the Grand Council of the Provincial Workmen's Association, the Ontario Municipal Association, and the Union of Canadian Municipalities, which appear elsewhere in the present issue of the *Gazette*. Briefer references to other meetings of the month are as follows:—

The third annual convention of the Ontario Firemen's Association was held at Toronto.

The annual convention of the Structural Iron Workers' Union was held in Toronto.

Delegates to the St. Louis International Electrical Congress visited Canada.

The annual convention of the Farmers' Association, Canada, was held at Toronto during September. Over 1,400 members were stated to be in affiliation. Co-operation and public ownership were discussed.

A meeting of the New Brunswick Wagon-makers' Association was held at St. John, and a resolution passed requesting the government to amend the Act fixing the width of tires.

At the 37th Annual Trades Union Congress of Great Britain, held at Leeds during September, and representing 1,500,000 work-people, a resolution was passed urging the appointment of a minister of labour with cabinet rank.

The Retail Custom Harness-makers of Ontario held their 5th annual convention in Toronto, about ninety members being present. The title of the organization was changed to the 'Master Harness-makers' Association of Ontario.' Mr. C. H. Hicks, Uxbridge, was elected president, and Mr. Alex. Downey, Toronto, secretary.

The annual meeting of the Dominion Millers' Association was held at Toronto, representatives from twenty-six counties being present. The wheat crop for the present season was the subject chiefly under discussion. Freight rates were also discussed. Mr. H. Shaw, Toronto, was elected president, and Mr. C. D. Watts, Toronto, secretary.

The annual meeting of the Dominion Furniture Manufacturers' Association was held at Berlin. Business was reported fair, most dealers having heavy stocks on hand. It was stated that the supply of labour was greater than a year ago. Mr. D. Hibner, Berlin, was elected president, and Mr. George F. Macdonnell, Toronto, secretary.

The annual convention of the Master Horseshoers Protective Association, of Ontario, was held at Peterborough during September, the secretary reporting that since October, 1903, thirteen new local branches had been added to the association, the membership now being over 200. Mr. F. H. Hearn, Brantford, Ont., was

elected president, and Mr. R. B. McGill, secretary-treasurer. The next annual convention will be held at London, on the first Monday in September, 1905.

The 36th regular meeting of the general executive committee of the Intercolonial Railway Employees' Relief and Insurance Association was held at Moncton. A number of claims for total disability were ordered to be assessed and paid. In view of the surplus existing in the temporary employees' accident fund, it was decided to recommend that these employees be paid a maximum of 26 weeks' indemnity in any one year, instead of 13 weeks, as at present. Certain changes in the constitution with regard to the payment of sick allowances were approved.

At the annual meeting of the Maritime Board of Trade, resolutions were passed recommending the further protection of the lobster fishery, the establishment of a Canadian Fast Atlantic service, the double tracking of the Intercolonial Railway where needed, government ownership of telegraphs in Prince Edward Island, the encouragement of immigration, the encouragement of the steel ship building industry, and advocating the abolition of the right of municipalities to impose a license fee upon mechanics and labourers working within and residing outside of the municipality.

Notes of the Month.

Toronto, Montreal and Winnipeg report the highest *post office collections* during September of any month during the past year.

Returns from the various *free bathing* stations of the city of Toronto for the season show a total of 106,654 bathers.

The *Toronto District Trades and Labour Council* addressed an open letter to the Manufacturers' Association meeting in Montreal, with reference to the relations of capital and labour.

The assets of the *Canadian Woollen Mills* were purchased for \$253,000 cash. The property included the plants of the

company at Carleton Place, Hespeler and Waterloo, the site at Lampton Mills and the stock of manufactured goods and raw material.

The *Shawenegan Water and Power Company* have completed arrangements to deliver 10,000 additional horse-power into Montreal by December 1. Additional transmission lines will be erected.

Notice was given to the American Tobacco Company, and the Empire Tobacco Company by the Department of Inland Revenue that they would be required to abandon their *exclusive contract* system under the penalty of cancellation of licenses.

A draft Bill prepared for consolidation by the Lord's Day Alliance and the Minister of Justice, with regard to *Sabbath* observance, was referred by Order in Council during September to the Supreme Court of Canada, to determine whether the proposed legislation would fall within the jurisdiction of the federal or provincial authorities. The draft Bill fixes a maximum penalty of \$40 for any one who works on Sunday.

Statistics collected by the American Iron and Steel Association with regard to the production of *pig iron* in Canada during the first six months of 1904 show a decrease as compared with either of the two halves of 1902-1903. The decrease as compared with the first half of 1903 was 12,287 tons, or about nine per cent as compared with the second half of 1903, 11,845 tons, or a little less than nine per cent. On June 30, 1904, Canada had fifteen complete blast furnaces, of which six were in blast and nine were idle. Ten furnaces were in blast during the first half of 1904 for the whole or part of the period.

The quarterly report of the Free Municipal *Labour Bureau* of Montreal, for the 3 months ending August 31, was as follows:—

Average number of applicants.. . . .	1,750
Situations offered.. . . .	1,108
Situations obtained.. . . .	1,050

The situations obtained were:—Four agents, 4 apprentices, 31 kitchen helpers, 1

conductor of elevator, 1 barber, 1 butcher, 5 laundry employees, 8 female cooks, 22 male cooks, 23 carpenters and joiners, 697 farm labourers, 14 carters and coachmen, 8 scrub women, 5 blacksmiths, 4 chamber maids, 5 dining room girls, 12 hotel and restaurant employees, 11 stable and yardman, 4 gardeners, 131 labourers, 1 housekeeper, 2 messengers, 1

factory employee, 1 storeman, 1 for general work, 7 pressmen and feeders, 1 pastry cook, 3 tinsmiths, 3 painters, 3 men for general repairing of houses, 15 servant girls, 16 compositors (printers), 2 tailors, 1 wagon and coach maker, 1 baker, 1 engineer. Total: 1,050.

II. REPORTS OF LOCAL CORRESPONDENTS.

SYDNEY, N.S., AND DISTRICT.

* *Mr. John Moffatt, correspondent, reports as follows:—*

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions during September were slightly better than in August. The demand for labour was fair, the market being considerably affected by the large number of men (300) who left for the harvest fields of the North-west.

Wholesale trade is only fairly active, while retail trade is very good.

Shipping, apart from the regular boats calling for iron ore and coal, is rather inactive.

The building trades around Sydney are inclined to dullness. In the surrounding district there is a fair amount of this class of work.

The Ferguson-Buller case which was tried in the June courts, was to have come up again in the fall court, held in Halifax, Ferguson having appealed owing to the small amount of damages awarded by the jury. By mutual agreement, however, Ferguson and Buller Lodge Committee placed the case before a board of three arbitrators. The board awarded Ferguson \$140 damages. The board sat on the 13th and 14th of September in Stellarton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Grain crops are below the average, but the root crop is fair.

Fishing.—Fisheries are a failure this year. The catches of cod were poor; spring herring was fair, but late herring was a failure. Spring mackerel were plentiful, but fall mackerel were scarce. Salmon and shad were also scarce, with lobster catches

fair. The scarcity of herring did not enable a satisfactory test of the Scotch method of curing to be made at Canso during the summer, and the experiment will be continued next year.

Mining.—The coal industry shows an improvement over last month, although considerable broken time was experienced in some of the Cape Breton collieries. The fall work will be as active as the summer if not broken. With the exception of one or two of the smaller collieries of Cumberland, the collieries there and in Pictou county are working steadily. The new Allan shafts at Stellarton are being sunk at the rate of 100 feet per month. They are now down over 400 feet. Mabone colliery is said to be producing coal. The Egerton Electric Company in Pictou county was not ready to operate its tramway in September. It may, however, be running in the early part of next month.

Manufacturing.—The steel industry at Sydney is slightly improving, though as yet there is but one blast furnace going. The stoves of No. 2 are lit, and the second furnace may be started within three weeks. This will furnish a larger supply of newly manufactured material to the four or five open-hearth furnaces now running, as the present supply of scrap is rapidly running short. The engines for the rail mill are to be placed in position as soon as the concrete beds for them are ready. The wash plant is almost completed, and will be off the contractors hands as soon as the belting is changed. The Sydney Mines steel plant is progressing slowly; most of the pig iron is being shipped. It may be some months before the open-hearth furnaces are started up. The iron industry at Londonderry is gradually improving. The quality

of the iron is good, and there is a very fair demand for it. The company is still adding to its ore areas, and in a short time may further improve the plant by erecting a rolling mill. A new round house, which will shelter ten locomotive engines, is to be erected near to Mulgrave; work has begun on the foundation, and the contract is let.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, stonecutters and builders' labourers were rather inactive. Carpenters and joiners, lathers and plasterers were busy around mining districts, but not in Sydney. Plumbers and gas and steam-fitters were all actively employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, and coremakers were all satisfactorily employed; also machinists, engineers, electrical workers and linemen. Stove mounters, sheet metal workers, tool sharpeners and horseshoers were all active. Blacksmiths and iron shipbuilders were fairly busy, while jewellers and watchcase makers experienced a slackness in work.

Woodworking and furnishing trades.—Woodworkers, car builders and pattern-makers were busy.

Printing and allied trades.—Printers and pressmen were busy.

Clothing trades.—Journeymen tailors and garment workers were dull. Boot and shoe workers were well employed.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were all active. Ice handlers were not very busy.

Miscellaneous.—Barbers were busy. Clerks and stenographers found conditions dull. Hotel, restaurant and theatre employees, laundry workers, &c., experienced a fair trade.

Transport.—Railroad conductors, locomotive engineers and firemen, railroad telegraphers, railroad trainmen, switchmen, trackmen and freight-handlers were all ac-

tively employed. Ship labourers and long-shoremen found conditions unfavourable. Street railway employees were busy.

Unskilled labour.—Fair conditions were reported.

HALIFAX, N.S. AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market during the past month has been exceptionally good, and in point of activity surpassed that of the previous month. This was due largely to the preparations for the opening of the provincial exhibition, and many branches of labour were busy as a result. The fine weather of the past month has permitted outside work to be carried on without interruption, and all branches of the building trades have been quite busy with many fairly large stops being made. Commercial activity, wholesale and retail, continues with good indications for a prosperous autumn trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Conditions in this industry indicate a good crop, generally, with hay, perhaps, an exception.

Fishing.—This branch has been normally good during the past month, and local fishermen report mackerel again striking in, with many fairly large stops being made near the end of the month.

Railroad construction.—The first consignment of freight came over the Halifax and South Western Road during September. Kempt road bridge, 3 miles from Halifax, is open for traffic. Fencing will be finished to Halifax, October 1. The road is ballasted from Indian river east within 3 miles of Halifax, and completed from Mahone Junction to the head of Margaret's Bay. Ten miles only remain to be ballasted, which will be completed October 1. Track is now laid to Italy Cross—11 miles. A mile a day is the average. A steam shovel will be at work on October 5, ballasting the

Liverpool end. Work is now commenced at Shelburne, running westward to connect with the road at Barrington, a distance of 20 miles. Ingram river bridge is also completed. The car shops here are busy, and two boarding cars will be finished in a few days for the western section. The railway is being pushed forward rapidly.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, stonecutters and plumbers still continue to be busily employed. Carpenters and joiners, lathers and plasterers reported work normal. Painters were fairly well employed, and work with builders' labourers was satisfactory.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, electrical workers, blacksmiths and boilermakers were fairly active. Machinists, engineers, caulkers and shipwrights were busily employed, with horseshoers only normally so.

Woodworking and furnishing trades.—Those employed at these industries were fairly well employed during the month.

Printing and allied trades.—Printers and pressmen were busy.

Clothing trades.—Tailors and garment workers were fairly busy.

Miscellaneous.—Barbers, clerks, delivery employees, hotel and laundry workers were busily employed.

Transport.—Railroad and steamboat men were busy. Ship labourers and teamsters were fairly active.

Unskilled labour.—This class of labour found conditions of employment fairly satisfactory.

CHARLOTTETOWN, P.E.I., AND DISTRICT.

Mr. F. J. Nash, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Supply and demand were well balanced in the labour market during September, a condition similar to that of August. A

feature of the past month was the departure of a large contingent of harvesters to work in the grain fields of the North-west. Building operations continued fairly active in city and country. The market house in Charlottetown, which has employed a large number of men in construction, was completed this month. Merchants report business in September better than in August, the buying of fall goods having started, whilst August witnesses the conclusion of the summer trade. A shortage in the crops of this province where agriculture is the main industry has naturally caused business men to be a little cautious in buying, but no unfavourable results are yet manifest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The latter part of the month saw all the crops with the exception of roots gathered in. Grain and hay are below the average, but although potato digging does not begin till next month the indications are that the yield will be equal to, if not above that of last year. The cheese industry will be unsatisfactory. The price is unusually low, and the output, owing to the shortage of the pastures on account of the drought, will be considerably below the average.

Fishing.—Oyster fishing began during the latter part of the month, with good prospects. In other lines there was very little doing.

Manufacturing.—The few factories in the province reported a steady business.

Railroad construction.—The Murray harbour and Belfast road is practically completed, but surveying has been carried on this month between Emerald and New London, Souris and Elmira. Cardigan and Montague. A large force of men are still employed at filling in the approaches to the Hillsborough bridge and assembling the superstructure, two spans of which are now in position. New stations are being erected at different points on the main railway line, and extensive curve-straightening operations at Curtis creek.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons and builders' labourers had a fair month. Carpenters and joiners and plumbers were busy, and lathers and plasterers, painters, decorators and paperhangers fairly busy.

Metal, engineering and shipbuilding trades.—Ironmoulders, ironworkers and helpers, machinists and engineers, steam engineers, electrical workmen and linemen had a busy month.

Woodworking and furnishing trades.—Woodworkers and upholsterers were busy. Carriage and wagon makers had steady employment. Carbuilders were also busy.

Printing and allied trades.—Printers and bookbinders were busy.

Clothing trades.—Journeymen tailors, garment workers, and boot and shoe workers had a good month.

Food and tobacco preparation.—Bakers and confectioners, butchers and tobacco workers were busy.

Leather trades.—Tanners, curriers and saddlers had steady employment.

Miscellaneous.—Barbers, clerks, and delivery employees had a good month.

Transport.—Railroad conductors, locomotive engineers, railroad telegraphers, trainmen, switchmen, trackmen, freight-handlers, longshoremen and expressmen were steadily employed.

Unskilled labour.—There was a fair demand for unskilled labour during the month.

houses, stores, dwellings, &c., besides a church and school-house, and it is considered to be one of the most valuable properties in New Brunswick. It will be operated under the name of the Bay Shore Lumber Company.

The St. John Times Printing and Publishing Company will have a capital of \$100,000, divided into 1,000 shares of \$100 each. The first number of the *Times* will be issued on October 1, and will be in the form of an eight-page daily. The *Evening Gazette* will cease publication September 30, the *Times* Company having purchased its plant. Eight steamers of the Canadian Pacific Railway fleet will be engaged in the St. John trade during the winter as follows: Three running to Liverpool, three to London and Antwerp, and two to Bristol. The first steamer will leave November 29. There will be nine sailings to London and Antwerp, eleven to Liverpool, and eight to Bristol, making twenty-eight in all. The Wagon Makers' Association assembled in St. John September 22, and after considerable discussion on that part of the new Highway Act, relating to the width of tires, the following resolution was adopted:—

That this association memorialize the government to amend the Act by changing the proposed width of tires, making them as follows: One and a half inch axle, two inch tire; one and five-eighth inch axle, two and a quarter inch tire; one and three-quarter inch axle, two and a half inch tire; one and seven-eighth inch axle, two and three-quarter inch tire; two inch axle, three inch tire; two and a quarter inch axle; three and three quarter inch tire; two and a half inch axle four inch tire.

During October meetings will be held in Woodstock, Moncton, and Newcastle. Bank clearings for the five weeks ending September 29 were \$5,356,915, and for the corresponding period last year \$4,944,907, being \$412,008 greater in 1904 than in 1903. Wholesale and retail traders report that business was exceedingly good during the month, caused by the large number of visitors, who were in the city attending the exhibition. There has been no change in the rates of wages and hours of labour, and the city has been free from strikes and lock-outs.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market during September was exceedingly active, all branches of industry being well employed. The Pejepacot Paper Company, of Brunswick, Maine, has purchased from C. M. Bostwick 100,000 acres of well wooded land situate at Great Salmon river and Martin's Head, St. John county. There are also lumber mills, ware-

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Reports from the country districts are that crops will average about the same as last year, although the recent heavy frosts did considerable damage to the grains.

Fishing.—During the early part of the month sardines struck in the harbour in large quantities, but the prices were very low. Other varieties of fish are scarce and prices high. Fresh herrings are retailing at 15 to 20 cents per dozen; haddock, 5 cents per pound; smoked and cured fish are coming in in large quantities, and are finding a ready sale.

Lumbering.—The Fredericton Boom Company reports that during the week ending September 27, 2,675 joints were rafted. The average number of men employed on the Douglas boom was 104, and on the Mitchell boom, 108.

CONDITION OF PARTICULAR TRADES.

Building Trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers were well employed. Plumbers, gas and steamfitters were busy. Stonecutters, painters and builders' labourers say that work was plentiful.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers were fairly well employed. Machinists and engineers active. Electrical workers and linemen were busy. Blacksmiths and boilermakers were normal. Sheet metal workers were exceptionally busy.

Woodworking and furnishing trades.—Woodworkers were very active. Shingle weavers were only fairly employed.

Printing and allied trades.—Printers and pressmen were busy. Bookbinders report an improvement over last month.

Clothing trades.—Journeyman tailors were all employed except one, and the journeymen tailors' union claims that it has won the strike, as all the men except one have gone to work in union shops.

Food and tobacco preparation.—Bakers and confectioners report work active. Cigar-makers say work is only fair.

Miscellaneous.—Brush and broom makers were well employed.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen, railroad switchmen, railroad trackmen, and freight handlers have been very active on account of the large amount of travel during the exhibition. Steamboat men and steamboat firemen were very active. Ship labourers reported an improvement over last month. Street railway employees had all they could attend to during exhibition week. Cab drivers and hackmen also were very busy during the rush of visitors, and teamsters and expressmen were well employed.

Unskilled labour.—Unskilled labour was very active.

DISTRICT NOTES.

Newcastle.—The new furniture factory is rapidly nearing completion, and when finished will give employment to nearly one hundred hands.

QUEBEC, QUE., AND DISTRICT.

Messrs. P. J. Jobin and Edward Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Rainy weather and frosts retarded employment during September. Apart from this drawback, the month compared favourably with August, though there were plenty of men to meet all demands, especially as no new works of any magnitude are being undertaken. No strikes or lock-outs were reported.

The annual meeting of the Quebec Bridge and Railway Company was held on September 6. The engineer's report, showing the condition of the work under contract for the company during the past year, chiefly in connection with the bridge over the St. Lawrence, was presented.

A gang of about one hundred and fifty men are working in Commercial, St. Laurent and Cote Begin streets, Lévis, digging the trenches for the new waterworks. A large number of pipes have arrived, and

are being distributed along the route. Three steam drills are at work on Cote Be-gin, each of which does the work of fifty or sixty men.

Some twenty-two delegates from labour bodies in this city are attending the second convention of the National Trades and Labour Congress in Ottawa.

The free employment bureau of the city hall is doing satisfactory work since its establishment two months ago.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting was seriously delayed by the rainy weather. Frosts also did some damage to grain crops.

Lumbering.—The sawmills are approaching the end of their season's cut.

CONDITION OF PARTICULAR TRADES.

Building trades.—There was much loss of time for outside workers owing to the rainy weather. Bricklayers and masons, carpenters and joiners and lathers had a dull month. Painters, however, were active, and plumbers and steamfitters were busy.

Metal, engineering and shipbuilding trades.—Moulders and machinists had a busy month. Boilermakers and iron ship builders had an active month on repair work, though no heavy jobs were reported. Electrical workers and linemen had a fair month.

Printing and allied trades.—Printers are not as active as in August, and a number of men were in idleness. Bookbinders find work plentiful, and overtime prevailed in some establishments, though there were men enough to meet all demands.

Clothing trades.—Boot and shoe workers report an improvement over August, though no exceptional activity prevailed.

Leather trades.—Tanners and curriers were more active than in August.

Miscellaneous.—Barbers report a fair trade. Hotel and restaurant employees were fairly active, but the tourist season has been much quieter than 1903.

Transport.—Ship labourers and long-shoremen had a dull month.

Unskilled labour.—Apart from weather conditions, a fair month was experienced.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the labour market during the month of September. All classes of trades and industries have been well employed, and there is but one industry, and that a small woollen mill, that is running on short hours. In all other branches the demand for labour is well maintained. Considerable damage was done in the district about the 7th and 18th of the month by heavy rain storms. In some places both crops and buildings were damaged.

The question of municipal ownership has again been brought forward. The council is now calling upon the water company to go to arbitration, basing the demand on a clause in the contract between the city and company, passed in 1887, which reads that the city can take over the works by arbitration in July, 1905. The matter will in all probability be decided in the law courts, as it is contended that the clause in question was voided when the city took over the water from the company some eight years ago.

The transportation companies report business as very good, many having taken advantage of the cheap fares offered in connection with the various exhibitions in the district and at a distance.

Retail merchants report business as being a little slow after the rush experienced at the first of the month, due to the ten days' exhibition.

There has been no unrest among employees reported during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have completed their harvesting operations, except in a

few cases. The wet weather retarded operations, but, so far, in this district, little damage was done to the crops. The frost of the 22nd did considerable damage to garden stuffs. The farmers say that roots are a good crop, with the exception of potatoes, in which the rot has appeared. Where potatoes are in heavy soil about one-half is affected from rot, while in lighter soil it is not quite so serious.

Lumbering.—The various drives which come down the St. Francis river have all been secured, the heavy rains having kept the rivers well up for this operation.

Manufacturing.—All manufacturing industries are running full time, with the exception of the woollen mill, which runs but five days a week.

Mining.—Reports from the mining centres at Black lake and Thetford mines, state that all the properties are being worked to their full capacity, and that labourers are still in demand. The asbestos property at Black lake has been disposed of to an American syndicate for \$240,000. The mine will be opened up, and mills erected at once, so that there will be a large increase in the number of men employed.

Railroad construction.—The railway companies give employment to large numbers, and the Quebec Central Railway had a special call for men at the first of the month to repair two washouts which occurred on their system.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons and bricklayers had considerable broken time during the month owing to the wet weather. Carpenters, joiners, plasterers, painters and stonecutters were fully employed.

Metal, engineering and shipbuilding trades.—Moulders, machinists and all allied trades connected with the machine shops here had a good month.

Woodworking.—All woodworking trades report work very plentiful.

Printing and allied trades.—The various printing shops report a good month's business.

Clothing trades.—Business has been well maintained, and although there has not been a rush of work no hands have been laid off.

Food and tobacco preparation.—Bakers and confectioners are busy. Both cigar factories have had a good month, and in one overtime had to be put in to keep up with the orders.

Miscellaneous.—Barbers, clerks, delivery employees, hotel employees and laundry workers report a good month.

Transport.—Railway men were steadily employed during the month.

Unskilled labour.—This class of labour is still in good demand.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market in general has not been as active as in previous months, owing to the very inclement weather. Shipping has been fairly active and will continue so until the close of navigation. Outside work has not been active. Building repairing, both inside and outside, has been more active than for many years past; in certain localities almost every second house is undergoing repairs of some kind. Trade generally has been dull during the whole month, caused by unfavourable weather conditions. No changes worth mentioning occurred in either rates of wages or hours of labour, and competent men commanded good wages.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The agricultural outlook is not so favourable as indicated in August, and harvesting has been greatly retarded. If fine weather does not set in at once the potato crop in many places will be badly affected, and will certainly be high in price.

Lumbering.—The saw mills are all running full time and will continue so until the end of October. There is plenty of employment for all who wish to work.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were retarded and the completion of several buildings delayed by unfavourable weather. Painters have found work plentiful, but will experience the usual slackness until early spring.

Woodworking and furnishing trades.—Woodworkers were kept busy with inside work, and carriage and wagon workers were busy on repair work.

Printing and allied trades.—Conditions in these lines were fairly good.

Clothing trades.—The tailors and garment workers have all the work they can attend to. A branch of the 'Semi-ready' Company has been established here.

Food and tobacco preparation.—Bakers and confectioners have been doing a satisfactory business all month.

Leather trades.—Boot makers (on moccasins), saddlers, tanners and curriers were busy.

Miscellaneous.—Barbers, clerks, stenographers, typewriters, laundry workers, hotel and restaurant employees were all very busy.

Transport.—All men employed on railways were steadily employed. Ship labourers have been fairly employed this month discharging coal and loading lumber, and they will no doubt have a better month in October.

Unskilled labour.—This class of labour was fairly well employed.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has continued in the same state as last month, work for day labourers being very active, owing to the

corporation having built a great many sidewalks in asphalt and in cement. Drainage canals are also to be constructed, which will employ many hands. In the woollen industry work has not been favourable to the operatives; in several of the departments the hands have only worked three and four days per week. Work also was not plentiful in the boot and shoe industries. The construction of the dairy and model school is advancing rapidly. The distillery is soon to resume operations, after having been closed for a couple of months.

The following is a brief statement of prices paid for house rent and also for the construction of workmen's houses. Since May 20, 1903, when the greater portion of the houses belonging to the workmen were destroyed by fire, lodgings have become scarcer and the price has increased. House rents range from \$6 to \$9 per month, and they have to pay the water tax in addition. For a rental of \$72 per year the tenant is obliged to pay \$10 water rate, and if the tenant wishes to take part in the elections of aldermen and to have right to vote he must pay a tax as tenant. No families, however, are obliged to go boarding through not finding lodgings. Since 1903 rents have increased more and more, and this fall there is a tendency to a still further advance. Workmen and others who wish to build are obliged to spend from \$1,200 to \$2,000 outside of the city, but in the city houses containing a couple of lodgings cost from \$2,000 to \$3,000, according to the site on which they are built. This fall many of the workmen are buying houses, saying that it costs less than to pay rent.

Business during the month has been quiet and banks report a good month, though wholesale and retail merchants say that business was not so good this month as might be. Rates of wages have not changed nor has there been any change in hours, except in the Ames and Holden establishment, which since the 10th September has worked on Saturday afternoons

until five o'clock. Cordial relations continue between employers and employed.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and market gardeners had a busy month. The weather has not been favourable and the gathering of the fruit and other crops was accomplished with great difficulty, especially in the case of potatoes. These were affected with rot, and the price has increased 50 cents a bushel, and the market shows a further upward tendency.

Manufacturing is very active in some lines.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, carpenters, plasterers and painters have been busily engaged. Plumbers, gas and steam-fitters had an abundance of work, and some have worked overtime.

Metal, engineering and shipbuilding trades.—Moulders and machinists had a good month, and electrical workers had plenty to do. Blacksmiths and boilermakers also report satisfactory conditions.

Woodworking and furnishing trades.—The woodworking trades have enjoyed similar conditions to the preceding month. Workers in sash and door factories, cabinet-makers and carriage workers have been fully occupied.

Printing and allied trades.—Printers continue very busy.

Clothing trades.—Garment workers report very active conditions. Girls and women are required at the Eastern Clothing Co.'s factory. This firm employs about 60 hands nearly all the time. Shoemakers report dull times.

Food and tobacco preparation.—Bakers and confectioners are actively employed. From September 25, bread will be advanced one cent, which will bring it to 16 cents a loaf. Hotel and restaurant employees and laundry workers have been very busy.

Transport.—Railway train hands and freight-handlers report a very good month. Carters say that business has been fair.

Unskilled labour.—No day labourers are idle, though the supply seems equal to the demand.

MONTREAL, QUE., AND DISTRICT.

Mr. Gustave Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Satisfactory conditions prevailed in the labour market during September, especially in the building trades, in which all hands have been well employed, particularly the carpenters, joiners and builders' labourers, notwithstanding the arrival of many outsiders since spring from Europe and the United States. Business in general was good, but importations of fruit have been lighter than during August. Quiet prevailed in the industrial world, all strikes being now over, a circumstance especially pleasing to the grocers, butchers and storekeepers in general, who, during the past five months, were obliged to advance goods to the strikers. Workingmen's lodgings are scarce, two families being in many cases forced to live together in a lodging of from four to six rooms owing to the lack of houses. The winter promises well, as several large buildings will be ready for wood and marble work, the foundations being already above ground. In this respect the following buildings might be noted: The Sovereign Bank, which will be ten to eleven stories high; the store of the Messrs. Scroggie, one of the largest departmental stores in Montreal. The work on the Bank of Montreal, which has been in progress for three years, is about finished. This is stated to be the finest edifice used as bank premises in Canada, not only for its interior finishings but for its safety. The woodwork was done by Messrs. Simpson & Peel, stone and brickwork by Morrison & Co., and the marble by Forsyth & Co. Coal has not as yet increased in price, and is selling for \$6.75 per ton. The permanent freight sheds are being pushed forward very rapidly; the first part is completed, and at the commencement of Octo-

ber the foundations of the second portion will be laid.

CONDITION OF LOCAL INDUSTRIES.

Manufacturing.—Very busy conditions prevail in some cases. The cotton industry, however, is not as active as it was.

Railroad construction and employment.—There is much work in relaying rails, over 400 men being employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades have been very active during September.

Metal, engineering and shipbuilding trades.—Business was fair with iron moulders, iron workers and coremakers, and conditions satisfactory with electrical workers and linemen. Blacksmiths and boilermakers were very active. Shipwrights, caulkers and sheet metal workers report trade good, and tool sharpeners, horseshoers and jewellers have been very busy.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders, pattern makers were actively engaged.

Printing and allied trades.—These trades have all been very busy.

Clothing trades.—Journeymen tailors, garment workers, hat and glove makers report business good. Boot and shoe workers were very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters have been busily employed. Ice drivers report quiet conditions. With cigar-makers and tobacco workers business has slightly improved since last month.

Leather trades.—These trades have been fully occupied.

Miscellaneous.—Barbers, delivery employees, furriers, hotel, restaurant and theatre employees, and laundry workers, had a very satisfactory month.

Transport.—Locomotive firemen, steamboat men, longshoremen, street railway em-

ployees, cab drivers, teamsters, &c., were very busy.

Unskilled labour.—There is an abundance of work for this class, day labourers being scarce.

MONTREAL, QUE., AND DISTRICT.

Mr. Thomas J. Griffiths, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour on the whole was in satisfactory demand during the past month, the demand for skilled labour being equal if not greater than in the month preceding, while the demand for unskilled labour, especially for outdoor work, has increased. Labourers for building roads and railway construction were in active demand. Up to September 18, permits were issued for 841 new dwellings as compared with 787 dwellings for the whole of last year.

The Protestant board of school commissioners has raised the salaries of teachers engaged by the board as follows:—

Male principals to receive \$1,000, with an annual increase of \$50 until the maximum \$1,500 is reached; principals in charge of school composed of more than 16 classes to receive in addition to the above mentioned salary \$50 per annum for every class over sixteen up to \$1,800. Male assistants to receive on commencement a salary of \$600, and \$50 annual increase to a maximum of \$1,000. Female teachers in kindergarten, preparatory and first year to receive \$300, with an annual increase until the maximum of \$400 is reached. For second and third year work an initial salary of \$350 is allowed with yearly increases up to \$450. This affects the largest number of teachers engaged by the board, and means in comparison with former salaries an increase of 27 per cent. Female teachers in fourth and fifth year work, who were formerly paid \$330 to \$400 per year will now receive from \$400 to \$500 per year, an increase of 21 per cent over the former minimum, and 14 per cent over the former maximum. The sixth year teachers also receive an increase up to a maximum of \$550. In Montreal high school teachers in the first to fifth year will receive \$550 and in the sixth year, \$650. Teachers in the girls' high school for similar years will receive from \$525 to \$575 per year. Senior teachers in this school will receive from \$500 to \$700.

The announcement has been made of the establishment of two new industries, viz.: A corroding industry and a white lead manufactory; the latter will occupy the old Canadian Pacific Railway Company shops,

situated on DeLorimier avenue. The Dominion Oil Cloth Company has just turned out at its new buildings on Parthenais street the first rolls of linoleum ever made in Canada.

A technical institute is about to be established, and a provisional board has been appointed. The Mechanics Institute will co-operate and business people and workmen will assist.

CONDITION OF PARTICULAR TRADES.

Building trades.—All engaged in the building trades were fully employed.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, coremakers, machinists and engineers were fairly well employed. Electrical workers and linemen, metal polishers, buffers, platers and brass workers were busy; also blacksmiths and boilermakers.

Woodworking and furnishing trades.—Woodworkers, upholsterers and car builders were busy, and pattern makers were fairly well employed.

Printing and allied trades.—All employed in these trades had fairly satisfactory employment.

Clothing trades.—All engaged in these trades were fairly well employed.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, cigarmakers and tobacco workers were busily employed.

Leather trades.—Tanners and curriers, leather workers and saddlers were busy, and trunk and bag makers found fair employment.

Miscellaneous.—Barbers were fully employed. Clerks and stenographers, and delivery employees were fairly well employed. Hotel and restaurant employees, theatre and laundry employees were all fully employed.

Transport.—All engaged in the railway transportation service experienced a fairly satisfactory month's work. Steamboat men, steamboat firemen, ship labourers and long-shoremen were fairly well employed. Street railway employees, cab drivers and hack-

men, carters and draymen were fully employed.

Unskilled labour.—This class of labour was in active demand.

HULL, P.Q., AND DISTRICT.

Mr. Rodolphe Laferrière, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in and around Hull during the month just passed was very favourable. A scarcity of hands continued as during the previous month, and it is stated that the shanties will have difficulty in securing the required number, especially if wages are not increased instead of decreased, as was threatened last month, as there are no men to be had in the city for outside requirements. These conditions will prevail for some months, it is expected, since even the closing down of the mills later on in the season will not leave many men idle. The Matthews Packing Company is contemplating the putting up of large additions to buildings, and the starting of new branches in the city. The offer of the company to the city council points to the employment of over one hundred additional hands. The corporation works which started on September 30, mean the employment of a lot of labourers at \$1.35 per day for the remainder of the fall. The corporation has some \$35,000 to spend on its new water works within the coming two months. The surveys of the transcontinental railway and of the Georgian bay canal have taken a few men from this city. The cement works employ about 300 hands just now, but the operations in the factories will not begin for some months yet. Trade in general is very active, and the banks are satisfied with business, as money is readily borrowed on city property. Many important real estate deals at more than satisfactory prices have been recently made. Building is doing fairly well, and prospects are for even better conditions than the present.

The city of *Buckingham*, an active centre of industry, reports very active business this fall. Mines, factories, mills and building operations are all working full time, and there is nobody idle. The Anglo-American Graphite Mine Company is extracting and crushing ore, and the pure plumbago is exported. The company employs about 100 men, whom it pays from \$1.25 to \$2.50 per day. The better-paid men work at steam drills or crushers. The Electric Reduction Company is busy, and works twenty-four hours every day, the year round. It is stated to be the oldest electric reduction plant in America. Phosphate is used in making phosphorus and other by products. The James McLaren Company, Limited, employs about 600 men in its sawmills, and pays them between \$1.25 and \$2 per day. The Kelly and Kaushick companies also employ each about 50 men in their sawmills; the latter is working day and night. The McLaren pulp mill also employs two shifts. The stores and residences recently destroyed by fire are being rebuilt in better style than before. All the building trades are busy. The corporation is employing a squad of men improving the highways and streets. Houses are scarce, and those which rented formerly at \$3 and \$4 secure to-day \$5 per month. A fairly good house rents for \$10 and \$12 per month. The government works in the dredging of the Lievre river is another source of employment.

The town of *Aylmer* has also been very active during the past summer. The good times are keeping up. The fall fair which has just been held showed very clearly the prosperity of the farming community of this end of the district. Crops are exceptionally good. The lumber mills in and around Aylmer, the car shops for the Hull Electric and the Ottawa Northern and Western companies, and the power house at Deschênes, are all sources of good employment.

In *Hull* there has been no labour troubles or industrial disturbances, no com-

mercial or financial failures, no accidents to work-people and no changes in wages.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

September was a month of general activity and all classes of labour seemed to have ample opportunities of employment. The opening of the autumn season caused a revival in the trades naturally quiet during the summer months, while other trades were also busy. There was a scarcity of labourers in some lines, more particularly in farm labour, there being a complaint that the assistance to gather in the root and other late crops was insufficient. The holding of the Central Canada Exhibition drew on the supply of unskilled labour, while the approach of the cold season created special work. Increased activity was especially noted in connection with transportation. The corporation of the city of Ottawa had about 400 men employed at the close of the month on the construction of streets and sidewalks, about one hundred less than at the height of the season. Operations on civic work were delayed somewhat by the inability of the quarries to keep up with the demand for stone. The extensive civic works, the erection of the new university buildings, and the asphalt flooring being put down in the drill hall caused an abnormal demand for broken stone, and although the quarries worked day and night shifts, the supply was quite inadequate.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers in the district reported the work of gathering in the crops well advanced. The cold and unseasonable weather accompanied at times by heavy frost, caused a rush in saving the root crops, and some difficulty was experienced in getting the necessary help.

Lumbering.—The lumbering industry was active, full shifts being at work in all mills. The employment of men for the

shanties continued and a large number were engaged. The reduction of from \$3 to \$4 in the maximum wages did not prevent agents securing nearly all the men required, but complaint is being made that the class of men going to the limits was not, on the whole, as well qualified as in former years.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were active. The construction of a considerable number of small houses was started, with a view to completion for occupation this coming winter, and are giving employment to a number of workmen.

Metal, engineering and shipbuilding trades.—The iron trades experienced a revival, and towards the end of the month became much more active. The strike of iron moulders continued during the month, and at one time there was a slight disturbance, the strikers interfering with men at work in a foundry in the Chaudiere district. The trouble, however, was not of serious consequence.

Leather trades.—The leather trades were busy.

Woodworking and furnishing trades.—The woodworking trades were busy as a result of activity in building operations.

Printing and allied trades.—Activity characterized the printing trades in all shops. Job printers reported a very satisfactory month.

Clothing trades.—The clothing trades felt the effect of the approach of cold weather in increased trade.

Miscellaneous.—The master barbers applied to the city council for a by-law compelling the earlier closing of barber's shops, but the city solicitor has expressed doubts as to the legality of such a measure. Early closing is looked on as more a matter for common agreement than for legislation.

Transport.—All railway men were steadily employed. Steamboat traffic slackened towards the end of the month, the passenger boats tying up for the season. Freight boats will continue doing business

for some weeks, especially the barges engaged in carrying lumber.

Unskilled labour.—There was an abundance of work for unskilled labour.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fully employed during September, and in some cases, notably in the case of masons and other branches of the building trades, the supply was reported as not being equal to the demand.

In connection with the building trade generally, much activity prevailed owing to the erection of a number of new residences, and the extension and enlargement of churches, houses of refuge, the city buildings, and other public constructions. During the month extensions to the only tannery here were also begun, the plant being taxed to its utmost capacity. It is intended that the tannery, which now employs upwards of fifty hands, shall double its capacity within a year. This fall the capacity of the boiler will be doubled, and that of the leach house more than doubled. In order to lessen the cost of insurance, the extension will be of cement instead of wood, as at present. The extensions to the Frontenac cereal works will also be of cement, making them fire-proof. This building is to be 118 feet by 64, and comprise four stories besides a basement. The city council has decided to purchase two lots adjoining the recently acquired gas and electric light works, at a cost of \$3,192, for the purpose of carrying on the proposed extensions to this plant. If necessary, a temporary loan will be procured for this purpose. This makes an expenditure of \$10,000 in this connection. It is stated that the erection of the new barracks for the use of the Royal Canadian Artillery, for which an appropriation was made by the late parliament, will be begun almost at once.

The work of fitting up the new gymnasium at the Royal Military College, a handsome modern brick structure, is nearing completion. The contract for supplying the equipment was awarded by the government to a firm in Ottawa.

According to the assessor's report, just issued, Kingston's population has increased 200 during the year.

The Canadian Locomotive Works Company is busily engaged on a contract for the engines for the Temiskaming Railway.

More imports are coming through the local customs examining warehouse this autumn than ever before.

As far as the collection of taxes is concerned, this city is in a better position than it has been in many years past. Up to the 21st of the month \$22,000 had been collected, leaving about that amount still out. The unpaid taxes of 1901, 1902 and 1903 are also coming in well. The amount of old taxes available was \$30,000. Already \$20,000 of this has been paid in, and it is expected that by the end of the year the balance will be safe in the city coffers. The city will, therefore, have greatly improved its position, and will have much less interest to pay.

According to the report of the public school inspector, there is the largest attendance at present on record. There are at least fifty more than at the same time last year.

The heavy transportation business and the volume of bank clearings indicate marked activity in commercial lines. Wholesale and retail houses report good business for the month.

No changes in the rates of wages or hours of labour occurred during the month. The labour market was quiet with respect to strikes, lockouts, &c. There is a growing feeling here among the wage-earners in favour of the principles of arbitration and conciliation in the settlement of difficulties which may arise.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agricultural work was much retarded by wet weather. The local county and township fairs were unusually successful from financial and other standpoints.

Fishing.—Fishing is quiet, as is also the lumbering business.

Manufacturing.—Manufacturing of all kinds is active.

Mining.—Mining is very active. Surveys for the extension of the canals in this connection are already under way, to the very great satisfaction of those interested.

CONDITION OF PARTICULAR TRADES.

Railroad construction and employment.—Railroad constructions continue active.

Building trades.—With the possible exception of stonecutters and quarrymen, every branch of the building trade is actively employed.

Metal, engineering and shipbuilding trades.—There is no diminution in the opportunities for employment in connection with the metal, engineering and shipbuilding trades, all being fully employed.

Woodworking and furnishing trades.—The woodworking and furnishing trades are now occupied with the fall trade, which is in excess of last year.

Printing and allied trades.—Printers report a busy month.

Business in the *clothing, food and tobacco preparation, leather and miscellaneous trades* was reported as being active.

Transport.—Cold weather somewhat hampered transportation, but on the whole a busy month was reported.

Unskilled labour.—Unskilled labour was fully employed, and is still in much demand.

DISTRICT NOTES.

During the month at the instance of the Lord's Day Alliance, a summons was issued to a conductor on the city electric railway, charging him with a violation of the Sab-

bath Observance Law, by operating on a car on Sunday, August 28, 1904. After several hearings the police magistrate is at present reserving his decision.

Meetings to consider the bonusing of the Ontario Electric Railway were held in this district. The enterprise is meeting with much approval.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month of September was the busiest of any of the summer months for all classes of labour in this city and district. The demand for labour has been active and few idle men are to be found. Many men have been actively engaged in building new granolithic pavements, the city spending upwards of \$20,000 in this direction. This work will be completed about the middle of October. The cement works are fast nearing completion and many men are employed here. The rolling mills are also running to full capacity and giving profitable employment to a large number. Commercial men report a splendid month. A contract has just been awarded for the building of a stone wall along the east bank of the River Morris, by the harbour commissioners, to prevent damage by spring freshets. The work will start next month and will give employment to a large number of men. A government dredge is also expected here this fall. The Donnelly Wrecking Company of Kingston, is to repair the broken water-works main across the river. There has been no unrest in the labour market during the month, and no change in rates of wages or hours of labour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This county is noted for its successful agriculture, and almost every town and village had a very successful fall fair.

Fishing.—This industry is chiefly confined to supplying foreign markets.

Manufacturing.—The principal manufactures at present are the Belleville Lock Works, which are very busy; the Rolling

Mills, which are producing a fine grade of iron, and are expected shortly to go into the manufacture of railroad spikes.

Mining.—The government assay office officials are kept busy analysing different specimens. The ore from the Cook mine in the Atlas Co.'s mill near Marmora, was finished in September. This is an arsenic mine, and it averaged ten to twelve dollars a ton, and gives a handsome profit outside of the arsenic product. The Craig Gold Mining Company has been putting in a 16 drill compressor, with new boilers, and work will start about the first of October. A large number of miners are engaged. The principal stockholders of this mine are Americans from Newark, N.Y.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trade has been very quiet during September, although bricklayers and masons, as well as carpenters report a very good month at small jobs. Painters and steam and gasfitters were busy. Builders' labourers had a quiet month.

Metal, engineering and shipbuilding trades.—Iron moulders had a splendid month, while blacksmiths, machinists, bicycle workers and engineers were busy. Blacksmiths, boilermakers and shipbuilders also report a good month.

Woodworking and furnishing trades.—Most of the woodworkers were very busy, the principal demand being from outside points. Carriage and wagon makers were very busy. Coopers were also busy in this district during September, owing to shipments of apples.

Printing and allied trades.—In the printing line September has been a quiet month. Bookbinders were also quiet.

Clothing trades.—Tailors had a splendid month, as had also the boot and shoe workers.

Food and tobacco preparation.—All the trades under this heading had a good month, although ice-men were rather quiet the last of the month.

Leather trades.—Harness makers are busy and say they never had a better season.

Miscellaneous.—Barbers report a good month, as well as delivery employees. Theatre employees have had a busy half month. Laundry workers were all engaged.

Transport.—The principal event was the removal of a number of engineers to London, Ont., where they are in need of men. They left on September 28. This will promote a number of firemen here. Steamboat men and firemen have had a good season, although not as good as in previous seasons.

Unskilled labour is in good demand.

PETERBORO, ONT., AND DISTRICT.

Mr. W. J. Johnstone, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During September outside activity has been very general. The new street car system is completed, the company has added several new cars to the equipment, and street car employees were very busy. The industrial exhibition was held on the 26th, 27th and 28th instant, and a good display of agricultural products was exhibited. Good progress is being made on the construction of the Young Women's Christian Association building, the corner stone of which was laid on September 8, and which will give employment to a large number of skilled mechanics. The Canadian Machine Telephone Company is engaged putting in its plant for the new telephone system. The Taylor Hall Co., is busy making cement brick, a new article used in place of ordinary brick. Outside labour of all classes was in good demand. Bricklayers and masons were exceptionally busy. Commercial activity was evidenced by the heavy importation of coal during the month. Banks reported business good, with money circulation heavy. The labour market was free from all unrest.

A bad fire occurred here in the compound department of the C. G. E. works. The loss will run into the thousands of dollars, fully covered by insurance. About twenty-five men were thrown out of employment.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Harvesting is finished in this district; fall wheat sowing is also completed, and the farmers in general are very busy with fall ploughing and threshing. The yield of grain in all lines was good. Much interest was taken in the industrial fair, and produce of every kind from all over the district was shown by the farmers. The exhibits were very much above the average, and superior in number and quality to those of former years.

Lumbering.—The lumbering industry is very active. All the sawmills were running to their full capacity, and it is a difficult matter to get any stock ahead for winter use.

Manufacturing.—Industrial conditions in some shops were active, but most of the iron-working shops were quiet. Wood-working industries were especially active. The Cereal milling industry here was very busy, as were all the other grist mills, some of them running night and day to fill orders. The J. J. Turner Company, awning and tent manufacturers, have been exceptionally busy supplying goods for the exhibitions throughout the district. The Matthews pork packing establishment reported business very satisfactory in all branches. The Colonial Ink Company is doing an extensive business exporting goods throughout the Dominion.

Mining.—In some parts of the northern district mining is being strongly advocated by experts, as the ore beds are very rich.

Railroad construction and employment.—Extensive work continues to be done in street railway construction.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were exceptionally busy, as were carpenters, joiners, lathers and plasterers. Painters have pretty well caught up with the season's work, but were pretty busy. Plumbers and builders' labourers were busy. Gas and steam-fitters and stone-cutters were fairly busy.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, find work fair. Steam engineers, electrical workers, linemen, blacksmiths, sheet metal workers, horseshoers and jewellers were busy. Machinists, brass workers and tool sharpeners found employment only fair. Coremakers, boilermakers and bicycle workers were rather inactive.

Woodworking and furnishing trades.—Woodworkers in all lines were busily employed. Carriage workers and coopers were busy. Upholsterers, varnishers and polishers and gilders were fairly well employed, but pattern makers experienced a slackness of work.

Allied and printing trades.—These trades had only a fair month.

Clothing trades.—Journeyman tailors were busy, but garment workers were only fairly employed. Boot and shoe workers found employment satisfactory.

Food and tobacco preparation.—Bakers and confectioners had an active month. Butchers and meat cutters were also active, with ice handlers fairly busy. The cigar trade was steady.

Leather trades.—Leather workers were becoming busy on fall goods.

Miscellaneous.—Barbers, broom makers, clerks and stenographers, delivery employees, furriers, hotel and restaurant employees and laundry workers were busy.

Transport.—Railroad workers in all lines are getting back to a normal state. The summer season has closed, and railway transportation has been exceptionally heavy. Steamboat employees of all classes have been exceptionally busy up to the present. Street railway employees, cab and hackmen, carters, teamsters and expressmen were busily employed.

Unskilled labour.—This class of labour was fairly well employed.

DISTRICT NOTES.

All villages throughout the district report business in all lines good. Trade with farmers for their produce finds a ready market, and the supply in some cases can-

not meet the demand. Prices were high. The Lakefield Cement Company, of Lakefield, is very busy; its cement finds a ready market. Saw and grist mills still continue very busy. General stores in villages were doing a good trade. The apple crop is a very fair one, and a number of buyers were busy picking with several men throughout the district. Current market quotations were as follows: Wood, soft \$5 per cord, hard \$7 per cord; coal, \$7 per ton; potatoes, per bag, 60 cents; apples, per bag, 50 to 60 cents; butter, 21 cents per pound; eggs, 18 to 20 cents per dozen; chickens, per pair 50 to 75 cents; ducks, per pair, 80 to 90 cents. Cheese-making still continues very active; another large shipment was made this month. The farmers find this one of the best paying industries connected with their business. The root crop is especially good.

TORONTO, ONT., AND DISTRICT.

Mr. Phillips Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The principal drawback to the generally prosperous and satisfactory condition of the labour market during September was the continued influx of mechanics and labourers. While the former class has been mainly absorbed, the immigration of general labour has been on too large a scale for permanent requirements, and there is already a considerable surplus which is likely to increase as soon as the busy season in the country is over. Nearly all classes of mechanics and artisans are busy and the relations between employers and men are satisfactory, as there are now no serious strikes or difficulties in any branch of industry.

Contracts have been awarded for the power distributing station of the Toronto and Niagara Power Company on the Davenport road just outside the city limits. The building will cost \$100,000 and is to be completed in a year.

The Grand Trunk Railway Company have undertaken the filling in of their water lots from the western end of the waterworks lot

Toronto
to the eastern side of the Queen's wharf, and out to the new windmill line, which will add from 20 to 25 acres to the yard space on the Esplanade. The old round-house and machine shop will be removed to another site.

The construction of the James Bay Railway from Toronto to Sudbury has begun on the 14th, when a large force of men began track building operations between Richmond Hill and Aurora. Since then another construction camp has been established about 8 miles from the city. The road has secured an entrance to Toronto by purchasing the right of way of the eastern portion of the old Belt Line, a suburban road formerly operated in connection with the Grand Trunk Railway, but disused for many years.

The traffic of the street railway continues to increase. The gross receipts for August were \$223,611, as compared with \$194,669 for August, 1903. The largest day's traffic on record was that of Labour Day, September 5, when 343,000 passengers were carried the receipts being \$14,691.

The progress of Toronto as a distributing centre is indicated by the very large movement of freight in this direction. It is stated that during the last 3 months, the advance over the corresponding period of last year amounts to fully one-third. This has been attended, however, by a falling off in through and outward traffic.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are all busy with their threshing and fall ploughing. They are a little later in commencing the latter work than in most seasons. The sugar-beet crop raised in the eastern and north-eastern sections of York county has turned out so favourably that beet raising will probably become one of the staple branches of agriculture, provided the market remains assured. The beets are now being shipped to the Berlin sugar factory.

Manufactures.—Conditions in the leading branches of manufacturing industry continue prosperous and labour well employed.

Notwithstanding the settlement of the strikes in the building trade, the building up of the burned district proceeds but slowly. This is due to the noteworthy tendency on the part of the firms whose places of business were destroyed by the fire to locate elsewhere. The westward movement of manufacturing interests in particular is very decided.

CONDITION OF PARTICULAR TRADES.

Building trades.—Since the termination of the builders' labourers and bricklayers strike by the return of the men to work on the 14th instant, under the former conditions all classes employed in the building trades have had plenty of work. There was for some time a scarcity of bricklayers owing to many of the men having left the city on account of the strike, but this difficulty has now been overcome. There are a large number of contracts on hand and work will be steadily pushed as long as the conditions of the season permit.

Metal, engineering and shipbuilding trades.—Conditions continue good in nearly all of these lines. A few machinists, however, are out of employment. Blacksmiths and boilermakers and galvanized iron workers have steady work. Brass finishers are especially in demand. On the 10th the new Dominion cruiser *Vigilant*, designed specially for fisheries protection, was launched at the Polson yards. The cost of construction and equipment was about \$150,000. Jewellers and silversmiths are well employed.

Woodworking and furnishing trades.—These lines are generally active, but cabinet making is rather dull. Piano workers have had a good month.

Printing and allied trades.—Business will be very brisk in the printing industry, and those affiliated with it for the next few weeks. The printers have had a quiet month, and the growing use of the monotype machine is likely to throw an increasing number of men out of work. The other branches are in a more favourable condition.

Clothing trades.—With the approach of colder weather the custom tailors are kept increasingly busy. Garment workers, hat and cap makers and neckwear workers find plenty of work. There is very little fluctuation from month to month, as regards boot and shoe workers, whose trade is a steady one.

Food and tobacco preparation.—Trade is fairly active in these lines. The strike of the meat-cutters employed in Harris' abattoir has just been settled, but the terms have not been made public.

Leather trades.—The leather trades are well employed, and there is a good demand for skilled workers in harness-making.

Miscellaneous.—Laundry workers are entering upon the slack season. The barbers early closing by-law compelling the closing of all barber shops at 8 p.m. has been repealed by the city council, owing to the opposition of barbers doing business in the less central districts. The down-town trade was strongly in favour of it, but it aroused strong resistance on the part of employing barbers in other sections.

Transport.—There is continued activity in all branches of land transportation. Railway employees, expressmen, teamsters, &c., have all the work they can do.

DISTRICT NOTES.

Toronto Junction.—Work has been begun on the construction of a large knitting factory near the Canada Cycle and Motor Company's works.

The Stark Telephone and Power Company is installing an automatic telephone system requiring no central operators. A motor has been put in.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The highly satisfactory condition of industry and labour which prevailed during the summer still continues and promises to

extend to the cold season. Labour is fully employed and there is a slight demand for more men in some lines. Trade is good. Retail merchants are very busy and wholesalers are doing well. Transportation is active and financial conditions satisfactory. No changes in wages or hours, and no industrial unrest was reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fruit growers were very busy handling peaches, plums, pears and early grapes and apples. The fruit exhibits at local fairs were very fine.

Manufacturing.—Factories of every sort report a good fall and winter prospect and are running to full capacity.

Railway construction and employment.—Railways are busy. Freight traffic has been good all summer and will be very heavy next winter. Improvements to tracks employ many men.

Other industries.—The power development works are progressing rapidly. The first half of the Canadian Niagara Power Company's power house is almost inclosed, and machinery will soon be arriving. The wheel-pit equipment is in place. The Ontario Power Company has started its power house and its intake works are nearing completion. The tunnel and wheel-pit of the Electric Development Company are nearly finished, so far as the excavation is concerned. Contracts will be let soon for the erection of sub-stations on the transmission line.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still rushed. Bricklayers and stonemasons were busy; carpenters were all employed, and some good men are wanted; lathers and plasterers were all working, and painters are very busy. Gas and steamfitters and plumbers have all the work they can handle. At one time during the month there was a slight lack of employment for builder's labourers. The prospect in the building trades is good.

Metal, engineering and shipbuilding trades.—Machinists, engineers and foundry-

men were all employed and linemen and electrical workers very busy. The Bell Telephone Company is improving its lines.

Woodworking and furnishing trades.—Coopers are rushed with work. A new shop has been opened here for the manufacture of apple barrels. Prices for these barrels are up, and the demand is good.

Printing and allied trades.—Printers were all busy and work is plentiful.

Clothing trades.—Tailors were fully employed.

Food and tobacco preparation.—Bakers were very busy. New shops are starting and old ones are being better equipped.

Miscellaneous.—Barbers find business slower, but employment is steady. The rush season for hotel and restaurant help, icemen and butchers is over, but there is no serious slackness in business. Laundries were busy.

Transport.—Railway business is good. Summer passenger traffic is falling off, but freight will soon be picking up. A few yard employees are being taken on. Several summer steamboat lines have decreased their services and have laid up some boats. Employment is consequently poor. Street railways also are reducing crews for the fall.

Unskilled labour.—Fewer labourers are now employed on the power works. Girls are wanted in factories and for housework. There is little demand for general unskilled labour.

DISTRICT NOTES.

Welland.—The Toronto, Hamilton and Buffalo railway yards are being enlarged.

Ridgeville.—Building is active.

Attercliffe.—Railway construction has employed many men here.

Allanburg.—Power canal work goes on steadily. Improvements to the Welland canal continue.

Port Colborne.—The first crib of the new east breakwater was sunk in place early in the month. Harbour work is steadily pro-

gressing. Steam power will replace gas engines in the brass works.

Sherkston.—The Empire Limestone Company is adding to its equipment.

Port Robinson.—The fruit evaporator gives employment to many women and girls in the autumn months.

St. Davids.—Canneries are very busy. Another establishment of this sort has just been started.

Fort Erie and Bridgeburg.—Railway improvements are still going on. Labour conditions generally are very good.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wiley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the labour market during the month of September. Labour was generally well employed, and in some branches quite active. Particularly was this so in the building and construction trades, though the supply of men was equal to the demand. Work on the new armoury, Bishop Ridley College, Young Men's Christian Association building and other works is progressing favourably, giving employment to a large number of men. Sewer construction has caused some trouble, owing to the city's not having inserted in the contract that the prevailing scale of wages and hours of labour should be adhered to. The contractor has been bringing in foreign labour to work for less money and longer hours. The prevailing wages and hours for such work are 19 cents per hour, 9 hours per day. The contractors are paying 15 cents per hour, with a 10-hour day. The labour bodies, especially the Trades and Labour Council, are protesting, and some of the labourers have quit work. The contract has been let for the erection of a new depot on the Welland branch of the Grand Trunk Railway here. Transportation has been active owing to the heavy shipments of fruit usual at this season of the year. There are no new labour troubles to report. The

strike of the sawsmiths in the Welland Vale, and of the papermakers in the Rioridon mills, Merritton, remain with little change.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers are busy, owing to the heavy shipments of fruit. There is a heavy crop of grapes, but other fruits are not so heavy a crop, though all are of a better quality than usual.

Manufacturing.—Most of the factories are running full time, though a few are not, for seasonable causes. The canning factories are running night and day. Many women and girls were imported to assist in the work, which is heaviest at this season of the year.

CONDITION OF PARTICULAR TRADES.

Building trades.—All building trades were fairly employed, with plenty of work for the season.

Metal, engineering and shipbuilding trades.—All were fairly well employed in most lines, including machinists and engineers, steam engineers, electrical workers, linemen, metal polishers, buffers, platers and brass workers, blacksmiths, metal workers, and horseshoers.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, wood carvers and carriage and wagon workers were busy.

Printing and allied trades.—Printers, pressmen and bookbinders were working full time, with plenty of work on hand.

Clothing trades.—Journeymen tailors report trade improving. Boot and shoe workers were busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, ice cutters and drivers, cigarmakers and tobacco workers were all well employed.

Leather trades.—Tanners and curriers, leather workers and saddlers reported trade good.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, furriers, hotel

and restaurant employees, and laundry workers were fully employed.

Transport.—Railroad conductors, locomotive engineers and firemen, railroad trainmen, switchmen, trackmen, freight-handlers, ship labourers, street railway employees, cab drivers, hackmen, teamsters and expressmen are all well employed.

Unskilled labour.—This class of labour is well employed.

DISTRICT NOTES.

Thorold.—Favourable conditions continue. All labour is fully employed, and most of the mills are running full time. Quarrymen were especially busy.

Power Glen.—A large staff of men still continue to be employed on the extensive improvements of the Cataract Power Company's plant.

Pt. Dalhousie.—The labour market is active. All the building trades are busy. Ship labourers and freight-handlers are fully employed, and trade generally is good.

Merritton.—The condition of the labour market remains much the same as last month. The strike of the paper-makers of Rioridon mills is still on, but very few are out of employment, having secured work elsewhere. The company reported that it was not now inconvenienced by the strike. It is stated that a new paper mill is to be started up that will give employment to more hands than any of the other mills now here.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was fairly well employed during September. Some of the skilled trades were a little slack, while others were fairly busy. All skilled labour was fairly well employed. The puddlers and rollers at the Hamilton Iron and Steel Company's works went on strike against a reduction of about 13 per cent in their wages, about fifty employees

are affected by the trouble, which was not settled at the end of the month. Transportation shipments and bank clearings have been active during the month. The civic corporation and the Street Railway Company have had some difficulty, the latter refusing to sell the usual workmen's tickets (eight for 25 cents) on the cars. The city secured an injunction restraining the company from so acting, this was granted temporarily.

Several companies were incorporated during the month. Solicitors have applied for letters of incorporation for the Hamilton Biscuit and Confectionery Company, Ltd. The new company will have a capital of \$100,000, and it will take over the business now carried on under the name of the Hamilton Biscuit Company. The new company will enlarge the present premises, and will extend the business.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—This industry in the country district has given employment to a great many men during the summer. Fruit shipments have been fairly large, one carload of grapes for Montreal contained 2,280 baskets, and 518 boxes of apples for Dublin, Ireland; both of these were from Vineland.

Manufacturing.—The manufacturing of iron goods, clothing, tobacco, woodenware and furniture has been carried on extensively during the month.

Railroad construction and employment.—There was considerable railroad construction work going on in the doubling of the Grand Trunk Railway tracks west of Hamilton, and the extension of the Toronto, Buffalo and Hamilton Railway Company's yards east of the city limits, at Welland and Vinemount.

Other industries.—Tenders have been called for an addition to the Chipman-Holton Knitting Mills. A \$27,000 fire occurred at the Ontario Lamp and Lantern Company's works. About 50 men will be out of employment for several weeks at the least.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building operations were being carried on very extensively, factories and dwellings being erected, particularly in the city annex. Many of the bricklayers that left during the recent trouble have returned. Carpenters, lathers and plasterers were fairly well employed in new work, but painters were not so busy. Plumbers are enjoying a busy season.

Metal, engineering and shipbuilding trades.—Among the iron trades some branches were working more steadily than others. Stove plate and machinery moulders were working fairly steadily, but there is no extra rush on. Machinists and electrical workers, and steam engineers were well employed, and metal polishers in brass factories and foundries were busy. Stove mounters, blacksmiths, boilermakers, sheet metal workers and horseshoers all had a very fair month's employment.

Woodworking and furnishing trades.—All of the woodworking trades, furniture and piano workers, car builders, pattern makers, and makers of household utensils, &c., have been well employed.

Printing and allied trades.—While there has been steady employment in the printing and its allied trades during the month, yet they have not been busy.

Clothing trades.—Journeymen tailors have been slack this month, as have also the garment workers in some branches. Sample season in the ready-made lines has kept the bulk of the tailors well employed. Boot and shoe workers have also enjoyed a good month.

Food and tobacco preparation.—Cigar-makers and tobacco workers had a good month's employment.

Leather trades.—Leather workers were fairly busy. An effort was made during the month to settle the still existing strike at Jolly and Sons, without effect.

Miscellaneous.—Barbers have been fairly busy. Broom and brush makers experienced a slackness in trade. Hotel and restaurant

employees as well as laundry workers were fairly well employed.

Transport.—All railway employees, both steam and electric, have enjoyed a good month's employment at wages on signed agreement. Longshoremen have not had very steady work since so much coal arrives by rail. Teamsters, cabmen, &c., have had a good month.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions in the labour market have not been as favourable during the past month as they were during August or the corresponding month last year. The Massey-Harris Company has been closed down all month, and several other factories engaged in the iron trades have been reducing their forces. The building trades are active, there have been 192 building permits issued to date, against 184 issued during 1903, the total value of the buildings erected this year is \$225,365. The Farmers' Co-operative Binder Twine Company recommenced operations during the month. A charter has been granted to the Mohawk Natural Gas Company, a local concern, to construct and operate works for the production, distribution and sale of electricity or natural gas and petroleum oil. The head office of the company will be in Brantford, and the capital is \$150,000. The Barber-Ellis Company is erecting a two-story warehouse. A charter has been granted incorporating the Ham & Nott Company, Limited, with a capital of \$100,000. They expect to increase the present capacity of the plant in the near future. Flour has advanced 25 cents per barrel and coal is selling at \$6.75 per ton.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Fine weather assisted agriculturists who have been very busy. Comparatively speaking, crops in this locality have been very fair. Potatoes are now being raised and very little rot is noticeable.

It is expected that the price will be from 45 cents to 50 cents per bushel. Apples are selling for \$1 per barrel.

Railroad construction.—The new power house of the Grand Valley Radial Company is being erected with all possible speed. A portion of the equipment including a couple of new engines is now in the city; the work on the line to Galt is nearing completion. The extensive operations on the main line of the Grand Trunk Railway are being rushed forward with all possible speed.

Manufacturing.—The iron trades are not as active as they were a few months ago, only two of the factories being really busy. In other branches of manufacture carried on here trade is good.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have been especially active. Bricklayers, masons, carpenters, lathers, plasterers and painters had a busy month. Plumbers and gasfitters were fully employed.

Metal, engineering and shipbuilding trades.—Iron moulders in some branches were slack, and a few men were laid off. Stove plate moulders have been busy, and a few extra men have been taken on. Core-makers in some shops were slack, and a few men laid off; in other shops work has been steady. The same conditions prevailed among machinists during the month. The Engine Works laid off a number of workmen about the 20th. Electrical workers and linemen found trade active. Buffers and polishers, stove mounters, blacksmiths and boilermakers had a steady month. Sheet metal workers have been very busy. Horse-shoers had steady employment.

Woodworking and furnishing trades.—Woodworkers generally were busy, and carriage and wagon makers report plenty of work. Pattern makers and millwrights had a steady month. Coopers were very busy.

Printing and allied trades.—Printers and pressmen report an active month.

Clothing trades.—Journeyman tailors have had a fair month.

Food and tobacco preparation.—Bakers and confectioners, and butchers have had an average month. Cigarmakers and tobacco workers report all local men fully employed.

Leather trades.—Leather workers and saddlers report steady employment.

Miscellaneous.—Barbers, clerks, laundry workers, delivery employees, and furriers had steady employment. Hotel and restaurant employees have been in demand.

Transport.—Railway trackmen and freight handlers have been active. Street railway employees had a full month. Teamsters and draymen found steady employment. Hackmen and cab-drivers have had an average month.

Unskilled labour.—Unskilled labour has been pretty fully employed.

DISTRICT NOTES.

Paris.—Labour generally has been well employed during the month. The Paris Plough Company is about to erect a three-story warehouse, and a block of buildings for mercantile purposes is to be erected on River Street.

Blue Lake.—The cement works have been advertising for men.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment in all lines has been good, with about the same general conditions that prevailed in August, the only exception being that fifty-five hours instead of fifty-nine were worked by the employees of the Raymond Manufacturing Company, owing to accumulated stock, and the usual slack season in the cream separator business. There is at present no general demand for work-people, and the fall season will soon cause a considerable number who usually work out of doors in the summer, and in the factories in the winter to seek jobs. The new factory of C. Kleopfer, to manufacture carriage trimmings, has commenced operations. One firm which employs about 200

men, and which hitherto has paid 60 hour's pay for 59 hour's work per week has decided to adopt the hour system of paying, and in future will only pay for 59 hours. There have been no other wages changes during the month, and no noteworthy case of unrest.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—All farm crops, except roots and apples, have now been harvested. In many cases the grain crop is turning out better in the threshing than was anticipated. Coarse grains are grown more extensively than wheat.

Railroad construction and employment.—The first sod of the Guelph to Goderich extension of the Guelph Junction Railway was turned at Goderich on September 15, at which end of the line construction work is to be pushed rapidly ahead. Although it is expected that a large amount of work will be done this fall, active operations have not as yet commenced on the Guelph end of the line.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building season is beginning to relax somewhat for the reason that there are no large contracts under way, and very little likelihood of any extensive new work being undertaken this year. A few men, however, have left for Toronto and Winnipeg, and in all probability others will shortly follow. The wholesale price of lumber has dropped \$5 per thousand. Bricklayers and masons have all worked steadily during the month. Carpenters and joiners as well as painters have had a good month. Stonecutters had little to do, but plumbers have had a satisfactory month, partly in consequence of the number of steam heating plants installed recently.

Metal, engineering and shipbuilding trades.—Iron moulders had a good month, especially in the stove plate foundries, but work was only fair in other foundries. Machinists and helpers were only fairly busy, the reason given for this being the excessive stock in hand. Tinsmiths were busy. The tube mill workers had a very

busy month, night and day shifts being worked, giving employment to 75 additional men. Most of the work is done by Italians, and most of the new workers are of this nationality, and were fetched here from outside points for this work.

Woodworking and furnishing trades.—The woodworking trades are about the same as last month, excepting that there is more work in the furniture factory, owing to the Waterloo fire. Piano and organ workers had a good month, as had also the upholsterers. In the carriage trade business is quiet, though new men are being taken on in two new shops.

Printing and allied trades.—Printers had an excellent month's work. The securing of a contract for an additional fraternal monthly has given employment to some new men in one of the offices.

Clothing trades.—Tailors had a much better month than August, and new men were taken on. Garment workers enjoyed a good month. One firm of garment makers has been advertising for girls.

Food and tobacco preparation.—Cigar-makers were satisfactorily employed. Bakers and confectioners also had a good month.

Miscellaneous.—These trades show an improvement with the reopening of the Ontario Agricultural College. Ingrain carpet weavers and Brussel carpet weavers had only a fair month.

Unskilled labour.—This class of labour was well employed at out-of-door work, but as the season for this kind of work is nearing its end, many will be seeking in-door employment.

DISTRICT NOTES.

Hespeler.—A by-law is about to be submitted to the ratepayers to loan \$20,000 for ten years without interest to establish a foundry and woodworking factory, to employ 35 to 45 hands. The plant of the Canada Woollen Mills Company has been sold by the assignee and will shortly be reopened. The other mills have lately been taking on additional help. The Tube Works

Company has been lately advertising for help.

Fergus.—A by-law to bonus a lime and quarrying works was defeated by vote of the ratepayers.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has been exceptionally busy, but the chief activity prevails in the building trades, as there are several residences and large buildings in the course of erection and nearing completion. There was no necessity for any man willing to work to be idle in this city. All the manufacturing trades have had a good month. Another factory is starting here, to be known as the Stratford Carriage Company. The building is of white brick with stone foundation. The main building is 62 by 125 feet, three stories high, with wings for blacksmith, boiler and engine rooms 32 by 47 feet. It is to be completed by the end of the year. In all something like 75 or 100 men will be employed, mostly skilled workmen. The wholesale and retail merchants have received their fall shipments, and report a fairly good trade. No change in the rate of wages or hours of labour, and no trouble in the labour market occurred.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are employed threshing and marketing their grain, which finds a good price, and in getting out the potatoes and the root crops, which showed a good yield, with the exception of potatoes, which were affected with rot in the low ground.

Manufacturing.—In all the branches of the manufacturing industry there was continued activity, and the outlook for a busy fall and winter season is generally expected.

Railroad construction and employment.—Work on the different branches of the

Grand Trunk Railway in repairing tracks gives employment to a number of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters and paper-hangers, plumbers, gas and steam-fitters, stone-cutters and builders' labourers were busily engaged, and no idle men in the building trades were reported.

Metal and engineering trades.—Iron moulders, machinists, engineers, electrical workers and linemen report trade good. Blacksmiths, boilermakers and bicycle workers had steady work.

Woodworking and furnishing trades.—Woodworkers, upholsterers and varnishers were all busy. Coopers on apple and flour barrels had all they could do.

Printing and allied trades.—Printers report plenty of work, especially 'ad' setters and job compositors.

Clothing trades.—Tailors and garment workers had steady work. Milliners were active.

Food and tobacco preparation.—Bakers and confectioners, and butchers were well employed. Cigarmakers had no idle men.

Leather trades.—Harness-makers report a good trade.

Miscellaneous.—Barbers, clerks, delivery and hotel employees, and laundry workers were fully employed.

Transport.—Railroad men in all departments were active during the month. Cab drivers, draymen and teamsters were busy.

Unskilled labour.—Labourers were fully employed, a number being employed on the civic works laying cement walks, &c.

DISTRICT NOTES.

Markets for city and district were as follows:—Wheat (standard) \$1.05; new wheat \$1; barley 28 cents; oats (standard) 30 cents; pease 60 cents; potatoes 75 cents per bag; butter 18 to 20 cents per pound; eggs 18 cents per dozen.

Mitchell.—The farmers are busy taking up their potatoes, and find in many places they are only half a crop, while others are scarcely affected by the rot.

New Hamburg.—The new flour mill in course of erection is nearing completion. It is one of the largest and most up-to-date in western Ontario. When finished it will give employment to a number of men. The New Hamburg Manufacturing Company, gives employment to a number of machinists and other mechanics. The company has shipped several carloads of machinery to the North-west during the month.

LONDON, ONT., AND DISTRICT.

Mr. A. Woonton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Trade conditions throughout September showed an improvement over the preceding month, brought about principally by the holding of the Western Fair, which brought nearly 60,000 visitors to the city during the week, and increased trade in proportion. The opportunities for employment continue equal to the supply, and idle men are few. In the building trades new work keeps opening up, and the year is proving a better one than was expected. Welford Bros., broom factory and rope walk, which was destroyed at the time of the street railway car barns fire, has been rebuilt; the new Grand Trunk Railway roundhouse is advancing rapidly, and more commodious car barns than the old ones for the street railway, to cost about \$10,000, are to be built at once.

Retail trade was exceptionally good during the early part of the month, owing to the fair, and wholesale trade is considerably better than a year ago.

To date from the beginning of the year, the mayor's salary has been increased by the city council, from \$700 to \$1,200 per year.

The fine brick-yards built by the Builders' Supply Company of this city, about two years ago, were totally destroyed by fire on Thursday, September 22, with a loss of about \$20,000, and an insurance of only \$8,000.

Over a mile of new road-bed is to be put down during the coming month, which will mean a lot of work for men and teams.

The change from summer to winter hours, involving work on Saturday afternoon, took place in a large number of trades on September 1. This does not affect wages at all.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A large number of men and boys are at present engaged in this district picking and packing apples for export to the British markets.

Manufacturing.—Brickmaking is about completed here for this year, and a number of men who were engaged at this work are having to work in the lumber woods.

Railroad construction.—The extension of the street railway is now under way, and is expected to be finished about October 20. The double tracking of the Grand Trunk Railway between London and Hamilton is practically completed, with the exception of a few places over bridges and culverts, which are not yet ready for the rails.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, stonecutters and builders' labourers are all working, with indications good for the remainder of the season. Carpenters were very busy. Plasterers and lathers have considerable work ahead. Painters report business as fair. Plumbers and steamfitters were busy.

Metal, engineering and shipbuilding trades.—Iron moulders were exceptionally busy, with about 40 more moulders employed in the city than this time last year. Iron workers and machinists reported trade as extra good. Electrical workers had a good month, with a lot of work at the fair grounds. Metal polishers, buffers and stove mounters were exceptionally busy.

Woodworking trades.—Woodworkers reported trade good. Upholsterers have had more work this year than for some time. Carriage and wagon makers reported trade somewhat quiet. Car builders were busy,

and coopers exceptionally so, a large demand being made for apple barrels.

Printing and allied trades.—Printers are exceptionally busy, with prospects bright, and not enough men to meet the demand; three nights a week overtime is being worked both by pressmen and printers in most job offices. Bookbinders reported trade good.

Clothing trades.—Tailors report trade much improved, with plenty of orders coming in. Garment workers were busy. Boot and shoe workers report trade as fair.

Food and tobacco preparation.—Confectioners are becoming very busy, and overtime will be the rule from now until the beginning of the year. Cigarmakers reported trade as good, with no idle men.

Leather trades.—Tanners reported trade fair. Leather workers and saddlers reported an increase in business over last year.

Miscellaneous.—With the opening of Welford's broom factory several broom makers who have been out of work since the fire, are again working. Furriers were very busy. The large number of Chinese laundries opening in this city is cutting into the work of the other laundries.

Transport.—On the railroads a good month was reported by train crews. Several of the mammoth 900 class engines have been added to the rolling stock of this division of the Grand Trunk Railway during the month. Teamsters were exceptionally busy, and were in demand. Carters, draymen and expressmen reported an extra busy month.

Unskilled labour.—This class is employed to its fullest extent, with indications of abundance of work this fall.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour during September continued steady, and on the whole prospects seem bright for steady employ-

ment until the winter sets in. The most important change in conditions was the announcement at the close of the month of a reduction in staff of 50 men employed in the Michigan Central Railway shops. The cut was made for reasons of economy, as work has been active all summer, railway traffic being very active and affording a good demand for labour.

Retail trade was much more active than during the preceding month. The fall millinery openings gave an impetus to trade in the dry goods line.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The demand for farm labour was slacker during September, as evidenced by the numbers of surplus labourers moving about. A larger number than usual also went out west on the harvest excursions. The net profits from the farm are said to be much less than during the last few years, owing to a lower price obtaining for pork and dairy produce.

Manufacturing.—Shows no important changes over preceding months. Trade is steady, but not rushed. The new car wheel works of the Canadian Iron and Foundry Company are nearing completion; the main buildings are inclosed.

Railroad construction.—In this line there is much activity. The Père Marquette shops are progressing favourably. It is expected that the main buildings will be inclosed before the winter sets in. A new modern coal hoist has been completed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building line continues very active. A number of buildings in progress are not beyond the foundation stage, which will prolong the outdoor work until cold weather. All building mechanics are fully employed. The demand for workmen's houses is very keen, the supply being far short of present requirements.

Metal trades.—Conditions in this line continue unchanged, with the exception of the lay-off before mentioned.

Woodworking and furnishing trades.—Work continues brisk in the furnishing trades. The new planing mills erected by H. Lindop & Co. to replace the burnt structure is about ready for use.

Printing trades.—Printers were very busy during the month, fall advertising work being plentiful.

Clothing trades.—Journeymen tailors had a fairly good month's trade. The prospects for fall trade seem very favourable. Garment workers are busy on spring trade.

Food and tobacco preparation.—Local bakers have increased the price of bread from 5 to 6 cents for a 1½-pound loaf as a result of the raise in the price of flour, which is now retailing at \$3 per hundred. Trade is reported normal. Cigarmakers are busy.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour during the month has been active, comparing very favourably with August, and very few idle men were to be found in any trade. The building trades were unusually active, and manufacturing, especially planing mills and sash and door factories, were exceptionally busy.

The supply of labour in all branches, however, has been and is fully equal to the demand, contractors having no difficulty in securing all the help needed.

Negotiations are in progress between the industrial committee of the city council and a manufacturing firm, to establish a plant for the manufacturing of gasoline engines and certain kinds of agricultural implements.

Work has commenced on a large addition to the sanitarium necessitated by the increased demand for accommodation of patients.

Transportation was fairly active. Wholesale and retail trade was normal.

There were no changes in the rate of wages or hours of labour to note. The labour market is quiet; perfect harmony existing between employers and employees.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Owing to the few warm days this month, farmers report that beans, corn and tobacco will be only a fairly good crop.

Manufacturing.—There is continued activity in nearly all branches.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners, lathers and plasterers, painters, paperhangers, plumbers, gasfitters and builder's labourers were all busy.

Metal, engineering and shipbuilding trades.—All men in these trades had plenty of work. Electrical workers and linemen were exceptionally busy.

Woodworking and furnishing trades.—Carriage and wagon makers had plenty of work. Coopers were very busy.

Printing and allied trades.—Printers, pressmen and bookbinders have had a very good month.

Clothing trades.—Journeyman tailors, boot and shoe workers report trade much better than last month, with good prospects for the fall months.

Food and tobacco preparation.—Bakers and confectioners, cigarmakers and tobacco workers report men idle in those trades.

Leather trades.—Harness makers and saddlers have plenty of work.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel and theatre employees, are fully employed.

Transport.—Railroad men, freight-handlers, longshoremen, draymen, teamsters and expressmen are well employed.

Unskilled labour is in good demand for sidewalk and sewer building. This class of labour is no more plentiful than heretofore.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour was well employed during the past month. Manufacturing was active, but the greatest activity was in the building trades. There is as big a demand for houses at the present time as in the spring. The Steel Range Company is building a large addition to its works, which when completed will necessitate more help. Wholesale and retail merchants report trade fairly good for this time of the year. Friendly relations between employer and employees continued during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are all busy getting ready to harvest their corn crop, which promises to be above the average.

Lumbering.—Wholesale and retail lumber merchants are busy getting in their stock of lumber before navigation closes.

Railroad construction and employment.—The Grand Trunk Railway Company has a force of men building a large coal chute to take the place of the one that was burned.

Other industries.—The Messrs. Hurley, coal merchants, are making extensive improvements to their coal docks in this city. Owing to the large increase of burners, they are building a new dock 250 feet long and 40 feet wide.

CONDITION OF PARTICULAR TRADES.

Building trades.—There are no changes to report in the building line. Work is very active, and builders have all the work they can handle at the present time in all branches of the trade, especially carpenters being in demand.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists, engineers, electrical workers and linemen report trade very good. Blacksmiths, boiler-makers and sheet metal workers had steady work.

Woodworking and furnishing trades.—All persons connected with the woodworking line have all the work they can do.

Printing and allied trades.—Printers and pressmen were fully employed.

Clothing trades.—Journeyman tailors report trade improving.

Food and tobacco preparation.—Bakers and confectioners had steady employment. Cigarmakers and tobacco workers report trade good.

Leather trades.—Harness-makers and saddlers were all busy.

Miscellaneous.—Barbers had a busy month.

Transport.—All railroad and steamboat men were fully employed. Carters, draymen, teamsters and expressmen had plenty of work.

Unskilled labour.—There still exists a scarcity of unskilled labour.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. Edward Barry, correspondent, reports as follows :—

At the end of September there are over two thousand men employed by the Lake Superior Company. All plants are in operation with the exception of the nickel reducing plant and the sulphide pulp mill. The mill is closed down for lack of wood; a sufficient supply to enable both mills to operate was not procured last winter. With respect to the Reduction Works, it is stated that some extension changes will be made in the plant before it will again operate. On the A.C.R.R. there are at present about 200 men employed. The company has not undertaken any construction work this season, but expects to complete the road between here and the Canadian Pacific Railway next season.

During the twenty-four hours of the 26th inst., 600 tons of rails were manufactured by the steel plant, the rails being of first-class quality. The test to which rails are subjected is a very severe one. Four rails are made from a single ingot. One of these

is selected and a weight equal to one ton is allowed to fall on the rail from a height of 15 feet; if the rail fails to stand the test the other four are condemned, but during a period of 14 days only one ingot was found defective. There is hope that a large proportion of the rails used in Canada for the next five or ten years will be manufactured here. The company has already secured several contracts, and the duty now imposed on foreign rails well enables them to be manufactured at a profit. The steel plant employs between 500 and 600 men.

One of the blast furnaces will be blown in about October 1. These will not be quite able to supply the plant with pig iron, but will furnish about two-thirds of the quantity necessary.

Pending the discovery of Bessemer ore in large quantities in Canada, the company will be obliged to obtain their stock from the American ranges. A large supply has already been obtained, but the boats will continue to run for some time longer.

Work on the new post office is almost completed. The stone and brick work are entirely finished. The contractors state that under certain conditions the post office can be installed by Christmas. The extension of the dock and the canal pier are also progressing favourably.

With the revival consequent on the resumption of operations by the Lake Superior companies, building has been given a slight impetus, but as yet independent enterprise responds feebly to the example of the company. The empty houses so characteristic of the past year are becoming daily less and less, but there is yet ample house room for a great many more. Rents are not nearly so high as they were three years ago. The labour market seems to be well supplied, and no difficulty has been found in obtaining all the men necessary for any kind of work that offered.

Two miles from Wilde, a station on the A. C. R., 24 miles distant from Sault Ste Marie, is situated, known as the Williams iron property. Development work was commenced on this property early in 1902, and has been continued pretty constantly ever

since. A shaft has been sunk to the depth of 200 feet, and ore is said to have been met with all the way down. On analysis the ore is said to contain from 61 to 67 per cent of iron with traces of both phosphorous and sulphur, but not, it is claimed, in sufficient quantities to make the ore non-Bessemer. The company is about to install modern mining machinery, and are making arrangements with the A. C. R. authorities for rail communication. If there is a large body of Bessemer ore near Wilde, the opening of such a mine by giving an independent ore supply would be an event of the greatest importance.

The Canadian Copper Company mine about 1,000 tons of ore per day from the Creighton mine. The cost per ton is very low, probably not one half as much as it costs to mine in the smaller mines. This company still leases and operates the Mond Company smelters at Victoria mines. There is talk of a resumption of operations by the latter.

Municipal improvements on a considerable scale have been commenced in *Sudbury*. Granolithic sidewalks are to be placed on the principal streets.

The Canadian Copper Company is installing an electric plant on the Spanish river, about three miles from Nairn, and 30 miles from Sudbury. This plant is expected to furnish power to the company's works at Copper Cliff. There is also another plant building on the Vermilion river, about 15 miles from Sudbury, but by an independent company. This company expect to lease power to various concerns.

It is reported that the Ogilvie Flour Mills Company on September 27 closed a contract for a new 3,000 barrel flour mill at Fort William, to the Nordyke Marmion Company of Indianapolis. The mill will cost \$200,000.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were very much the same in September as those reported for

August. For ordinary labour there is a keen demand at wages having a tendency to become stronger. There are, however, evidences of the usual accumulation of labour that takes place between seasons in Winnipeg. Many of the ordinary manual labourers are looking forward to securing work that will keep them employed for the whole of the winter season, and in consequence a large number seem to be unwilling to enter service which is likely to terminate as soon as the winter weather sets in.

Industrial activity still continues, and will remain so until the weather interferes.

The most striking activity prevails in the building trades. Already the building permits aggregate, for the eight months ending September, about \$8,000,000.

Commercial activity continues and the volume of business is being rapidly increased.

As reported last month, the various classes of employees in the workshops of the Canadian Pacific Railway were negotiating for new schedules. In several cases a crisis was reached during September. On September 17 the boilermakers over the Pacific division ceased work because of their failure to reach an agreement. On the 19th of the same month one cent per hour advance was offered to them, which they accepted conditionally. Their existing rate was 33 cents per hour, and they claimed that it should be 35 cents, the same as prevails at railway points on other lines nearest to Winnipeg. This contention was disputed by the company. In the meantime the boilermakers agreed to return to work on the advance of one cent, and the company were allowed a month (October) to investigate the amount of wages paid at the points quoted by the men.

On Saturday, September 24, in accordance with the terms of an ultimatum served on the company some time previous, the machinists, blacksmiths and allied mechanics ceased work. The cessation of work covered these trades on the whole of the Canadian Pacific territory from the western extremity of Lake Superior to the

Pacific coast, and over a thousand men were concerned in it. On September 28, negotiations were resumed, and a settlement was effected with all the trades on strike. In the case of the machinists, advances as follows were conceded:—

	Old rate.	New rate.
Fort William to Broadview.	32½	34
Broadview to Laggan.. ..	34	35½
Laggan to Kamloops.. ..	36	36½
Kamloops to Vancouver.. ..	34½	35

The reason given for the advance of only half a cent per hour on the mountain sections, and particularly at Vancouver, was that the cost of living has not advanced at the same rate there as it has on the prairie sections. Usually the rates have been considerably higher at the coast than, for instance, at Winnipeg. At the latter point, however, house rent and the price of food commodities have risen during the past year to a more marked extent than they have in Vancouver, where fruit is reported cheaper and also house rent. What is said of Winnipeg is also true of the various towns and divisional points on the main line of the Canadian Pacific Railway between that city and the mountains.

The advances granted to the moulders, allied mechanics, storemen and sundry other men has not been made known. Increases, however, vary from five to ten per cent, according to reports. No definite answer was procurable from those in authority.

The carmen are still negotiating, and so far it is understood that the company are prepared to make an advance, but there is difference of opinion as to what the amount should be.

Altogether over two thousand workmen will profit by this increase in their wages, and they are scattered over the various divisional points of the railway between the lakes and the Pacific coast.

With the exception of the common labourer, whose services happen to be in the keenest demand at the present time, and he is therefore receiving slightly higher wages, there are no other changes of any consequence.

The strikes of the boilermakers and the machinists were not characterized by any

demonstration. The men left their work quietly and never attempted to interfere with the work or property of the company, and the company's representatives apparently made no attempt to replace the men.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The weather at the beginning of the month was not of the best for threshing and drying the grain. Towards the latter part, however, a period of finer weather set in, and the receipts at Winnipeg were very much larger. The season is fully two weeks late. What receipts have already come to hand have graded well, although there is a large proportion of 'no grade' wheat. This, however, will be treated in the elevators at Fort William and Port Arthur, and turned into a good flour-making grade. In the process, however, some shrinkage results. The damp weather has made it difficult for the farmer to get his wheat threshed dry from the shock, and this is the reason why so much of it has had to be classed 'no grade.' There has been no pronounced scarcity of farm help, and the farmers have not suffered through lack of it. They have, however, suffered some loss through having to keep their help through weather when the grain could not be handled.

It is generally conceded that the wheat product this year will be greater than hitherto it has been in the west. The estimates of the damage through rust have been proved to be excessive according to the actual returns from the threshermen. It is generally admitted that the yield of wheat will be at least 55,000,000 bushels.

Manufacturing.—The local manufacturing industries have all been very busy, and the prospects have been greatly enhanced by the crop conditions.

Railroad construction and employment.—Railroad construction has made good headway, but the supply of labour has been somewhat short.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are working to their fullest capacity. As re-

ported last month, the only class of labour that is at all scarce is the experienced builders' labourer. There is a vast amount of high-class carpenter work being done at the present time, but there are quite enough men on the ground to do the work. Lathers and plasterers are at the busiest stage in the season's work. Although there has been a large importation of stonecutters and also the employment of several stone saws, both men and plants are working overtime to meet the demands.

Metal, engineering and shipbuilding trades.—All the engineering trades are busy and their prospects are good for another season's work as active as the present one.

Woodworking and furnishing trades.—As reported last month, the woodworking trades are working full time and to the limit of their capacity.

Printing and allied trades.—There has been a slackness in the printing trades, but at the latter end of the month it improved and indications are that business will be good for some time.

Clothing trades.—In the clothing trades work continues to be steady in all lines.

Food and tobacco preparation.—The cigar factories and the bakeries are busy and their trade continues to assume larger proportions. During the month the price of bread has advanced to 16 2-lb. for a dollar, or 4 loaves for a quarter of a dollar. Previously it was 18 loaves for a dollar.

Miscellaneous.—Under this head employment of all kinds was good.

Transport.—At the present time the railway companies are exceedingly busy, and are likely to continue so until the close of navigation. The fact of the crop movement being two or three weeks late will make it necessary to rush the crop in time to get it to the lake ports before the freeze up. This will bring into operation all the resources of labour and rolling stock available.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

During the early part of August all classes of labour were exceptionally busy, particularly skilled labour. Special activity also prevails in all lines of the building trade, an effort being made to forward operations as far as possible before the season closes. The amount of contract work equals that of any previous year; the supply of skilled labour is also equal to the demand, with the exception of plasterers. No new industry has started during September, but the corporation of Brandon is carrying on extensive improvements in the laying of concrete sidewalks, and the building of a new pumping station for city water works, to be equipped with up-to-date machinery. The old pumping station was built in too close proximity to the Assiniboine river, and was consequently subjected to the spring floods. Considerable activity still continues in all branches of industry, particularly in the manufacture of builders' supplies and in the operation of flour mills. It has been found necessary for managers of the flour mills to put on night staffs to keep up with the demand. The Kelly Milling Company has shipped a considerable amount of flour to Japan this season, the same being paid for on loading. Transportation companies report that freight and passenger traffic was never heavier than at the present time, owing chiefly to the influx of new settlers and their effects. Wholesale and retail merchants reported trade very satisfactory. There has been no change in rates of wages or hours of labour, with the exception of that involved in the settlement of the boilermakers' strike, who have secured an increase of one cent per hour. The men employed in the car department of the Canadian Pacific Railway Company, and the machinists, applied to the company for a new schedule of wages, and representatives visited Winnipeg in the endeavour to come to some settlement with the management. In the closing week of the month a strike was declared.*

*See reference in the article on Trade Disputes during September in the present issue.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—According to the official government inspection report, the yield of wheat is much in excess of what had been anticipated; it is also grading higher than was expected. In districts where the rust was thought to have been worst the yield has been surprisingly heavy, and the damage has not been great. The official report of grain so far shows as follows: 28 per cent, No. 1 hard and No. 1 Northern; 48 per cent, No. 2 Northern; 11 per cent, No. 3 Northern; 13 per cent, lower grade. Practically 87 per cent is milling wheat, the report on the whole being very much higher than any previously made. It is safe to assume that the farmers of western Canada will get much more money for their wheat this year than last, the amount of increase being estimated by competent authority at \$17,000,000. The yield last year was 52,000,000 bushels, and the average price 68 cents. The average price this year will be fully 20 cents higher. One leading grain man states that the lowest amount that Manitoba will get this year is \$52,800,000 for her wheat. The total crop may come under the 60,000,000 mark, but in any event will exceed that of last year.

Lumbering.—An extensive business is being done by the lumber dealers.

Manufacturing. — Manufacturing of building supplies by city firms is very extensive, owing to the great demand for building supplies. The Kelly Milling Company, Limited, is building large additions to its premises, owing to increase of business. This company has 23 elevators throughout this district and the Northwest Territories, and 4 in this city. All city elevator companies are making preparations for an extensive trade this season. The cement works of this city are doing an extensive business. Cement bricks are extensively used for building purposes.

Railroad construction and employment.—The Canadian Pacific Railway Company expects to withdraw a number of engines engaged in construction work, with

the object of having all power possible available for the movement of wheat. A large gang of men and teams have just arrived in this city to double track the main line from here west to Kemnay. The Canadian Northern Railway construction work is being pushed very rapidly on the new extensions in this province and the Northwest Territories.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, joiners, lathers and plasterers were very busy, with a slight demand for a few good men, excepting in the case of masons. Painters, decorators, paper-hangers, plumbers, steam-fitters and stone-cutters were all well employed. Builders' labourers were also very busy, with a few openings.

Metal, engineering and shipbuilding trades.—Iron moulders, sheet metal workers, steam engineers, blacksmiths, boiler-makers and sheet iron workers were actively employed. Machinists were fully employed; some openings in railway work. Jewellers were actively employed, but horseshoers found trade somewhat slack.

Woodworking and furnishing trades.—Woodworkers, upholsterers and pattern-makers had a good month's employment.

Printing and allied trades.—Printers and pressmen were actively employed.

Clothing trades.—Journeymen tailors were fully employed, and garment workers were also active. Boot and shoe workers were very busy.

Food and tobacco preparation.—Butchers and meat cutters, cigarmakers and tobacco workers found business excellent. Ice handlers were only fairly well employed.

Leather trades.—Leather workers and saddlers found trade fairly good.

Miscellaneous. — Barbers, clerks and stenographers, delivery employees, hotel and restaurant employees, steam and hand laundries, had a good month. Furriers were rather inactive.

Transport.—All engaged in the transportation services were exceptionally busy.

Carters, draymen, teamsters and expressmen were busily employed.

Unskilled labour.—There are very few idle men of this class in the city at the present time. Those that are idle are composed chiefly of Doukhobors, 300 of whom have come here and to other places in the vicinity from Yorkton. About 200 found employment in this city, and a large proportion of the remainder have secured employment with the farmers. This class of labourers seem to give satisfaction wherever they are given employment. There are very few old countrymen in the city that have failed to find employment.

DISTRICT NOTES.

Reports from the district and from the Territories, from a commercial and agricultural point of view, are very encouraging. Commercial travellers that have returned report business very satisfactory, and agricultural implement agents have done a very heavy business. All the adjoining towns have had a building boom this season, and business seems to have been very satisfactory in all lines. Considerable improved farm property has been sold at a high price.

ROSSLAND, B.C., AND DISTRICT.

Mr. R. A. Laird, correspondent, reports as follows:—

DISTRICT NOTES.

No development of great importance in relation to labour conditions in the Kootenays-Boundary districts was reported during the month. Employment has been steady throughout September, with few increases in working forces. In several of the principal mining centres there has been a tendency toward the over-crowding of the labour market toward the end of the month, which is explained by the fact that many miners are returning to the cities to seek employment for the winter months, after spending the summer on prospects and in outlaying mines. The situation is not serious at all, but it has developed to a suffi-

cient degree to warrant the statement that men seeking work will find more obstacles in the cities for several months to come than for an equal previous period.

Water shortage and forest fires have interfered to some extent with industry. Toward the end of August forest fires attained serious proportions, but brief showers proved sufficient to abate the trouble temporarily. Toward the middle of September, no further rain having fallen, the fires again gained headway, and serious damage to valuable timber limits is reported, especially in the East Kootenay country. The interference with industry arose from the necessity of stopping lumbering and, in some instances, mining to concentrate men on the work of fighting fires. Toward the close of the present month, however, the reports of forest fires have decreased in frequency, and it is generally believed that little further trouble need be feared.

The water famine, following the worst drought in the history of the Rossland district, has had a serious effect locally. Mines have been able to secure sufficient water for their purposes, but the concentrating plants, consuming large volumes of water daily, have in some instances, been compelled to suspend operations.

Metalliferous mining has not presented any new features. The number of men engaged in the industry remains about the same, and little change is expected in this direction within the next few months. Coal mining is improved somewhat, as the outcome of the placing of large orders for export coal and coke in East Kootenay. The lumbermen are busy, all the plants exporting to the North-west Territories being reported well filled with orders. This is likely to continue until the first of the year, when many mills may close down, following the usual custom of not cutting frozen timber unless absolutely necessary. Agriculture has received a decided stimulus throughout the Kootenay as the outcome of the practical demonstrations that the flat country and benches along the rivers and lakes, together with the mountain sides almost everywhere are capable of raising a

fine grade of fruit. Settlers are taking up land everywhere, and it will only be a matter of a few years until the Kootenays raise ample fruit and dairy products to supply its home market, now largely dependent upon the east and south.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. George Hargreaves, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

There are few changes to report in conditions as compared with those of last month. The building trades continue active with a demand for carpenters, painters and plumbers. The Ross-McLaren lumber mills, which have not been in operation for a number of years, have changed hands, and are now undergoing repairs. A force of about 200 men will be employed when the mills are in operation. A new company has been formed and registered as the British Columbia Vinegar Works Company, and will erect works close to this city. The Stave Lake Power Company has decided to issue debenture bonds to the amount of \$900,000. The bond issue will be for the purpose of developing the company power at Stave river falls, below Stave lake. Work will be started immediately, and in a year and a-half the power will be ready for use. The company has a franchise to enter the city, and the electricity generated will be offered to industrial concerns at a low rate. Work on reconstructing the car-shops recently destroyed by fire is being pushed forward without loss of time. The new buildings will be larger than the old ones. Work in the shops will be resumed in November, orders for nine new cars being now on hand. A large force of men are employed on the buildings and grounds, preparing for the annual exhibition.

There have been no changes in wages or hours of labour, and no strikes during September.

An increased bonus will be received by each of the employees of the British Col-

umbia Electric Railway company this year. This annual bonus, which is paid to employees, is a certain percentage after all operating expenses have been deducted. The scheme was inaugurated by the manager last year, when each employee received \$25 as a bonus for the year. The management has announced that this year's bonus, which is to be paid on the 29th of the present month, will be \$35. The company owns and operates the electric tramway service of Vancouver, New Westminster, and Victoria, and this bonus will be paid to about 200 men in the employ of the company.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—From reports received from the district, the farmers are all through with their harvest. A good price is being paid for grain, root and hay crops.

Fishing.—The run of Cohoe salmon on the Fraser river up to the present has not been heavy; 12 to 15 cents per fish is being paid. The salmon hatchery, now in course of construction, for the Dominion Government, will be ready for operations by October. A large amount of salmon fry is being secured to stock the hatchery. The two halibut schooners continue to bring in large cargoes of fish. The fish is placed in cold storage and shipped to eastern markets.

Lumbering.—A good export and local trade is being done by the local mills. Some of the lumber camps are not very busy, but the prospects are bright for the industry. The revenue from timber royalties during July, the first month of the present fiscal year, paid to the provincial government, was in the neighbourhood of \$50,000, while that from the same source during the month of August was about \$15,000, making a total of \$65,000 in revenue for the two months. Never before during the history of the lumber industry in British Columbia has so great an amount of revenue been derived in any four months from the actual returns on timber manufactured into lumber. Conditions in the lumber industry at present justify the prediction that the total revenue will this fiscal year exceed that

of the last year, when the amount derived was \$250,000.

Railway construction.—The Great Northern Railway Company has commenced to build a line of railway from the Fraser river bridge to Ladner, along the river front. The company has a line of railway to the same point, but by the construction of the present line it will open a new territory, and shorten the distance by about 9 miles. About 40 men are at present employed on this work.

Mining.—The shipments for the month of August, from the mines operating in Kootenay and Yale, to smelters in British Columbia, were 100,368 tons, as compared with 89,687 tons in August, 1903, and 74,626 in July of the present year.

CONDITION OF PARTICULAR TRADES.

Building trades.—All of these trades are very busy, with prospects good for some weeks yet.

Metal, engineering and shipbuilding trades.—Work was steady with considerable jobbing work under way. Blacksmiths were all busy working full time. Shipwrights and caulkers were dull, with very little work under way, and no new work coming out.

Woodworking and furnishing trades.—Woodworkers and wagon makers reported repair work as good, with new work fair for wagon makers. Woodworkers in factories report work plentiful, with orders ahead. Shingle weavers report that some of the mills have commenced to engage Chinese to operate their shingle machines, and where this has occurred, the white labour has in many cases left for other localities.

Printing and allied trades.—Printers report trade both in job and newspaper work, fair.

Clothing trades.—Tailors report work fairly good, with all hands employed.

Food and tobacco preparation.—Trade with cigarmakers was good, with all hands making full time.

Transport.—Steamboat employees report trade, both freight and passenger, good,

with a demand for additional men. Street railway employees report that work on the lines in this city and district is good; a number of new men being engaged in contemplation of busy fall trade.

Unskilled labour.—In this line a demand for men still continues, but with the advance of the wet season, many will be thrown out of employment.

DISTRICT NOTES.

Kamloops.—The Kamloops Saw Mills Company, Limited, mill was totally destroyed by fire; loss \$50,000. The company employed 40 hands, who are temporarily thrown out of employment.

It is proposed to establish a fruit and vegetable cannery. The council and Board of Trade are offering inducements to an eastern firm to establish a plant.

VANCOUVER, B.C., AND DISTRICT.

Mr. George Bartley, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

At eleven o'clock on Saturday morning, September 24 instant, all the machinists in the local Canadian Pacific Railway Company shops went out on strike. The strike is general over the western lines of the Canadian Pacific Railway from Fort William to Vancouver. Some time ago the machinists presented a new schedule of wages to Mr. Wm. Cross, assistant to Second Vice-president Mr. Wm. Whyte, of Winnipeg. These demands were refused by the company, resulting in the strike. The cause of the trouble, the strikers state, is entirely a question of wages. The strike was ordered from the headquarters of the Machinists' Union at Winnipeg. About forty men are out in Vancouver. The local men say that there is no disagreement between the local Canadian Pacific Railway Company officials and themselves, as all the negotiations will be carried on with Second Vice-president Whyte.*

* Full particulars as to the demand of the men and the conclusion of this strike will be found in the article on trade disputes during September in the present issue.

Commercially, the outlook for winter trade is very promising. Merchants state that business conditions are up to expectations, and that payments on the whole were fairly prompt. The fruit trade was very active. Mushrooms this year are very plentiful, selling at 10 cents a pound. Most of the supply comes from the Fraser valley, Port Hammond having sent in large shipments. Ashcroft potatoes will be very high in price this year, a short crop being reported, and local firms have secured the bulk of the supply. They are now quoted at \$24 to \$25 a ton. The crop in other sections of the province is reported to be an average one. Okanagan brands of flour have been advanced in sympathy with the Manitoba article. Eggs were firm, and somewhat scarce, at 30 cents to 35 cents a dozen. Eastern creamery butter was quoted at 25 cents a pound.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—The Hastings Mill Company is having a new tug built. It will be 90 feet long, 18 feet 6 inches beam, and 8 feet of hold.

Railroad construction and employment.—The B. C. Electric Railway Company has installed a safety apparatus on the Westminster Avenue bridge, which will be used this winter when foggy weather prevails. By this means no collisions will occur, such as one which took place last year. A string of incandescent lights have been placed along the bridge, and when a car goes on at either end the conductor switches the lights on so that the motor-man of any other car can see at a glance that the track is occupied.

Other industries.—Messrs. R. P. Rithet & Co., in their freight and shipping report for August, have the following: Wheat has advanced steadily during the month, and has now reached an exceedingly high figure, offering no inducement for export business, even with low freight rates ruling. There is, therefore, little demand for grain vessels. The lumber market continues weak, with little change from last

month's quotations. Freight rates are quoted as follows: Grain—San Francisco to Cork, F. O., to 22s. 6d.; Portland to Cork, F. O., 27s. 3d.; Tacoma and Seattle to Cork, 26s. 3d. Lumber—British Columbia or Puget Sound to Sydney, 30s. to 31s. 3d.; Melbourne or Adelaide, 33s. 9d. to 36s. 3d.; Port Pirie, 35s. to 36s. 3d.; Freemantle, 45s. to 47s. 6d.; Shanghai, 35s. to 36s. 3d.; Taku, 45s. to 47s. 6d.; West Coast, South America, 36s. 3d. to 37s. 6d.; South Africa, 55s. to 57s. 6d.; United Kingdom or continent, 50s. to 55s.

It is announced that the telephone line between Vancouver and Victoria will be open for business in about six weeks.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades still continues good. The season has extended beyond expectations, there being no rain. From September 1 to 4 fifty-seven building permits were issued, aggregating a total valuation of \$66,000. They were nearly all for frame dwellings. No large buildings were started in September. Carpenters report the demand equal to the supply, and the amount of work in prospect very encouraging, which can only be hindered by unfavourable weather conditions. Bricklayers reported that every one engaged in the trade was busily employed, and that a number of jobs were being hurried in order to get the roofs closed in before inclement weather conditions prevail. Stonemasons reported that there were a few idle men, but that a goodly number of their craft were at work. Plasterers were very busy, all at work at \$5 a day of 8 hours. Builders' labourers were fairly busy, but a number were seeking employment. Quite a number have been arriving from outside points. Labourers for general purposes may be had in large numbers. Prospects for this class are not encouraging. Stonecutters were fairly well employed, a few being out of work. Painters and paper-hangers were rather inactive, there being more men than jobs.

Metal, engineering and shipbuilding trades.—Electricians reported demand for

men equal to the supply. Sheet metal workers reported trade conditions as only fair, with a number out of employment. Machinists reported trade in contract shops fair, with a few idle men, and prospects uncertain. There is no big work in hand or in contemplation, only small jobs being done.

Printing and allied trades.—Printers reported trade very quiet, especially in the job offices.

All other trades were practically unchanged from the conditions prevailing last month.

VICTORIA, B.C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market has improved since last month, the most noticeable improvement being in the building trades and in the demand for unskilled labourers.

Work on the foundation for the tourist hotel for the Canadian Pacific Railway Company has commenced, and will provide employment for about 100 men for the next three months. Day and night gangs are kept going, as the work has to be completed before January 1. The dimensions of the building will be 300 x 200 feet.

Tenders are being invited by the Canadian Pacific Railway Company for the erection of a warehouse 255 x 60 feet on its new wharf.

A new industry of considerable importance is being established on Saanich inlet, about fifteen miles from Victoria. A company known as the Vancouver Portland Cement Company is making preparations for the manufacture of a high-grade of cement. Buildings and wharfs are now being erected, on which 150 men have been employed since April last. It is the intention of the company to have everything in readiness to commence business about the 1st of January next. When com-

pleted the works will cost \$300,000. The capacity at commencement will be 300 barrels per day, but provision is being made to increase the capacity to 1,000 barrels per day. Permanent employment for about 50 men will be provided, and houses are being erected by the company for their accommodation. Those interested in the concern are principally eastern men, who also have large interests in the Shallow Lake Cement works and the Lakefield works. They claim to have the very highest grades of material to manufacture from, and in practically unlimited quantities. At present the total consumption of Portland cement in the province is about 50,000 barrels per annum, but this company hopes to secure a large market for their product in Manitoba and the North-west.

On September 29, all employees of the B. C. Electric Railway Company received a bonus of \$35, as their share of the profits of the company during the past twelve months. This system of giving the men a share in the company's business was inaugurated last year, when they received \$25 each. This money is a percentage of the earnings of the road after operating expenses, &c., have been deducted. The best of feeling prevails between the company and its employees.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—During the past summer forest fires have caused unusually heavy losses to mill owners and loggers. In this city and district mills are running full time, and shipping the usual amount. An average of nine cars per day is ferried to the mainland for points along the line of the Canadian Pacific Railway. Island shingles have recently been shipped as far east as Boston and New York. The Mountain Lumber Mills Association has withdrawn from membership in the North-west Retail Lumber Dealers' Association, which controls the trade and sale in Manitoba and the North-west. The Mountain association will establish lumber yards and an open market east to the great lakes.

Manufacturing.—The marine railway and dry dock which the Victoria Machinery Depot Company has had under construction since April last is about completed. The work was tested on the 19th instant, and pronounced very satisfactory. The cradle is 280 feet over all and 65 feet beam, having a dead weight capacity of 3,000 tons. The cost of the improvement is upwards of \$60,000.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, lathers and plasterers, painters and decorators, plumbers and builders' labourers were actively employed. Stonecutters report fair employment. A marked improvement over last month is noticeable in every branch.

Metal, engineering and shipbuilding trades.—Moulders were busy. Machinists have had a fair month. Blacksmiths report a good month. Boilermakers and iron shipbuilders were only partially employed. With shipwrights and caulkers work was very slack, over fifty per cent of mechanics in this line being idle. Sheet metal workers and horseshoers, electrical workers and linemen, are fully employed.

Woodworking and furnishing trades.—Woodworkers were well employed. Car-

riage and wagon makers report trade good.

Printing and allied trades.—Printers, pressmen and bookbinders were still well employed, but trade has fallen off somewhat since last month.

Clothing trades.—Journeyman tailors report trade dull. Garment workers were actively employed.

Food and tobacco preparation.—Bakers were busy. Butchers report trade only fair, but better than last month. Cigar-makers were fairly well employed.

Leather trades.—Harness-makers and saddlers report good employment.

Miscellaneous.—Barbers were all employed, but report trade as being not as good as usual at this season of the year. Clerks, delivery employees and laundry workers report favourable conditions.

Transport.—Steamboat men, steamboat firemen, ship labourers and longshoremen were fairly well employed. Street railway employees report conditions good. Hackmen, teamsters and expressmen also had a good month.

Unskilled labour.—There is a good demand for this class of labour, caused by the commencement of work on the foundation of the Canadian Pacific Railway tourist hotel.

TWENTIETH ANNUAL CONVENTION OF THE TRADES AND LABOUR CONGRESS OF CANADA.

THE 20th annual convention of the Trades and Labour Congress of Canada was opened at Montreal, on Monday, September 19.

According to the report of the credential committee certificates of attendance had been received from 130 delegates. There were 17 trades and labour councils represented by 32 delegates, 64 international local and federal unions represented by 97 delegates, and there was one fraternal delegate representing the American Federation of Labour.

Opening Proceedings.

Addresses of welcome were delivered by Mr. Alphonse Verville, president of the Montreal Trades and Labour Council, and by His Worship Mayor Laporte, of Montreal. Mr. John H. Richards, fraternal delegate from the American Federation of Labour, Mr. Jas. B. Mack, of Montreal, vice-president of the Congress, and Mr. Charles March, of Toronto, 3rd vice-president of the International Brotherhood of Painters and Decorators, also delivered short addresses.

The president of the Congress, in reply, referred to the meeting of the Canadian Manufacturers' Association in Montreal, stating that the Congress would be pleased at any time to confer with the association. The formation of a civic federation was also advocated.

Address of the President.

In his annual address to the Congress, the president, Mr. John A. Flett, referred at length to the more important industrial and labour developments of the past year. In brief form the leading subjects dealt with were as follows:—

Legislative.—Legislation relating to corporations passed at the last session of the federal parliament, more particularly that relating to the Grand Trunk Pacific Railway Company was referred to. Regret was expressed for the defeat of the Union Label Bill and of the Alien Labour Bill, and for the rejection of certain proposals to amend the regulations relating to the Railway Commission. The extension of the fair-wages clause so as to apply to all industries bonused or assisted by the government was suggested, and the convention urged to support candidates for the House of Commons and the provincial legislature who would best represent the interests of labour. The action of the executive in appointing a solicitor to take charge of the legislative work was explained and commended.

Legal defence fund.—Though the Congress had passed practically a unanimous vote in favour of the establishment of a legal defence fund, in compliance with the resolution passed a year ago at the Brockville convention, the executive had deferred action in the matter until further ordered by the convention. The action of the Centre Star Company against the Rossland Miners' Union for damages sustained through the strike of 1901, was referred to in connection with this subject.

Employers' associations.—Several opinions were quoted as to the methods pursued by employers' associations and their actions in the state of Colorado and else-

where were condemned. All employment bureaux or agencies, it was stated, should be under government regulation and inspection.

Department of Labour—Immigration.—Every effort, it was stated, should be made to have bureaux of labour established in every province in Canada. The increase of the poll tax on Chinese was commended, and the importation of an inferior class of immigrants from continental Europe condemned.

International relations.—The progress of the international brotherhoods in Canada was referred to, and the views of the president of the American Federation of Labour on the labour movement in Canada, as giving expression to the attitude of that body towards Canadian international unions were quoted at length. The Canadian membership of the American Federation of Labour was stated to be 19,710, with 365 officers, organizers and other representatives. The resolution passed at the convention of the American Federation held at Boston, Mass., in November last, with regard to labour organizations in Canada, was also quoted. Reference was also made to the Taff Vale decision in Great Britain, and to the cheap labour problem in South Africa.

Open shops.—The recent pronouncement of the president of the United States in favour of the open shop, was referred to, and the relations of unionists and non-unionists commented upon. With regard to the principle of collective bargaining, and the responsibilities of trade unions, the following statement was made:—

Trade unions undoubtedly should have the same right to do collective bargaining as has any other form of corporation,—one of the alleged complaints of employers being that our unions at times violate their agreements. While this may be true in some instances (our organizations not claiming perfection) we venture to assert without fear of successful contradiction, that agreements entered into by labour organizations and their employers are as free, if not more so, from breach or violation as those of any other element in the community, and labour unions are becoming more conservative in their methods as time progresses. In view of what has been stated I would urge upon our people everywhere to hold all obligations, agreements, or contracts, as binding upon their honour, and to be lived up

to religiously. I recognize it as a pre-requisite and necessary condition, to the due observance of contracts, and the proper carrying out of the terms, that all employees should be subject to regulation and discipline by the organizations entering into the agreements or contracts.

Union label.—The demand for goods bearing the label was reported to have greatly increased; the formation of branches of the Women's International Union Label League was advocated as a means of directing the public's attention to what the label stands for.

Prison made goods.—Every effort, it was stated, should be put forth to prevent the product of prisoners from entering into competition with that of free labour. All goods made in prisons and offered for sale should be labelled 'prison made.' The attitude of the Honourable the Provincial Secretary of Ontario was commended in this respect.

Health of workmen.—A law to protect the health and comfort of workmen, and favouring the appointment of inspectors of machinery and employees, &c., upon large construction works and quarries throughout the Dominion was advocated.

In conclusion the president impressed upon the convention the wisdom of pressing for such reforms only as were of the utmost importance. The introduction of fewer resolutions at the meeting, in order that better consideration and discussion might follow was recommended.

Report of Executive Committee.

The executive committee reported that they had met in the city of Ottawa, on March 13, 1904, and considered the recommendations adopted at the Brockville convention. It had been decided to abandon in future the method of sending deputations to interview the government, and to engage Mr. John G. O'Donoghue, solicitor, of Toronto, to look after legislation sought by the Congress. The report was concurred in.

Reports of Provincial Executive Committees.

British Columbia.—A law has been enacted making 8 hours a day's work in coal

mines, thus giving a uniform work day in all mines. Reference was made in the report to a loss of a case in the courts under the Alien Labour Law, and to a verdict for \$12,500 damages against the Rossland miners union.

Manitoba.—The action of the legislature in reducing the age limit for children and allowing an increase in the hours of labour for women and children under the Factories Act was regretted. The committee also referred to the result of the immigration policy of the government, and urged the Congress to lay the matter before the Dominion Government with a view to having a commission appointed to investigate the work of the policy. It was reported that work in the building trades and other lines had been plentiful during the year, but that the demand for skilled labour was met by the local market. The carpenters of Winnipeg succeeded in getting recognition of their joint organizations, and in establishing a wages rate.

Ontario.—A report of the interview with the premier of the province is given, the following matters having been submitted for consideration:—(1) A Bill for licensing stationary engineers; (2) a Bill to provide for passage through the centre of open street cars; (3) endorsement of the action of Robert Glockling, secretary, Ontario Labour Bureau, in placing before the British workingmen the true conditions of labour in the province; (4) the establishment of a provincial printing bureau; (5) legislation to end the evil effects of watering stocks; (6) additional factory inspectors to be appointed; (7) an Act to amend the law relating to trade unions and their funds. The committee also referred to the appointment of an additional female factory inspector, and of Mr. A. W. Holmes, in the place of Mr. James Brown, as factory inspector.

Quebec.—It was reported that a few unions in Montreal had succeeded in obtaining an 8-hour work day. About 15 labour unions were formed during the year. The need of a permanent organizer, to speak

both the English and French language, was stated. In an interview with the provincial legislature, the following subjects were dealt with:—(1) Legislation concerning mutual benefit societies, protesting against its application to labour unions. The minister gave assurance that instructions had been given to the Solicitor General that labour unions be no longer troubled; (2) resolution concerning compulsory education. The Hon. Messrs. Weir and McCorkill stated, that next year, Montreal would have its free school and compulsory education, but for Protestant children only; (3) a resolution concerning the sanitary regulations of the city of Montreal was sanctioned by the legislature.

New Brunswick.—The formation during the year of eight labour unions was reported, as well as the lapsing of three organizations. Increases in the rates of wages of various classes were mentioned, as well as the strike of journeymen tailors in St. John. The appointment of a commission by the legislature to inquire into the need of a Factory Act for the province was referred to.

Nova Scotia.—The progress of organization and a fraternal visit paid to the Grand Council of the Provincial Workmen's Association in Halifax were dealt with. An endeavour was made to have the 'Factory Act' put into operation, but so far without success. No labour troubles have occurred in the province during the year, except the strike at Sydney.

Prince Edward Island.—The trouble that existed between the Central Council and Federal Labour Union No. 10 was amicably adjusted. It was reported that some unions had allowed their charters to lapse. The Commissioner of Public Works had been asked to insert a fair wage schedule in contracts let by the provincial government. A special committee of the Charlottetown Trades and Labour Council submitted a report showing the increases of wages received by several classes of organized workers.

Report of Committee on President's Address and Executive Committees' Reports.

The committee concurred in the recommendations included in the president's address with regard to the Grand Trunk Pacific Railway. It was stated that the people should own the road. The government was censured for not passing the Union Label and Alien Labour Bills, as well as for its immigration policy. In reference to the *Labour Gazette*, it was recommended that the trade union secretaries be urged to give all possible information to the department, and that the government be asked to see that the correspondents of the *Gazette* secure their information from trade union officials. The committee also reported in favour of additional provincial labour bureaus, and factory inspectors, and approved of the powers of the latter where already established being increased. The reports of the provincial executives were concurred in except that portion of the British Columbia report which stated that it was a question of prudence to co-operate with the old parties where constituencies cannot elect straight labour candidates. In reference to the Provincial Workmen's Association, the committee recommended that efforts be made to have the association enter the international trade union movement, and become affiliated with the Congress. Regarding the complaints from Charlottetown *re* wages paid on government work, carried on by the province, it was urged that the provincial government be asked to insert fair wages clauses in all contracts for public works.

Report of Fraternal Delegate to A. F. of L.

The fraternal delegate to the convention of the American Federation of Labour held in Boston, Mass., in November last, in presenting his report recommended the Congress to invite the Federation to hold the 1905 convention in one of the leading Canadian cities, and also to prepare a hand-book giving information to the workers of the United States as to the field of labour in Canada. The report was approved.

Report of Solicitor.

The report of Mr. John G. O'Donoghue, the solicitor retained by the executive to watch the interest of organized labour in legislation brought before the Dominion parliament, was considered by the delegates in secret session. The subjects dealt with were: Wages of Intercolonial Railway employees; dismissal of Intercolonial Railway employees; railway insurance; amendments to the Railway Act; the old age pension scheme on the Intercolonial Railway; the British Columbia Labour Commission; Grand Trunk Pacific health regulations; the arbitration between the Order of Railway Telegraphers and the Grand Trunk Railway Company; amendment of the Steamboat Inspection Act; fair wages regulations; amendment to the Criminal Code; immigration; Chinese labour; the Union Label Bill; misrepresentations to intending immigrants; and the Alien Labour Bill.

Secretary Treasurer's Report.

The secretary-treasurer's annual report showed that there had been an increase in the membership of 5,902, and an increase in the revenue of \$376.50. The summary of receipts and expenditures is as follows:—

Receipts.

Balance on hand from last year..	\$ 494 96
Per capita tax, charters and supplies.	2,643 00
Grant from American Federation of Labour..	500 00
Advertising..	110 00

Total..	\$ 3,747 96
Expenditure..	3,346 29

Balance..	\$ 401 67
-----------	-----------

The following statement shows the increase or decrease in membership and revenue by provinces:—

Province.	Increase in No. of Unions.	Increase in membership.	Increase in Revenue.
Nova Scotia..		24	23.47
New Brunswick..	6	417	51.53
Prince Edward Island..	4	493	70.30
Quebec..	33	3,879	344.45
Ontario..	26	1,634	48.77
Man., N.W.T. and British Columbia.	14	289	11.95

The number of unions in each province affiliated with the Congress, together with their membership, and the amount paid during the year was also presented as follows:—

Province.	No. of Unions.	Member- ship.	Revenue.
			\$
Ontario....	176	12,018	1,465 34
Quebec.....	59	6,179	630 07
British Columbia	58	2,752	391 78
Manitoba and N.W.T.			
Prince Edward Island.	5	534	80 38
Nova Scotia.....	5	400	20 20
New Brunswick.....	18	127	55 23
Total.....	321	22,010	2,643 00

Twenty-seven trades and labour councils hold charters from the Congress, as well as twenty-four federal labour unions, three of which were issued during this year. Four charters were revoked and four surrendered.

In addition to presenting the financial and statistical statement, the secretary recommended the appointment of an organizer, an increase in the per capita tax, and the payment of such tax from headquarters of international unions having locals in Canada.

Changes in the Constitution.

The following changes in the constitution were adopted: Article 4, section 1, which provides for the raising of the revenue, was amended by increasing the per capita tax 50 per cent. Trades and labour councils, national trades unions, and federal labour unions chartered by the Congress, and not having to pay to an international or national head, will now have to contribute $37\frac{1}{2}$ cents per year, while international trade unions will be called upon to pay 24 cents per year.

It was enacted that where an office has become vacant the executive shall have power to appoint a person to fill such vacancy.

The ways and means committee reported in favour of increasing the per capita tax by 100 per cent, but the proposition was

defeated, and a 50 per cent increase was enacted.

Sabbath Observance.

A deputation from the Lord's Day Alliance was received, which explained the aims and objects of the alliance. The association asked the co-operation of the Congress in seeking legislation for the protection of one day of rest in seven. The previous resolutions of the Congress, it was stated, had been of great assistance to the alliance. The president, in reply, assured the deputation of the support of the Congress.

Conference with Canadian Manufacturers' Association.

A suggestion made by the Toronto District Trades and Labour Council that a conference between the Manufacturers' Association and the Congress be held was upon motion accepted, and a committee appointed to confer with the Manufacturers' Association, the secretary notifying the Manufacturers' Association of the action of the Congress. In reply, the secretary of the Manufacturers' Association stated that the association had adjourned at Montreal, but that he was ready on behalf of the association to meet a committee from the Congress in any city of the Dominion, Toronto preferred. It was, therefore, decided to appoint a committee of five to meet the Manufacturers' Association in the city of Toronto.

Resolutions Submitted.

There were 52 resolutions submitted for consideration, the majority of which were adopted in their entirety or amended by the convention.

Agent to Great Britain.

A resolution recommending the appointment of an agent to guard the interests of labour in connection with government immigration was defeated, and an amendment carried providing for the sending of circulars to central labour bodies and trade unions asking what amount each would con-

tribute towards such a scheme. The executive was authorized to appoint an officer should the returns warrant.

Quebec Matters.

The following resolutions having direct reference to the province of Quebec were referred to the executive committee of that province:—

That the Quebec government be asked to pay current scale of wages on public works in the City of Quebec.

Instructing Quebec executive committee to watch the new legislation regarding compensation to workmen injured in the discharge of their duties.

Asking for the appointment of a scaffolding inspector, and also for the appointment of a plumbing inspector for the City of Montreal.

That the Quebec factory inspectors be given more power, and that eight hours be made a legal day's work for children.

Asking the Quebec legislature to provide means whereby free school books will be furnished to school children.

That an inspector of telegraph lines be appointed for the province of Quebec, and that alien labour officers be appointed for the province.

Ontario Affairs.

The following resolutions were referred to the Ontario Executive Committee:—

That the Ontario government be asked to label prison-made brooms on the expiration of the present contract.

That this congress ask for a law in the province of Ontario preventing the employment of children of 10 years of age in shops, and request that age limit be raised to 14 years, the same as that governing the employment of children in factories.

Miscellaneous Resolutions.

The following resolutions dealing with a variety of subjects were approved by the convention:—

That all government work be performed under the day labour system and by competent workmen in their own particular trades.

That the federal and provincial governments be petitioned to have government employees confined to the particular work for which they are engaged.

In favour of women's union label leagues, and recommending the labels of international trades unions as the emblems of fairness.

In favour of having members of trade unions abstain from use of intoxicating liquor on Labour Day.

Instructing the General Executive Committee to make inquiries as to how the trade union movement can be benefited, and the various unions brought into affiliation with the Congress.

In favour of bringing out independent labour candidates wherever practicable.

Asking the provincial authorities to pass a law requiring the removal of old paper, &c., from walls before new material is put on.

In favour of an arbitration treaty between Canada and the United States.

Disapproving of holding caucuses for the purpose of selecting officers of the Congress or any other purpose.

In favour of public ownership of telephones, and asking that Dominion legislation be secured for same.

Protesting against government employees being discharged or discriminated against on account of their connection with labour organizations.

That the provincial governments be asked that in the appointment of boiler inspectors competent men be selected.

That labour organizations be instructed to see that fair conditions prevail where the use of labels are granted.

Against the bonusing of industries by municipalities.

That Congress ask for the passage of a law by the provincial governments enacting that passage ways be provided in street cars.

In favour of the abolition of property qualification in public office.

In favour of shorter work days for barbers.

Officers for 1904-05.

The officers chosen for the ensuing terms were as follows:—

President, A. Verville, Montreal, Que.
Vice-president, Jas. Simpson, Toronto, Ont.
Secretary Treasurer, P. M. Draper, Ottawa, Ont.

Provincial Vice-presidents and Executive Committees.

Ontario—

Vice-president, Samuel Landers, Hamilton, Ont.

Executive committee, E. W. A. O'Dell, Hamilton, Ont., George Lambert, Sarnia, Ont., Jas. Wilson, Toronto, Ont.

Quebec—

Vice-president, George Levesque, Quebec, Que.

Executive committee, A. Mitchell, Montreal, Que., T. Fisher, Montreal, Que., E. Berthiaume.

New Brunswick—

Vice-president E. J. Neve, St. John, N.B.
Executive committee, M. J. Kelly, St. John, N.B., H. Goldsworthy, St. John, N.B., Chas. McHirstal, St. John, N.B.

Manitoba—

Vice-president, Henry Alberts, Winnipeg, Man.

Executive committee, A. W. Puttee, M.P., Winnipeg, Man., R. Western, Winnipeg, Man. J. F. Grassick, Winnipeg, Man.

The appointment of the officers for the provinces of Nova Scotia, British Columbia and Prince Edward Island were left to the General Executive Committee.

The retiring president John A. Flett, of Hamilton, Ont., was elected as fraternal delegate to the American Federation of Labour.

Toronto, Ont., was chosen as the next place of meeting.

NATIONAL TRADES AND LABOUR CONGRESS—SECOND ANNUAL CONVENTION.

THE second annual meeting of the National Trades and Labour Congress of Canada convened in the city council hall, Ottawa, Ont., on Tuesday, September 27, at 10 o'clock a.m.

His Honour Mayor Ellis, of Ottawa presented the civic welcome. Speeches in answer to the Mayor's address were delivered by T. F. Benbow, of Ottawa, Thos. J. Griffiths, Montreal, and P. J. Simard, Quebec.

Opening of Congress.

The president announced the different committees on credentials, resolutions, ways and means, president's address, audit and thanks.

The following is a list of the credentials submitted to the committee, representing delegates in attendance at the congress:—

National Brotherhood of Tanners, Corroyeurs No. 1, Quebec—

N. Grenier, Jos. Couture.

Canadian Federation of Boot and Shoe Workers of Canada, Local No. 2, Montreal—

Lucien Depocas, Phil. Monahan, Chas. Dionne.

National Brotherhood of Machine Shoe Workers, Quebec—

Ed. Barry, O. Brunet, J. A. Langlois, Geo.

Marois, Ant. Letourneau, Ferd. Laroche.

National Protective Union of Labourers, Quebec—

Jos. Havard, J. M. Gobeil.

Painters National Union No. 1, Quebec—

W. Alf. Bertrand.

Maple Leaf Assembly K. of L., No. 1160, Quebec—

P. J. Simard.

National Union of Bricklayers, Plasterers and Masons, Quebec—

Arthur Marois.

Union National des Charroyeurs de Charbon,
Quebec—
Félix Binet.
Fraternité Nationale des Manœuvres, Quebec—
J. B. T. Menard.
National Central Trades and Labour Council,
Quebec—
L. C. D. Laroche, J. B. St. Laurent, P. J.
Jobin.
National Protective Union of Boot and Shoe
Lasters, Quebec—
Jos. Julien, Elz. Ferland.
National Union of Gravel Roofers No. 1, Mont-
real—
Jos. Despatie.
National Federation of Coopers of Canada, No.
1, Montreal—
Rod. Bissonnette.
National Union of Garment Workers, No. 1,
Montreal—
Jos. Miller.
Union Nationale de Propagande, Montreal—
A. L. Gareau.
District Assembly K. of L., No. 20, Quebec—
J. Roe, Jos. Voyer, J. Elz. Gauvreau.
National Union of Glovemakers, No. 1, Que-
bec—
Thos. Kelly.
National Union of Carpenters and Joiners, No.
3, Quebec—
Art. Mercier.
National Trades and Labour Council, Ottawa—
E. Carey, S. Legaré, S. Kennedy.
National Union of Carpenters and Joiners, No.
2, Ottawa—
Thos. Welsh.
National Union of Plumbers and Steamfitters,
No. 2, Ottawa—
E. Coldez.
National Union of Musicians, No. 2, Ottawa—
Thos. F. Benbow.
National Union of Carpenters, Joiners and
Caulkers, No. 4, Montreal—
Jos. Lapointe.
Canadian Federation of Brass Workers, No. 1,
Montreal—
Thos. J. Griffiths.
Central Trades and Labour Council, Montreal—
Jos. Houle, H. Gravel, D. Verdon.
Canadian Federation of Textile Workers, No.
1, St. Hyacinthe—
E. Ouellette.
National Union of Longshoremen, No. 1, Que-
bec and District—
J. L. Bertrand.
Canadian Federation of Boot and Shoe Workers,
No. 1, Montreal—
Eph. Chalifoux, U. Lavallière.
National Union of Bakers, No. 1, Quebec—
Jos. Gagnon.
National Union of Brewery Workers, No. 1,
Quebec—
National Union of Plumbers and Steamfitters,
No. 1, Quebec—
Phil. Roy, F. X. Doré.
J. Mallette.
National Union of Tin Roofers, No. 1, Que-
bec—
Alb. Tardif.
General Executive of Canadian Federation of
Boot and Shoe Workers, Montreal—
T. Beaupré, N. Lavallière, Zotique Fournel.
National Union of Painters, Decorators and
Papers Hangers, No. 2, Ottawa—
Jos. Béland.

Delegate J. B. St. Laurent, of Quebec,
acted as French Secretary during the
session.

Address of the President.

The president in his annual address to
the Congress referred in opening to the
growth and influence of the Congress dur-
ing the past year. The interview of the Ex-
ecutive Council with the Dominion Govern-
ment was also mentioned, and the establish-
ment of a sound defence fund raised entirely
in Canada was recommended as a potent
means of attracting organized labour to the
federation. Reference was also made to the
criticism which the Congress had received
for having adopted a friendly attitude to-
wards employers of labour. The adoption of
the principle of mutual understandings and
arbitration between capital and labour was
commended in this connection as preferable
to an attitude of hostility. The president
also referred to the advisability of changing
the name of the Congress to 'the Canadian
Federation of Labour' as conveying more
clearly the scope and purpose of Canadian
national unions. With regard to immigra-
tion, the president was of the opinion that
a reasonable influx of British labour should
not be discouraged, though the immigration
of people who do not readily assimilate in
Canada ought to be reduced. The growth
of the organization during the past year,
it was stated, had been such as to warrant
the expression that the national movement
now extends from the Atlantic to the Pa-
cific. In the city of Ottawa in particular
good progress had been made. In conclu-
sion the delegates were asked to recognize
fully the importance of their deliberations,
and to see to it that the resolutions of the
convention should be of lasting benefit to
the workers of Canada and the growth of
the national unions.

Annual Report of the Executive Board for the Quebec Division.

The executive Board of the Congress in
the course of an extended report stated that
the national labour unions of the Quebec
division were in a prosperous condition, and

that the bonds uniting them were being drawn closer. Almost all workmen of the city of Quebec, it was stated, are organized under the national congress. Three new chartered associations, the Glovemakers, No. 1, of Quebec; the National Union of Tinsmiths and Metal Roofers of Quebec, and the National Union of Brewery Workers, of Quebec, have joined with the existing unions and the future gives promise of even better results. No serious difficulty had been reported, except the lock-out in the boot and shoe manufacturing industry in the month of October, 1903. The employers, in order to force their machine workers to treat individually with them, closed their establishments, stating that they would only reopen them after each individual worker had signed a contract. During five weeks the machine workers maintained a struggle. Finally, at the request of the workmen, the case was referred to the Quebec Arbitration Tribunal, which ordered the reopening of the factories.

In the month of February the following programme, previously endorsed by organized labour in Quebec, took effect:—

- (1) Election of mayor by the people.
- (2) Abolition of the property qualification for the third alderman in each ward.
- (3) Vote by the people on all permanent loans, bonuses and all tax exemptions.
- (4) Every elector to have right to vote who has paid his personal tax.
- (5) Eligibility to be subject to the desired qualification and to the payment of personal taxes only.
- (6) Absolute independence of the city auditor.
- (7) More equitable regulation of the constitution of the Board of Revision and its procedure.

The report also referred to an unsuccessful attempt to elect a workingman candidate for municipal honours in Quebec, and to the expulsion of three members from the National Central Council in Quebec; also to the temporary suspension of a society. Legislation with regard to labour in Quebec, was stated to be neither very considerable nor varied. With regard to the law intituled, 'Of Councils of Conciliation and Arbitration to settle industrial disputes in the province of Quebec,' the manner in which this tribunal was formed had

forced the executive to join with the National Central Council of Quebec, in protesting against the appointment of the arbitrator for the workingmen.

In Montreal the national movement was stated to have made considerable progress. Four new unions had been organized and the future regarded as favourable.

Resolutions Adopted.

The following is a statement of the various resolutions adopted by the Congress:—

That this congress is of the opinion that a national label league be formed, and the public be requested to demand the national label on all products of Canadian manufacturers.

That this congress is in favour of an imposition of a tax of 50 per cent to be levied on all barrels imported from the United States, as a means of protecting the Canadian cooping industry.

That the government be requested to appoint a competent inspector in each city to control the use of dynamite and other explosives thus protecting the public against accidents.

That a deputation be drafted to wait upon the proper minister of the Dominion government, to see why it is that the harbour commissioners of Quebec have allowed ocean steamers to go past that port to Montreal harbour, the Quebec commissioners charging too high fees as compared with Montreal.

That a special committee be appointed to wait upon Sir Wilfrid Laurier and Sir Wm. Mulock, with respect to securing a nine hour day on all public works in the City of Quebec. The committee appointed was composed of delegates, T. F. Benbow, T. J. Griffiths, J. P. Simard, P. J. Jobin, A. Marois and J. B. T. Menard.

That the congress make the necessary arrangements for the publication of an official organ, which will be of great advantage to the unions affiliated with the National Congress.

That the government be asked to take steps for preventing the influx of indigent immigrants and skilled labour men into this country.

That this congress think it is its duty to show to Sir Wm. Mulock, Minister of Labour, its appreciation of his work during the last session of parliament, in introducing an amendment to the present alien labour law. If this new law had not been thrown aside by the Senate, its effect would have been of great importance to the labouring classes, in checking the importation of undesirable workers into this country. That this congress hopes that the Minister of Labour will make an effort to introduce this measure again at the next session of parliament more successfully.

That the government be requested to appoint a competent inspector of scaffolding, said officer to be a practical carpenter.

That this congress do strongly protest against the action of the Senate, in refusing its sanction to the alien labour law, as presented by the Minister of Labour, and adopted by parliament.

That in view of the great importation to this country of boots and shoes made in the United States, this congress do request the government to place a tariff on imports of that kind to the value of 35 per cent *ad valorem*.

That in view of the fact that the growth and encouragement of the Canadian industries, and agriculture, would be of great benefit to the workmen of Canada: Be it resolved: That the government be asked to appoint a special commission composed of manufacturers, merchants, agriculturists and workmen, to investigate and report on the needs of Canadian manufactures and industries, for adequate protection to their several industries.

That this congress offer its thanks to the Hon. Mr. Brodeur, Minister of Inland Revenue, for the introduction of a law for the protection of our tobacco industries and against the trust of the American Tobacco Company.

That a design of a flag as submitted to the congress be accepted as the emblem of the National Trades Congress.

That the executive be instructed to approach the government and suggest that all government works shall be regulated as to hours of labour, and wages therefore, by the standard obtaining in the nearest city where such work is to be executed.

That the competition of manufacturers in England is against the interest of the manufacturers and workers of Canada in the tweed industries, consequently be it resolved: That the executive of this congress, be instructed to ask the government at the next session of parliament to increase the duty on these goods manufactured in England, so as to put them on the same basis as goods coming from foreign countries.

That the government be requested to amend the fair wages resolution in such a way as to prevent contractors on public works from dismissing employees making claims to the departments under the fair wages schedules.

That the general executive be empowered to prepare a by-law, to levy an assessment of 5 cents per week on all members of the organizations for the purpose of creating a defence fund in case of necessity, and to present a report at the next session of congress, said report to be acted upon by the delegates to the next congress.

That national unions affiliated with this congress be allowed to receive and accept as honorary members any artisan or mechanic of their respective trade or occupation over 60 years of age, such members to pay such initiation fee and annual contribution as the local union may deem fit to fix from time to time.

A resolution to change the name of the Congress into Canadian Federation of Labour, was left on the table until next session.

Votes of thanks were passed to Rt. Hon. Sir Wilfrid Laurier, Hon. Sir William Mulock, Mayor Ellis, the Ottawa City Council, Mr. W. L. Mackenzie King, Deputy Minister of Labour, National Trades and Labour Council of Ottawa, to the Governor General's Foot Guards' Band, to the local press, and to the ex-officers of the Congress.

A resolution favouring the adoption of a higher protective tariff was defeated.

Reports of Officers and Committees.

Mr. Thos. J. Griffiths, secretary-treasurer of the Congress, presented his annual report, which showed that 14 new charters were issued during the past year, classified according to locality as follows: Montreal 4, Quebec 4, Ottawa 3, Hull 1, Granby 1, St. John 1. The Congress has now under its jurisdiction 43 chartered unions and 7 affiliated bodies, being a total of 50 organizations.

The Congress is now composed as follows:—

National Central Trades and Labour Councils:—

	Number of Delegates.	Member- ship.
Montreal.. .. .	30	3,400
Quebec.....	54	5,000
Ottawa.....	20	500
Total.....	104	8,900

National Unions:—

National Unions:—		Number of Unions.	Member- ship.
QUEBEC..	{ Quebec.	17	5,000
	{ Montreal.....	12	3,400
	{ St. Hyacinthe...	2	300
	{ Hull.....	1	40
	{ Granby.....	1	30
ONTARIO..	{ Ottawa.....	6	500
	{ London.....	2	200
	{ Trenton.....	1	175
	{ Hawkesbury.....	2	540
BRITISH COLUMBIA.	{ Victoria.....	1	100
	{ Vancouver.....	2	150
Total.....		47	10,435

The auditors reported as follows:—

Receipt:—

From charters fees.. . . .	\$115 00
From per capita tax.. . . .	296 95
From miscellaneous.. . . .	6 18
On hand last year.. . . .	29 32

Total \$447 45

The following unpaid accounts were reported:—

To T. J. Griffiths, as organizer..	\$ 76 00
To Montreal Printing Company..	12 00
To Bulletin du Travail.. . . .	108 00

The committee on ways and means recommended the imposition of the following per capita tax for next year: On all central trades councils, district assemblies of Knights of Labour, 35 cents per annum for each member; on national unions and all

other organizations, 18 cents per annum. The committee also recommended that \$15 per month be paid to the secretary-treasurer and organizer, \$10 to the French secretary for his services during the present session, and \$5 to the caretaker of the council chamber. Also that 700 copies of the proceedings be printed, 400 in French and 300 in English, for distribution.

Officers for 1904-05.

President—Thos. F. Benbow, Ottawa.

Vice-president—D. Verdon, Montreal.

Sec.-treasurer and organizer—Thos. J. Griffiths, Montreal.

Executive for Quebec—

Vice-president—J. L. Bertrand, Quebec ;

Art. Marois, Quebec ; H. Gravel, Montreal ;

Teles. Beaupré, Montreal.

Executive for Ontario—

Vice-president—S. Kennedy, Ottawa ; J.

Welsh, Ottawa ; H. Legaré, Ottawa ; J.

Béland, Ottawa.

The executives for other provinces are left to the general executive to select.

The Congress adjourned on Friday, September 30, to meet next year at Montreal, on the second Tuesday of September.

Notes.

Among other entertainments given to the delegates by the National Trades and Labour Council of Ottawa, were a car ride to Britannia-on-the-Bay, thence to Rockliffe, where the Royal Shanty was thrown open to the visitors, and a luncheon served. A smoking concert in honour of the visitors was held at the King Edward hotel. The delegates were also invited to a concert by the Black Watch Band at the Russell Theatre. A very successful banquet was also held at Aylmer.

The Honourable the Minister of Labour and the Deputy Minister of Labour addressed the Congress during the session, on which occasion the special committee appointed to interview the government had an interview with the Minister of Labour.

ANNUAL MEETING OF THE GRAND COUNCIL OF THE PROVINCIAL WORKMEN'S ASSOCIATION AT TRURO, N.S.

THE twenty-sixth annual meeting of the Grand Council of the Provincial Work-

men's Association was held at Truro, N.S., during September, assembling on the 6th inst., and remaining in session for four days. Seventy delegates, representing 38 lodges, and 10 grand officers were present.

The secretary's report showed 42 lodges in good standing. The income from per capita tax was shown to have increased by \$1,000 from last year.

Subjects under Discussion.

The following were among the principal subjects discussed by the Council: The need of a mechanics' and wage-earners' lien Act in Nova Scotia, and of legislation for the better protection of stationary engineers; alien labour; the union label; old age pension funds; the need of more frequent inspection of scales over which heavy cars pass, and which are subjected to continual jarring, as at pit bank heads; and the punishment of agents who falsely represent working conditions in Canada, especially in the mining regions of Nova Scotia.

It was resolved to urge the passing of a Mechanics' Lien Act upon the provincial government, and to make representations to the federal government with regard to the inspection of scales and the status of alien labour. The action of the Dominion Senate in defeating the amended Alien Labour Bill during the past session was condemned. With regard to the question of old age pensions, it was resolved to promote discussion of the subject during the year among the lodges, and thus obtain more definite information as to the opinion of the membership of the association in the matter. A desire was expressed for a more equal distribution of the hospital funds granted by the local government.

Election of Officers.

The following officers were elected: G.M., Joseph Moss; G.A.M., S. B. McNeil; G.Sec., John Moffatt; G.Treas., Ronald Nicholson; G.Guardian, J. J. Fraser; G.I.W., A. G. McLellan; G.O.W., John Legett; Sub. Sec., John Dooly; P.M., Peter Murphy.

New Glasgow was chosen as the next place of meeting.

PROCEEDINGS OF THE ARBITRATION BOARD IN DISPUTE BETWEEN G T. R. CO. AND TELEGRAPHERS.

THE board of arbitration appointed by the Honourable the Minister of Labour on August 27, 1904, under the Railway Labour Disputes Act, 1903, in the matter of the dispute between the Grand Trunk Railway Company and certain of its telegraphers, held its opening meeting at Toronto, on September 19, delay in commencing the taking of evidence having been agreed to by the parties, owing to the engagements of His Honour Judge Teetzel, chairman of the board.

At the opening meeting a question was raised as to whether counsel should be permitted to represent the parties to the arbitration before the board. Objection was taken by the representatives of the telegraphers, and the chairman, under section 19 of the Act, which provides that 'No counsel shall be entitled to appear before the board except with the consent of the parties to the difference,' sustained the objection.

The question of fixing a date from which the decision of the board should take effect was discussed, but was left in abeyance.

The procedure to be followed in presenting the evidence was also discussed. The board then adjourned to convene again at the call of the chairman.

On September 23 an informal meeting of the board was held, but owing to the absence of the company's agents the sitting was adjourned until the following day, when proceedings were resumed at the city hall, Toronto.

It was decided by the chairman that the meetings should be open to the public.

Mr. D. Campbell, third vice-president of the Order of Railroad Telegraphers, submitted a statement of claims on behalf of the telegraphers, addressing the board in this connection.

The board then adjourned until October 13.

Claims of Telegraphers

The statement setting forth the claims of the telegraphers was in the form of twenty-five proposed rules and rates of pay to govern the telegraphers employed on the Grand Trunk Railway system. Briefly stated the more important demands of the telegraphers as therein presented were as follows:—

The term 'telegrapher' to include any employee performing telegraph duties of any character by assignment of proper authority.

Telegraphers not to be suspended or discharged without just cause; any charges to be in writing and to be duly tried within fifteen days. If found guilty suspension to commence at the time the employee was relieved for trial; if discharged the reasons to be clearly stated in writing and no loss of time to be incurred by the employee.

No discrimination to be made against members of the Order of Railroad Telegraphers. Free transportation to be allowed telegraphers over their division and time allowed in which to attend meetings in as far as consistent with good service.

A letter stating term and efficiency of service to be given to telegraphers leaving the service.

Promotion to be governed by merit and ability, seniority having the preference where ability is sufficient, and senior telegraphers to be retained in the case of a reduction in staff.

Free transportation for family and household goods to be granted in case of transfer.

Telegraphers called from duty at the request of the company to receive the same compensation as if on duty.

Regular wages to be paid telegraphers performing duty at wrecks or in other emergencies.

Certain classes of employment such as conveying mails, teaching telegraphy, cleaning stations, &c., not to be required of telegraphers.

Four dollars per month to be paid telegraphers who are required to attend six or less switches or semaphores lights with fifty cents per month for each additional light.

Telegraphers not to be required to work on Sundays or legal holidays except when absolutely necessary to the company's interest, pay in such cases to be at overtime rates.

Telegraphers handling express business to receive the usual commission.

Not more than twelve consecutive hours including meal hours to constitute a day's work. Nine consecutive hours to constitute a day's work at certain specified stations.

Overtime in no case to be paid less than twenty-five cents per hour. Emergency calls to be paid at fifty cents per hour. Employees to have eight consecutive hours off duty in each twenty-four.

All branch line telegraphers required to be on duty beyond twelve consecutive hours to be compensated for the inconvenience at a fixed scale.

After four years service two weeks leave of absence to be granted annually with full pay and free transportation for themselves and families to any point on the system.

The following minimum salaries to be paid :

	East of Detroit and St. Clair Rivers.		West of Detroit and St. Clair Rivers.	
	M. Lines.	B. Lines.	M. Lines.	B. Lines.
Agents with dwelling, fuel and light.....	\$ 50 00	\$ 47 00	\$ 55 00	\$ 52 00
Agents without dwelling, fuel and light.....	58 00	55 00	63 00	60 00
Telegraph operators	50 00	47 00	55 00	52 00
Relieving agents or telegraphers, relieving agents fifty cents per day extra for expenses.....	60 00	60 00	65 00	65 00

THE HOUSING PROBLEM IN CANADA.

FOR some years past references have appeared from time to time in the press throughout Canada to a reported scarcity in the supply of houses available for workingmen's families, more particularly in the larger centres of population and industry. The province of Ontario, and especially the southwestern portion of it, has been the section chiefly referred to in this connection, though in several other districts, more particularly in western Canada, the rapid development of the country and the heavy influx of new population has occasioned much inconvenience and enhancement in the cost of living owing to the accompanying increase in property valuations and rentals. In the case of Toronto, for example, which may be regarded as the centre of the district from which complaints were most frequently received, the local house famine was reported as so severe that, at the instance of the Board of Associated Charities, a tour of inspection was undertaken in Great Britain by an officer of the society in order to secure the most recent information as to how the problem could be met. The general prevalence of the reports, and the fact that the question is one which affects not only the financial well-being but the physical comfort and health of large numbers of the working class constitutes the problem one of considerable importance to labour at the present time.

Special investigation by the Department.

In order to obtain comprehensive and reliable information on the subject for the whole of Canada, so that its proper significance in relation to the general condition of labour might be appreciated, the department during the month of July past conducted a special investigation into the question through the correspondents of the *Labour Gazette* representing every incorporated city of more than 10,000 inhabitants in the Dominion. The object in view, more particularly, was to obtain an accurate statement as to the prevalence of the reported house scarcity, and its comparative intensity in the several industrial centres. In a circular sent to each of the correspondents to the *Gazette*, they were accordingly requested to supply, in addition to a general statement as to the more important local features of the problem, specific information on the following points:—

1. The supply of houses available for working men at the present time, relative to the demand ;
2. The class of house desired by the working man and the rental which he finds it necessary to pay at the present time for such a house ;
3. The extent to which families have been obliged to live in boarding houses, because of inability to secure individual houses ;
4. The tendency of rents during the past few years and the probable future tendency ;
5. A general statement as to the cost of building; whether or not new houses are likely to be built in the near future; if not, why additional building will not take place.

TABULAR STATEMENT RELATING TO THE

Locality.	Class and rental of houses chiefly in demand by workmen.	Supply available.
Sydney, N.S.....	Six to ten-roomed house with cellar, water and drainage.	Supply in excess of demand; 20 p.c. of houses in outlying parts vacant; good houses near to steel works at reasonable rentals in demand.
Halifax, N.S.	Self-contained flats; \$10-\$12 per month.	Not nearly equal to demand.... ..
Charlottetown, P.E.I.....	Varies according to means of workmen; rentals range from \$5 to \$10 per month, and few of the latter have bath rooms in connection with the city sewerage system.	Supply and demand evenly balanced
St. John, N.B.	Flats with separate entrances and patent closets; \$7-\$15 per month.	Supply equal to demand
Quebec, Que.....	Four-roomed tenement at \$8 to \$8.50 per month.	Supply equals but does not exceed demand which is increasing.
Sherbrooke, Que.	Houses in East and South Wards near to the larger factories; \$7-\$8 per month.	Supply not nearly equal to demand; rents very high.
Three Rivers, Que.	Houses to rent at \$6-\$9 with conveniences but exclusive of water rates, a \$6 per month house paying a water rate of \$10 per year.	Houses very scarce since the great fire of May, 1903, which burned many workmen's dwellings.
St. Hyacinthe, Que.....	Houses of from 4 to 6 rooms with bath and w.c., \$9-\$15 per month; without conveniences \$8-\$12 per month.	Houses scarce and will be more so when C.P.R. Angus shops are finished. Several thousand additional houses could find occupants next spring.
Hull, Que.	Cheap centrally located houses....	Moderately-priced (\$11-\$14) central dwellings scarce and unequal to demand.
Ottawa, Ont.....	Houses with w.c. and bath and small garden, bring \$14-\$25; smaller houses without conveniences \$5 to \$10 per month.	Supply about equal to demand, but improvement in class of houses offering desired.
Kingston, Ont.	Comfortable 6 to 7-roomed houses can be had for \$6-9 per month, including water rates.	Supply fully equal to demand
Belleville, Ont.....	Well lighted and easily heated houses of from 5 to 7 rooms at \$8 to \$12 per month.....	Supply not equal to demand owing to growth of city.
Peterborough, Ont.....	Six or seven-roomed houses near to work or street cars, \$10 to \$15.	Workmen's houses at moderate rentals very scarce. Situation will be worse as season advances as during summer many live in huts or buildings not fit for occupation in winter.
Toronto, Ont.....	Six to eight-roomed houses with water; \$10 to \$16 per month.	A keen unsatisfied demand for houses has existed especially during past three years.
Niagara Falls, Ont.		

HOUSING PROBLEM IN CANADA.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES D. No. 8.

Extent to which workingmen's families have been obliged to live in boarding houses owing to the scarcity of houses.	Tendency of rents during the past few years and probable future tendency.	Cost of building and outlook for erection of additional housing accommodation.
Several small families boarding, owing to scarcity of houses near steel works.	Downward during past two years; houses renting for \$30 in 1901 now bring only \$21.	High, being 35 p.c. higher than at Halifax, St. John or in P.E.I. Little prospect of house building owing to over supply of poorly built houses erected during the boom and to high taxation (5 p.c.), water and insurance rates, &c.
Many families boarding.....	Upward.....	High; additional houses will probably be built soon, as they would earn good profits.
No families boarding.....	Stationary	Higher than in several years; no houses building for rental.
No families boarding on account of scarcity of houses; a few from preference.	Upward	High, being \$1,500-\$2,000 for a two-story house; house building outlook poor on account of high taxation and water rates.
No families boarding.	Steadily upward; increased in past five years 30 p.c.	Cost of building has increased 25 p.c. in past five years, owing to rise in wages and in price of materials.
Many families boarding	Upward; increase during past four years in case of \$7 to \$11 houses being \$3-\$4 per month.	Increasing price of lots high.
No families boarding	Upward since May, and still rising.	Workmen's houses cost \$1,200-\$1,500 to build outside of the city; inside, \$2,000-\$3,000.
Few families boarding, but many cases of two families occupying one house.	Upward; a marked increase last spring, rents advancing from 6 to 40 p.c.	Cost of material and labour high; a 4 6-roomed house (brick) cost \$1,000-\$1,500, (frame) \$700-\$1,300. Extensive house building not in prospect, other investments being preferred by capitalists.
No families boarding.....	Upward.....	Building material high, and investors reluctant; no immediate prospect of improvement.
Very few families boarding.....	Upward for past 10 years owing to civic improvements.	Increased cost of building largely accounts for any scarcity of houses; no prospect of active house building operations.
Very few workmen's families boarding.	Upward, owing to influx of families and cessation of building.	Increased recently; no definite prospect of active building operations.
No families boarding.....	Stationary and reasonable.....	Cost of building has increased one third in 5 years. About 150 houses were erected this year.
A large number of families boarding.	Upwards; having increased from 30 to 50 per cent in past six years. Better class of houses will probably see further advances. An inferior 7-roomed house brings \$8 at present. New houses in terraces rent from \$8 upward; detached from \$12 to \$16 per month.	Comparatively few small and cheap houses under construction. Cost of building has increased about proportionally with rents being about \$12 to \$15 for a six-roomed house with conveniences.
Few families boarding, but numbers living in part of a house.	Decidedly upward, especially for smaller houses, amounting to about one third in the past three years. No reaction in sight.	Building of workmen's houses very active. Land, labour and material especially lumber and hardware have greatly increased.
Few families boarding.	Rapidly advancing during past 3 years; now considered to have reached top prices and a decline is expected when work on power development ceases in a year or two.	

TABULAR STATEMENT RELATING TO THE

Locality.	Class and rental of houses chiefly in demand by workingmen.	Supply available.
St. Catharines, Ont.....	Five to eight-roomed houses to rent from \$6 to \$12 per month.	Demand greatly exceeds supply and the situation is serious.
Hamilton, Ont.....	\$5 to \$9 per month; formerly \$4 to \$7. Skilled mechanics, foremen, etc., pay \$13 to \$16; formerly \$10 to \$13.	Demand much in excess of supply.
Brantford, Ont.....	Six-roomed houses costing \$1,200 to \$1,500 and renting from \$6.50 to \$10.50 per month according to location	Supply much below demand for past two years.
Guelph, Ont.....	Small houses to rent at \$7 to \$10 per month.	Supply below demand.
Stratford, Ont		Supply much below demand on account of rapid growth of city during past two years.
London, Ont.....	A six to eight-roomed house with conveniences; \$8 to \$11 per month.	Vacant houses so scarce as to be all but unobtainable.
St. Thomas, Ont.....	Houses renting at from \$6 to \$12 per month.	Supply much short of demand owing to decline of investment in this class of property.
Chatham, Ont.....	Six or seven-roomed houses renting at from \$7 to \$9 per month.	Demand much in excess of supply.
Windsor, Ont.....	Small houses at from \$8 to \$10 per month.	Great scarcity of workmen's houses throughout district, but many are in course of erection.
Sault Ste. Marie, Ont.....		Supply equal to demand in spite of recent increase in population.
Winnipeg, Man.....		Houses of all kinds greatly in demand. Small houses very scarce.
Brandon, Man.....	Six-roomed houses with conveniences.	Supply not equal to demand.

HOUSING PROBLEM IN CANADA.—*Con.*DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES D. No. 8

Extent to which workmen's families have been obliged to live in boarding houses owing to the scarcity of houses.	Tendency of rents during the past few years and probable future tendency.	Cost of building and outlook for erection of additional housing accommodation.
About 20 families are boarding who would be glad to secure houses.	Rents paid by workmen range from \$7 to \$18 with few houses below \$10 per month. This represents an increase of from 50 to 80 per cent within 5 years with the tendency still upward.	Cost of building has increased 40 per cent in 8 years. A six-roomed house costs \$1,000 to construct. 25 new houses are needed. Most of those buildings are of the better class, capitalists not caring to invest in the cheaper houses. Cost of labour has increased \$80 on a \$1,000 building in 5 years.
Cheap lodging houses in the factory district crowded; many instances of two or three families occupying the same house.	Upward for some years with no prospect of a decrease though higher rates are not expected. A detached brick house with conveniences rents for \$20 per month.	A good deal of building of houses to sell in progress. Cost of building greater than in some years.
Many families boarding on account of the high rents.	Upward during past three years, but it is thought the highest point has been reached.	Building material is high and wages are advancing.
About 75 to 100 families boarding owing to inability to secure houses. Boarding houses crowded.	Upward; raises of \$6 to \$4 per month common. Few houses to be obtained under \$10 a month.	High; little building in prospect, capitalists not regarding this class of investment favourably. Six roomed house with water costs \$1,000 to \$1,300.
About 100 families boarding or "doubling up" on account of scarcity of houses. New comers to the city not bringing their families. Boarding houses filled to overflowing.	Rents very high on account of scarcity and cost of building.	Building of houses very active. Cost very high. Next season promises to be active.
Many families boarding and in several two families are occupying one house.	Rents have increased \$2 to \$4 per month during past four years, and are still increasing.	Cost of average workman's house \$1,400 to \$2,000. Four years ago it was \$900 to \$1,600. Increase of taxation and insurance rates has discouraged building.
From 50 to 100 families boarding. Number will probably increase next spring on completion of new industrial establishments.	Upward; an advance of from \$2 to \$4 per month has occurred during past few years.	Land, labour, building material and municipal taxation have all materially increased. This accounts for decline in investment of capital in workmen's houses. Houses which cost five years ago \$1,000 to build now cost \$1,200. Only better class of houses costing \$1,600 to \$2,500 now being built. No prospect of immediate improvement in situation.
Few families boarding, but several cases of workmen leaving on account of inability to secure houses.	Upward; this will probably continue. Many workmen pay \$10 to \$12 per month rent.	High; a six-roomed house with brick foundation and without plumbing costs \$1,400. Lots cost about \$400. Several houses building, but price of lumber very high. Investment in houses not favourably considered.
Many families boarding with furniture stored.	Upward; houses renting 3 years ago for \$7 per month now bring \$10.	Building active and transfers in real estate frequent. Building material high.
.....	Rents range from \$5 to \$15 for good houses.
.....	A four-roomed cottage without water in outskirts rents for \$15. A six-roomed dwelling with water in central location brings \$25 to \$30.	Building very active, but few small dwellings comparatively are going up owing to scarcity of money and more profitable forms of investment. A workman's six-roomed house with basement and improvements costs \$2,000 to build, renting at \$25 per month.
Many families boarding.	Upwards; having increased 50 per cent in four years. Further advances probable. A six-roomed house brings \$15 to \$20 per month.	Building very active this year. High price of land, lumber and labour responsible for high rents.

TABULAR STATEMENT RELATING TO THE

Locality.	Class and rental of houses chiefly in demand by workmen.	Supply available.
New Westminster, B. C.	Five to eight-roomed houses at \$8 to \$18 per month.	Supply not equal to demand.
Vancouver, B. C.	Four and five-roomed houses at \$10 per month.	Supply of small houses limited and below demand.
Victoria, B.C.	Detached one and a half story houses of from five to seven rooms on outskirts of city at \$10 to \$15 per month.	Supply equal to demand.

Tabular Statement Prepared.

Reports were received from the various correspondents in reply to this communication, and in the tabular statement presented herewith their general effect and bearing, with reference to the special points on which inquiry was made, are set forth in a form at once brief and easily available for purposes of reference and comparison. As the problem is one, however, that varies greatly according to locality, it was found impossible to reduce all of the information contained in the reports to tabular form, and the reader is referred to a subsequent heading for a brief statement, to be read in conjunction with the table of particulars of a special or local nature. The table, it will be seen, in addition to furnishing information with regard to the subject more especially under inquiry, throws light incidentally on such aspects of the case as the standard of living and comparative degree of comfort in their dwellings obtainable by the working classes in the several cities. This is more particularly set forth in the column in which a brief description is given of the classes of dwellings chiefly in demand, according to locality, for working people in Canada. Under the heading relating to the cost of building and the outlook for the erection of additional housing accommodation, considerable information is also given as to present and future condi-

tions in the building trades, which, on the whole, it will be seen, are not of a promising nature in so far as the erection of small houses is concerned. Regarding the table, however, as referring primarily to the present supply of work peoples' dwellings throughout Canada, and conditions connected therewith, the following statement of a general nature may be made as based upon the reports received from the departments' correspondents:—

The Supply of Work-people's Dwellings.

That a pronounced scarcity in the class of dwellings suitable for occupation by work-people at present exists in the different Canadian cities, with only a few exceptions, is the first and most prominent fact adduced in the reports of the correspondents to the *Gazette*. Out of thirty cities from which detailed reports were received, only six instances were recorded, namely, at Sydney, N.S., Charlottetown, P.E.I., St. John, N.B., Quebec, Que., Belleville, Ont., and Kingston, Ont., at which the obtaining of an adequate supply of houses of this class was not a more or less pressing problem. In the remaining cities of the Dominion, conditions in this respect, as will be seen from the tabular statement, varied according to the locality. The Ontario cities, and more particularly those included within a radius of 70 or 80 miles of Toronto, were those in

HOUSING PROBLEM IN CANADA.—*Con.*

Extent to which workingmen's families have been obliged to live in boarding houses owing to the scarcity of houses.	Tendency of rents during the past few years and probable future tendency.	Cost of building and outlook for erection or additional housing accommodation.
Only a few cases of families boarding.	Upward during past three years.	A city lot can be bought for from \$100 to \$500. Lots near to city on tramway can be bought at \$25 to \$150. Small houses cost \$250 to \$800 to build according to finish. A good house can be built for \$1,300 to \$1,800.
Many workpeople living in tenements. No families boarding on account of house scarcity.	A seven to eleven-roomed house rents for \$25 to \$35 per month. Upward during past four years, but now stationary.	A six-roomed frame house with conveniences costs \$1,500 to \$1,800. High price of lumber and labour has retarded building.

which conditions in this respect were on the whole most unfavourable. At Toronto, Niagara Falls, St. Catharines, Hamilton, Brantford, Guelph, Stratford and London, Ont., the situation was uniformly reported as serious. At Sherbrooke, Que., also, the obtaining of suitable houses is one of the chief problems at present confronting the workingman. At Winnipeg and Brandon, Man., and generally throughout the west similar conditions prevail, though the house famine is less confined to workingmen's dwellings in this section, but is rather a feature affecting all classes of the population. At Halifax, N.S., and at New Westminster and Vancouver, B.C., workmen's houses are likewise scarce. In a few of the above instances the scarcity is to be attributed to particular circumstances, as at St. Hyacinthe, Que., where a large number of workpeople's dwellings were burned in the great fire of May, 1903, and have not been rebuilt on a sufficient scale. For the most part, however, the phenomenon is apparently not to be accounted for on other than general and far-reaching grounds.

The class of houses referred to above under the title 'workingmen's' dwellings, and which are regarded as suitable for occupation by the working classes in the several cities, varies of course, as will be seen from the table, according to locality. In Halifax, for example, a self-contained flat at a rental of \$10 per month is the class of dwelling

in chief demand for workpeople. In Quebec a four-roomed tenement, and in Kingston a small detached house with conveniences and garden, &c., are chiefly demanded. As a rule, a low rental, ranging from \$6 to \$12 is a first requisite. Modern sanitary conveniences are also generally demanded, and a location either close to work or conveniently situated with regard to street car lines is preferred.

Tendency of Rentals.

Accompanying this pronounced and general scarcity of houses there has been a marked upward tendency in rentals in most of the Canadian cities during the past five years. In general figures the increase may be stated to have ranged from 15 to 40 per cent. At Quebec, for example, it is placed at 30 per cent, at Peterborough at from 30 to 50 per cent, and at St. Catharines at from 50 to 80 per cent, these being among the most extreme instances. Further details as to comparative rentals will be found in the tabular statement. Winnipeg, perhaps, furnishes the example of highest rentals paid at present for workingmen's houses. At Charlottetown, P.E.I., and at Belleville, Ont., alone, has there been little or no recent change in house values. In a few cases, also, as at Victoria, B.C., Niagara Falls, Ont., Hamilton, Ont., Brantford, Ont., it is stated that though the tendency has been markedly upward in recent years,

further advances are at the present time not regarded as probable. At Sydney, N.S., alone has there been a marked decline. In the great majority of cases, including Toronto and Montreal and other of the larger industrial centres rents are still increasing

Boarding.

Very few workpeople among those who have families are as a rule in the habit of boarding out, and the extent to which this practice is followed at a given time or locality may be regarded, therefore, as most convincing evidence of the degree to which a scarcity of houses exists. The fact, accordingly, that at Halifax, Sherbrooke, Peterborough, St. Catharines, Hamilton, Brantford, Stratford, London, St. Thomas, Windsor, Brandon and Vancouver, many workmen's families are reported in boarding houses at the present time for the specific reason that suitable dwelling houses at sufficiently low rentals were not available, may be regarded as throwing a particularly strong light on present conditions in this respect throughout Canada. The practice also of 'doubling-up,'—that is, of more than one family occupying the same house, is reported as common, especially in Montreal, Toronto, Hamilton and London. In several localities, also, storage warehousemen report an extensive business in connection with the storing of furniture for workmen who have been unable to obtain dwelling houses. The lodging houses chiefly frequented by unmarried workmen are also generally crowded, especially as in some cases married workmen on going to a new field of labour have been forced through inability to obtain houses to leave their families behind. Cases have even been reported of workpeople having to give up their employment in certain localities, owing to their inability to secure proper boarding or housing accommodation.

Influences affecting the Situation.

With regard to the leading causes affecting the existing situation and the outlook for its improvement in the future several facts and tendencies of a general nature were

adduced by the correspondents. The extensive development, and general prosperity of industry, by increasing the number of workpeople, has been a leading influence at work. There can be no doubt, moreover, that accompanying this increase in the demand, capitalists have shown a general tendency to regard investment in workmen's houses with disfavour. This is largely attributed to the general and very marked increase in the cost of building during the past few years, both for material and for the labour required for construction. This may be estimated on the average to amount to from 20 to 33½ per cent according to the locality. In several cases, also, civic improvements with the growth of municipalities have caused an increase in assessments and taxation, and though rents have risen proportionately the variety of other profitable fields of investment offering has been sufficient to cause a very widespread neglect of this branch. This is reflected in some cases in the attitude of loan companies, who are diminishing the percentage of their advances on houses under construction, a procedure which particularly affects the working classes, who in building their own homes on their own lots do so in a large proportion of cases, on the instalment plan. The outlook, accordingly, for an alleviation of the scarcity of houses, especially in the larger centres, cannot be regarded as promising, and though a number of correspondents report building operations actively under way, the class of buildings referred to consist very largely of manufactories, places of business, public establishments and dwelling houses of a greater cost and size than is suitable to the needs of a workman's family. Of the remedies proposed, municipal intervention, the extension of street car systems, the encouragement of building societies and the formation of co-operative associations, are most frequently mentioned.

Local Conditions.

In addition to the information set forth in the accompanying table, the special reports supplied by the correspondents to the

Gazette contained in several instances, as above stated, information of a particular or local character which did not lend itself to tabulation, but which is important as throwing light on the nature of the housing problem in the several localities. This information is presented in brief form as follows, the statements in each case to be taken as further illustrating or explaining the conditions set forth in the table:—

Sydney, C.B.—A six to eight-roomed house, poorly built of frame without out-houses, rents from \$12 to \$16 per month; more valuable dwellings with plumbing and furnace bring \$16 to \$25 per month. A half-house of four rooms, without cellar or conveniences, and with a single water tap, may be obtained for \$6 per month. Flats of four to six rooms, with water and conveniences, bring \$9 to \$15 according to locality. *North Sydney* has experienced but little change in rentals, which may be classed as moderate. *Sydney Mines* has a fair supply of houses for workmen. Four-room houses, with no water, drainage, light or heat, and with outside water closet, \$4. Five and six-room houses, of this class rent at \$5 to \$6. The Nova Scotia Steel Company has encouraged its workmen in building houses for themselves by selling them the land and lending money on easy terms. Many of the miners, mechanics and other workmen have built themselves comfortable cottages. Rents around the colliery villages vary as to the time the houses were built, the cost of material and the rates of wages while building. Some of the older houses at Sydney Mines rent as low as \$2, being built in rows. The same may be said of the houses in the colliery villages of the Dominion Coal Company. Four-roomed houses built 25 years ago rent from \$1.50 to \$2; 6-room houses built 11 years ago rent for \$4, and 8-room houses built at the same time, \$5 a month. Houses built within three years, with but five rooms rent at \$6, with the inconvenience of being part of a double block. Quite a number of the houses built eleven years ago have outhouses and are inclosed in a plot of ground sufficient to make a good garden. As these houses are being rented

to new tenants they are charged \$1 per month extra, supposed to be for taxes. Houses are always scarce around a colliery village, as comparatively few miners care to build for themselves. If the Dominion Coal Company hold out the same offer to its workmen as the Nova Scotia Steel Company, most of these men may be found owners of their own houses within a very few years.

Halifax, N.S.—The arrival of Imperial troops, many of whom are married men with families, has greatly increased the demand for houses within the past two years, landlords giving the members of the force the preference, as their rents are paid by the Imperial government.

Charlottetown, P.E.I.—Rents of workingmen's houses have remained stationary, partly from the fact that although wages have increased of late years, the price of food products has also advanced, so that mechanics and labourers cannot be induced to pay higher rents. The want of a building association that would allow workmen an opportunity of providing themselves with available houses on the monthly instalment plan is pointed out.

St. John, N.B.—After the great fire of 1877 the majority of the buildings erected in this city were of a class suitable for persons of means rather than for mechanics. The smaller classes of houses are not regarded as an attractive investment for capital. Taxation is 17½ mills on the dollar; and the water rates are \$4 for each tap, \$2 for each water closet and \$4 for each bath room. A workingman earning \$500 per year is taxed \$12.26 as follows: Income, \$8.55; personal property, if married, \$1.71; pole tax, \$2.

Quebec, Que.—Municipal taxes have not increased during the past five years, but there has been an increase in school taxes. Renting is done by the year, dated from May 1. The pole tax is \$2 per year, levied upon all males over twenty-one. With regard to the building of houses, St. Peters ward, Palace ward, St. Richmond ward, Jacques Cartier ward, St. Saveur ward, are all built over and have no further means

of extending their limits, though several houses are having additional stories built upon them. In Valier's ward, St. Louis ward, St. John's ward and Montcalm ward, there is still vacant property, and lots are being rapidly built upon. Champlain ward is the only ward in the city showing a decrease of houses, rentals being much less than were paid for the same houses ten years ago, owing to the decrease in shipping and the changing of the centre of industry from the timber cove to the Louise basin. No earth closets are allowed within the city limits. Snow must be removed in winter at the expense of the tenant, the rate being on an average about 20 cents per foot frontage during the winter, though this of course varies with different localities. The existence of a number of small villages on the outskirts of the city limits and within easy distance of the street cars has a tendency to lower rents. Among these suburbs are Lévis, Beauport, Stadacona, St. Malo, Limoilou and Beaulieu. In the city itself in some instances a very poor class of houses are being occupied by workmen. A considerable number, however, own their own dwellings in the city which in this case consist chiefly of four or six-roomed houses.

Sherbrooke, Que.—The housing problem has received considerable attention during the past few months on account of the scarcity of workmen's houses, and the high rents prevailing, which in many cases have led workmen to live in a poor locality and far removed from work. Within the past two years several houses have been erected in the South ward by workmen who claim that it is cheaper to build, even when money has to be borrowed, than pay rent. Real estate owners regard a house that rents from \$12 to \$15 as a better investment for capital than a lower priced building of the kind demanded by work people. Building has been retarded by the cost of material, especially in the case of mechanics desiring to erect a home for themselves. The whole problem has been frequently discussed by the city council and the board of trade but without definite result. The land available for the erection

of houses belongs chiefly to the British American Land Co., which is said to place a higher valuation on it than the city. About five years ago a syndicate bought several acres from this company and sold land for building purposes, with the result that there are now fifty houses where there were fields formerly; 95 per cent of these houses being owned by workmen. The workmen's house problem is regarded by many as requiring action on the part of the city council.

Montreal, Que.—The housing problem has been very prominently before the workpeople of Montreal since last spring. The erection of workpeoples' houses has not been in proportion to the rapid increase in the population. Rents are very high proportionately. Houses renting from \$8 to \$14 per month were raised from \$1 to \$4 per month this year, while several houses renting for \$12 and \$20 were raised to \$18 and \$25 respectively, there being no difficulty to get tenants at the latter price. In the vicinity of the new C.P.R. Angus shops in Rosemount, 2,000 houses could find tenants next May, though at present there is not housing accommodation for more than a small fraction of that number. About 2,000 workpeople are employed in this works at present, and eventually this number will be increased to from 6,000 to 8,000. All these additional workmen will have to be housed in the city.

Hull, Que.—Housing conditions in this city are perhaps somewhat uncommon. Three-fourths of the population are workmen earning between \$1.25 and \$2.50 per day. These people have their own houses, only a very small proportion of them boarding, and a slight percentage paying rent. The houses are being paid for on the instalment plan, from \$8 to \$18 and \$20 per annum being paid for a half lot. When this rent remains much in arrears, the house reverts to the furnisher of the capital. The system has given rise to many abuses, which the courts have often been called upon to settle. There are about a half dozen of these landlords in the city. They rent the houses which they enter into possession of in this

manner, otherwise there would be very few tenants. These houses rent for \$4 and \$5 per month, and are without conveniences. This was the usual custom prior to the great conflagration of 1900. Since then a better class of buildings have been erected, and a house which cost a workingman \$4 and \$5 per month before, costs him to-day \$10 and \$12. The demand for better houses is on the increase and many occupants are modernizing their homes, so that before long Hull will have as well housed workingmen as are in the country, as they will own their houses and experience will have taught them to improve their properties.

Ottawa, Ont.—The cheaper class of houses does not prove an attraction to investors mainly because of the high cost of building and the civic and local improvement taxes, though real estate investment in the better class of dwellings is regarded as particularly safe.

Kingston, Ont.—There is a scarcity of the houses chiefly in demand by work-people, and in consequence, many mechanics are almost constantly moving in the endeavour to secure quarters suitable to all seasons of the year. The increased cost of building is held largely responsible for the scarcity. Any pronounced business depression would probably cause a material reduction in rentals.

Belleville, Ont.—Only a very few houses are being built this year and there is no present prospect of house building on more than a small scale during 1905, though the starting up of the rolling mills will bring a number of families into the city with the probable effect of increasing rents. The city's population has been increasing slowly during the past few years.

Peterborough, Ont.—Exceptional industrial activity has prevailed during the past three years with a rapid increase in population, mechanics constituting a large proportion of the new population. Transfers of real estate and houses have been active and a number of families were forced to move owing to the sale of the houses which they had rented. This also has increased

the number of boarding houses. Several farmers have sold their farms and are moving into the city, and thus increasing the demand for houses. In 1903, 60 houses were built. The municipality also extended its limits, taking in a portion of the township in which 105 families were living, which with another suburb, brought the total population of Peterborough to about 14,000.

Toronto, Ont.—The building of workmen's houses has not kept pace with the growth of population, the stringency having been felt chiefly during the present season when many new arrivals have found it impossible to secure dwellings. Conditions, it is expected, will grow worse as the season advances and houses which are not suitable for occupation except during the warm weather have to be vacated. As a rule the working class here pay one-fourth of their earnings in rent and many who are not able to exceed that proportion have been compelled to occupy much smaller dwellings than the size of their families demands. The fact that, in spite of the growth of population there has been no considerable extension of the street railway system during several years, except in the building of suburban lines requiring the payment of double fares, has increased the difficulty of the housing problem, and the extension of the street railway system to the suburbs at various points for a single fare would give a stimulus to the building of workmen's houses in the outskirts. There is also a large amount of vacant land owned by the city and at present held in idleness.

Niagara Falls, Ont.—The difficulty of housing the rapidly increasing population of working people is so great that scores of houses are being erected in all parts of the city, being frequently spoken for before the ground is broken for construction. Incoming families have practically no chance of getting a house. This abnormal condition, however, has been in existence for about three years, being largely accounted for by the thousands of workmen employed upon the power development works, which will be finished in another two years. Foreign labourers are living in buildings con-

ducted as boarding houses, often under conditions which a Canadian workman would not tolerate.

St. Catharines, Ont.—Some years ago more houses were erected during a building boom than the growth of the city demanded. This experience has a tendency to deter capital from investing in similar property to-day.

Hamilton, Ont.—The increase in rents for workmen's houses renting ordinarily at from \$6 to \$12 per month has caused the city assessors to increase the landlord's taxation materially. Skilled mechanics, clerks, foremen, &c., are now paying from \$13 to \$16 a month, and in many cases as high as \$18 per month for houses with conveniences which they formerly obtained for from \$10 to \$13. Foreign labourers live to a great extent in cheap lodging houses, which are in some cases very crowded.

Brantford, Ont.—Houses in course of erection at the present time are usually rented, and in many cases occupied sometime before they are completed. Among small families the renting of furnished or unfurnished rooms has become common, and many find it cheaper to board than to pay a high rent. Storage houses have found it almost impossible to find room for the household effects they are asked to store, and the railroads have frequently been storing furniture until the owner could make other arrangements. Building material is high, brick costing \$9 per thousand, or \$1 more than last year's prices. The wages of bricklayers, masons and plasterers have increased. A number of workmen, however, are building houses to be paid for on the monthly rental system. The advisability of the municipality building workmen's houses has been discussed by the Trades and Labour Council. Frame buildings, on account of the scarcity of brick, are replacing brick buildings to a considerable extent. The price of lots has increased so materially that many people have been forced to build outside the city limits. In the town of Paris the scarcity of workmen's houses caused much difficulty last year and several special meetings of the Board of Trade

were held to discuss the question. This year, however, the building trades are active, and the pressure is being relieved.

Guelph, Ont.—Conditions are uniform throughout the district, a scarcity of houses being reported from Galt, Berlin and other towns. The situation might possibly be relieved if the building of houses in terraces were adopted.

Stratford, Ont.—The building trades have been very active this year, and many residences have been erected, though not sufficient to meet the demand. A newcomer to the city finds it almost impossible to secure a suitable residence, with the result that the practice of boarding has largely increased among work-people who have arrived in the city and have been forced to leave their families behind. The high cost of building and the rapid growth of the city's population are the chief causes. Real estate prices have not increased very materially. The prospect is that the building of houses will be very active next year.

London, Ont.—Nearly every residence erected this year has been for the use of the person building it. Members of the Real Estate Protective Association, which controls sixty per cent of the rentable houses, will not rent a house unless the tenant signs an agreement for a year. Houses scarcely fit for habitation are bringing \$6 and \$7 per month. A brick cottage, containing six rooms, with bath, closet, furnace and electric or gas light, costs from \$2,000 to \$2,800 to build at present.

St. Thomas, Ont.—The demand for houses has been relieved in one instance by the Thomas Bros. Co. which is erecting a dozen houses to rent for \$7.50 per month. A large boarding house of 18 rooms is also being built by the same firm. As the firm owns extensive timber limits and is in a position to procure cement and other materials at a cheap rate, the cottages in question are being economically constructed. The only other point within the district, at which a scarcity of houses is reported is at West Lorne, where the moving in of the Walkerville Wagon Co. has caused a demand for houses.

Chatham, Ont.—Many workmen here earn from \$7.80 to \$9 per week, without steady employment, and are obliged to live in houses renting at \$10 to \$12 per month, which is more than they can afford. The effect is detrimental to trade, merchants, grocers, &c., not being willing to grant credit under such circumstances. Many of the older workmen own their own houses which they built when lumber was cheap. The high price of material, however, discourages young mechanics from building for themselves. Capitalists do not consider small houses a good investment, as they do not regard work-people as suitable or desirable tenants, except in cases of factory employees who have steady employment.

Windsor, Ont.—Windsor, Walkerville and Sandwich report much the same conditions prevailing, houses of a moderate size renting from \$8 to \$10 per month being in great demand and many families being obliged to store their furniture until such time as they can secure houses. Conditions, however, are on the mend.

Winnipeg, Man.—The scarcity of houses is not confined to workmen's dwellings. Rentals vary with localities. The dearth of small houses has resulted in overcrowding and in the building of cheap shacks of one or two rooms in which families are living temporarily. These are scattered over the prairie in the outlying parts of the city. Rents are out of proportion to the wages that are being earned, and many workmen are obliged to sublet rooms, which if well furnished and in houses with modern improvements, easily bring \$10 per month per room. Very little money is being invested in small dwellings, these being regarded as a comparatively unprofitable investment. Loan companies make advances only to 40 per cent of the value of the house, so that it is difficult for workmen to erect their own houses. Building is not likely to be cheaper for many years to come, though lumber prices are comparatively low. Wages, in spite of the extraordinary amount of building taking place, have not materially increased, owing to the influx of workmen. The erec-

tion of workmen's flats with suites of three rooms each, to rent at about \$12 or \$15 a month has been suggested, but thus far, large blocks with suites have not been common in Winnipeg.

Brandon, Man.—In several towns throughout Manitoba there is a good demand for houses owing to the influx of immigrants. One result of the high rents prevailing is that a number of workmen have secured homes of their own through the agency of building societies. British Columbia and eastern capitalists have opened agencies and are doing a good deal to solve the problem of the house famine.

New Westminster, B.C.—High taxation and land valuation near the centre of the city have caused the erection of larger houses than are demanded by the working classes. Several work-people have secured lots near the city limits on the tram line at about \$20 to \$80 per acre, and have built what is termed a 'lean-to' or kitchen, with the intention of completing the building when circumstances permit. The British Columbia Electric Tramway issues tickets at the following rates:—Central Park, half way to Vancouver, 50 trips for \$4; to city limits, 8 tickets for 25 cents. The company also conveys lumber for building purposes at \$1 per thousand feet, giving encouragement thereby to men to take up small holdings.

Vancouver, B.C.—'Batching cabins' are all taken up at present, and there is a demand for more. These are situated in tenements, and consist of two rooms of about 10 x 11 each, renting for \$5 per month. The rooms are furnished with a cook stove, chairs, bedstead and wire mattress. The tenements are two stories high, with verandah outside, covering lots measuring 25 x 100 feet. Each tenement contains about 40 rooms, or 20 living places, and costs about \$2,500 to erect. There are plenty of larger houses, but there are several instances of workmen paying \$25 or \$35 per month, when their wages amount to only \$65 or \$75 per month, tenants relying on renting rooms to meet their own rent. Lumber dealers

have recently announced a reduction of 10 per cent from their present prices on rough lumber, laths and shingles. This may have a tendency to stimulate building, which has been retarded during the last two seasons by the high prices of building material.

SUMMER CHANGES IN RATES OF WAGES AND HOURS OF LABOUR, CANADA, 1904.

DETAILED information is presented in the accompanying table of 35 changes affecting rates of wages or hours of labour in Canada, which were reported to the Department of Labour as having taken place during the months of June, July and August of the present year.

Of the changes recorded 25 were increases in wages, one was a decrease in wages, one was decreases in hours and eight were increases in wages in combination with decreases in hours.

The General Result.

It will be seen from the accompanying small table in which an analysis is presented of the returns included in the detailed tabular statement that the general nature of the result of the changes reported to the department was a material reduction in the weekly wages bill, with a decrease of 561 hours in the weekly total of hours of employment. In arriving at this result, however, it should be pointed out that it was found impossible to secure detailed information relating to the increase in the wages of farm hands through Canada, and also of the number of men affected by the general increase in the wages of un-

skilled and railway labourers throughout Manitoba and the west which went into effect during August, the combined effect of which would produce a very material alteration in the results as presented.

As will be seen from the table the most important change of the summer from the standpoint both of the number of men affected and the amount of change in the weekly wage bill, was the re-adjustment of the wages of lumbermen in the Ottawa valley. Among the increases in wages granted, that to different members of the printing trades in Toronto and Ottawa was the most important involving an increase of about \$1,950 per week in the wages bill. Next in importance were the increases granted to employees of the Toronto Railway Co., to employees of the British Columbia Electric Railway Co., Limited, certain classes of which also received material reduction in hours, to civic employees at Hamilton, Ont., and to electrical workers and horseshoers at Toronto. The only reduction in hours was that which went into effect at Disraeli, Quebec, for 200 saw-millers. Among the remaining changes of the period the highest number of employees affected was 40.

TABLE SHOWING RESULT OF CHANGES BY INDUSTRIES AND GROUPS OF TRADES.

Trades or Industry.	No. of Workpeople Affected.	Total Increase in Weekly Earnings.	Total Decrease in Weekly Earnings.	Increase in hours of Employment per Week.	Decrease in hours of Employment per Week.

Changes by Industries and Trades.

The following is a detailed statement of the various changes in wages and hours reported to the department during the summer months of the present year, according to the several trades or industries affected.

Agriculture.—With the advent of the harvest season the wages of farm hands were increased, especially throughout Manitoba and the Territories, where the prevailing rate paid was \$2 per day or \$30 to \$40 per month with board. In Ontario wages for this class ranged for the most part during the summer months from \$25 to \$30 a month with board for experienced labour.

Lumbering.—The change which affected the largest number of work-people throughout the season was that by which the maximum wages of *shantymen* in the Ottawa valley and eastward as far as the St. Maurice river were reduced from \$32 to \$28 per month, with board. The reduction in schedule was arrived at by agreement between the different lumbering companies. The fact, moreover, that the *square timber* trade, in which men were engaged at wages ranging as high as \$50 and \$55 per month last year, will be almost wholly discontinued during the coming winter will also considerably reduce the total wages bill. *Choppers, teamsters and first-class rollers* for the coming season will be paid \$26 to \$28 per month, as compared with \$30 to \$35 last year. *Road cutters* will receive \$20 to \$22. The decrease in the demand of the foreign lumber market is held accountable for the decline.

The other summer change noted under lumbering was a reduction in hours from 12 to 10½ per day, which affected 200 *saw-mill workers at Disraeli, Que.*, the change taking effect on July 3, after a strike on the part of the men for a ten-hour day.

Building trades.—The change affecting the largest body of work-people in the building trades during the summer months was

that by which 40 *stonecutters at Ottawa, Ont.*, had their wages increased to 43 cents per hour on August 1, an 8 hour day having gone into effect on May 1. The change of wages was granted after three months' notice, which had been given by the men. In the case of one employer the increase was refused, and the men found work elsewhere. A similar number approximately of *painters and paperhangers at Peterboro, Ont.*, had their wages raised on August 1. Previous to the change a rate of \$1.25 per day was generally in force. During July, however, a union of journeymen painters was formed and a demand of \$2 per day presented and accepted by the contractors. *Builders' labourers* in the same city to the number of 25 had their wages increased on June 1 from 30 to 35 cents per hour on August 1.

Twelve *plasterers at Brantford, Ont.*, had their scale increased on June 1 from 30 to 35 cents per hour with a 9 hour day.

The remaining change under this heading was that by which 16 *plumbers and steam and gas fitters* in the employ of four establishments at *Victoria, B.C.*, were granted an increase of 50 cents per day on July 14 from \$3.50 to \$4 per day of 8 hours.

Metal trades.—Three changes affecting an aggregate of 419 employees were reported during the summer. Of these the voluntary concession of a general increase by the *British Columbia Electric Railway Company* to its employees, affected 204 work-people. Full particulars of the various classes affected, and of the nature of the change in each case will be found in the table. *Electrical workers* to the number of 150 received an increase of 2½ cents per hour at Toronto on June 1, the rate being now 27½ cents per hour. *Horse-shoers* in the same city to the number of 65 had their wages increased in June from \$11 to \$13.50 per week in the case of floor-men, and from \$12 to \$15 per week in the case of fitters. In some of the establishments the change was granted about June 30 on demand of the men; in others the increase went into effect after a strike in the

9 72	10 80	54	54	1 08	

and second years, and \$16.50 after the third year, and feeders to the number of 220 were increased from \$7 to \$9 per week. In the case of the 400 female bookbinders a scale of \$5 per week, \$5.25 per week for the second, and \$5.50 per week for the third year was adopted, no fixed scale having been previously in force.

In addition to the changes mentioned in the table, *stereotypers* and *electrotypers* had their scales fixed, though little change was involved, 5 foremen being paid \$20 per week, finishers and moulders \$19 per week and other classes \$15 per week, the hours remaining unchanged at 7½ for night work and 9 for day work.

In the Government Printing Bureau, Ottawa, changes similar to those granted at Toronto went into effect on June 22.

Clothing.—One change only was noted, namely, in *Montreal, Que.*, under which 15 male and 10 female *cloakmakers* in the employ of the Colonial Cloak Company had their scale increased on June 1, on the demand of the work-people.

Food and tobacco preparation.—At *St. Thomas, Ont.*, 12 *cigarmakers* employed by the B. F. Honsinger factory, received an advance of from 50 cents to \$1 per thousand cigars, according to the class of cigars, involving an increase of from \$1.50 to \$2 per week. The change was granted after a strike of the men.

Transport.—The adjustment of the wages of employees of the Toronto Railway Company affected 1,700 men from June 16. In an agreement signed on June 22, the following schedule was set forth :—

Motormen and conductors :—
 For 1st year.. . . 18 cents per hour.
 For 2nd year.. . . 20 "
 3rd year and after.. 21½ "

Shedmen :—
 Foremen.. . . . 21½ cents per hour.
 Assistants.. . . . 19 "

Car washers :—
 Foremen.. . . . 22 cents per hour.
 Assistants.. . . . 18 "

Motor and truck repair men—
 For 1st year.. . . 18 cents per hour.
 For 2nd year.. . . 20 "
 3rd year and after.. 21½ "

The company also agreed to pay half the cost of the uniforms of motormen and conductors, who had been in the company's service for the period of a year, and to provide free uniforms for motormen and conductors who had been in the service for a period longer than two years. It was agreed also that leave of absence to employees for a reasonable period of time when their services could be spared, would be granted upon application to the car starter or foremen. These provisions with others relating to discipline and the arbitration of disputes, were declared to be in force for a period of three years from June 16.

Civic employees.—At *Hamilton, Ont.*, 433 civic employees including sidewalk foremen, sidewalk finishers, unskilled labour and sew-

age disposal workers received on demand a material increase in wages.

Miscellaneous.—Under this heading, 17 patrolmen in the employ of the corporation of *Victoria, B.C.*, had their wages voluntarily increased from \$65 to \$67.50 per month on July 1, the hours remaining as before—56 per week.

Railway labourers throughout *Manitoba* and the *West*, aggregating several hundreds of men, had their wages increased from \$1.50 to \$1.75 per day, and from \$1.75 to \$2 per day, according to qualifications during August. The increase was granted as the result of the keen demand for that class of labour in connection with railroad construction.

Lady school teachers to the number of 30 had their salaries increased by \$15 a year by the *Guelph* Board of Education during July.

At *New Westminster* several employees of steamboats, tugs, &c., had their wages increased, owing to a temporary scarcity of men for this employment during August. No permanent change in scale, however, went into effect.

THE EARLY CLOSING MOVEMENT.

In connection with the above review of the changes in wages and hours which went into effect during the past summer reference should also be made to the extent to which the early closing movement was a factor affecting employment in the several trades and industries, and with the view of presenting a comprehensive statement on this phase of the subject in connection with the present article, the Department of Labour, during the month of September, conducted a brief investigation through the correspondents to the *Labour Gazette* into conditions among retail clerks, factory employees, &c., in this respect as they prevailed during the past summer season in the several cities of the Dominion. The correspondents were requested to prepare for their respective cities and districts brief separate reports estimating with as much accuracy as possible the extent and

importance of the movement in their several localities. The points on which particular information was requested from the correspondents were as follows:—

I. The trades and callings chiefly affected.

II. The extent to which the movement prevailed this summer as compared with previous years, noting in this connection any tendency towards an increase or decrease in the practice.

III. The approximate number of work-people affected.

IV. Information of a special nature on other points that might suggest themselves.

Replies were duly received to the above request and the information collected in this way is presented herewith in the form of a tabulated statement arranged with reference to the points suggested in the circular letter to the correspondents. The reader is accordingly referred to the table for information of a particular character relating to any particular locality and with regard to the early closing situation as a whole, the following brief statement of a general nature is offered in reference to the classes of workpeople principally affected, the general nature of the movement in Canada, and the extent to which it prevailed during the past summer season as compared with previous years:—

Classes of Work-people Affected.

The retail clerks were principally affected by special early-closing arrangements, the total employees of this class who had shorter summer hours this year numbering several thousands for the entire Dominion. There is only one city in the table, in fact, in which retail clerks do not figure very prominently in the lists of employees mentioned as receiving summer schedules. Barbers also were a class who secured early-closing arrangements of one kind or another in most of the cities. Among other classes of work-people, factory employees of various kinds are those who have been most successful in obtaining early-closing summer schedules. In some cases a Saturday half holiday was granted to these classes during July and August, without provision being made for the loss in working time involved; in a great many instances, how-

ever, the Saturday half holiday was secured at the expense of longer working hours on the first five days of the week. Certain of the trades, also, as at Sherbrooke, Que., Brantford, Ont., Guelph, Ont., and Vancouver, B.C., work under shorter hour schedules during the summer months. In the majority of cases, however, the shorter hour movement among the trades had reference to conditions prevailing throughout the entire working season, rather than to summer conditions alone.

Nature of Early-closing Arrangements.

The Saturday half-holiday is apparently the form of early-closing arrangement which chiefly commends itself to work-people. Especially is this true of factory employees and general labour. Retail clerks, however, on account of the long established custom of keeping stores open on Saturday nights, have for the most part taken Wednesday or Monday afternoons off instead of Saturdays, where conditions permitted. In cases where a half-holiday was not granted, early-closing arrangements, varying according to locality and the class of goods handled, were adopted on the first five days of the week, or on certain specified days as the case might be. In the majority of cases six p.m. was the closing hour thus recognized; in others seven; and in a few of the larger stores in Toronto and elsewhere, five p.m. Nine to eleven on Saturday nights, and on the nights preceding public holidays or on pay days, were the closing hours recognized in most localities. As a rule more favourable summer working hours for clerks were obtained in the larger establishments situated in the main business sections of the larger industrial centres, the suburban districts of the cities offering perhaps the fewest instances of early-closing schedules for the summer months.

Barbers' arrangements varied considerably according to locality. In some cases shops closed at six p.m. on certain days; in others at eight p.m. on all days of the week except Saturdays.

TABLE showing Nature and Extent of the Early Closing Movement in Canadian Cities during the Past Summer.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F, No. 9.

Locality.	Class of Work-people Affected.	Approximate Number of Work-people Affected.	Nature of the Early Closing Arrangement.	Extent of Movement as compared with last year.	Remarks.
Sydney, N.S.	Retail clerks	3,000	Three nights per week at six o'clock....	Practically no change....	A large proportion of the work-people affected were females.
Halifax, N.S.	Barbers	1,000	Three nights a week at 6.30 for clerks; Saturday half-holiday for certain of the other classes.	Growing in favour....	Movement will probably become more general next year.
"	Retail clerks..				
"	Painters				
"	Printers				
"	Carriage workers.				
Charlottetown, P.E.I.	Retail clerks.	90	Monday afternoons off; stores closing at 9 p.m. on Saturdays instead of 10. Wholesale establishments and railway offices grant Saturday half holiday.	Tendency to become more general.	Movement began 4 years ago.
Quebec, Que.	Barbers	10	At 6 p.m. on Mondays.	Much more general....	Movement dates back 10 years beginning among dry goods clerks.
"	Clerks....	350	In grocery stores at 7 p.m.; in dry goods stores at 6 p.m. except on Saturdays and eves of holidays. Wholesale establishments close at 6 p.m. with Saturday half-holiday.		
Sherbrooke, Que.	Employees of boot and shoe factories.		Stores close at 6 p.m. on 4 days a week.	Last year the early closing arrangement extended only to 3 days per week.	A movement for shorter hours throughout the year is on foot.
"	Retail clerks.			No change in several yrs.	Time made up during first five days of week. The factories close all the year at 1 p.m. on Saturdays.
"	Machinists	1,000	Saturday half-holiday.		Time made up by employees.
St. Hyacinthe, Que.	Printers		"	"	
"	Factory employees		Saturday half-holiday; in some cases at 3 p.m. or 5 p.m. on Saturdays.	No change this year, but movement growing in favour.	
Montreal, Que.	Retail clerks..	10,000	Saturday half-holiday during July and August; stores close at 7 p.m. one day per week among groceries, etc., who usually keep open until 9.	Growing in favour.	
"	Factory employees.		Saturday half holiday.		
Hull, Que.	Retail clerks	75	Tuesday and Friday nights off....	No change....	This applies to all year; arrangement agreed to 3 years ago. In Jan., Feb. and Mar., stores close at 8 p.m. every night. Grocery clerks work long hours in Dec. Saturday closing inaugurated 2 years ago.
Ottawa, Ont.	"		Saturday half-holiday in two or three dry goods stores during July and Aug.		

"	Factory employees.....	Saturday half-holiday.....	In some of the factories $\frac{3}{4}$ time was paid; in others whole time was lost. An agitation for a Saturday half-holiday at Arm- pore, Rockland and other points was without result. Relations between employers and employ- ees most harmonious. Corpora- tion workers do not receive the privilege.
Belleville, Ont.	Retail clerks.....	Wednesday half-holiday.....	Tendency to become more general
Peterborough, Ont.	Factory employees.....	Saturday half-holiday.....	Increasing.....
"	"	"	"
Toronto, Ont.	Retail clerks.....	Stores close at 5 p.m. in some cases; in others at 6 p.m. except on Saturdays. Centrally located stores close at 5 p.m. or 5.30 p.m. with a Saturday half-holiday in some cases.	Gradually increasing but no marked change.
Niagara Falls, Ont.	"	Stores close at 6 p.m. or 7-8 p.m. accord- ing to class except on Saturdays or pay-days on the M.C.R. and G.T.R. days.	Little change.....
"	Barbers.....	Stores close at 8 p.m. except on Satur- days.	Rule came into force this year.
St. Catharines, Ont.	Grocery clerks.....	Wednesday half-holiday.....	Per arrangement with union last year. No arrangement except in principal business districts.
Hamilton, Ont.	Retail clerks.....	"	Arrangement granted voluntarily by employers.
"	Factory employees.....	Saturday half-holiday in some small establishments.	Greatly increased this year being general in all classes of stores.
Brantford, Ont.	Bricklayers.....	Saturday half-holiday during July and August.	Arrangement in force for 2 years; in some of the trades mentioned, for many years. Plumbers ob- serve the half-holiday the year round. The Watrous Engine Works have observed it for over a year. The practice will pro- bably increase.
"	Carpenters.....	"	"
"	Printing Trades.....	"	"
"	Cigarmakers.....	"	"
"	Labourers.....	"	"
"	Machinists.....	Saturday half-holiday during June, July and August.	"
"	Moulders.....	"	"
"	Blacksmiths and helpers.....	"	"
"	Retail clerks and female delivery employees (female)	Wednesday half-holiday during July and August.	"
"	Barbers.....	"	"
"	Horseshoers.....	"	"
Guelph, Ont.	Carrriage workers.....	Saturday half-holiday.....	Custom was greatly ex- tended this year among machine shops and printing establish- ments.
"	Machinists and helpers.....	"	"
"	Wood workers.....	"	"
"	Piano workers.....	"	"
"	Retail clerks.....	"	"
"	Printers, &c.....	"	"
"	Brewery workers.....	"	"
"	Textile workers.....	"	"

TABLE showing Nature and Extent of the Early Closing Movement in Canadian Cities during the Past Summer. *Continued.*

Locality.	Class of Work people Affected.	Approximate Number of Work-people Affected.	Nature of the Early Closing Arrangement.	Extent of Movement as compared with last year	Remarks.
London, Ont.	Retail clerks.		Wednesday afternoon.	No change this year	Several thousands affected; nearly all factories and foundries closed on Saturday afternoons during May-August, but made up the time by longer hours on other days.
St. Thomas, Ont.	"	500	Wednesday half-holiday during July and August.	No change.	Stores close ordinarily at 6 p.m., except butchers at 7 p.m.
Chatham, Ont.	Broom factory employees. Retail clerks.	70 500	Saturday half holiday. In dry goods stores at 6 p.m. In shoe stores at 7-8 p.m. In hardware stores at 7-8 p.m. In grocery stores at 6 p.m. All keep open till 10-12 p.m. on Saturday.	"	Schedule arranged by proprietors; will likely remain in force indefinitely.
Brandon, Man.	"	400	All stores close at 6 p.m. except on Saturdays—11 p.m.	Arrangement has been in force for 3 years.	A movement in favour of a Saturday half-holiday was defeated.
Vancouver, B.C.	Building Trades		Saturday half-holiday.	Arrangement in practice for 3 years and is increasing.	
"	Retail clerks.	3,500	Stores close at 6 p.m. and 11 p.m. on Saturdays or days preceding public holidays.		
"	Barbers		Shops close at 8 p.m. except on Saturdays when they close at 10 p.m.		
Victoria, B.C.	Retail clerks		The Wednesday half-holiday was not granted this year.	Decreasing	All the large stores close at 6 p.m. the year round; on Saturdays at 10 p.m.

Growth of the Movement.

The department received reports from thirteen of its correspondents to the effect that the early closing movement had extended its scope during the past summer and was increasing in public favour in a like number of the cities of the Dominion. The cities represented in the list included the larger centres and were as follows:—Halifax, N.S., Charlottetown, P.E.I., Quebec, Que., Sherbrooke, Que., Montreal, Que., Hull, Que., Belleville, Ont., Peterborough, Ont., Toronto, Ont., Niagara Falls, Ont., Hamilton, Ont., Quelph, Ont.,

and Vancouver, B.C. In one case only, viz., at Victoria, B.C., was a tendency to curtail or limit the movement noted. In the remaining cities from which special reports were received conditions in this respect remained practically unchanged from last year, many of the cities in question, as will be seen from the table, having very favourable early closing arrangements in force. It will be further seen from the table that the retail clerks have been the most active in securing shorter summer schedules during the past year.

CANADIAN MANUFACTURERS' ASSOCIATION—THIRTY-THIRD ANNUAL CONVENTION.

THE thirty-third annual meeting of the Canadian Manufacturers' Association convened at Montreal, Que., on Tuesday, September 20, the sessions concluding with the annual banquet on the evening of Thursday 22nd. There was a large attendance of delegates present from all portions of the Dominion, especially from the provinces of Ontario and Quebec, and, as will be seen from a reference to the various resolutions passed by the convention, a number of questions of great importance to labour and industry throughout Canada were discussed.

The annual report of the treasurer showed that the past year had been the most successful in the history of the association, a balance on hand of \$4,816 being shown as against a deficit in 1903, although more had been spent than ever before in one year. The balance sheet for the year showed a surplus in assets of \$6,601.

The secretary's report showed an increase in membership of 246 during the past year, the association now having six branch offices, thirteen sections, and 1,500 members. Plans had been made for a new system of corresponding membership in foreign countries, and more than 2,500 trade inquiries from all parts of the world had been forwarded to members.

Address of the President.

The annual address of the president of the association on the opening day of the convention dealt at length with industrial conditions throughout Canada, and with recent advances in the commerce and population. The great natural resources of the country, and the importance of the manufacturing industry, which in 1901 was represented by 14,650 factories, producing goods to the annual value of \$481,053,375, and employing 344,095 working people at wages aggregating \$113,283,146, were pointed out, with a reference to markets, home and foreign. Recent Canadian trade returns were analysed, and the position of the association with regard to tariff revision stated. Preferential trade within the empire was advocated and the establishment of fast Atlantic steamships declared to be a necessity. The work of the association was then passed in review. With regard to the labour problem it was stated that no reasonable objection could be taken to employees organizing, so long as the organization did not interfere with matters solely under the employers' control; similarly there could be no objection to employers' organizations, but both employers and employees should accept full responsibility for their acts by

due and legal incorporation. The connection between Canadian and American organizations, it was stated, was not in the best interests of the country, and international associations should be nationalized by incorporation. If this were done, the president was of the opinion that conciliation boards could be formed to deal with wages and other questions that might from time to time arise, and thus provide a means for settling disputes without recourse to the present policy of strikes and lockouts. Employers' associations, it was stated, should take the first step in achieving this end. There was need, it was stated, for a national effort for securing technical education. The problem of cheaper fire insurance was also dealt with. The president concluded his address with a reference to the proceedings and growth of the association during the past year, and with a plea for unity, commercially and politically, between Canada and the British Empire.

The Transportation Problem.

The report of the railway and transportation committee of the association was among the first and most important items discussed at the meeting. The appointment by the government of the Grand Trunk Pacific Construction Commission, and of the Transportation Commission, was approved, and the organization and operations of the Railway Commission referred to as marking a new epoch in the railway progress of the Dominion, the commission having already succeeded in impressing the community by the reasonableness of its decisions, and the despatch with which its operations are conducted. Recent advances in freight rates by the railway companies were condemned as imposing an unfair tax on the manufacturing and shipping industries. The organization within the association of a new department managed by an expert transportation officer was stated to have already achieved very satisfactory results. The recommendations of the committee as approved by the convention with regard to present transportation needs in

Canada were embodied in the following resolutions:—

1. That in connection with propositions made from time to time respecting the establishment of new steamship lines for the benefit of Canada's foreign trade, that for such of these as may seem reasonable, a competent business commission, including one expert in the operation of ocean steamships, should be appointed by the Dominion government, to thoroughly inquire into the prospects of trade extension, report upon the advisability of establishing steamship communication, and supply Canadian exporters, in all branches of trade, with such information as they may require for the exploitation of the markets;

And, further, that the possibilities of closer trade relations, through such means, should be promptly investigated with regard to an eastern service to Australasia, a service to Mexico, and a service to the South American states.

2. That when such subsidized lines are, or have been established, the Dominion government should have a constant and businesslike supervision over the rates, the regularity of sailings, and all other features connected with the service, with a view to perfecting the facilities and encouraging Canadian shippers to patronize Canadian ports and Canadian steamship lines.

3. That such Canadian steamship lines should be extended a preference by Canadian shippers in both import and export trade.

4. That the Railway Act of Canada should be amended so as to place the express companies in Canada under the jurisdiction of the board of railway commissioners.

5. That the association reaffirm its belief in the necessity of a fast Canadian Atlantic steamship service, which will compete successfully in speed and rates with other Atlantic lines, and that we again urge the Dominion government to take prompt action in establishing the same.

Activity of Labour Organizations—The Labour Market in Canada.

The activity of labour organizations during the past year was dealt with at length in the report of the parliamentary committee. Organized labour, it was stated, had continued to be aggressive in seeking to secure legislation. Reference was made in this connection to the Union Label Bill and of the Alien Labour Bill introduced, but not passed during the recent session of the Dominion parliament. The statement circulated by Canadian labour organizations in Great Britain to the effect that skilled mechanics were not required in the Dominion was declared to be opposed to the rapid development of the country which, as shown by the inquiry made by the committee in July last, warranted a large immigration of many classes of mechanics. The

policy of the Dominion government in restricting the encouragement of immigration to agricultural and domestic labour was condemned, and the following recommendations were passed to be forwarded to the Dominion government and to the members of the House of Commons :—

1. That the Dominion department of labour, as such, should give equal consideration to the needs of employer and employee; that its exclusive system of labour correspondents should be abolished and that it should, as far as possible, be constituted in policy and practice, an impartial tribunal to advance the interests of all classes in the Dominion.

2. That provision should be made for the lawful importation of skilled mechanics from any other country, provided that the help required cannot be obtained in the Dominion.

3. That the immigration department of the Dominion government should encourage, and not discourage the emigration to Canada of the best classes of skilled workmen from other countries, provided that these workmen are required in Canadian industries, and cannot be secured in Canada.

Canadian Foreign Trade.

The commercial intelligence committee in suggesting a more expert and complete system of foreign trade encouragement recommended the following resolution:—

1. That the Dominion government should be urged to extend its system of commercial agencies;

2. That the representatives appointed should be active energetic business men with a wide knowledge of Canadian products, raw and manufactured;

3. That they should be recalled at least once in three years in order to visit the leading exporters in Canada and to keep in active touch with the progress of Canadian industries.

In the report of the tariff committee regret was expressed that a general revision of the tariff had not been carried out during the past year, though approval was expressed at the action of the Dominion government in passing regulations to prevent the 'dumping' of foreign manufactured goods in Canada. The tariff resolution passed at the annual meeting of the association held in Halifax in 1902 was reaffirmed, and the appointment of a permanent tariff commission of experts recommended. A clause recommended by the committee pledging members of the asso-

ciation to support candidates favouring a higher tariff was withdrawn.

Fire Insurance Department Organized.

The report of a special committee appointed to suggest a plan whereby some system of mutual fire insurance might be inaugurated was approved. The establishment of a department controlled by a standing committee to carry on the business of mutual fire insurance and of insurance brokers was recommended, no manufacturing risks to be accepted unless the manufacturers were members of the association. An estimated statement was presented which showed that the scheme could be made a financial success, and the executive committee was directed to arrange for the carrying out of the plan. Further details were as follows:—

To avoid the necessity at the outset of an expensive inspection department the rate of premium charged will be the same rate as is charged at the time the insurance is effected by any company that is acceptable to the committee, and the usual conditions regarding co-insurance will also be adopted.

The department will aim among other things to encourage the insuring public to protect their own property, and as an inducement, sprinkled and properly protected risks will receive special consideration.

In addition to the insurance carried by the department, arrangements are expected to be made with several first-class Canadian, English and United States companies, whereby an insurance amounting to several times the amount carried by the department may be placed. The commission on this insurance will be credited to the department to increase the fund available for losses.

In addition to the cash premium paid to the department, the policy holders shall also bind themselves by the acceptance of a policy to be responsible for all losses suffered by the department over and above the amount of premiums collected to an amount sufficient to make the policies absolutely safe.

No agents will be employed by the department. The insurance will be secured through the head and branch offices of the association, and through the individual efforts of the interested members.

The department will at the end of each year set aside a percentage of profits to be decided upon for a reserve fund to increase the security and lessen the guarantee of policy-holders.

The department will begin business just as soon as it has insurance contracted for to the amount of \$1,000,000, provided that legal authority has been obtained by that time. An effort will be made to have in addition to this \$1,000,000 a large amount of insurance to place in other companies, on which the department will receive a commission.

Other Business Transacted.

A proposal that the members of the association should take an excursion to Great Britain during the summer of 1905, was left to the decision of the executive committee.

The proposal of the District Trades and Labour Council, of Toronto that a conference should be held between the association and the Dominion Trades and Labour Congress was favourably received and referred to the secretary to arrange a date on which the meeting might take place.

The holding of an anniversary civic holiday in Ontario was discussed.

A deputation from the Lord's Day Alliance was received and the subject of Sunday observance discussed.

During the sessions of the convention a visit was paid to the harbour of Montreal, and the various improvements carried out by the Harbour Commissioners inspected. The new Canadian Pacific Railway Company's shops were also visited and inspected.

Industrial Canada, the official organ of the association, was stated to have had a successful year, the circulation having increased from 3,000 per month in 1903, to over 4,100 in 1904.

Election of Officers.

The election of officers resulted as follows:—

President—Mr. W. K. George, Toronto.
First vice-president—Mr. C. C. Ballantyne, Montreal.

Ontario vice-president—Mr. J. O. Thorn, Toronto.

British Columbia vice-president—Mr. John Hendry, Vancouver.

Quebec vice-president—Mr. Geo. E. Amyot, Quebec.

Manitoba vice-president—Mr. E. L. Drewry, Winnipeg.

Nova Scotia vice-president—Mr. D. W. Robb, Amherst.

Prince Edward Island vice-president—Mr. Bruce Stewart, Charlottetown.

Treasurer—Mr. George Booth, Toronto.

Executive Committee.

Toronto—Messrs. P. H. Burton, C. N. Candee, R. J. Christie, J. W. Cowan, R. A. Donald, L. V. Dusseau, W. P. Gundy, Geo. Heintzman, D. T. McIntosh, J. S. McKinnon, P. McMichael, J. P. Murray, Frederic Nicholls, F. B. Polson, Thos. Roden, A. S. Rogers, W. B. Rogers, A. F. Rutter, J. T. Sheridan, T. A. Staunton, Wm.

Stone, A. W. Thomas, J. O. Thorn, W. B. Tindall, Henry Wright, S. M. Wickett.

Montreal—Messrs. Geo. E. Drummond, J. S. N. Dougall, D. L. McGibbon, C. W. Davis, Col. J. H. Burland, R. C. Wilkins, S. W. Ewing, Jos. Horsfall, R. Munro, John Baillie, E. Tougas, Hon. J. H. Rolland, J. J. McGill, N. Tetreault, J. M. Fortier, J. R. Laurendeau, O. Faucher, Wm. McMaster.

Quebec—Messrs. J. J. M. Timmons, Geo. E. Amyot, C. Blouin, E. B. Eddy.

Nova Scotia—Messrs. John F. Stairs, H. L. Hewson, C. M. Crockett.

British Columbia—Messrs. A. C. Flumerfelt, Alex. McLaren, H. Heaps.

New Brunswick—Mr. James Penred.

Manitoba—Mr. D. E. Sprague.

The following are the leading officers of the different standing committees of the association:—

Railway and transportation—Chairman, Mr. H. Cockshutt, Brantford; vice-chairman, Mr. W. P. Gundy, Toronto.

Parliamentary—Chairman, Mr. F. B. Polson, Toronto; vice-chairman, Mr. G. W. Watts, Toronto.

Industrial Canada—Chairman, Mr. A. W. Thomas, Toronto; vice-chairman, Mr. George A. Howell, Toronto.

Commercial intelligence—Chairman, Mr. A. S. Rogers, Toronto; vice-chairman, Mr. Thomas Roden, Toronto.

Tariff—Chairman, Mr. McNaught, Toronto; Frederic Nicholls, Toronto.

Reception and membership—Messrs. Robert Crean (chairman), Toronto; L. V. Dusseau (vice-chairman), Toronto.

Annual Banquet.

At the annual banquet held on the evening of the 22nd, addresses were delivered by the Right Honourable the Prime Minister of Canada, by the Honourable the Minister of Customs, Sir Howard Vincent, the Honourable the Premier of Ontario, the Honourable Mr. McCarthy, the Honourable George E. Foster, and several officers of the association, the subject chiefly referred, to being the development and expansion of trade within the empire and of Canadian industry.

UNIONS FORMED DURING THE MONTH OF SEPTEMBER, 1904.

New Brunswick:—

St. John—National Painters.

Quebec:—

Montreal—National Brass Workers.

Ontario:—

Stratford—Teamsters.

THE ONTARIO MUNICIPAL ASSOCIATION—ANNUAL CONVENTION.

THE annual convention of the Ontario Municipal Association was held at Toronto, on September 6 and 7, about sixty delegates being present from different parts of the province.

Municipal Insurance.

The chief subject under discussion by the association was municipal insurance, notice of a motion in favour of the establishment of a Dominion Municipal Insurance Corporation being given by the Mayor of Ottawa at the opening session. The motion was formally presented and as referred for consideration to a special committee of the association was as follows:—

1. That a Dominion charter be secured incorporating all municipalities in Canada who may desire to join as 'The Dominion Municipal Insurance Corporation,' such corporation, as nearly as may be and with the qualifications hereinafter mentioned, to be incorporated and conducted in the same way as a joint stock insurance company.

2. Every municipality becoming a member of such corporation and paying the amount mentioned in clause 7, to be entitled to have all shareholders rights in the proportion of one vote for every 10,000 of population. All municipalities under 10,000 to have one vote.

3. Each municipality proposing to join the corporation after incorporation to do so only when authorized by a vote of the ratepayers of such municipality.

4. The directors of the corporation to be five, consisting of one each from Ontario, Quebec, the Maritime Provinces, one from Manitoba the North-west Territories and British Columbia, and one from at large, all to be elected at the annual meeting of the corporation each year.

5. The directors to have power to appoint all officials required, including a board to fix the rates of insurance in each municipality.

6. The corporation in the first place to enter into competition with existing insurance companies.

7. Each municipality joining the corporation to pay in in cash an amount equal to 1-100 of 1 per cent (or such other amount as may be determined upon) of the assessed value of all the property in such municipality.

8. The corporation to deposit with the Dominion Department of Finance the debentures at par of each municipality (carrying interest at 4 per cent) equal to 1 per cent (or such other amount as may be determined upon) of the assessable property of each such municipality. These debentures to be held as security only, and only to be cashed in the event of losses being sustained which cannot be met by the ordinary revenue of the corporation. Whilst uncashed no interest will be payable on them.

9. In each municipality a property owner may, by giving notice to the municipal authorities and paying the premium in advance, have

his real property other than land insured up to two-thirds of its assessable value when such assessable value is not more than \$10,000, up to one-half of its assessable value when such assessable value is over \$10,000, and not more than \$25,000, and up to one-fourth of its assessable value when such assessable value is over \$25,000 and not more than \$100,000, and in no case more than \$25,000 of insurance on any one property. The matter of the insurance of personal property to be considered later.

(Note.—These proportions and figures are merely suggestive, and subject to revision by actuaries.)

10. All insurance in the corporation shall be done through the municipal authorities in each municipality, who shall act to all intents and purposes as local agents of joint stock insurance companies do now. No commission or any consideration whatever to be paid any local municipal authorities.

11. In the event of this system of insurance proving successful the question of making it compulsory, in so far as regards all the real property except land, in each municipality joining the corporation to be considered.

12. The whole plan to be submitted to the Dominion superintendent of insurance, and such actuaries and others as may be deemed advisable, for criticism and report.

13. In addition to the charter to be obtained from the Dominion parliament, legislation to be obtained in each province authorizing the municipalities in each province to become members of the corporation, &c.

That the Ontario Union of Municipalities approves of the general outline of the above plan and recommends it for adoption to the Union of Canadian Municipalities, and hereby declares its willingness to co-operate with such union and with the various municipalities in the other provinces in having such plan put into practical shape and the legislation above mentioned applied for.

In reporting on the above proposal the committee recommended that it be forwarded with the association's approval to the Union of Canadian Municipalities in order that the corporation might become a Canadian one from the beginning. The details of the scheme were not discussed, though the proposals set forth were endorsed and commended to the favourable consideration of the union, with the suggestion that the latter body should elaborate the details and place the scheme in workable form.

Regulation of Fire Insurance Companies.

A resolution was adopted recommending that in cities and towns fire insurance companies should be required to file annually a sworn statement of receipts and

losses within the municipality, so that municipalities might be in a position to determine whether the rates were equitable or otherwise.

Municipal Ownership.

Other resolutions recommended that municipal councils be given power to construct underground conduits and erect poles and to compel all electric companies to use such conduits or poles and pay a rental therefor; and that power be given to municipalities to buy or expropriate on equitable terms public utilities, such as gas, electric, water plants, &c.

Other subjects discussed were the operation of trunk telephone lines by the Dominion government, and the working of the new assessment Act.

Election of Officers.

Mayor W. A. Boys, Barrie, Ont., was elected president; Mr. W. P. Hubbard, Toronto, and Mayor W. W. Chown, Belleville, comptrollers; and Mr. S. H. Kent, Hamilton, secretary.

It was resolved to hold all future annual meetings at Toronto.

THE UNION OF CANADIAN MUNICIPALITIES—ANNUAL CONVENTION.

THE Fourth Annual Convention of the Union of Canadian Municipalities was held at London during September, convening on the 20th of the month, and adjourning on the 22nd. About fifty delegates were present, representing different sections of the Dominion.

The report of the secretary showed that the membership of the union was at present 107. The union, it was stated, was now in a position to harvest some of the fruits of the past three years' work, having succeeded in almost totally checking the stream of injurious new legislation affecting municipalities. The tasks at present before the union, as outlined by the secretary, were principally to consolidate its organization, and to secure municipal control of streets from companies now encroaching upon them.

The financial report for the year showed a slight surplus in hand.

Subjects under Discussion.

Among the subjects on which addresses were delivered during the course of the convention were the following:—'Special civic charters in Canada,' by S. Morley Wickett, Toronto; 'A model French Canadian Town,' by Mayor Gelinas, of St. Louis, Que.; 'London's Experiments in

Road-making,' by City Engineer Graydon; 'Parks and Park Civic Act,' by F. G. Todd, Montreal; 'Municipal Ownership of Telephones,' by W. N. Andrews, Brantford, Ont.; 'Municipal Fire Insurance,' by Mayor Ellis, of Ottawa, the latter topic being made the subject of a resolution as follows:—

That the scheme for the formation of a Dominion municipal insurance corporation, the principle of which has received the indorsement of the Ontario Municipal Union, and has been forwarded to this union by that body, be referred to the executive of this union with instructions to submit the scheme to the Dominion superintendent of insurance, and such other experts upon the subject as they may deem proper, obtaining full information as to the business done in Canada, full information as to the cost thereof, including losses and expenses and to report to this union at the next annual meeting.

Municipal Ownership of Telephones.

An important resolution passed was that relating to government and municipal management of telephones, as follows:—

That in the opinion of this union the long distance telephone business of Canada should be taken over by the government of the Dominion, and legislation obtained whereby the local business of telephoning can be taken over and operated by the local municipalities in which such businesses are carried on, and for these purposes direct that a draft petition be prepared by the Union of Canadian Municipalities for presentation to the Dominion parliament and provincial legislature, by the different municipalities through their representatives.

Municipal Paving Powers.

A resolution with regard to the power of municipalities in carrying out paving operations was passed as follows:—

That this union favours legislation being obtained in the provincial legislature, where required, giving councils power to put down permanent pavements (even if petitioned against, by the majority of the local rate-payers interested), on any street upon the recommendation of the engineer and approved of by a two-thirds vote of the council, and

when the municipality as a whole pays a part of the cost thereof.

Officers Elected.

Mayor H. Laporte, of Montreal, was elected president, and Mr. W. D. Lighthall, Montreal, honorary secretary-treasurer for the ensuing year. The executives for the various provinces were also chosen.

The next place of meeting will be decided upon later.

TRADE DISPUTES DURING THE MONTH OF SEPTEMBER.

WITH the exception of building trades in Toronto, industrial conditions were not greatly affected by disputes during the month in any portion of the Dominion. In nearly all the disputes which had been in existence prior to September, settlements were reached in the course of the month, or normal conditions were resumed, and the new disputes were not sufficiently prolonged to cause any serious interruption to industry.

Analysis of Trade Disputes during the Month.

Number and magnitude.—There were 10 disputes in existence during the month, of which 7 began before September 1, and 3 after. This is a decrease of 4 compared with the previous month and with September, 1903, in both of which months there were 14 disputes. About 76 firms were affected by disputes of the month, and about 2,800 employees directly and 1,640 indirectly.

The magnitude of the new disputes, according to the number of working-people involved was as follows:—

Magnitude.	Number of Disputes.
From 1,000 to 2,000	1
From 200 to 300	1
From 50 to 100	1

Loss of time in working days.—The loss of time to employees through trade disputes during the month of September was

approximately 42,250 working days, an increase of over 5,000 days compared with August, and an increase of over 27,700 days compared with September, 1903. This comparatively great loss of time is largely accounted for by the strikes of builders' labourers and bricklayers at Toronto, which beginning in August continued until September 14, during which month there was a loss through them of about 32,450 days.

Trades affected by new disputes.—All of the new disputes of the month affected the metal trades, two of these occurring in the shops of the Canadian Pacific Railway had an indirect effect upon the transport trade as well.

Causes of new disputes.—Two of the disputes were due to a demand for an increase in wages, and the third was due to an objection to a reduction in wages.

Methods of settlement.—Of the 10 disputes in existence, during September, definite settlements were reached in the case of five, three by negotiations between the parties concerned and two without negotiations. Of the remaining five, in three cases the employers claimed to be no longer affected, and in two, no settlement was reached.

Results of disputes.—Of the five disputes that were definitely settled, the employers were successful in one, compromises were effected in three cases, and in the case of

TABLE OF TRADE DISPUTES OF THE MONTH OF SEPTEMBER. DEPARTMENT OF LABOUR, CANADA. STATISTICAL TABLES, SERIES C, No. 45.

Ontario.....	Hamilton.....	Iron moulders.....	Objection to reduction in wages of 13 per cent.	1	50	" 26	No settlement reported at end of month.

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours

one, which was sympathetic, no change took place. In addition to these, there were three disputes which the firms involved claimed to be no longer affecting them.

Disputes commenced prior to the beginning of the Month.

There were few important developments with regard to the seven disputes which began before September 1, and were in existence during the month.

The strike of builders' labourers at Toronto, which began on August 15, owing to a refusal of the contractors to increase their pay from 25 to 28 cents per hour, and the strike of bricklayers declared in sympathy with them on August 27, were both terminated on September 14, the labourers having decided to return to work at the rate of wages prevailing before the strike. Many of the strikers who had left to seek work elsewhere in the course of the dispute, returned to Toronto in September, and normal conditions were resumed.

In the case of a dispute at the Riordan Paper Mills, Merritton, Ont., the employees of which went on strike in the months of May and June, no definite settlement was reached, but on September 28, the company claimed that during the month its former employees had been returning to them, and that they were then employing all for whom they had room.

A settlement was reached at the end of the month between the Harris Abbatoir Company of Toronto, and its employees, 40 of whom had struck on June 30 for higher wages and payment of time-and-a-half for overtime. The terms of the agreement, however, were not made public.

Conditions ceased to be affected in the case of a strike of iron moulders at Ottawa, which was declared on July 28, but the dispute was not officially declared off. Some of the strikers returned to work at the old rate, and in other cases new men had been engaged.

No change was reported in a strike of saw-smiths at St. Catharines, Ont., which began on July 28, owing to the employment of an extra apprentice.

NEW DISPUTES.

The most important new disputes of the month were a strike of boilermakers and a strike of machinists, both classes being employees of the Canadian Pacific Railway Company. An account of these disputes is given below.

The only other dispute was a strike of about 50 iron moulders of the Ontario Rolling Mills at Hamilton, Ont. The cause of the dispute, which was declared on December 26, was their objection to a reduction of 13 per cent in their wages. No settlement had been reached by the end of the month.

Strike of Boilermakers of the Canadian Pacific Railway Company.

On September 17, about 200 boilermakers on the Pacific Division of the Canadian Pacific Railway Company, from Fort William, Ont., to Laggan, Alberta, ceased work on account of their failure to reach an agreement with regard to wages. They had been receiving 33 cents per hour, and demanded 35 cents per hour, claiming that this was the rate prevailing on other lines nearest to Winnipeg. The company disputed this claim, but two days later an agreement was arrived at, the men returning to work with an advance of one cent per hour, and the company promising to investigate the amount of wages paid at the points mentioned by the men during October.

Strike of Machinists of the Canadian Pacific Railway Company.

On September 24 the railway machinists and blacksmiths employed by the Canadian Pacific Railway Company from Fort William, Ont., to Vancouver, B.C., to the number of about 1,000 went on strike, owing to a refusal of the company to grant them an increase in wages. The men who had been receiving 32½ cents per hour demanded an increase of 2 cents from Fort William to Broadview, 3 cents from Broadview to Swift Current, and 1 cent west of Swift Current. The company offered arbitration with regard to an increase of 1 cent per hour, but

this was declined. After the strike had begun, the men demanded similar rates to those paid on the Great Northern Railway, which were from $2\frac{1}{2}$ to 5 cents an hour higher than what they had been receiving. Several conferences were held between the second vice-president of the company and a committee of the men, which ended in an agreement, and the strikers returned to work on September 29.

The table published herewith is a compilation of the trade disputes in the Dominion of Canada, which began or were in continuance during the month of September, and which have been reported to the department.

ENFORCEMENT OF THE FAIR WAGES RESOLUTION BY THE POST OFFICE DEPARTMENT, SEPTEMBER, 1904.

During the month of September the following orders were given by the Post Office Department for the supplies be-

low mentioned. All were given subject to the regulations for the suppression of the sweating system and securing employment to working men and women of fair wages, and the performance of the work under proper sanitary conditions:—

Nature of Order.	Amount of Order.	
	\$	cts.
Making and repairing metal dating and other hand stamps and type and brass crown seals.....	277	25
Making and repairing rubber dating and other hand stamps and type.....	23	95
Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and post marking and cancelling ink	757	72
Making and repairing post office scales..	141	00
Supplying mail bags	125	80
Repairing mail bags.	1,401	33
Repairing mail locks and supplying mail bag fittings	326	10
Repairing parcel receptacles, and portable tin letter boxes and supplying railway mail clerks' tin travelling boxes	61	25
Miscellaneous orders for making and repairing postal stores.....	9	55
Making up and supplying articles of official uniform.....	581	25

INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER, 1904.

Account under this heading is taken of accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with the statement of returns of accidents reported to them.

THE Department of Labour received notice of industrial accidents to 229 individual workmen, which took place in Canada during September, involving a loss of 76 lives, and serious injuries to 153 other persons. Compared with the month of August, this was a decrease of 10 in the total number of accidents, the deaths hav-

ing been less by 9 and other accidents by one.

The following is the record of the month by industries and groups of trades:—

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	11	14	25
Fishing	5	5
Lumbering	1	7	8
Mining	5	1	6
Building trades.....	2	18	20
Metal trades.....	7	45	52
Woodworking trades.....	11	11
Textile trades	1	1
Food and tobacco preparation.....	3	3
Railway service.....	30	27	57
General transport.....	12	10	22
Miscellaneous trades.	1	9	10
Unskilled labour.....	2	7	9
Total	76	153	229

In addition to the above there were reported to the department 18 accidents, involving the loss of 3 lives, which took place in previous months, information of which had not been received before.

Nature of Fatalities and Accidents.

Two serious accidents occurred during the month causing loss of life or serious injury to a number of employees. The first took place on September 14 and was caused by the explosion of a boiler in the rolling mill of the Toronto Bolt and Forging Company. The other disaster was caused by a rear-end collision on the Grand Trunk Railway at Eastwood, Ont., which happened on September 28. The following is a brief description of these accidents:—

Boiler Explosion at Toronto.

On September 14, a 100 horse-power horizontal return tubular boiler exploded without warning at the rolling mills of the Toronto Bolt and Forge Company. Seven employees were severely injured, two of whom died two days later, and damage amounting to from \$2,500 to \$3,000 was done to the boiler and building. All the injured were severely scalded, and some of them suffered from broken limbs and internal injuries caused by flying debris. The boiler was about two years old and had been inspected in July and pronounced in first class order. An inquest was held upon the body of one of the victims, and the jury found that the explosion was caused by not having sufficient water in the boiler, and that the wooden plug which was used was not the proper appliance for water-gauges.

Railway Collision at Eastwood, Ont.

On September 28, at 3.15 o'clock a.m., a rear-end collision of two freight trains took place at Eastwood, Ont., about five miles east of Woodstock, on the line of the Grand Trunk Railway, which caused the death of two engineers, a conductor and a brakeman, and injuries to a fireman which were expected to prove fatal. The cause

of the accident was an open switch, but it was difficult to fix the responsibility of the disaster, owing to the death of the conductor and brakeman of one train, and the engineer of the other. From information obtained, it appears that the local freight had just gone from the main track to a siding, when the through freight arrived before there was time to close the switch. A long hill near the siding prevented the engineer on the through train from seeing the open switch until it was too late, and the engine crashed at full speed into the rear cars of the local freight. The wreck took fire and nine cars were destroyed by the flames as well as the station. Three of the dead were burned beyond recognition; the engineer of the local train, who was beneath the engine at the time, was crushed to death by the engine wheels. An inquest on this accident was held but no verdict had been returned at the end of the month.

The Record by Trades and Industries.

Agriculture.—In the agricultural industries, there were 25 industrial accidents during the month, 10 of which were fatal. Two men were struck by trains, two were killed by threshing machines, one by a stumping machine and one man fell beneath the wheels of a traction engine. The other deaths were caused by a fall from a barn, a fall from a wagon, a fire in a barn, lightning, and goring by a bull. Fifteen of the accidents happened to farmers, four to threshers, and six to farm hands.

Fishing and hunting.—Five fishermen were drowned during the month by the capsizing of their boats. Three men lost their lives in a gale on September 15 at Little River West, Que., in the county of Gaspé, and two others on September 21, in Moffatt Straits, Ont., near Port Arthur.

Lumbering.—The only death in the lumbering industry during the month was the drowning of a river driver at Owen Sound, on September 19, when working on a raft. The other accidents happened to a shantyman, four saw-mill hands and a planing mill hand.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F. No. 11

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Agriculture</i>						
Farmer	Oakland, Ont.	Sept. 5	1	1	Head crushed.	Fell from the gangway of a barn striking stone wall.
"	Sutton, Que.	" 5	1	1	Lost a forearm and head badly cut.	Gored to death by a bull.
"	Kinloss, Ont.	" 11				Caught in the cylinder sheaf pulley of a fanning mill.
"	Richmond West, Ont.	" 19	1	1		Horses ran away and he was thrown from wagon.
"	Huntsville, Ont.	" 20	1	1	Leg broken.	Struck by a train when driving across tracks.
"	Sydney River, N.S.	" 10		1	Collar bone broken and head bruised.	Injured when hauling logs.
"	Ayr, Ont.	" 21		1		Struck by a train when driving across tracks.
"	Macdonald, Man.	" 18	1		Crushed to death.	Fell beneath wheels of a traction engine.
"	Aberfoyle, Ont.	" 3		1	Shoulder dislocated.	Fell off a load of oats.
"	Shelburne, Ont.	" 28	1			Struck by a train and run over.
"	North Gower, Ont.	" 21		1	Hip dislocated and ankle broken.	Horse ran away and he was thrown from wagon.
"	Unionville, Ont.	" 23		1		Fell 29 feet when working on a silo.
"	Near Galt, Ont.	" 15		1	Hand mangled.	Caught in the gearing of a windmill.
"	Near Port Colborne, Ont.	" 29	1			Struck by lightning.
"	Minden, Ont.	" 28	1			Stumping machine upset and killed him.
Thresher	Clinton, Ont.	" 10	1		Fatally burnt.	When rescuing a threshing engine from a burning barn.
"	Ripley, Ont.	" 12	1			Thrown against a threshier when replacing a fanning mill belt.
"	Erin Township, Ont.	" 23		1	Right arm torn off at shoulder.	Sleeve caught when replacing a belt.
"	Palermo, Ont.	" 30		1	Right arm, leg and a rib broken and lung lacerated.	Caught in the driving wheel of a threshier.
Farm hand	Delhi, Ont.	" 12	1			Fell into the cylinder of a threshing machine.
"	Downie, Ont.	" 29		1	Head dangerously injured.	Fell 12 feet, alighting on head.
"	Bongard's Corners, Ont.	" 29		1	Stunned and badly injured internally.	Struck by lightning and trampled on by a horse.
"	Mansonsville, Que.	" 23		1	Jaw broken.	Kicked by a horse.
"	Milligan, Ont.	" 30		1	Foot badly cut.	Was run over by a mower when cutting corn.
"	Carieville, N.W.T.	" 30		1	Lost a leg.	Fell into the cylinder of a threshier.
<i>Fishing and Hunting</i>						
Fishermen	Little River West, Que.	" 15	3		Drowned.	Boat upset in a gale.
"	Moffatt Straits, Ont.	" 21	2		"	Boat capsized.
<i>Lumbering</i>						
Shantyman.	Port Arthur, Ont.	" 13		1	Fingers broken.	Hurt when sawing logs.
River driver.	Owen Sound.	" 19	1			Drowned when working on a raft.

Saw-mill hand	Ancaster, Ont.	Sept.	28	1 Arm seriously cut.	Caught in a circular saw.
"	Vancouver, B.C.	"	23	1 Leg broken.	When working in a mill.
"	St. Stephen, N.B.	"	24	1 Lost two fingers.	Caught in a planer.
"	Johnville, Que.	"	16	1 Windpipe split.	Struck by a clapboard when sawing it.
Planing-mill hand.	Niagara Falls, Ont.	"	16	1 Lost three fingers.	Cut off by a buzz planer.
"	Peterboro', Ont.	"	20	1 Right hand cut off.	Caught in a planer.
<i>Miner</i>					
Miner (coal)	New Aberdeen, N.S.	"	22	1 Leg broken and back injured	Killed by a gas explosion in a mine.
"	Wellington, B.C.	"	13	"	Killed by an explosion.
"	Glouce Bay, N.S.	"	24	"	Killed when at work.
"	Ymir, B.C.	"	22	"	Hoist cable broke.
Miner (gold).	"	"	27	"	Killed when at work.
"	Phoenix, B.C.	"	6	"	"
<i>Building Trades—</i>					
Contractor's foreman	Niagara Falls, Ont.	"	20	1 Seriously injured internally	Injured by a premature blast.
"	"	"	20	1 Badly cut and bruised.	"
Carpenter	Hamilton, Ont.	"	4	1 Right leg broken	Fell from scaffolding.
"	Harrison, Ont.	"	14	1 Shoulder dislocated and two ribs broken.	Fell 25 feet off a barn.
"	Peterboro', Ont.	"	22	1 Blood vessel in brain ruptured.	Fell 10 feet from a scaffold.
"	St. Catharines, Ont.	"	21	1 Leg badly broken	Struck by falling timbers.
"	Port Arthur, Ont.	"	29	1 Brain pierced	Struck by a falling chisel.
"	Toronto, Ont.	"	16	1 Leg broken.	When placing a furnace a wall caved in and a board struck him.
"	"	"	12	1 Back injured	Fell from a roof.
Plasterer.	St. Thomas, Ont.	"	21	1 Back injured. Died Sept. 23.	Fell from a wagon.
"	Toronto, Ont.	"	8	1 Spine injured	Fell from a scaffold.
Painter	Quebec, Que.	"	13	1 Leg broken	Fell off a scaffold.
"	Bainford, Ont.	"	22	1 Hands and legs badly burned.	Dropped lighted torch which set fire to his paint.
Builder's labourer	Quebec, Que.	"	5	1 Back badly injured.	Fell from a roof.
"	"	"	13	1 Arm broken	Fell off a bungalow.
"	"	"	12	4 Badly bruised and shaken.	Scaffolding gave way and they fell with it.
"	St. Catharines.	"	22	1 Ankle sprained	Fell from a wall.
<i>Metal Trades—</i>					
Supt. of rolling mill.	Toronto, Ont.	"	14	1 Arms scalded.	Hurt by a boiler explosion.
Iron moulder.	Hamilton, Ont.	"	19	1 Foot badly burned	Hot metal fell on his foot.
"	Guelph, Ont.	"	17	1 Eye injured.	Struck by a piece of flying steel.
"	St. Catharines, Ont.	"	14	1 Right foot burned.	When carrying hot iron.
"	St. Thomas, Ont.	"	22	1 Wrist sprained.	Fell 23 feet from a scaffold.
Iron worker	Hamilton, Ont.	"	10	1 Foot scalded.	When carrying hot iron.
"	"	"	3	1 Head injured.	Struck by a falling wrench.
"	Toronto, Ont.	"	14	2 Both badly burned	Hurt by a boiler explosion.
"	Sydney, N.S.	"	30	1 Crushed to death.	Struck by a heavy door when repairing a furnace.
Structural iron worker	Lethbridge, N.W.T.	"	1	Both ankles broken; died from shock.	Fell 70 feet, through breaking of a rope supporting a cage.
"	"	"	1	2 Arms and legs broken and injured internally.	"
"	Montreal, Que.	"	7	1	Fell 20 feet, when working on the construction of an elevator.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Metal Trades—Con.</i>						
Structural iron worker.	Fort William, Ont.	Sept. 21	1		Body dangerously injured.	Fell 50 feet from an elevator.
"	Winnipeg, Man.	" 23		1	Crushed internally.	Fell 50 feet from scaffolding.
"	Outremont, Que.	" 15		1	Badly cut.	A heap of rails fell on them from a car which collapsed.
"	Hamilton, Ont.	" 2		1	Right hand badly crushed.	"
"	"	" 22		1	Right arm badly cut.	When working a trip hammer.
"	Niagara Falls, Ont.	" 22		1	Fingers crushed.	Slipped on some pointed iron.
"	Montreal, Que.	" 15		1	Lost fingers of left hand.	When setting up machinery.
"	Hamilton, Ont.	" 7		1	Lost three fingers.	When working at a machine.
"	"	" 15		1	Left eye burned.	Crushed by a trip hammer.
"	Guelph, Ont.	" 17		1	Eye injured.	Piece of hot iron flew into it.
"	Hamilton, Ont.	" 22		1	Lost a thumb.	Struck by a piece of flying steel.
"	St. Thomas, Ont.	" 26		1	Two fingers crushed and one broken.	Caught in a ladle.
"	Hamilton, Ont.	" 27		1	Jaw broken and neck cut.	Struck by a piece of flying steel.
"	"	" 27		1	Both thumbs crushed.	Crushed by a trip hammer.
Stationary engineer.	Quebec, Que.	" 5		1	Arm broken.	Caught in belting in engine room.
Water tender.	Toronto, Ont.	" 14	1		Arms fractured, head cut and body burned.	Hurt by a boiler explosion; died Sept. 16.
Stationary engineer.	"	" 14		1	Face scalded; injured internally.	"
"	"	" 14	1		Leg broken; badly scalded.	"
"	Hamilton, Ont.	" 14		1	Three fingers crushed.	"
"	"	" 4		1	Lost a finger.	Crushed by a drop press.
"	"	" 17		1	One finger broken and three cut.	Caught in a drop press.
"	"	" 27		1	Lost a finger.	Injured when dumping a press.
"	"	" 29		1	Arm badly torn.	Caught in machinery.
"	Toronto, Ont.	" 9		1	Hand and thigh badly lacerated.	Caught in a drop press.
"	"	" 16		1	"	" hand press.
"	"	" 16		1	Ankle broken.	Touched a live wire when working on a pole.
"	St. Foy, Que.	" 8		1	Lost an eye.	Fell from a telegraph pole.
"	Niagara Falls, Ont.	" 6		1	Leg fractured.	Struck by metal being polished, which flew off buffing wheel.
"	Toronto, Ont.	" 8		1	Spinal column injured.	A boiler rolled on him.
"	"	" 3		1	Neck and shoulders scalded.	Fell off a scaffold.
"	Hamilton, Ont.	" 3		1	Lost three fingers.	Plug blew out of an engine.
"	Quebec, Que.	" 3		1	Eye injured.	Caught in the gear of a crane.
"	Crowland, Ont.	" 19		1	"	By scrap flying from anvil.

"	Brantford, Ont.	"	26	1	Lost two fingers.	Caught in machinery.
"	"	"	26	1	Left parts of three fingers.	Caught under drop hammer.
"	Hamilton, Ont.	"	8	1	Left hand smashed.	Struck by hammer of a spile driver.
"	Marbank, Ont.	"	21	1	Sprained ankle.	Fell.
"	Brandon, Man.	"	12	1	Body crushed; died Sept. 12	Heavily laden elevator fell on him when working beneath it.
"	Hamilton, Ont.	"	2	1	Arm and two ribs broken.	Fell 15 feet in elevator.
"	Woodstock, Ont.	"	10	1	Fingers badly torn.	When operating a jointer.
"	Quebec, Que.	"	21	1	Fingers badly cut.	When working on a machine.
"	Owen Sound, Ont.	"	20	1	Flesh torn off left hand.	Hand came in contact with a sander.
"	Brantford, Ont.	"	11	1	Hip injured.	Fell into well of an elevator.
"	Walkerville, Ont.	"	26	1	Head seriously injured.	Struck by a machine when moving it.
"	"	"	26	1	Chest seriously injured.	"
"	Clinton, Ont.	"	14	1	Seriously cut near abdomen.	Struck by a board which he was ripping.
"	Ottawa, Ont.	"	17	1	Arm badly cut.	When working on a boring machine sleeve caught in anger.
"	Hastings County, Ont.	"	1	1	Finger torn.	Caught in a knife.
"	Toronto, Ont.	"	30	1	Had concussion of the brain.	Struck by a falling board in a lumber yard.
"	Peterboro, Ont.	"	20	1	Lost right hand.	Cut off by a planing machine.
"	Kingston, Ont.	"	16	1	Had concussion of the brain.	Fell fifty feet from top flat of mill.
"	Toronto, Ont.	"	26	1	Lost three fingers.	Hand caught in scraper when mixing dough.
"	Lindsay, Ont.	"	20	1	Had concussion of the brain.	Horses ran away and he was thrown from cart.
"	London, Ont.	"	23	1	Left leg broken.	Fell ten feet down elevator shaft.
"	St. Thomas, Ont.	"	15	1	Spine injured.	Fell off train.
"	Eastwood, Ont.	"	28	1	Flesh badly crushed.	Killed in railway collision.
"	Hochelaga, Que.	"	24	1	Two ribs broken.	Caught between car steps and door of barn.
"	Sintalabta, Assa.	"	1	1	Head badly cut.	Hurt in a collision.
"	Near Harrison, Ont.	"	8	1	Head badly cut.	Engine ran into cattle and was wrecked.
"	Jonquière, Que.	"	20	1	Seriously injured internally.	Killed in wreck due to a washout.
"	Near Moosomin, Assa.	"	25	1	Three ribs broken.	Engine was wrecked by spreading rails.
"	St. Thomas, Ont.	"	7	1	Injured internally.	Injured in a collision.
"	Near Canfield, Ont.	"	2	1	"	"
"	Niagara Falls, Ont.	"	25	1	"	"
"	Eastwood, Ont.	"	28	2	Lost a leg and badly injured.	Engine ran off end of siding.
"	Montréal, Ont.	"	25	1	Later. Died five hours later.	Killed in a collision.
"	Dundas, Ont.	"	14	1	Scalp wound and shoulder dislocated.	Engine upset and crushed him.
"	Near Harrison, Ont.	"	8	1	Left ankle broken.	Jumped from engine.
"	New Glasgow, N.S.	"	1	1	Lost a foot.	Engine ran into cattle and was wrecked.
"	Near Canfield, Ont.	"	2	1	Injured internally.	Fell when boarding an engine and was run over.
"	London, Ont.	"	20	1	Arm burned and head badly bruised.	Fell in tender when coaling. Arm burnt by falling lantern, and head bruised by falling coal.
"	Eastwood, Ont.	"	28	1	Fatally scalded and injured internally.	Injured in a railway collision.
"	Burlington, Ont.	"	1	1	"	Struck by a train when standing on track.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Railway Service.</i>						
Brakeman	Montreal, Que.	Sept. 17	1		Skull fractured and fatally injured internally.	Fell from the top of a car.
"	Barrios, N.S.	" 21	1		Legs were cut off.	Fell off a car and was run over.
"	Sussex, N.B.	" 1	1		Foot and hand crushed.	"
"	Jonquières, Que.	" 20	1		Died Sept. 3.	Killed in a wreck due to a washout.
"	Point St. Charles, Que.	" 15	1			Run over by a train.
"	Richmond, Que.	" 17	1		Skull fractured.	Fell off a car.
"	Moncton, N.B.	" 14	1		Foot badly crushed.	Fell caught in a frog and car went over it.
"	Point Tupper, N.S.	" 15	1			Fell from top of a car and was run over.
"	Milton, Ont.	" 28	1		Body badly mangled.	Killed in a railway collision.
"	Eastwood, Ont.	" 28	2			Run over by a train when flagging it.
"	Thetford Mines, Que.	" 27	1			Fell between cars and platform.
"	Springhill, Que.	" 27	1			Crushed between cars.
"	Port Hope	" 30	1		Lost an arm.	Fell when boarding a train and two cars passed over him.
"	Hamilton, Ont.	" 30	1		Lost one leg and other badly injured. Died from shock.	Run over by a train.
"	Greenwood, B.C.	" 20	1		Lost left arm.	Fell from train when operating brakes.
Yardman	Toronto Junction, Ont.	" 14	1			Fell between cars.
Yardmaster	Point Tupper, N.S.	" 15	1		Hand crushed.	When working on an engine.
Yardman	Hamilton, Ont.	" 29	1		Leg broken and injured internally.	Hurt in a collision.
Porter	Sudbata, Assa.	" 1	1			When repairing an engine.
Shop hand, switchman.	Hamilton, Ont.	" 30	1		Hand crushed.	When adjusting belt on a stone crusher.
Railway bridge inspector.	Beaconsville, Ont.	" 17	1		Shoulder dislocated.	Fell from a hand-car.
Sectionman	Hamilton, Ont.	" 26	1			Run over by a train.
"	St. Boniface, Man.	" 23	1			Fell off a car and was run over.
"	Blackwater, Ont.	" 12	1			Clothes caught in the wheel of a hand-car and he was run over by a train.
"	Near Cross Lake, Man.	" 14	1			Injured in a collision.
"	Oak Point, Man.	" 28	1		Dangerously injured internally.	Struck by a train when on a hand-car.
"	Streetsville Junction, Ont.	" 24	1		Lost a leg.	"
"	"	" 24	1		Leg broken.	Struck by an engine when on a hand-car.
Railway labourer	Near Remie, Man.	" 29	2			"

"	"	"	29	1	Seriously injured	Crushed by a steam shovel.
"	Burlington, Ont.	"	5	1	Hand crushed.	Struck by a train.
"	"	"	13	1	"	Struck by an engine, six cars went over him.
Chore-boy at a station.	Cavanville, Ont.	"	29	1	Leg crushed, dangerously hurt.	
Street railway conductor	Toronto, Ont.	"	6	1	Skull fractured, recovery doubtful.	Fell off a car.
Electric motorman	Hochelaga, Que.	"	27	1	Shoulder broken and severely bruised.	Crushed between two cars.
<i>General Transport</i>						
Sailor	Port Colborne, Ont.	"	1	1	Head cut, nearly drowned.	Fell off a crib.
"	Lake Winnipegosis.	"	28	1	Drowned.	Washed overboard in a storm.
"	Montreal, Que.	"	14	1	"	Struck by a bucket of coal.
" (coal shoveller).	St. John, N.B.	"	20	1	Head split open.	Fell from wharf and struck an iron barrow.
"	Indiantown, N.B.	"	5	1	Badly scalded.	Explosion in a stove caused boiling water to fall on him.
Cook on a tugboat.	Welland, Ont.	"	1	1	Drowned.	Fell off a scow.
Dredge-man	St. John, N.B.	"	20	1	"	Fell from staging when dumping coal from a barrow.
Longshoreman	Fraserville.	"	26	1	Drowned.	Fell from a boat when loading a ship.
"	Port Arthur, Ont.	"	22	1	"	Struck by falling coal when unloading a ship.
"	Montreal, Que.	"	23	1	Left hip and arm fractured.	Fell into a ship's hold.
Teamster	Mount Sicker, B.C.	"	1	1	"	Killed when unloading skids.
"	Montreal.	"	17	1	Back and left shoulder injured.	Wagon was struck by an electric car and he was thrown out.
"	Toronto, Ont.	"	21	1	Collar bone and several ribs broken.	A load of lumber fell on him.
"	Peterboro, Ont.	"	29	1	Thigh broken.	Knocked from his cart by a street car and run over.
"	Hamilton, Ont.	"	3	1	Hip fractured.	Wheel came off wagon and he fell out.
Driver.	Toronto, Ont.	"	23	1	Skull fractured and arm broken.	Struck by an engine when driving across tracks.
"	Montreal, Que.	"	27	1	Feet badly cut and bruised.	Thrown from wagon which collided with electric car.
"	Barrington Passage, N.S.	"	6	1	"	Struck by an engine when driving across track.
"	Oakville, Ont.	"	29	1	Leg broken.	Fell from a wagon.
Jockey.	Montreal, Que.	"	8	1	"	Horse fell when jumping a hurdle.
"	Victoria, B.C.	"	9	1	"	Horse fell with him when jumping a hurdle.
Cashman	London, Ont.	"	27	1	Body badly crushed.	When exercising a horse it rolled on him.
Elevator man.	Montreal.	"	3	1	Head crushed.	Fell and was crushed between the elevator and shaft.
<i>Miscellaneous</i>						
Brickmaker.	Toronto	"	7	1	Injured internally.	By fall of a trestle on which he was standing.
Clerk.	"	"	2	1	Bones of face broken.	Hurt by the slipping of an elevator.
Drug clerk.	Berlin, Ont.	"	24	1	Face burned and eyes seriously injured.	When mixing chemicals they exploded.
Fireman (civil).	Toronto, Ont.	"	23	1	Finger badly cut.	When at a fire.
"	"	"	23	1	Head badly cut.	Struck by a plate glass window when at a fire.
Jute bag factory hand.	"	"	9	1	Lost part of third finger.	(Caught in cylinder printing press.
Lumber factory hand.	Hamilton, Ont.	"	17	1	Arm seriously cut.	Fell out of a window.
Paint factory hand.	Montreal, Que.	"	20	1	Bodily injured internally.	A barrel of paint fell on him.
Papermaker.	Hull, Que.	"	26	1	Lost left index finger.	Caught in machinery.
Pulp mill worker.	Rimouski, Que.	"	12	1	"	Clothing caught in a shaft.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER—*Concluded.*

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Unskilled Labourer</i>						
Labourer	Belleville, Ont.	Sept. 6	1	1	Back and arm injured	Struck by falling timber.
"	"	" 6	1	1	Back injured	"
"	Niagara Falls, Ont.	" 20	1	1	Bones broken	Injured by a premature blast.
"	Quebec, Que.	" 20	1	1	Lost three fingers.	Killed by a falling derrick bucket.
"	Port Arthur, Ont.	" 5	1	1	Face struck by fragments of rock.	Caught in cog wheels when working at a crane.
" (civic)	"	" 14	1	1	"	Hurt by a premature explosion of dynamite.
"	Hamilton	" 21	1	1	Chest and hip injured	When working in a sewer.
"	Lakefield, Ont.	" 13	1	1	Killed by electric shock	Arm touched a live wire.
"	Pontypool, Ont.	" 21	1	1	Seriously hurt	When unloading ties one fell on him.

ACCIDENTS HAPPENING IN PREVIOUS MONTHS, BUT ONLY REPORTED TO THE DEPARTMENT IN SEPTEMBER.

Farmer	Bright, Ont.	Aug. 28	1	1	Skull fractured	Kicked by a horse.
Machineist	Hamilton, Ont.	" 22	1	1	Ankle badly sprained	Fell when running to shut off motor.
Moulder	"	" 24	1	1	Left foot burned	When pouring hot iron.
Machineist	"	" 27	1	1	Finger badly cut	When knocking out castings.
"	"	" 31	1	1	Two fingers badly crushed	When setting a fertilizer drill frame.
Iron worker	Guelph, Ont.	" 29	1	1	Hand crushed	Caught in gearing.
Carriage maker	Palmerston, Ont.	" 22	1	1	Lost two fingers	Out off by a jointer.
Sheet metal worker	Hamilton, Ont.	" 30	1	1	Index finger crushed	Caught between the dies of a press.
"	"	" 31	1	1	Ankle broken	Foot caught in a chain when feeding cans into a soldering machine.
Knitting factory hand	Toronto, Ont.	" 29	1	1	Fingers crushed	Caught in a carding machine.
Rubber factory hand	Clinton, Ont.	" 31	1	1	Lost three fingers	Hand was caught between rolls.
Brickman	Stratford, Ont.	" 31	1	1	Crushed to death	Caught between couplers when coupling cars.
"	Near Hamilton, Ont.	" 31	1	1	Scalp severely wounded	Struck a bridge when on top of a car.
Merchant	Wingham, Ont.	" 17	1	1	Died	Sept. 17 from blood poisoning.
Paper mill hand	Merriton, Ont.	" 5	1	1	Lost two fingers	Struck his leg against a stove in his store.
"	"	" 30	1	1	Arm burned	Crushed between rolls.
Miner (gold)	Phoenix, B.C.	" 31	1	1	"	Caught between paper and dryer. Killed when at work; no particulars received.

Mining.—Five fatalities were reported in the mining industry. Two coal miners were killed by explosions, one at New Aberdeen, N.S., on September 22, and the other at Glace Bay on September 24. A gold miner employed as a nipper fell down a shaft at Ymir, B.C., on the 27th, owing to the breaking of a cable of the hoist in which he was being taken up. Particulars were not obtained with regard to the two other fatal mining accidents which occurred during the month, one of which took place at Phoenix, B.C., on the 6th, and the other at Ymir, B.C., on the 22nd of the month.

Building trades.—The same number of accidents occurred in the building trades in September as were reported in the previous month, but there were only two deaths compared with eight in August. On September 21, a plasterer at St. Thomas, Ont., fell from a wagon, and injured his back so severely that he died two days later. On the 22nd, a carpenter at Peterboro, Ont., fell from a scaffold, a distance of about 10 feet, and ruptured a blood-vessel in his brain, which caused his death.

Metal trades.—There were 7 fatal and 45 other accidents in the metal trades during the month, an increase of one in the number of deaths, and of 15 in the number of other casualties, compared with the previous month. Three of the fatalities were caused by men falling from heights, two were caused by a boiler explosion, in another case the victim was crushed by an elevator when working below it, and the seventh fatal accident was caused by a heavy door falling on an iron worker when he was engaged in repairing a furnace. Those who met with accidents included the superintendent of a rolling mill, 4 iron moulders, 5 iron workers, 7 structural iron workers, 11 machinists, 3 stationary engineers and a water tender, 4 sheet metal workers, and a sheet metal workers' apprentice, one electrical worker, 2 electrical linemen, one metal polisher, 3 boiler-makers, and one boiler-makers' helper, 2 blacksmiths, 3 cement workers and one sewer pipe maker.

Woodworking trades.—There were no deaths in the woodworking trades in the month of September through industrial accidents, and there were only 11 accidents in all in this industry, an increase, however, of 5 over the previous month. The accidents happened to two box factory employees, two basket makers, an organ worker, a factory hand, a canoe factory hand, and four employees of other wood factories.

Textile trades.—The only accident in the textile trades happened to an employee of a cotton mill at Kingston, Ont., on September 16, who fell 50 feet from the top flat of the mill and suffered concussion of the brain.

Food and tobacco preparation.—There were only three accidents in the trades relating to food and tobacco preparation. On September 20 a butcher at Lindsay, Ont., was thrown from his cart and had concussion of the brain. On the 23rd, a biscuit maker at London, Ont., broke his left leg by falling down an elevator shaft, and on the 26th, a baker at Toronto lost three fingers which were cut off by a scraper when he was mixing dough.

The railway service.—There were 57 employees in the railway service who met with accidents during September, of whom 30 were killed. This is a total increase of 21 over the previous month, an increase of 16 in the number of killed, and of 5 in the number of injured. There were 6 men killed in railway collisions, 5 in wrecks of engines, 9 were struck by trains and killed, 7 fell from trains and were run over, 2 sustained fatal injuries by falling off cars, and one man was crushed between cars when coupling them.

General transport.—In the general transport trades there were 12 deaths and 10 other accidents, a decrease of two in the number of fatalities, and of 9 in the number of other casualties. Three sailors and a dredgeman were killed, of whom two were drowned, one was struck by a bucket of coal, and one fell from a wharf. One longshoreman was drowned by falling out of a boat, another was struck by falling

coal when unloading a ship, and a third was killed by falling from a staging. Two drivers were killed by engines when crossing tracks, two jockeys were killed by their horses falling when jumping hurdles, and an elevator man had his head crushed between the elevator and the shaft.

Miscellaneous trades.—In the miscellaneous trades which do not come under any of the classes mentioned above, there was only one death, that of a pulp mill

worker who was killed at Rimouski, Que., on September 12, by his clothes catching in a shaft and dragging him into the machinery.

Unskilled labour.—The only death among unskilled labourers from an accident during the month, took place at Niagara Falls, Ont., on September 20, when a labourer was struck by a bucket, which fell from a derrick.

GOVERNMENT CONTRACTS FOR THE MONTH OF SEPTEMBER.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties to them during the past four months, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'Fair Wages' schedule inserted in each contract:—

Post Office, &c., Building, Acton Vale, P.Q. Contractor, Joseph Bourque, of Hull, P.Q. Date of contract, June 28, 1904. Amount of contract, \$10,250.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages.	
	Not less than the following :	
Bricklayers	\$2.00	per day of 10 hours.
Masons	3.00	" 10 "
Stonecutters	0.36	per hour.
Builders' labourers	1.50	per day of 10 "
Carpenters	2.00	" 10 "
Stair builders	2.25	" 10 "
Joiners	2.00	" 10 "
Lathers	1.50	per M.
Plasterers	3.00	per day of 10 "
Painters	2.00	" 10 "
Blacksmiths	2.00	" 10 "
Ordinary labourers	1.25	" 10 "
Plumbers and steamfitters	2.25	" 10 "
Sheet metal workers	2.25	" 10 "
Electricians	2.00	" 10 "
Electrical wirers	1.50	" 10 "
Driver, 1 horse and cart		
" 1 horse	2.00	" 10 "
" 2 horses and wagon		
" and 2 horses	3.00	" 10 "

Landing Pier, Pointe aux Trembles, P.Q. Contractors, Dussault & Pageau, of Quebec City. Date of contract, June 28, 1904. Amount of contract, \$33,775.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages.	
	Not less than the following :	
Contractor's foreman carpenter	\$2.50	per day of 10 hours.

IMMIGRATION AND COLONIZATION MOVEMENT.

THE immigration movement from Great Britain and the continent of Europe into Canada during September, though stimulated by the exceptionally low steerage rates offered by the Atlantic transportation companies, was on the whole quiet, the most widely discussed features being in connection with the previous months of the season, and with projected operations during the season of 1905.

British Emigration Returns.

Immigration returns for August from Great Britain to Canada show an increase of 256 as compared with August, 1903. The totals for the month were, English, 5,382; Irish, 358; Scotch, 1,196. In addition 1,472 foreigners left British ports for Canada. For the first eight months of 1904, the totals were, British, 53,997; foreign, 15,994, as against 47,920 British and 30,700 foreigners during the corresponding period of 1903. The increase in British emigration during the present year was stated to have been particularly noticeable in arrivals from Scotland.

Notes.

Numerous applications were reported as having been received by the Colonization Department of Ontario for information with regard to conditions in new Ontario. About four thousand veterans have had their claims recognized and have been located.

Arrangements were discussed during the month for bringing over a large number of children from Great Britain to be instructed to follow agricultural pursuits at a farm which is to be established in the maritime provinces.

A ranger dispatched by the Ontario Crown Lands Department to inspect the district north and west of Chapleau, reported the discovery of a stretch of good agricultural land over 200,000 acres in extent, and constituting from eight to ten townships in the district surrounding Trout lake.

The British Columbia Immigration Act, passed February 10, 1904, and enforced by the provincial police under regulations approved by Order in Council of May 20, was reported to have worked satisfactorily during the past season, several undesirable immigrants having been detained and deported. Up to August 25, \$1,800 was paid into the provincial treasury, representing a similar number of certificates at \$1 each issued by the officer, the certificates allowing immigrants who have passed the educational examination test prescribed by the law to enter the province.

In connection with the proposal of the Dominion Trades and Labour Congress to send a representative to Great Britain to counteract the alleged inducements offered by the government officials to mechanics and skilled artisans to immigrate to Canada, the Canadian Commissioner of Immigration, in London, Eng., has issued a statement that the propaganda of the government was confined strictly to the agricultural classes and domestics.

Eighty additional colonists were sent to Canada from Great Britain under the auspices of the Salvation Army during September.

In certain localities in Ontario dissatisfaction was expressed with the classes of English domestics brought out during the past summer by local councils of women. In most cases the girls were reported to have left their employment in order to work in factories, though the more intelligent ones are giving much satisfaction.

The monthly report for August of the Montreal Colonization Society, shows a total number of 384 colonists to have been distributed as follows: North of Montreal, 238; Temiskaming, 43; Metapadia, 6; Lake St. John, 29; New Ontario, 19; Western Canada, 49. The month shows an increase of 227 over August, 1903. For the year ending June 30, the number of colonists entered upon the roll of the society was 1,668, distributed as follows: North of Montreal, 483; Temiskaming, 103;

Metapadia and Gaspé, 94; Lake St. John, 125; New Ontario, 79; Western Canada, 163. These represent colonists who have been actually settled on the land; in addition there were 621 others forwarded to various sections.

Homestead Entries during the Month of August, 1904.

The following table, furnished by courtesy of the Department of the Interior, Canada, shows the number of homestead entries during the month of August, 1904, as compared with August, 1903:

TABLE OF HOMESTEAD ENTRIES DURING THE MONTH OF AUGUST, 1904.

Agency.	1904.	1903.	Increase.	Decrease.
Alameda.....	164	227	63
Battleford.....	208	178	30
Brandon.....	23	53	30
Calgary.....	173	209	36
Dauphin.....	22	27	5
Edmonton.....	228	271	43
Kamloops.....	10	10
Lethbridge.....	100	109	9
Minnedosa.....	24	34	10
New Westminster.	2	4	2
Prince Albert.....	182	165	17
Regina.....	579	492	87
Red Deer.....	153	105	48
Winnipeg.....	93	76	17
Yorkton.....	399	328	71
Total. . .	2,360	2,288	270	198

It will be seen that there has been a net decrease in the number of homestead entries made during the year of 72.

A statement of the homestead entries made during July and August, 1904, is as follows:—

TABLE OF HOMESTEAD ENTRIES, JULY-AUGUST.

Month.	1904.	1903.	Increase.	Decrease.
July. . .	3,011	3,438	427
August.....	2,360	2,288	72
Total....	5,371	5,726	72	427

It will be seen that the net decrease for the last two months amounted to 355.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the Department of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of August, 1904, were as follows:—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS DURING AUGUST.

Nationalities.	Number of Entries.
Canadians from Ontario.....	337
" Quebec.....	48
" Nova Scotia.....	11
" New Brunswick.....	8
" Prince Edward Island.....	5
" Manitoba.....	79
" North-west Territories.....	56
" British Columbia.....	3
Persons who had previous entry.....	277
Canadians returned from United States.....	29
Americans.....	658
Newfoundlanders.....

Special grants.	1	4' 28
Yukon Territory sales.	5	39' 19
Total.	566	864,033' 29

In August, 1903, the number of patents issued was 421, covering an area of 143,499.63 acres.

INDUSTRIAL BETTERMENT INSTITUTIONS IN NEW JERSEY.*

AT the request of the managers of the Louisiana Purchase Exposition, the New Jersey Bureau of Statistics recently undertook an investigation of the various plans adopted by manufacturing establishments within the state, for the benefit of their employees. In the circular letter which was sent to the manufacturers of the state, the scope of the inquiry was stated

*Industrial Betterment Institutions in New Jersey Manufacturing Establishments, 1904. Prepared for the Department of Social Economy of the Louisiana Purchase Exposition, by the Bureau of Statistics of New Jersey, Trenton, N.J., 1904. Pages 153.

to include such institutions as profit-sharing hospitals, beds in hospitals, club-rooms, libraries, reading rooms, educational classes, lectures, recreation halls, gymnasiums, baths, lunch rooms, rest rooms, shop committees, sick benefits, burial funds, prizes for useful suggestions relating to business or for superior work, and all institutions for improving social and industrial conditions and raising the general standard of life of the working people.

Two thousand letters of inquiry were sent to as many manufacturing firms or corporations, and five hundred and ten replies were received. Seventy-five firms were in a position to give particulars of industrial betterment institutions in their factories, about one hundred replied that nothing of this character was in operation at their respective works, and the remaining firms, about three hundred and thirty in number, expressed a desire to know what other establishments were doing along these lines, with a view to the adoption of some plan for the benefit of their own employees. The results of this inquiry are embodied in an illustrated pamphlet which contains an account of the institutions existing in the seventy-five factories from which particulars were obtained.

The Celluloid Company, Newark.

The three companies whose institutions are most fully described, are the Celluloid Company, Newark, N.J., the Sherwin-Williams Company, Newark, N.J., and the Weston Electrical Instrument Company, Waverly Park, N.J.

The chief features connected with the Celluloid Company of Newark, N.J., are an association of its employees for general purposes, called 'The Celluloid Club,' and a mutual benefit association, an organization which sprang from the Celluloid Club. This club arose from an amalgamation of numerous other clubs which had been formed by employees in different departments of the company's works. A great increase of membership followed the union of these societies, and the need of proper accommodation was soon felt. A request was made

to the managers of the company for the use of a vacant floor in one of the factory buildings, but this was refused. Instead of providing a room the company decided to erect a club house for their employees, and in 1899 one was built and furnished by the company at the cost of about \$40,000 for the free use of the Celluloid Club. The Mutual Benefit Association was organized for the purpose of obviating the difficulties experienced by the company in rendering help to its employees who from sickness or accidental injury were unable to work. The idea of forming this association was eagerly adopted by the employees, and so far it has met with great success. The officers of the company made a liberal donation to the association at its commencement in order to place it upon a sound basis. The salaries of the secretaries, the only officers who receive compensation, are paid by the company. In all other respects the employees manage the Celluloid Club and subordinate institutions themselves. There are 945 male employees of this company, of which number 525 are members of the Celluloid Club, and 300 members of the Mutual Benefit Association. The female employees, who number 360, are not eligible for membership, but they enjoy certain privileges, and many entertainments are organized for their benefit.

The Sherwin-Williams Company.

The Sherwin-Williams Company, manufacturers of paints and varnish, provides shower-baths, lunch rooms, rest rooms for female employees, and a club room furnished with a piano, game tables, and a library. A sick and death benefit society was organized by the company in 1887, and at the present time it includes over ninety per cent of the working force. The company gives an annual banquet to its employees, and also an annual outing, furnishing the transportation to some summer resort chosen by vote of the employees. The company has a system by which it solicits criticism of matters connected with the business and suggestions for improvement. At the end

of each year rewards are distributed to those who have made the most useful suggestions. The Sherwin-Williams Company operate fourteen plants, ten of which are in the United States, three in Canada, and one in England, and the company state that in all of them the same features of industrial betterment are in operation.

Weston Electrical Company.

The most important step taken by the Weston Electrical Instrument Company for the promotion of the welfare of their employees, was to present to them several furnished halls fitted up as recreation rooms, library, kitchen, dining-room, gymnasium, natatorium, bicycle depot, hospital, &c. On May 22, 1903, these rooms were formally transferred to the employees, who soon after formed themselves into the 'Weston Employees' Club of Newark, New Jersey,' which was incorporated under the laws of the State. The club is conducted entirely by the employees, and its object is stated in the constitution to be 'to promote the social, moral, intellectual and physical welfare of the employees of the Weston Electrical Instrument Company, and to cultivate harmonious relations between them and the company.' The officers are a president, vice-president, secretary and treasurer, and seven others, constituting the board of governors. Three members of the board are women, and of the male members four are heads of departments, and four general employees. The club provides a restaurant in which a full meal is served for twenty cents, or a light lunch may be had for less. For a time the restaurant was managed by a caterer under contract, but as it failed to meet expenses and was otherwise unsatisfactory, the club undertook the catering itself, with the result of good food, good service and financial prosperity. This company, a short time ago, voluntarily reduced the hours of labour in the factory from sixty to fifty-four hours per week, and also decided to close the works at 11.50 a.m. on Saturdays. The working day formerly lasted from 7 a.m. to 6 p.m. with half an

hour's intermission at noon. The lunch period was lengthened to 40 minutes, and the employees were given their choice of curtailing the day either in the morning or the evening. They chose the latter, and it is stated by the company that the employees express the highest satisfaction with the present arrangement, and that the weekly product of the factory has not been diminished.

CANADIAN TRADE DURING MONTH OF SEPTEMBER, 1904.

Revival in exports as compared with August and a distinct improvement in the domestic trade of the country, especially during the latter half of the month, were the leading commercial developments reported during September. Prospects for an active autumn season, accordingly, may be said to have brightened considerably within the past four weeks. The outlook also for trade as between the different colonies of the empire is, according to the most recent reports, favourable. Fuller particulars with regard to the more important features of the month are given under the following headings relating respectively to foreign, domestic and imperial trade.

Foreign Trade.

It will be seen from the accompanying table, supplied by courtesy of the Depart-

ment of Customs, that both exports and imports during August compared very favourably with July, the increase being approximately twenty-five per cent in the former and fifty per cent in the latter. As compared with August, 1904, imports were practically unchanged, while exports showed a falling off of about \$1,600,000. The chief improvements in exports were shown under the headings of agriculture and animals and their products. There was a decline of \$2,200,000 in products of the mines.

The new customs regulation to prevent 'dumping' went into effect on October 1.

Canadian trade prospects with Japan were reported by the agent of the Department of Trade and Commerce, Canada, at Yokohama, as favourable, especially in lumber and grain. The market for Canadian butter, fish and calcium carbide was also stated to be good.

Canadian trade with Mexico was reported as showing good prospects during September and a good demand for Canadian hay and straw fodder was reported from Belgium and Norway respectively. The Dominion government has entered into a contract with Andrew Weir and Company, of Glasgow, Scotland, for a steamship service from Vancouver and Victoria to certain Mexican ports.

According to the weekly reports issued by the Department of Trade and Commerce, Canada, during September, prospects for Canadian fruit in Great Britain were considered very favourable, especially for the more highly coloured and carefully packed article. The market for Canadian beer barrels and casks and for Canadian canned goods was also said to be very favourable. In South Africa trade was reported as practically at a standstill, with depression ruling

in nearly all branches, conditions during July being worse than for some time past.

Domestic Trade.

In the opening week of the month the prevalence of cool and unsettled weather caused a continuance of the general quietness noted during August. In the latter half, however, a very marked and general revival in trade conditions set in throughout the Dominion. This was particularly noticeable in the dry goods lines, a very good quality of buying having been reported at the autumn openings, which at several points and particularly at Toronto, Ont., were the most active in several years. In other lines the improvement was less marked, though a buoyant tone was noted in the general market, owing in large part to the favourable crop reports and the high price of wheat and other farm products. With scarcely an exception from Nova Scotia to British Columbia the prospect for an active autumn trade at the leading distributing centres was regarded as satisfactory at the close of the month.

Insolvencies in Canada were more numerous in August than usual, according to *Dunn's Review*, but the concerns are all

small and the total liabilities fell considerably short of those reported in July or in August, 1903. Manufacturing failures

were exceptionally light, numbering only eighteen with a total indebtedness of \$129,907.

REPORTS OF DEPARTMENTS AND BUREAUS.

The following reports of departments and bureaus were received at the Department of Labour, Ottawa, during September, 1904.

ONTARIO REPORTS.

Co-operative Movement in the Fruit Industry.

Thirty-fifth annual report of the Fruit Growers' Association of Ontario, 1903. Toronto: King's Printer, 1904. Pages, 208.

In the report of the executive committee of the Ontario Fruit Grower's Association, which was presented at its annual meeting on November 24, 1903, an account is given of a co-operative movement which has been inaugurated in this industry, and a proposal is made to extend it. In the report for 1902, it was mentioned that a number of local fruit growers' associations had been organized throughout the province under the direction of the executive committee, with the object to assist the farmers to produce more and better fruit. The suggestion is made to take these local societies as a nucleus and to organize associations for the purpose of buying materials for spraying, &c., required by their members, and selling the products of their gardens and orchards in a co-operative system. In the Georgian Bay district the practice of co-operative buying was adopted in 1902, and the Fruit Growers' Association of the Lake Huron district in the same year made a successful trial in co-operative storing and selling, shipping two cars of Duchess apples and selling them in Manchester, England, and also selling three cars of winter apples. In 1903, the Association, which was composed of from fifty to sixty members, shipped fourteen carloads of apples. In accordance with the recommendation of the executive committee a com-

mittee was appointed at the meeting for the purpose of promoting the formation of growers' co-operative organizations in every fruit district in the province, with the object of handling the fruit and buying supplies in a co-operative way.

A resolution was also passed urging the Dominion government to remit the duty on sugar used in canning, and on packages for holding canned fruit, and to enact legislation compelling the labelling of all canned preserves, so as to show what they consist of, as demonstrated by official analysis, the labels to contain the words 'made in Canada.'

The report contains numerous papers which were read at this meeting, among them being 'Co-operative Fruit Packing and Marketing,' by W. H. Owen; 'The Canadian League for Civic Improvement,' by G. R. Patullo, and 'Ocean Transportation,' by W. W. Moore, and also papers read at the annual meeting of the Ontario Horticultural Societies, held at Leamington, Ont., in 1903.

Loan Corporations in Ontario.

Loan corporations' statements, being financial statements made by building societies, loan companies, loaning land companies and trust companies for the year ending December 31, 1903. Toronto: King's Printer, 1904. Pages, 306.

The report of the annual statements of loan corporations in Ontario, for 1903, is divided into three parts, containing respectively reports of loan companies, loaning land companies and trusts companies. The statements are preceded by a copy of the form supplied to loan and trust companies by the registrar of loan corporations for the purpose of the annual statement.

The reports of the various companies are followed by comparative tables which give

the following particulars among others: The authorized capital of all the loan corporations having only permanent stock, in 1903, amounted to \$100,776,139.95, of which the sum of \$55,529,109.95 was subscribed. The total assets amounted to \$116,084,999.09. The liabilities to the public amounted to \$73,713,313.90, and to the shareholders \$42,371,685.19. Loan companies with terminating stock had permanent capital subscribed to the amount of \$7,385,660, and terminating capital amounting to \$17,930,770. The liabilities of these companies to shareholders were \$11,640,923.95, and to the public \$3,261,162.67. The total assets were \$14,902,086.62. With the exception of the amount of capital subscribed, there was a general decrease in the amount of business of these companies compared with the previous year. This was also the case with loaning land companies, the authorized capital of which showed a decrease of \$1,200,000, and the subscribed capital decreased from \$6,126,516 to \$4,842,833. The total liabilities also showed a decrease from \$7,804,455.32 to \$6,258,130.34. The business of trust companies showed some improvement over 1902. While the authorized capital of \$8,200,000 was \$500,000 less than in 1902, and the subscribed capital was \$404,000 less, the total assets increased from \$22,415,486.17 to \$27,687,307.81, and the liabilities to the public decreased from \$965,001.68 to \$823,352.56.

Mining in Ontario.

Report of the Bureau of Mines of Ontario, 1904. Part I. Toronto: King's Printer, 1904. Pages, 268.

There was a slight decrease in the value of minerals produced in Ontario, in 1903, according to the report of the Ontario Bureau of Mines. This was due to a decrease in the output of metallic substances, there having been a gain in the production of non-metallic substances. The total production of minerals during the year amounted to the value of \$12,870,593, of which \$7,628,018 were for non-metallic products, and \$5,242,575 for metallic products. There were 10,658 employees en-

gaged in the mining industries who received in wages the sum of \$4,222,386. The output of gold has steadily decreased since 1899, when it reached the highest point on record, the sum of \$424,568 having been produced in that year. The value of gold product in 1903 amounted to \$188,039, the number of men employed was 493, and there were paid in wages \$245,490. The cause of this decline is stated to be want of judgment on the part of directors of companies and lack of competent management. There was a great decrease, also, in the production of silver, owing to the destruction by fire of the shaft and power houses of the West End Silver Mountain Mine, the largest producing mine in Ontario. The value of silver bullion dropped from \$58,000 in 1902 to \$8,949 in 1903. The greatest mining development in Ontario in recent years has been in the production of nickel and copper. Since 1899, the value of nickel produced has increased from \$526,104 to \$2,499,068, and the value of copper from \$176,237 to \$716,726. With regard to the non-metallic substances, Portland cement increased from \$444,227 in 1899 to \$1,182,799 in 1903; carbide of calcium from \$74,680 to \$144,000; mica from \$38,000 to \$102,205; while there was a decrease in natural gas from \$440,904 to \$196,535, and in petroleum products from \$1,747,352 to \$1,586,674.

Returns of the production of peat fuel are given for 1903, in which year there were produced 1,100 tons, valued at \$3,300. Most of it was produced at Beaverton, and a small tonnage was also produced at Newington, Welland and Picton. The peat factories were chiefly engaged in experimenting with new machines and processes, which accounts for the small output. Peat briquettes are now being made for about \$1.50 per ton, and are sold for \$3.50 per ton at the works. A new peat industry which gives promise of success is being established at Cannington, on Lake Simcoe, for the manufacture of a material to take the place of straw and wood pulp for making paper, cardboard, leatherboard, mill board, &c.

Laws Affecting Children.

Laws affecting children, compiled from the Dominion and Ontario statutes. By J. J. Kelso, superintendent of neglected and dependent children of Ontario. Toronto: King's Printer 1904. Pages, 74.

A small pamphlet recently issued by the Superintendent of Neglected and Dependent Children of Ontario on the subject of Dominion and Ontario laws affecting children, contains the Children's Protection Act of Ontario, which was enacted in 1893, with subsequent amendments. This is followed by an Act passed by the Dominion parliament in 1894, respecting the arrest, trial, and imprisonment of youthful offenders, and a number of extracts from other Ontario statutes, and from the Dominion Criminal Code, relating to children and young persons. This publication also contains a model constitution for children's aid societies, a directory of these societies in Ontario, and a list of Ontario institutions for the care of defective and delinquent children.

BRITISH REPORTS.

Factories and Workshops.

Annual Report of the Chief Inspectors of Factories and Workshops for the year 1903. Part I—Reports. London: Eyre & Spottiswoode, 1904. Pages, 342. Price, 2s. 10d.

The report of the Chief Inspector of Factories and Workshops of Great Britain for 1903 states that at the close of the year there were on the registers of the Factory Department 102,939 factories and 144,148 workshops. These include laundries, but not men's workshops, domestic workshops or factories, docks or warehouses. During 1903 there were received from occupiers 317,933 statutory reports, of which 92,600 related to accidents, 153,976 to overtime and 30,531 were humidity records. Of the 92,600 accidents reported in 1903, 1,047 were fatal.

With regard to dangerous trades new regulations came into force governing file cutting by hand and the manufacture of electric accumulators. Other proposed regulations are under consideration respect-

ing docks, electrical stations, and the use of electricity and locomotives.

A new Act respecting the employment of children was passed in 1903, and came into force on January 1, 1904, which enables the Inspector of Factories to prevent the employment of a child after 9 p.m., or in work for which he is physically unfit, and imposes upon local authorities the duty of enforcing conditions attached to licenses for the employment of children in public entertainments.

Statistical Charts of Trade and Labour.

Charts illustrating the statistics of trade, employment and conditions of labour in the United Kingdom, prepared for the St. Louis Exhibition by the Commercial, Labour and Statistical Department of the Board of Trade. London: Eyre & Spottiswoode, 1904. Pages, 65. Price, 4s. 9d.

The Commercial, Labour and Statistical Department of the Board of Trade of the United Kingdom has issued on a reduced scale a series of twenty-eight charts which were prepared for the St. Louis Exhibition illustrating the industrial conditions prevailing in Great Britain. Statistics are given in these charts with reference to the following subjects:—Occupations of the people, showing the numbers occupied in fourteen groups of trades at the time of the census of 1901, and a comparison of the numbers occupied in seven principal groups of trades according to the various censuses from 1851 to 1901; the average monthly and annual percentage of unemployed members of certain trade unions from 1888 to 1903; changes in rates of wages from 1874 to 1903 in five principal groups of trades, and wages of agricultural labourers in England and Wales from 1850 to 1903; wholesale prices from 1871 to 1903; prices of wheat and bread from 1800 to 1903; retail prices of nine principal articles of food from 1877 to 1903; consumption per head of population of tea, currants and raisins, coffee, cocoa, tobacco and sugar from 1854 to 1903; the annual consumption of beer since 1881; the net consumption of wheat since 1853; and the consumption and expenditure, as regards meat, flour and bread,

of agricultural labourers' families and urban workmen's families based on a number of budgets furnished in 1903. Other charts deal with pauperism, foreign trade; shipping and railway traffic, production and home consumption of coal and pig iron, the home consumption of raw cotton and raw wool, and the net tonnage of mercantile and passenger vessels built in the United Kingdom, trade disputes, trade unions, workmen's co-operative societies, and fatal industrial accidents. The charts are preceded by tables containing the figures on which they are based.

Statistics of Foreign Countries.

Statistical abstract for the principal and other countries in each year from 1892 to 1901-1902. London: Eyre & Spottiswoode, 1904. Pages, 360. Price, 1s. 6d.

The Statistical Abstract for Foreign Countries issued by the British Board of Trade in 1904, which is the thirtieth number of this series, contains particulars of the principal countries of the world, relating to their area, population, shipping, commerce, agricultural and mining production, railways, telephones, public finances, and various other subjects. The period covered is from 1892 to 1902, so far as it was possible to do so, but in many cases statistics were not available for the whole of this period or for all the countries enumerated.

The following figures taken from this report show the relative positions of the leading countries in certain branches of industry, in the year 1903:—In the production of coal the United States led with 320,983,000 tons. The next highest was the United Kingdom with 230,334,000 tons, Germany coming next with 116,638,000 tons. In the production of iron ore the United States was also first with 31,606,000 tons, followed by Germany which produced 21,231,000 tons, the United Kingdom yielding 13,716,000 tons. The United States produced 18,009,000 tons of pig iron, and the United Kingdom 8,811,000 tons, the tons being 2,240 pounds. Germany produced 10,018,000 tons of 2,204 pounds each, and France, 2,828,000 tons.

NEW ZEALAND REPORT.

Industrial Conditions in New Zealand.

Report of the Department of Labour, New Zealand, for 1904. Wellington: Government Printer, 1904. Pages, 128.

In the thirteenth annual report of the Department of Labour of New Zealand, which covers the period from April 1, 1903, to March 31, 1904, it is stated that the year was exceedingly prosperous for a large majority of the workers. The most flourishing industries were the building trades, woollen mills, laundries and clothing trades in the towns, and agricultural and pastoral industries in the country districts. There was a falling off among tanners and fellmongers, and the saddlery and harness-making trade was decadent. The number of applicants for work who were assisted by the department during the year was 2,860, a large decrease compared with the previous year, when 3,704 were assisted. The number of factory hands has increased from 29,879, in 1895, and 59,047, in 1903, to 68,968 in 1904.

In 1903, the New Zealand parliament passed an Industrial, Conciliation and Arbitration Act, containing important amendments to the Act then in force. By the new law, an arbitration court is empowered to extend an award beyond the industrial district originally concerned, when considered advisable by the court to do so. The object of this clause was to prevent one factory from having an unfair advantage over another, owing to the inequality of wages. Other important sections of the Act forbid combinations of workers or employers with the object of defeating an award, and employers are also forbidden to discharge any worker for unionism, or with intent to defeat the law. Inspectors of awards are provided by the Act appointing inspectors of factories and inspectors of mines.

EUROPEAN REPORTS.

Workmen's Insurance in Germany.

The German Workmen's Insurance as a Social Institution. By order of the Imperial Insurance Office, compiled for the Universal Exposition at St. Louis, 1904. Parts I., II., III., IV., 1904.

Guide to the Workmen's Insurance of the German Empire. Revised edition brought up to date for the Universal Exposition at St. Louis, 1904. Berlin: A. Asher & Co., 1904. Price, 6 cents.

The Imperial Insurance Department of Germany has issued a number of pamphlets on the subject of workmen's insurance in the German empire, as exhibits at the St. Louis Exposition. Among these are publications entitled 'The German Workmen's Insurance as a Social Institution,' and 'Guide to the Workmen's Insurance of the German Empire,' from which the following information has been obtained.

In seeking to provide assistance for workmen who received injuries, or were otherwise disabled while engaged in their respective occupations, the German government decided to adopt a system of compulsory insurance. This policy was first announced in an Imperial message to the Reichstag, on November 17, 1881, and it was carried out in a sickness insurance law passed in 1883, an accident insurance law passed in 1884, a law of 1885, extending accident and sickness insurance, the public employee's insurance law and the law on the accident and sickness insurance of persons employed in agricultural work and forestry of 1886, the building accident insurance law and the marine accident insurance law of 1887, and the invalidity and old age insurance law of 1889. These laws have since been revised at various times. In 1900 a law was added referring to the provision in case of accidents to prisoners, and in 1901 the public employee's and military accident insurance law were passed.

The system of workmen's insurance against sickness in vogue in Germany consists in the formation of corporations, or clubs, by the insured, each one of which is composed of persons belonging to the same trade. The formation of the following associations are compulsory: The Local Sick Clubs, established by parishes (townships), for branches of trade within their limits; the Industrial (factory) Sick Clubs, erected by proprietors of large factories; the Builders' Sick Clubs, which building contractors are bound to establish; the Guilds' Sick

Clubs, founded according to the National German Trades Regulation Law, and the Miners' Sick Clubs, founded in accordance with the mining laws of the several states of Germany. The amount of premiums paid to these clubs by the insured, and the minimum relief to which they are entitled are fixed by law. One-third of the contributions are paid by employers and two-thirds by employed. Accident insurance is carried out on the mutual system by the employers united in trade associations, each one of which represents a special industry either in a certain district or in the whole Empire. Insurance is compulsory in the case of all workmen and inferior managing officials with yearly salaries up to 3,000 marks, if they are occupied in establishments subject to insurance or in domestic and other services ordered by their masters or managers apart from their regular work. Compulsory insurance may also be extended by statute to small masters with yearly earnings up to 3,000 marks, or with only two regular workmen, 'managers of home industries, and officials with salaries over 3,000 marks a year. These latter classes are also legally entitled to voluntary insurance, which may be extended to employers with higher yearly earnings, and also to other persons exposed to risks in an establishment without being employed by it. Contributions are levied on employers according to the extent of their business and the risks incidental to it. The compensation provided for injured workmen includes free medical attendance with medicines and remedies; a pension during disablement up to 66½ per cent of the yearly earnings, or free hospital treatment during the whole cure, and a pension for the family in case of death; funeral expenses equal to one-fifteenth part of the yearly earnings, but not less than 50 marks, and a pension for surviving dependents from the day of death up to 60 per cent of the yearly earnings.

Insurance against invalidity and old age is carried on by territorial organizations comprising working-people of all trades. Contributions to this insurance are payable half by the employer and half by the em-

ployee, the amount of insurance being in proportion to the wages earned, and ranging from a total weekly contribution of '14 marks in the case of those with yearly earnings up to 350 marks, to '36 marks for those with yearly earnings of over 1,150 marks. the yearly pension, including a state subsidy of 50 marks, ranges from 116'40 to 150'00 marks for invalids unfit for work after the

waiting period of 200 weeks, from 185'10 to 450 for invalids after 50 years, and from 110'40 to 230'40 marks for persons 70 years old, but still able to work. The total number of people insured in these institutions against sickness, accident and old age increased from 17,366,000 in 1901, to 17,582,000 in 1902.

RECENT LEGAL DECISIONS AFFECTING LABOUR.

THE following synopses of cases affecting labour are based upon the latest law reports and other legal records of the different provinces of Canada:—

ONTARIO CASES.

Employment of Child who misrepresents his Age.

The Ontario Factories Act provides that no person under 14 years of age shall be employed in certain factories.

M., a boy 10 years old, obtained employment in a factory coming within that Act, representing himself as being 14 years of age. The work he was given to do was to put glue on boxes. In making his way to his glue-pot some days after he was employed, he put his hand on a planer and the little finger of his right hand was taken off.

M. brought an action for damages, claiming that his employers committed a breach of the Factories Act in employing him when he was under 14 years of age, and also that there was a defect in the 'ways' of the factory.

At the trial the case was withdrawn from the jury, and M.'s action was dismissed upon the ground that the misrepresentation as to his age precluded him from recovering damages.

An appeal was taken, and the higher court allowed the appeal, and directed that there should be a new trial, the employers to pay the costs of the former trial and of the appeal.

In the course of his judgment the Chancellor of Ontario said, in reference to the provisions of the Factories Act above referred to: 'This prohibition of the Act is for the benefit of young children—to protect them from dangerous employment—it enacts a rule of safety for the preservation of children even as against themselves. It is not enough to take the statement of a child as to his age; the employer must take steps to satisfy himself by reasonable means that the applicant for work is a legal worker. In case of controversy it would be for the jury to be satisfied that reasonable precautions had been taken on this head—by inquiry from the parents or other ordinary means of information as to age.

And this illegal employment may be, in some circumstances, evidence of negligence if inquiry has arisen in the course of the work. The boy was not put to work at a dangerous machine, but he was left to find his way to his work through a room which had elements of danger and without any warning or notice given to him as to the proper passage. There was a roundabout way which was safe, but he saw workmen taking the short cut, and this he took at noon of the first day of his work at the glue-pot. Finding it blocked with boxes he stooped down to get under the corner of the planer, not appreciating the danger. His attention being called off by another boy, he suddenly made a movement which brought his hand upon the knives of the planer and caused the loss of the finger.

He thought that he could have got under or through the place safely, and probably would have done so but for the call which disturbed him.

Upon this state of facts, in the plaintiff's evidence, it would be for the jury to say, having regard to his age and the danger of the place, whether sufficient warning had been given by the employer to protect the lad, who should not have been in the factory at all. I need not elaborate the matter, but I will refer to a very apt (English) case, as containing the latest law. Mr. Justice Wills, who speaks knowledgeably about the small boy, said: 'Every one knew that if boys were not well watched they would get themselves into danger where there was an opportunity of doing so.'

(McIntosh vs. The Firstbrook Box Company. Judgment given by a Divisional Court of the High Court of Justice, June 30, 1904.)

Improvident Compromise of Claim Set Aside.

D, a painter, was employed in painting the ceiling of an engine-room. He was working, with the knowledge of the superintendent of the works, on a raised scaffold near a revolving shaft.

In the course of the work his clothing was caught on part of the shaft, and he was then drawn in and received injuries from which he died.

D's wife and mother brought an action for damages against the proprietors of the works in which the engine-room was situated. The jury brought in a verdict, giving seven hundred and fifty dollars (\$750) to each, but the judge gave judgment in favour of the defendants and dismissed the action.

An appeal was taken, and the court, while holding that the evidence was not shown that the mother's interest was sufficient to entitle her to recover, yet was of the opinion that there was evidence of negligence on the part of the proprietors of the works, and that D's wife was entitled to the damages of seven hundred and fifty dollars (\$750) awarded her by the jury.

It also appeared that there was some ques-

tion of D having another wife, who was alive at the time of his death, and that, by the use of this and other arguments, representatives of the defendants had, shortly after D's death, induced the wife, who brought an action, to give a release to the defendants in exchange for a small sum which they then paid her. The court held that under the circumstances, this release was not binding upon the wife, and referred to it in the following terms:—

The woman was in needy circumstances: she was naturally of weak constitution (anaemic), had been unnerved by the sudden death of her husband, and was further shocked by the intimation that she was not his wife. Confessedly she was unfit for business for a fortnight after his death, and it is not proved that she had become fit a month after, when the release was signed.

The argument was pressed upon her that if she did not take the small sum offered, it would go to the other wife, said to be the lawful one. This was a rather unfair argument, for the other wife had long been away from the deceased and had apparently at that time no claim for his support. The woman was sadly in need of disinterested advice, and she had none. Though it was known to the company that she then had solicitors, who were prosecuting her claim, it was not suggested that she should resort to them before accepting the sum offered. To use her own expression, 'she was worried to death' by the importunity of those acting on behalf of the company defendants, and the insurance company, who are really defending the action, and so, without knowledge of the facts which established the legality of her marriage (which she might have quickly ascertained had fitting advice and opportunity been given her), she was pressed into an improvident settlement by adversaries who over-matched her. Fair play demands that better consideration should have been extended to her before seeking to extinguish her rights. It is not the ordinary case of the compromise of a doubtful claim, but one in which the parties were not dealing on equal terms and in

which the woman's competence for such business admits of the gravest doubt.

(Doyle vs. The Diamond Flint Glass Company. Judgment given by the Divisional Court of the High Court of Justice, June 30, 1904.)

Employee Voluntarily Accepting Risk of Work.

C. was employed as a foreman by a contractor who was building a power-canal near Niagara Falls.

In the course of the work, a shaft had been sunk to the depth of about 155 feet, and from the bottom of this shaft a tunnel had been made, horizontal, extending from the shaft to a joint under the Niagara river. The construction work was interfered with by water leaking through and filling or partly filling the tunnel, and this water had to be got rid of by pumping. Four pumps were placed in the shaft, and were about 15 feet from the bottom. The power for pumping was on the surface, and the men at this time could do nothing in the shaft except to keep the pumps oiled and in good working order. There were two gangs of men, one for night, the other for day, and C. was foreman of the day gang.

One day when C and another employee were lowered down the shaft to oil the pump, a large stone fell from the shale side of the shaft and struck C on the head, and so injured him that death resulted.

C's widow brought an action, under the Workmen's Compensation Act, for damages against the contractor, claiming that he was negligent in not having had the wall of the shaft lined with timber or made secure in some other way, so that the loose rocks would not fall from the wall.

At the trial the judge, before deciding the main point of law involved, submitted questions to the jury so as to avoid the necessity of another trial in case he should find that the law was in favour of the widow's contentions. The jury found that the contractor had been guilty of negligence in not having the shaft lined, and awarded two thousand dollars (\$2,000) damages.

The judge stated that there was no statutory duty compelling the contractor to have

the shaft lined, the point not being covered by either the Ontario Mines Act or the Ontario Factories Act.

The trial judge also came to the conclusion that the evidence showed (1) that the shaft was in a dangerous condition; and (2) that C was well aware of the danger from loose stones falling that he had been warned against it, and that as foreman of the shift, he had been at liberty to 'trim' the shaft, and that he should have done so. He, therefore, held that C had been aware of, and had voluntarily accepted the risk by going down the shaft under the prevailing conditions, and that the case was governed by a maxim of law, the effect of which is that no action for damages will lie in respect of an injury caused to a person, who, of his own accord and with full knowledge of the risk, undertakes to do the work to which such risk is attached.

The action was, therefore, dismissed, but without costs.

(Cameron vs. Douglass. Judgment given in the High Court of Justice. By Mr. Justice Britton, June 22, 1904.)

Railway Accident Caused by Display of Wrong Signal.

B. was employed as a conductor on the Grand Trunk Railway Company. On the night of October 7, 1901, he brought his train from Stratford to London east, where he arrived at about 10 p.m. The usual track for his train was the second from the station platform, and, leaving the train upon that track, he got off as it was about to stop, and while going toward the telegraph operator's door in the stationhouse, he was struck and instantly killed by an engine which was backing or reversing upon the track next the stationhouse.

B's widow brought an action for damages against the railway company.

At the trial the case was withdrawn from the jury, and judgment given in favour of the railway company, upon the ground that B had been guilty of negligence in-as-much as he had broken one of the rules of the company, which is to the effect 'the employees must not get off moving trains.'

An appeal was taken, and the higher court, in the course of its judgment, pointed out that while B did get off his train before it actually stopped, yet that did not in itself cause the accident; and that, on the other hand, there are two rules of the company to the effect (1) that engines reversing at night must display a white light; and (2) that no engine shall pass between the station and a train which is discharging passengers. In this instance both of these rules had probably been broken, and the first one certainly had. The reversing engine not only did not have a white light, but it carried a red light, which was worse than no light at all, in-as-much as it indicated a stationary object, and not a moving or approaching one. It was quite possible that B, who was a railway man of 25 years experience, might have seen this red light and crossed the track, naturally thinking that he was safe in so doing. In view of these circumstances, the court allowed the appeal, and directed that there should be a new trial, the railway company to pay the costs of the former trial and of the appeal.

(Birkett vs. The Grand Trunk Railway Company. Judgment given by the Court of Appeal for Ontario, June 29, 1904.)

Liability of Employer for Accident on Premises.

K. was employed by a manufacturer of engines and other machinery.

A dredge engine which had been built for shipment to British Columbia was, at the time of the accident in question, standing near a railway track, which was built into part of the shop. This engine weighed four or five tons, and each end of it rested on a piece of timber about twelve inches (12") square, and was also supported by timbers against flanges at the side. A large wagon had been backed into the shop in order to get a retort, which it was taking away. When on the wagon, the retort extended over the edge about a foot or fifteen inches (15"), but there was still room for it to pass the engine, as it had to do on the way out. K. was at this time working at a

bench some three or four feet from the engine. From some cause, not ascertained, the horses started suddenly, and, as they swerved, the engine was struck by the wagon, and was thrown over upon K., killing him.

K.'s widow brought an action against his employers on behalf of herself and her invalid daughter. At the trial a jury found that the accident was caused by the negligence of the manufacturer of the engine (K.'s employer), in not having it properly braced, so as to withstand any shocks it was reasonably likely to receive from passing drays, and that K. himself had not been guilty of any negligence. They, therefore, awarded one thousand two hundred dollars (\$1,200) damages—one thousand dollars (\$1,000) to the widow and two hundred dollars (\$200) to the daughter.

The employer appealed but the Court of Appeal sustained the judgment. A further appeal was taken to the Supreme Court of Canada, which also gave judgment in favour of K.'s widow.

(Miller vs. King. Judgment given by the Supreme Court of Canada, May 4, 1904.)

Action for Damages Dismissed, Cause of Death being Conjectural.

B. was employed in certain engine works, and, in the course of his work was engaged, together with other employees, in carrying materials from the ground floor of the factory to a gallery or floor above by means of a crane. When the materials reached the floor above, they were deposited on the platform.

B. fell to the floor below in the course of this work, and received injuries which eventually caused his death. His widow brought an action for damages, claiming that the platform was a part of the ways connected with the employers' works, that therefore it should have been 'as far as practicable securely guarded' in accordance with the provisions of section 20 of the Ontario Factories Act, and that B. had met his death as a result of the negligence of his employers in leaving it unguarded.

At the trial the jury found that the projecting platform in question was a dangerous place for the man working on it, because it did not have a railing; that the employers were guilty of negligence in not providing such a railing; that the accident was caused by the lack of it; and that B. by the exercise of reasonable care, could not have avoided the accident. They, therefore, awarded the widow one thousand dollars (\$1,000) damages. The employers appealed from the judgment which was given in accordance with this verdict. The higher court held that even if the platform was 'a dangerous structure or place' within the meaning of the Ontario Factories Act, yet there was no evidence whatever which showed that the want of a railing caused B. to fall. The court, therefore, considered that the cause of death was purely a matter of conjecture. The appeal was allowed and the action dismissed, but without costs.

(Brown vs. The Waterous Engine Works Company. Judgment given by a Divisional Court of the High Court of Justice, July 2, 1904.)

Employer not Liable for Unauthorized Acts of Employees.

A, was employed in a door factory. He worked on the first floor, in which there was an opening through which boards were passed from the floor below. It was usual, when a number of boards had to be sent up, to have one of the employees stand by the hole and receive the boards one by one. But when only a few boards were to be passed up, it was usual for the man on the floor below to shove one board up a little way, and then rattle it about until some one came to take it.

On the occasion in question, an employee on the ground floor, finding three boards with their ends in the opening, shoved one up a little way and rattled it in the usual way. As no attention was paid to this, he shoved the board up violently, so that it went through the hole and landed on the first floor. He did the same thing with the second and third boards, and the last one

struck A, who happened to be walking past the hole, and caused his death.

A's widow brought an action against the employers, claiming that the accident was caused by negligence, for which they were responsible.

The case was tried with a jury, and judgment was given awarding A's widow one thousand dollars (\$1,000) damages.

The employers appealed, and the Court of Appeal held that they were not liable, as the act of the employee which caused the accident was unauthorized by them, and opposed to the usual system in force; and that they could not be blamed for not assuming that any one would attempt to remove the boards in such an extraordinary way.

(Alexander vs. Miller. Judgment given by the Court of Appeal at Toronto.)

Wrongful Abandonment of Employment.

N. B. and J. B., of Montreal, were charged before the police magistrate of Deseronto Ont., with having entered into an agreement with the Rathbun Company of Deseronto, to perform work and services for the said company at Deseronto, under which they received from the Rathbun Company, as an advance of wages, the sum of \$5.60 each in railway tickets for their transportation from Montreal to Deseronto, and with having without the consent of the Rathbun Company, left its employment, before the costs of such transportation had been repaid; contrary to the provisions of the Act respecting Masters and Servants, R.S.O., 1897, ch. 157, as amended by 1 Edw. VII., ch. 12, sec. 14. J. B. pleaded guilty. Evidence was given in behalf of the prosecution, and the prisoner N. B. gave evidence in his own behalf. The magistrate adjudged that each prisoner should be fined \$5 and costs, and that if the amounts were not paid within 10 days, they should be committed to the common jail at Belleville for 10 days.

(Gaulin v. Bernier and Bigras, tried before Police Magistrate Bedford, of Deseronto, Ontario, on the 30th August, 1904.)

British Columbia Case.

As a result of the recent judgment for twelve thousand five hundred dollars

(\$12,500) given against the Rossland Miners' Union, in the action brought against it by the Centre Star Mining Company (reported in the September number of the *Labour Gazette* at p. 303) a permanent receivership has been appointed for the Rossland Miners' Union.

The receiver is entitled to collect twelve thousand five hundred dollars (\$12,500), to-

gether with the costs of collection. The order will put the receiver in possession of the Union Hall in Rossland, as well as in possession of all funds which may have been collected by the union for initiation fees, fines, assessments, or otherwise, and which are in the hands of its secretary-treasurer.

It is stated that the miners' union will contest the validity of the receivership.

INDUSTRIAL AND LABOUR CONDITIONS DURING OCTOBER—

GENERAL SUMMARY.

FOR the season of the year, October was an exceptionally active month in the labour market throughout Canada, showing a very slight, if any, diminution in the amount of employment as compared with September, and comparing favourably with the corresponding period of 1903. The advance of the season had the usual effect of increasing somewhat the number of unemployed among unskilled labourers and the out-of-door occupations, but the tendency in this direction was, with only local exceptions, almost wholly offset by the prevalence of exceptionally mild and open weather throughout the month, enabling work in the building and other outdoor trades to be continued almost without interruption to the closing day, and greatly facilitating operations in the agricultural and transportation industries which are usually taxed to their utmost capacity at this time of the year, in connection more particularly with threshing and marketing of the western grain crops.

The prolongation of the season of outside activity, by increasing the amount of em-

ployment in sections where a distinct falling off is usually noted during October, had the effect of equalizing conditions and of causing the activity in connection with the marketing and forwarding of the western crops to be less prominently the development of chief industrial importance during the month.

Several of the reports of the correspondents to the *Labour Gazette* show the prevalence of more active conditions than during September. The cities of Hull, Que., London, Ont., and Sault Ste. Marie, Ont., may be particularly instanced in this connection, although improvements in the general industrial situation were shown at Sydney, N.S., Quebec, Que., St. Catharines, Ont., Windsor, Ont., and Brandon, Man. Toronto, Montreal, Winnipeg, and others of the larger cities remain very active. A falling off was shown at St. John, N.B., Belleville, Ont., Brantford, Ont., and St. Thomas, Ont. In British Columbia, Vancouver showed a slight falling off, and at Nanaimo conditions were dull, though the favourable weather conditions considerably increased

the volume of employment. New Westminster reported a favourable and Victoria a fair month.

Changes in Wages and Hours.

Several important increases in wages were recently granted by the Dominion Government. The wages of carpenters employed on the Rideau and Welland Canals were raised from \$2 to \$2.25 per day. Foremen were advanced from \$2.50 to \$2.75 a day and from \$2.75 to \$3 per day. (*) Another change granted was in the nature of an increase of one cent per hour to the following classes of employees on the I.C.R., the increase being dated back to take effect from July 1, 1904:—

	Cents, per hour.
Carpenter—bench and coachmen..	21
Carpenter—freight..	18
Wood machine hand..	17
Car fitter..	19
Car inspector in charge of men..	22
Car inspector..	18
Car repairer..	16
Car oiler..	15
Lamp trimmer..	15
Car cleaner..	13
Airbrake tester and cleaner..	16
Tinsmith..	19
Pipe fitter..	17
Painter—coach..	21
Painter—freight..	15

On October 17 also, the different classes of employees engaged in work about the fortification walls of Quebec were granted a 9-hour in place of a 10-hour day. Increases in wages were also granted, as will be seen from the following:—

	Former rate.	Present rate.
Stonecutter....	\$2 50	\$2 50
Masons..	2 00	2 25
Carters..	2 00	2 00
Labourers..	1 25	0 15 per hour, or 1 35 per diem.

Members of the Dominion police force also received an increase in wages.

A large body of work people was affected by the upward tendency in the wages offered to *lumbermen* for work in the shanties dur-

ing the coming winter, and by an increase affecting *sailors* on the Great Lakes.

Other increases of the month were as follows: *Machinists* employed in the Angus shops of the Canadian Pacific Railway Company at Montreal, Que., to the number of 450, had their minimum rate increased from 18 cents to 22 cents per hour. Fifty *apprentices* at the same time received increases varying from 2 cents to 5 cents per hour. Sixty *printers and bookbinders* at Montreal, Que., also received an increase of \$1.50 a week from \$12.50 to \$14. A number of female *garment workers* in the employ of the American Silk Waist Company received an increase in piece work prices on certain classes of goods. In the city of Toronto, Ont., the *drivers of scavenger wagons* were increased from \$1.60 to \$2 per day, the change involving an additional expenditure of \$1,438.80 during the two remaining months of the year. At St. Thomas, Ont., 20 *journeymen tailors* and 20 *tailoresses* had their wages increased by 8 per cent on October 10. *Street car men*, to the number of 50, at Windsor, Ont., had their wages increased $\frac{1}{2}$ cent per hour on October 15. *Boilermakers* and their *helpers* in the employ of the Canadian Pacific Railway Company at Winnipeg and other points in western Canada had their wages increased.

Reductions in wages went into effect at Hamilton, Ont., among *heaters* and *puddlers* at the rolling mills, amounting to 8 per cent. At Nanaimo, B.C., *miners* and *labourers* in the employ of the Western Fuel Company, to the number of 500, had their hours increased one hour per day on Saturdays, and had their allowance of twenty-five cents per day for using safety lamps withdrawn. They were also required to pay \$2.50 per ton for house coal, and to pay for the use of oil and tools.

At St. Thomas, Ont., 320 *car builders* and *machinists* in the employ of the M. C. R. Company had their hours reduced from fifty-five to fifty-four per week on October 1, with corresponding loss of pay, the

* See report of the St. Catharines correspondent in the present issue of the *Labour Gazette*.

schedule being changed from ten hours per day on the first five days of the week with a five-hour day on Saturdays to a uniform nine hour day throughout the week.

Cost of Living.

A number of staple commodities were advanced in price during October, an upward tendency of flour and bread being widely noted throughout Central and Eastern Canada. In the correspondents' reports, for example, it will be seen that bread was advanced 1 cent per loaf to 13 cents for a four pound loaf at Peterborough, and by 1 cent per loaf at St. John, N.B., Toronto, Ont., and Montreal, Que. Milk at a number of points was advanced 1 cent per quart with the advent of the winter season. Eggs and fruits were high in price, and potatoes, with the general failure of the crop, showed an upward tendency. Coal showed a tendency to stiffen in price, though no marked advance was reported. The housing famine still continues at several points, being perhaps most severely felt at Toronto.

The scarcity of houses in Toronto was illustrated in the difficulty experienced by students of the different colleges and universities, on their return to the city in the opening week of October, in securing suitable lodging. An overflow of population beyond the city limits was also reported, many families still living in tents and temporary shacks, owing to their inability to secure houses within their means. The sanitary engineer of Montreal issued a report during October on the over-crowding evil in congested districts and dwellings. It is urged that in future not more than seventy-five per cent of the land should be occupied in dwellings. In view of the over-crowding at present prevalent in Montreal, the following recommendations were made :

1. Every room intended for habitation shall have two openings, one of which, at least, shall be in direct connection with external air.

2. Every apartment in a building used as a shop, hall for a club, or hall for meetings of any sort, having no other openings but those in front of the building (facade) should be provided with a suitable ventilator or sky-light.

3. Every dwelling house and stable should be thoroughly drained.

4. Every building used as a dwelling shall not occupy more than seventy-five per cent of the lot upon which it is erected.

5. The board of health shall have the right to determine the number of persons who shall occupy the various habitable rooms of every dwelling.

Interruptions to Industry.

There were only ten industrial disputes in existence during the month as compared with ten in September and eleven in October, 1903. None of the disputes were of great magnitude; the total number of employees affected being 475.

Fifty men employed in the M. C. R. shops at St. Thomas were laid off. As the company took on ninety additional men last spring there is still a force greater by forty men than was employed six months ago. The Excelsior Woollen Company closed down its plant in Montreal on October 15.

Among industrial establishments destroyed by fire during the month the following may be mentioned : A steam sawmill at Keswick, N.B., loss \$3,000; a sash and door factory at Nashes' Creek, N.B.; a metal shingle factory at Preston, Ont., loss \$30,000; a health food factory at London, Ont., loss \$10,000; biscuit factory, loss \$10,000, at Hamilton, Ont.; several cars, machine shop, and a switch tower, loss \$30,000, at Hamilton, Ont.; the works of the Stanley Mills Co., loss \$10,000, at Hamilton, Ont.; M. C. R. round house at Windsor, Ont., loss \$40,000; a casket factory, at Winnipeg, Man.; a sheet metal factory at Winnipeg, Man.; a lithographing factory at Winnipeg, Man.; warehouse and stores at Winnipeg, Man., loss \$700,000; several stores and dwellings at Rosthern, N.W.T., loss \$50,000; several stores and hotel at Dawson, Y.T., loss \$200,000.

Conditions in the Industries and Trades.

Conditions of employment in the several trades and industries throughout Canada, as indicated by the reports of local correspondents for October and by information received at the department from other

sources, may be briefly summarized as follows :—

Agriculture.

Activity in farm employment showed some falling off in Ontario and the eastern provinces, threshing operations nearing completion in many sections, though apple-picking and the gathering of the corn and root crops gave a good deal of employment. The prevailing fine weather also afforded a good opportunity for fall ploughing. In Manitoba and the Territories the threshing and marketing of the grain crops made the month a very busy one. With regard to the yield, several railway reports issued during October placed the average yield of wheat at from eighteen to twenty bushels to the acre. In the annual fall crop report of the North-west Grain Dealers' Association, issued on October 20, the average yields were estimated as follows : Wheat 59,857,190 bushels, or $17\frac{1}{2}$ bushels to the acre; oats, 45,000,000 bushels, or 47 bushels to the acre; barley, 10,500,000 bushels, or 26·8 bushels to the acre; flax 500,000 bushels, or 11·9 bushels to the acre. Other crop reports of the month referred to the failure of the potato crop in Ontario, owing to rot in localities where the crop was grown on low-lying lands, and the damage of the tobacco crop by frost early in the month. In Ontario it was officially announced that spring wheat will average 18·5 bushels per acre, as against 18·7 last year, and oats 39·3 bushels as against 32·1 bushels in the United States. The beet sugar crop in Canada this year, it is stated, will be somewhat below that of 1903, about 10,100 acres having been devoted to beet culture, with an estimated sugar yield of 5,900 tons. At Berlin, Ont., however, high tests were reported, the average price to be paid being estimated at \$5 per ton. The exceptionally favourable prices offered for all farm products were features of the month which considerably enhanced the present prosperity of the agricultural classes.

Estimates of the Canadian fruit trade during the past summer show on the whole

a poor season. The backward spring and the cool moist summer considerably impaired the yield, though peaches turned out better than was expected, both in quality and quantity, and brought enhanced prices. Plums were uniformly a poor yield, but prices were high. Summer and fall apples were a fair crop; with regard to the winter varieties reports are of a conflicting nature, being on a whole favourable in Nova Scotia, but only fair in Ontario and Quebec, with prices low in the British market. Extensive developments in the fruit-growing industry were reported from British Columbia and western Canada.

An experimental farm and college for the training of young men in agricultural pursuits is being established at St. Anne, Que., near Montreal, with the assistance of Sir William Macdonald.

The Annapolis Valley Fruit Estates, Ltd., with a capital of \$356,000 has been organized at Halifax, N.S., to combine about thirty farms aggregating over 3,000 acres in the Cornwallis Valley.

Fishing.

Very favourable reports were received from the Prince Edward Island oyster fisheries, where good catches were made, with prices high. With the exception of this branch of the industry, however, the month on the whole was a dull one. Mackerel and herring catches were light. The season has been a poor one for the Atlantic fisheries. Good runs of sardines in the Bay of Fundy were reported, though the prices realized were low. Information was collected during the month by the Dominion Commissioner of Fisheries, in connection with the fish reduction works which are to be established by the Dominion Government, with reference more particularly to the extermination of the dog-fish pest. In British Columbia fair catches of coho and dog salmon were reported in a few localities. The provincial fisheries commissioner, on returning from an inspection tour of the salmon spawning grounds tributary to the Fraser River, stated that very few sockeye were

found on the spawning grounds, and that the take of eggs was considerably less than during the past three seasons owing to the small runs of fish this year. Greater protection of the fish was advocated, in the interests of the future of the industry.

Lumbering.

The work of preparation for the winter season in the shanties was actively under way, and in some cases work in the woods was begun, in the lumbering sections of Ontario and the Eastern provinces, especially in the region north of Lake Superior, the Ottawa Valley, Northern Quebec and the St. John River district. A marked scarcity of men for this employment was reported from almost every locality, notwithstanding the lessened scale on which operations in the woods will be conducted during the coming season by several firms. Wages of lumbermen showed an upward tendency from the rates offered in September, though they are still very considerably below the level reached during 1903. The saw milling season was brought to a close in several localities, though in others the mills were still actively engaged on last winter's cut. In British Columbia, operations in the woods were somewhat quiet, but the mills in both the mountain and coast districts were generally very active.

Mining.

Favourable conditions were reported from the Nova Scotia collieries. (*) From the mining regions of Ontario and Quebec also reports were all of active conditions. In British Columbia dullness prevails in the Vancouver Island collieries, though in the Crow's Nest Pass district the month was a busy one.

Good strikes of oil were made in Kent county, N.B., during October, and the fields in Westmoreland and Albert are reported as developing rapidly. In Ontario also new strikes were made in the neighbourhood of Petrolea.

The output of the Klondike for the year was estimated at about \$11,000,000.

Manufacturing.

The industry was generally very busy throughout Ontario and Quebec, the demands of the western market greatly stimulating production. A few instances were reported to the department of localities in which comparative quietness existed in particular branches, for local or other reasons. Thus in the city of Quebec, boot and shoe manufacturers had a quiet month, and at Peterborough and Brantford, Ont., manufacturers of iron goods were on short time. Factories in the larger centres, however, continued very active with prospects of the same conditions being maintained throughout the balance of the year. Flour milling may be instanced as a branch in which particular activity prevailed. In the steel-making industry also, as will be seen more particularly from the reports of the Sydney and Sault Ste. Marie correspondents in the present issue, conditions and prospects are very favourable*.

At the annual meeting of the Dominion Iron and Steel Company, held in Montreal on October 19, very favourable reports of the new rod milling and washing plant of the company were received. The open hearth steel rails which the company are now preparing to manufacture, it was stated, would be of excellent quality. The net profits of the company for 1903 were placed at \$115,576 after allowing for a shrinkage in the value of pig iron and steel, bad debts, &c. It was also stated that the operations of the company since last December had been conducted at a profit.

Although button-making is a new industry in Canada, the three plants situated at Waterloo, Ont., Berlin, Ont., and Montreal, Que., reported conditions busy recently.

The factory and business of the Kemp Manure Spreader Company, of Stratford, was purchased by the Massey Harris Co.,

* See report of the Sydney correspondent of the *Labour Gazette* in the present issue.

* See article on Canadian trade and revenue in the present issue for a brief statement of recent tariff regulations affecting the steel industry in Canada.

TABLE SHOWING STATE OF EMPLOYMENT IN CANADA

{This table is based largely on the reports of the correspondents of the *Gazette* as published in the present employment in the several trades and industries throughout the Dominion. This table has reference kindred phenomena treated under separate headings in the *Gazette*. In tabulating the information in general conditions were favourable or unfavourable, as follows: (1) active, busy, very busy; (2) quiet.

in Clerks dnll.

Toronto, the transfer to take effect on November 10. It was announced that the output of the works would be largely increased, involving an increase in both plant and operating staff.

Transportation.

The movement of the western grain crop was the chief development of the month affecting employment among the transportation companies. The season was somewhat later than last year, and it was not until the opening week of the month that grain in large quantities began to be forwarded by the railways. On this account special efforts were made to secure as heavy shipments as possible from Fort William and Port Arthur prior to the close of navigation, a large number of boats being assembled at these points for the transportation of grain. Special efforts have been made by the railways to place rolling stock and other facilities in as efficient a state as possible. Since last autumn nearly 100 locomotives and about 2,000 freight cars have been added for this traffic by the C. P. R. Co., alone.

Compared with September, 1903, the returns of vessels using the Sault Ste. Marie canals during September, 1904, show an increase of 268, with a total freight carried of 5,246,675 tons, an increase of 981,007. A tonnage of 4,139,813 was east bound.

Railway construction afforded less employment than during September, especially in the West, where, with the beginning of the movement of the crops, construction gangs were largely reduced. In Eastern Canada, however, construction works in some localities were still actively under way. Much interest was taken in this connection in announcements by the Transcontinental Railway Commissioners with regard to the operation of surveying parties and the probable date and extent of the beginning of construction operations next spring. The entire route of the railway from Lake Abitibi to Moncton is being covered by surveyors, who are engaged in running two pre-

liminary lines in order to determine the most feasible route for the railway. From Winnipeg also surveying operations have been begun.

An order for twenty-five locomotives of the Richmond Compound Mogul type was placed by the G.T.P. Company with the Kingston Locomotive Works during October. The engines are to be completed within eighteen months, and will involve an expenditure at the works of about \$400,000. A locomotive for the C. P. R. was completed during October by the Canada Foundry Company, Toronto, being the first locomotive constructed in that city for nearly half a century.

In response to a circular communication issued by the Railway Commission, representatives of the different railway companies in Canada held a joint meeting during October in order to agree on a uniform system of running rules and regulations. In the circular sent out by the Commission it was stated that to some extent the accidents occurring on Canadian railways from time to time in the past had been due to the want of uniformity in the rules governing their operation. It is stated that the Commission will endeavour to secure, as a part of the revised system, that the men employed in running trains shall be compelled to take a certain amount of rest every day. The block system for the prevention of collisions, an automatic switch system and other safety devices were also discussed. The Commission will have power to enforce the rules agreed upon.

The 23rd annual meeting of the shareholders of the Canadian Pacific Railway Company was held in Montreal, on Wednesday, October 5. The capital of the company was increased by \$25,500,000, of which \$16,900,000 will be offered at once to shareholders at par. The directors were empowered to arrange for the construction of two additional passenger steamships with a speed of eighteen knots. The report of the president showed gross earnings of \$46,469,132.24, and working expenses of \$32,256,027.21 during the past year.

Conditions in the Trades.

The exceptionally fine weather of the past month enabled outside *building operations* at many points to be continued to a considerably later date than usual, thus further increasing the high record of the building season reported from many localities. Instances as to the extent which building was carried on this year as compared with former years will be found in a number of the reports of the local correspondents. *Carpenters and stonecutters* were about the only branches of the outdoor building trades reporting employment as slackening last month in a few localities, the remaining branches of the trades being very active, and in several instances taxed to their utmost capacity in order that full advantage might be taken of the prolongation of the season. In the *metal trades* a fair month was generally reported, with slackness prevailing at a few points, as for example, at Peterborough and St. Thomas, Ont. In the *wood-working branches* the month also was active, operations showing little or no diminution from September. *Coopers* continued very busy on apple barrels and fruit cases.

The *printing trades* were generally very active, the federal election campaign having materially increased employment for printers and pressmen. Bookbinders also had an exceptionally favourable month in several localities. In the *clothing trades*, *tailors* were generally busy, though the mild weather delayed orders for winter clothing. *Garment workers*, on the other hand, were on the whole somewhat less active than in September for seasonal causes. Under the heading of *food and tobacco preparation*, *bakers and confectioners* had a very busy month, and *cigarmakers and tobacco workers* an active month. Employees of *canning factories* also were rushed. *Ice cutters*, however, were dull. *Leather workers* had an average month. Among the *miscellaneous trades*, *hotel and restaurant employees* had a good month, though the reaction from the tourist season is still felt in some localities. *Theatre employees* were busy, and *carters, cab*

and hack drivers, &c., had a fair month. Unskilled labour, considering the season of the year, reported a very favourable month, though in a number of localities the cessation of corporation work and outside employment generally threw a number of men on the market.

Notes of the Month.

The work of re-modelling the *Toronto Labour Temple* was begun on October 10.

During September fifteen *new post offices* were opened in Manitoba and the Territories.

Several sessions of the *Arbitration Board* appointed to deal with the brewery workers' dispute in Toronto, were held during October, statements from both sides being received, and a full investigation conducted into conditions in the trade.

A special committee of the Toronto District Trades and Labour Council had the subject of a *Strike Insurance Fund* under consideration during October, the idea being to create a permanent fund to be maintained independently of local unions for the benefit of unions on strike.

A committee was appointed by the Canadian Manufacturers' Association on October 20 to hold a conference with a similar committee appointed by the Dominion Trades and Labour Congress, with the object of establishing better relations between employer and employees as agreed upon at the conventions of the association and of the congress recently held at Montreal.

A mass meeting of upwards of 2,000 men and women employed in the *clothing trades* was held in Montreal on October 23, for the purpose of discussing means of improving the condition of garment workers in that city. The meeting was held under the joint auspices of the Contracting Tailors' Association and the United Garment Workers of America.

The *Bricklayers' Union* of Toronto severed connection with the District Labour Council and the building trades section of that body as a result of the council refus-

ing to enforce the union label working card in the recent strike of builders' labourers, in sympathy with whom the bricklayers had quit work. There are about 700 members in the union.

Steps were taken by the Canadian Manufacturers' Association during October towards the organization of a *Mutual Fire Insurance Project* within the association on a basis of \$2,000,000 of insurance. A permanent board of twenty-one directors was appointed by the executive on October 20 for a term of three years. The assessment made on the members insuring will be two per cent.

The Attorney General for Canada was requested by the Supreme Court on October 13th to notify the attorney-general for all the provinces, together with the Lieutenant Governor of the North-west Territories, and the commissioner of the Yukon district, and to advise twice in the 'Canada Gazette' that on November 14th next, that application will be made to the Supreme Court to have the date fixed for the hearing of the question of *Sunday legislation*, and to give direction what persons or class of persons shall be entitled to be heard thereon.

A very distressing industrial accident of the month was the asphyxiation of six railway employees of the Grand Trunk Railway Company in the St. Clair tunnel. The accident was the result of the breaking of a car coupling and consequent overpowering of the men by the gas in the tunnel before the train could be removed. A jury found that a better system of ventilating the tunnel would have prevented the accident, and urged the Railway Commission to investigate what means the St. Clair Tunnel Company should take to prevent loss of life in the future.*

The 15th annual meeting of the members of the *Intercolonial Railway Employees Relief and Insurance Association* was held on October 12. Amendments to the con-

stitution making a separate district of Cape Breton passed, and a resolution was carried to increase the benefits payable to members of the temporary employees' accident fund after November 1, 1904, as suggested by the executive committee. Several claims for indemnity were settled and the question of medical fees and special hospital treatment discussed. Mr. D. Pottinger was re-elected president and Mr. J. J. Wallace, vice president.

A by-law was passed at Toronto on October 25 approving of a proposal that the city should purchase stock in the *Consumers Gas Company*, no restriction being placed on the amount to be bought or the price to be paid. The end in view was that the city should secure representation on the board of directors and thus obtain reliable information as to the company's affairs, in order that the arrangement between the city and the company by which the price of gas was to have been reduced from time to time as the consumption reached certain figures might be promptly carried out. On special invitation of the Montreal Branch of the Canadian Manufacturers' Association, representatives from the Board of Trade and *Chambre de Commerce* met in the board room of the association to discuss the *purchase of the gas plant* by the city. It was decided to place the matter in the hands of legal advisers, in order to ascertain what are the exact rights of the city should it decide to negotiate for the purchase of the plants of the Light, Heat and Power Company.

In several of the cities of the Dominion the annual reports of the *assessors* were handed in during October, and show in many cases a substantial growth both in population and assessment. The population of *Toronto* for example, is placed by the assessors at 226,356, an increase over last year of 7,363 or 3'36 per cent. The total assessment is placed at \$149,272,094, or an increase of \$7,500,000. New factories, warehouses and business houses show an increase of \$1,200,000. Factories now number 398, employing 30,129 persons. There are

* A full description of the accident will be found in the article on industrial accidents of the month in the present issue of the *Gazette*.

now 37,055 dwellings in the city, of which 38 per cent are occupied by owners. At Hamilton the population was shown to be 57,558, an increase of 2,797 over last year. The total assessment is \$29,734,484, an increase of \$1,419,440. The population of *London, Ont.*, has shown an increase of about 1,500. At *Ottawa, Ont.*, there is an increase in the total assessment of \$696,815,

and an increase in population of 1,637, the highest record in several years. The population of *Stratford* is placed by the assessor at 12,241, an increase of 781 or 6'81 per cent during the past year, while *St. Catharines* shows a population of 10,878, an increase of 202 over last year, with an increase in property valuation amounting to \$168,660.

II.—REPORTS OF LOCAL CORRESPONDENTS.

DURING the month of October, Mr. John Gillespie was appointed correspondent to the *Labour Gazette* for Calgary, N.W.T., and district, in place of Mr. S. D. Milken, resigned.

SYDNEY, N.S. AND DISTRICT.

Mr. John Moffatt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during October was very favourable. The coal trade was better than in September, and the steel industry seems to be steadily improving. There was less broken time at the collieries than last month, and prospects are good for the remainder of the shipping season. The building trades were not particularly busy. A large station house is being erected near the present one in Sydney.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—The fisheries show no sign of improvement, and are still a failure.

Lumbering.—Lumber dealers say that, owing to the large cut of small logs last year, prices are now so low that lumber work in the woods this winter will be dull.

Mining.—All the island collieries, with two or three exceptions, are working steadily and producing to their limit. *Mabou* has started to do good work. *Port Hood* for the first time this season has been idle for want of shipping. *Inverness collieries No. 1 and 2* were double shifted during the

summer, but one shift will be taken off on November 1. Most of the men will be kept and put to work on the single shift in the same collieries. The *Mainland* collieries are fairly busy. *Pictou* is busy. *Cumberland* has more or less broken time. The *Allan* shafts at *Stellarton* are progressing favourably. The new slopes at *Big Glace Bay* are being driven by four shifts of workmen of six hours each. Like in most new collieries much water is met with, which greatly hinders rapid progress. The *Cochran Lake* collieries are expected to be the coming large ones of Cape Breton. Two slopes are now being sunk. As soon as these are developed it is the intention of the company to open up others to the west near Sydney. The company claims it owns thirty-eight square miles of coal areas. The site of a new town has been surveyed and streets are being laid out; company houses will be built next spring. A railway of two miles is being built to connect at *Homville* with the Sydney and Louisburg line. This will enable the more rapid transportation of machinery and other supplies for the building up of the new collieries and town. Like the Dominion Coal Company, it is the intention of the Cape Breton Iron and Coal Company to have two ports; the winter one at Louisburg and the summer one at Sydney. The railway connection for six collieries at Big Glace Bay is almost completed. It is five miles long.

Other industries.—The Marconi towers are being taken down and removed from table head to the Norien district. The

reason given is that they are exposed and unprotected on the coast if war should occur and the warships of an enemy succeed in getting into these seas. Their new position is near to Sand lake four miles from the coast. The elevation of the ground on which they are to be built is 140 feet above sea level. The towers will be 240 feet high, as before. Additional horizontal arms will be added. A fine residence is being erected for the manager, and twenty more cottages will be erected for those who are to operate the wireless towers. This new station will be connected with the S. & L. by one mile of railway. Many men are now employed clearing the land necessary for the site of this village.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were fairly active. Carpenters and joiners, lathers and plasterers were dull. Plumbers, gas and steam fitters were all busy. Builders labourers were fairly well employed.

Metal engineering and ship building trades.—Iron moulders, iron workers and helpers and coremakers were all busy. Machinists and engineers, steam engineers, electrical workers and linemen were well employed. Stove mounters, blacksmiths, boilermakers, iron shipbuilders and sheet metal workers were active. Tool sharpeners and horseshoers were very busy. Jewellers and watch case makers were dull.

Woodworking and furnishing trades.—Woodworkers were busy. Varnishers and polishers, carriage and wagon makers, car builders, pattern makers and coopers were well employed.

Printing and allied trades.—Printers, pressmen and electrotypers were busy.

Clothing trades.—Journeyman tailors and garment workers were fairly active. Boot and shoe workers were very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were fairly active. Ice cutters and drivers were dull.

Leather trades.—These trades were well employed.

Miscellaneous.—Barbers and laundry workers were busy. Clerks and stenographers were dull. Delivery employees were fairly active.

Transport.—Railway employees were all busy. Street railway employees, cab drivers, hackmen, carters, draymen, teamsters and expressmen were well employed.

Unskilled labour is in fair demand.

DISTRICT NOTES.

Amherst.—Rhodes & Curry, employing in all 1,600 men, were busy not only in Amherst but throughout the province. Robb's Foundry & Machine Works have found it necessary to build a new shop and put in the most improved machinery. When completed this concern, which now employs 450 men, will be able to still further add to its business. The Amherst Foundry Company has lately added a porcelain department which is doing excellent work and is getting a great demand for its wares. The Amherst Boot and Shoe Factory is flourishing, doing a business of \$650,000 yearly. This year it will increase its business, as the products of this factory are in demand all over Canada. It is only a matter of time when the factory must be enlarged to keep pace with the demand. Hewson's Woollen Mills, employing one hundred hands, seventy-five per cent of whom are women, is running steadily and doing a profitable business.

New docks have been built at *Parrsboro* for repairing vessels. The *Lugan* factory there, employing 69 men, is working overtime to meet the demands.

The Atlantic Quarry Co., at *Lower Cove*, *Cumberland Co.*, has had a successful year. The opening of a new quarry has given it a good quality of stone for the making of grindstones. Besides the making of these stones the company owns and operates a small coal mine, called the 'Fundy,' where it finds fuel for its own supply and sells what it cannot use.

HALIFAX, N.S., AND DISTRICT.

Mr. F. W. Smith, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month just past has been one of continued activity, and the splendid weather permitted outside operations in the building trades to be as active as during the previous month. There has been no special activity in any particular trade, but a general healthy condition has existed. Commercial conditions have been about normal, wholesale and retail traders reporting business good. An entire absence of labour disputes points to a busy autumn season.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—This industry has been fairly active for the season, and during the past month an unusual quantity of herring has been taken. The dog-fish, however, has caused great destruction to the nets of the fishermen, and has prevented mackerel from striking in near shore.

Mining and Railroad operations were normally active.

CONDITION OF PARTICULAR TRADES.

Building trades.—Almost every phase of the building trades has been busy during the past month, and, should the weather continue fine, operations will be active for some time to come.

Metal, engineering and shipbuilding trades.—Machinists and engineers found work brisk; boilermakers and moulders were busy; shipwrights and caulkers were also active.

Woodworking and furnishing trades.—These branches were fairly busy.

Printing and allied trades.—Printers had a good month, but a slight relaxation is now apparent. Pressmen were active.

Clothing trades.—The fine weather has not conduced to activity in these trades, but the coming season will be busy.

Leather trades.—Saddlers were fairly busy.

Miscellaneous.—Barbers, delivery employees, and furriers were busy.

Transport.—Railroad and steamship employees report conditions good.

Unskilled labour was fairly active.

CHARLOTTETOWN, P.E.I., AND DISTRICT,

Mr. F. J. Nash, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market showed little change from September. There was considerable activity in government work, and the month witnessed the completion of the Murray Harbour and Belfast Railway, excepting the Hillsborough bridge section. In the city jobbers were busy, but in the outside districts farmers have been too much occupied with ploughing and harvesting the potato crop to give much time to building operations. Business men report a good month, though the shortage in crops is having its effect. The opening of the shipping season at the latter part of the month gave an impetus to trade.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—With the exception of turnips the root crop is about gathered in, and shipping has commenced with fair prices.

Fishing.—Oystering is the principal branch of this industry at this season of the year. Prices have been exceptionally high and fishermen are having a profitable season.

Manufacturing.—This industry is very small in a province almost purely agricultural. The few factories that are here have been running steadily.

Railroad construction and employment.—The work of filling in the approaches at the north end of the Hillsborough bridge was completed by the latter part of the month, and work started on the opposite end. The Murray Harbour and Belfast Railway was completed, but the contract has been let for the construction of a loop line to take

in Vernon river bridge. The survey of a branch from Souris to Elmira has also been completed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, lathers and plasterers had a quiet month. Carpenters and joiners, and plumbers were busy. Builders' labourers had fair employment.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers and machinists were busy. Steam engineers, linemen and blacksmiths had a good month. Bicycle workers experienced a dull month.

Woodworking and furnishing trades.—Woodworkers, carriage makers, car builders and coopers had a steady month's employment.

Printing and allied trades.—Printers, bookbinders and pressmen were busy.

Clothing trades.—Journeymen tailors, garment workers, boot and shoe workers, were steadily employed.

Food and tobacco preparation.—Bakers and confectioners, and tobacco workers experienced a satisfactory month.

Leather trades.—Tanners and curriers and saddlers had a fair month.

Miscellaneous.—Barbers, clerks and laundry workers were employed steadily.

Transport.—Railroad conductors, locomotive engineers, firemen, telegraphers, switchmen and trackmen had steady employment. Freight handlers, longshoremen, teamsters and expressmen had a good measure of employment.

Unskilled labour.—This class of labour was fairly well employed.

ST. JOHN, N.B., AND DISTRICT.

Mr. W. H. Coates, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market was not so active during October as in September, notably among longshoremen, though

this branch is expected to improve with the arrival of the winter steamers. Indications point to a heavier traffic than usual, as the Allan Line of steamers will run weekly this year, while the C.P.R. vessels will run on their usual schedule.

The following agreement has been entered into between the longshoremen's association and the steamship people, to take effect on November 3, and to last until April 30: 30 cents an hour, night and day; 40 cents an hour for handling bulk grain; double time for work on Sundays and Christmas; half time when waiting in the evening from 7 o'clock until such time as they are dismissed; 10 hours to constitute a day's work. All work performed in rigging and unrigging gear shall be paid for on the same basis as the above.

Bank clearings for the four weeks ending October 27 were \$4,311,670, and for the corresponding period last year \$4,236,724, being \$74,946 greater in 1904 than in 1903, and \$45,245 less than during September of the current year. Great activity prevails in wholesale and retail circles, occasioned by up-river settlers purchasing winter supplies before the closing of navigation.

The master bakers formed an association on October 27, and decided to advance the price of bread one cent per loaf on and after November 1. At present bread is sold at six cents per loaf wholesale and seven cents at the stores, but on and after November 1 the prices will be seven cents wholesale and eight cents retail. This has been decided upon on account of the recent rapid advance in the price of flour.

The city council decided to purchase on October 3 the electric light plant at St. John West for \$25,000. The city council has also purchased the St. John Sulphite Company's property at Mispic for \$115,000, about one-third its original cost.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—During the early part of the month a large run of sardines made its appearance in the harbour, and the fishermen received \$5 per hoghead; but the fish were

so numerous that a drop in price took place. The fishermen refused to fish any longer for the low price (\$2 per hoghead), holding out for \$5. The schooners from Eastport and Lubec refused to pay the amount asked, and cleared in ballast.

Lumbering.—It is stated that the coming season's cut of lumber on the Miramichi will not be much more than half of the average cut. During the past season about 50,000,000 feet came through the southwest Miramichi and about 22,000,000 through the northwest. Of this amount at least 15,000,000 will be wintered. The best wages during the coming season will be \$22 or \$23 per month. Last year the men received \$28 and \$30. One prominent operator reports that he found it difficult to obtain men.

Mining.—It is expected that prospecting for marble will be begun in the vicinity of St. John shortly. The proposed scene of operations is at Brookville, on the I.C.R., where indications point to a good marble deposit.

Railroad construction and employment.—The work of ballasting the tracks about the new I.C.R. roundhouse has been completed, over 1,000 carloads of gravel having been used.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons report work only fair, but carpenters and joiners were very busy and stone cutters, building labourers and painters and decorators were well employed. Plumbers were active. Gas and steamfitters reported work fair, though early in the month quite a rush occurred.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, machinists, engineers, steam engineers, electrical workers and linemen, blacksmiths and boilermakers, were busy. Sheet metal workers continue active, and horseshoers reported business good.

Woodworking and furnishing trades.—Woodworkers were well employed, and carriage and wagon makers were active. The firm of Crothers, Henderson & Wilson, has

disposed of its works to three of its employees, Messrs. Graham, Cunningham and Naves. Shingle weavers report work only fair.

Printing and allied trades.—Printers and pressmen were busy in the newspaper departments, but in some of the job offices work was only fair. A campaign sheet—the 'Liberal News'—has been started, and it is thought will become permanent. Bookbinders were very busy.

Clothing trades.—Journeymen tailors were well employed.

Food and tobacco preparation.—Bakers and confectioners and cigarmakers report business fair.

Miscellaneous.—Broom makers were dull, and brush makers active.

Transport.—Railroad conductors, locomotive engineers, locomotive firemen, railroad telegraphers, railroad trainmen, railroad switchmen, railroad trackmen and freight handlers all reported business active. Steamboat men and steamboat firemen were well employed. Longshoremen reported work dull. Street railway employees and teamsters and expressmen were well employed.

Unskilled labour.—Only fair conditions were reported.

DISTRICT NOTES.

Keswick.—Brewer & Reynolds' steam saw mill was totally destroyed by fire on October 12. The ruined mill consisted of a rotary saw mill, lath saw, edgers, &c. About 200,000 laths and a quantity of lumber were also burned. Loss about \$3,000; no insurance.

Nash's Creek Station.—The dwelling, sash and door factory of Robert McLean, at the above place in Restigouche county, were destroyed by fire on October 1.

QUEBEC, QUE. AND DISTRICT.

Messrs. P. J. Jobin, and Ed. Little, correspondents, report as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been a quiet one, though the general tone of the labour market was

somewhat better than in September. Cordial relations continue between capital and labour, though in the closing week of the month it was stated that employers in one of the boot and shoe manufacturing establishments had notified their employees that they would require them in the future to be members of the International Boot and Shoe Workers' Union. Many of the workmen at present are members of the Canadian Federation of Shoe Workers. The action of the employers was stated to be on the ground that goods manufactured by other than international union men did not find a ready market in western Canada.

The fourth foundation crib for the extension of the breakwater was successfully sunk in position on the 4th inst.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvesting of the grain crops being completed the farmers were busy with the root crop and fall ploughing.

Lumbering.—Gangs of men were leaving almost daily for the lumber camps, wages ranged from \$24 to \$30 per month and the demand for men was keen. The season is somewhat later than last year.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, lathers and plasterers and builders' labourers had a good month. Plumbers had a better month than September. Carpenters, however, were dull.

Metal, engineering and shipbuilding trades.—Moulders and machinists had a busy month, but boiler makers were dull. Iron ship builders were fairly busy, a large steamer being in the dock throughout the month.

Printing and allied trades.—Printers and pressmen had a fair month, though there were a few men idle. Book binders were working overtime in a few establishments.

Clothing trades.—A dull month was experienced in several branches, there being only two boot and shoe factories running full time.

Leather trades.—Tanners and curriers had a dull month.

Food and tobacco preparation.—Cigar makers reported a fair month with good prospects.

Miscellaneous.—With the close of the tourist season, hotel and restaurant employees were dull. Furriers, however, worked overtime in one establishment.

Transport.—There was a falling off in passenger traffic but an increase in freights, and special activity was noted in the movement of vessels engaged in the coasting trade. Ship labourers had a dull month, but longshoremen were fairly well employed.

Unskilled labour.—A good month's work was reported.

THREE RIVERS, QUE., AND DISTRICT.

Mr. John Ryan, Sr., correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Conditions among wage earners in this locality are favourable, and men and women without employment are very scarce. Good wages prevail. The city continues to give employment to large numbers on street improvements; with cold weather approaching this will be reduced. There is some quietness in business operations owing to the continual wet weather.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The harvest was very late owing to continual wet weather; crops as a rule were fair, with the exception of oats and potatoes. Constant rains have caused many potatoes to rot, and from all appearances prices will be high.

Lumbering.—The lumber mills have been running steadily since spring and will continue to give steady employment until the 20th of November or later.

CONDITION OF PARTICULAR TRADES.

Building trades.—During the past month the building trades have been fairly busy, but at the present moment things are quieting down, though capable men in all branches can secure employment. Painters

and carpenters are not in great demand, especially the first, their busy season being over. Stone masons and brick makers are doing little or nothing, and are moving elsewhere; the inclement weather here during the summer months was very unfavourable to them, although wages were high. Tinsmiths and sheet iron workers have been busy all season, and will be for a few days yet.

Metal, engineering and shipbuilding trades.—Ship labourers have not been quite as busy this summer as last; the rate of wages has been from 25 cents to 30 cents per hour. Business is now beginning to be dull.

Clothing trades.—The coming of winter has increased business, and trade in this line will no doubt be good. Tailors are fairly busy, and expect to have to work extra time as the cold weather approaches. Garment workers, although not numerous, are kept very busy.

Printing and allied trades.—These trades are fairly active.

Food and tobacco preparation.—Bakers are well employed and have been kept busy all year. Cigar-making is very active at present.

Leather trades.—Tanners and saddlers have had a satisfactory month.

SHERBROOKE, QUE., AND DISTRICT.

Mr. H. Logie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been no change in the condition of the labour market during the month of October. All skilled labour was fairly well employed, and masons and bricklayers had plenty of work, though the wet weather caused undesirable broken time. Bricklayers are in good demand, and Messrs. Simoneau & Dion were advertising for men at \$4.25 per day.

The machine shops are busier than they have been for some time, one concern receiving a large order for mining machinery and another an order for appliances in con-

nection with the fog signal service for the Gulf of St. Lawrence.

Retail merchants complain that business is somewhat dull owing to the election campaign.

Inland Revenue receipts for the month of September were \$30,578.02, and those of the Customs department \$18,921.36, an increase over the same month last year of \$1,958.19. The declared exports entered at the Sherbrooke office of the United States Consul for export to the United States for the three months ending September 30 amounted to \$258,805.87, being an increase over the three corresponding months of 1903 of \$59,415.98. The chief item was asbestos, which amounted to \$151,580, the next highest item being for ground wood pulp, the amount being \$32,380.31.

During the month one of the largest asbestos deals recorded in the province of Quebec took place, when Mr. H. M. Whitney, of Boston, bought the King asbestos property at Thetford Mines for \$1,250,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are now well advanced with their fall work. So far they have been very fortunate in this section, and the crops were secured in good condition, with the exception of potatoes, which suffered from rot owing to the wet weather.

Lumbering.—Lumbermen are hiring men for the woods, but they are not offering as high wages as last year, the difference being from \$6 to \$8 per month.

Manufacturing.—The manufacturing industries are well employed, and in the Paton mill overtime has been put in during a portion of the month.

Mining.—The mining industry maintains the steady demand for labour prevalent during the past summer.

Railroad construction and employment.—The Canadian Pacific Railway Company is laying new rails near Cookshire, and repairing the track generally in anticipation of the heavy freight traffic which sets in after navigation closes.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and joiners, plumbers, stonecutters and builders' labourers have been fully employed.

Metal and engineering trades.—All branches had a busy month.

Woodworking and furnishing trades.—Woodworkers, carriage and wagon makers report a good month.

Printing and allied trades.—The printing trade was good, the election work keeping several shops working overtime.

Clothing trades.—All branches had a good month, fall business being very good.

Food and tobacco preparation.—Bakers and confectioners have been well employed, and cigarmakers say business was very good.

Miscellaneous.—Barbers, clerks, delivery employees, and laundry workers had steady employment.

Transport.—Teamsters and hackmen had a full month.

Unskilled labour.—Unskilled labour was in good demand.

ST. HYACINTHE, QUE., AND DISTRICT.

Mr. Napoleon Samson, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market has not improved during the month of October. Although there has not been a great number of idle men, still work has slackened in several factories, especially with the Penman Mfg. Co., Limited, in several departments of which the men are only working four and five days a week. Since the beginning of October the company has started night work in one or two departments, giving work to about 15 men and boys. This is in the spinning and carding branches in order to supply the other branches with day work. Work has not been so plentiful in the boot and shoe factories, but sash and door factories are very busy. At the organ factory and in the tanneries there is much work.

Business generally is not very active. Wholesale and retail merchants state that business is duller than in former years. There have been no changes in hours of labour or wages during the month and relations between employers and employees were cordial.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers have not been so fortunate this year in harvesting operations as last year, owing to the unfavourable weather. This particularly affected the potato crop which is not as good as last year, the potatoes rotting in the ground before digging as a result of the wet weather.

Manufacturing.—All manufacturing industries, with the exception of those above mentioned, report favourable conditions.

The following is a statement of the manufacturing establishments at present in the city of St. Hyacinthe :—Two *machine shops*, employing 64 men and some apprentices; these work practically all the year round and manufacture boilers and other machinery for sawmills, and factories. Two *foundries*, employing 15 men. Two *boot and shoe factories* with 375 hands, men, women and children; coarse work is the principal product of these factories. An *agricultural implement factory*, employing 38 men, manufacturing all kinds of agricultural implements. A *cigar manufactory* with 114 hands, men, women and children. Two *sash and door factories* with 276 employees, nearly all heads of families; the owners of these factories are large contractors, especially Messrs. Paquet & Goodbout, who have large contracts outside of the city in the province of Quebec, such as the building, or finishing of churches; they have much work on hand just now; Messrs. L. P. Morin & Co., for example, have the contract for the Girouard Academy and the Dairy School. A *tannery* with 160 men and boys and about 30 females; these last work in the branch of preparing insoles and stiffening of boots, shoes &c. An *organ factory*

with 75 employees, all men, which makes church organs. Three carriage factories employing 20 men and manufacturing working and finer vehicles. The *Eastern Clothing Company* employs 150 hands, men, women and children; they make all kinds of clothing and have travellers taking orders all through the province of Quebec. The *St. Hyacinthe Distillery, Packing and Vinegar Co., Limited*, has 18 hands; at present only whiskey is turned out but later beer and other liquors will be manufactured. Four *plumbing establishments* employing about 20 men and apprentices. A Canadian laundry with 15 hands, men and women. A flour mill built according to the most modern ideas, employing 8 men. The *Penman Mfg. Co. Limited*, with 530 hands at present, men, women and children, manufacturing all kinds of tweeds, knitted goods, such as stockings, &c.; this factory has already had 1,100 employees, and a couple of years ago had 800 hands. There are in all 21 manufactories of all kinds, with 1,430 employees earning a living in them.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been fairly busy. Carpenters and joiners were very active. Plasterers and painters report plenty of work just now, as do also plumbers and gas and steam fitters.

Metal, engineering and shipbuilding trades.—The iron moulders have been busy and machinists and coremakers report a good month. Electrical workers have had plenty of work. Blacksmiths have been well occupied and sheet metal workers are very busy just now.

Woodworking and furnishing trades.—Woodworkers and carriage makers had a busy month.

Printing and allied trades.—Printers report favourable conditions.

Clothing trades.—During October work was not so plentiful as usual but prospects for next month are more favourable.

Food and tobacco preparation.—Butchers and bakers had a good month but cigar-makers state that October was not a good month.

Leather trades.—Tanners, curriers and saddlers reported fair conditions.

Miscellaneous.—Barbers, clerks, delivery employees, hotel and restaurant employees and laundry workers say they have had a good month.

Transport.—Railroad trainmen and freight handlers have all been busy. Carters and expressmen have been fully employed, more especially carters since the opening of the election campaign.

Unskilled labour.—There is work for all of this class, as the corporation is at the present time digging sewer trenches in a couple of streets, giving employment to a large number.

MONTREAL, QUE., AND DISTRICT.

Mr. G. Audet, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The labour market is very favourable for the time of year. Building is generally active, all the different trades being fully occupied. Carpenters, joiners, masons, stonecutters and bricklayers state that all their men are working, a sign of the prosperity reigning in Montreal. The coal supply is normal and any fears that may have existed on that score have been dispelled, coal selling for \$6.75 a ton. This year, as last year, there is scarcely a single house to rent, and as houses are finished they are occupied, many people being able only to secure rooms instead of houses. Wholesale and retail merchants state that business has been most satisfactory during October. The Canadian Pacific Railway has started on repair work, and this, every fall, gives employment to thousands of men in all branches of trade. The Grand Trunk Railway is comparatively quiet, although a number of men, suspended last summer, have been re-engaged. A large number of sea-going vessels have arrived in our harbour and longshoremen, whose busy season finishes with the close of navigation, have been very busy. The Dominion Bridge Company is working at full

capacity, owing to orders for structural iron for some large buildings, amongst others that of the Sovereign Bank. Night and day gangs of men are working. The business of ice carters has slackened owing to the termination of the delivery season, which closes in September, except in the case of restaurants, hotels and a few residences.

Work on the erection of the plant of the Canada Car company, recently, incorporated at Montreal, with a capital of \$3,000,000, was begun on October 17. The contractors find difficulty in securing men.

The Simplex Railway Appliance Company, it was stated, will erect a \$2,500,000 plant, comprising fifteen different kinds of shops and mills and giving employment to 1,500 men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Active conditions were reported.

Metal, engineering and shipbuilding trades.—Iron moulders, iron workers and helpers, electrical workers and linemen were active. Stove mounters and blacksmiths were very busy. Tool sharpeners and horse-shoers were active.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and polishers, wood carvers, carriage and wagon makers, car builders, pattern makers and shingle weavers report great activity.

Printing and allied trades.—All branches of these trades report satisfactory conditions.

Clothing trades.—Journeyman tailors and garment workers had a good month. Boot and shoe workers have been very busy.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters have been fairly busy. Ice drivers report a dull month.

Leather trades.—The members of these trades have been well employed.

Miscellaneous.—Barbers, broom makers, clerks and stenographers were busy. Delivery employees, furriers, hotel, restaurant

and theatre employees and laundry workers report active conditions.

Transport.—Steamboat men, ship labourers, longshoremen, street car employees, teamsters and expressmen have been fully engaged. Cab drivers, hackmen, carters and draymen report fair conditions.

MONTREAL, QUE., AND DISTRICT.

Mr. Thos. J. Griffiths, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Employment for all kinds of labour continues about the same as last month, the building trades showing continued activity, which will likely continue to the end of the season. Machinists and metal workers generally are fully employed notwithstanding the noticeable increase of Jewish workers who have been arriving during the past season.

A change of wages took place in the Angus shops of the C.P.R., which will probably affect about 450 men and about 50 boys. By an agreement between the management and a committee representing the International Machinists' Union and the Amalgamated Society of Engineers, the minimum rate for journeymen machinists has been placed at 22 cents per hour. Apprentices will receive an increase of from 2 to 5 cents per hour for each year, the change to go into effect on October 1.

The printers (French and English) who had, some time ago, presented demands for an increase from \$12.50 to \$14 for a week of 54 hours, to come into effect at the commencement of October, have had their demands acceded to by most of the large establishments. About eight firms declined to meet the schedule rate, and as a result about 60 printers and 15 bookbinders are out on strike.

CONDITION OF LOCAL INDUSTRIES.

The girls employed in the American Silk Waist Company, about 60 in number, went on strike about October 20, against the

prices paid, which was settled in a few days by the firm giving a satisfactory increase.

The Locomotive and Machine Company of Longue Pointe have just turned out a number of heavy locomotives for the Canadian Pacific Railway, which appear to be equal in every respect to locomotives of a somewhat similar class that recently were imported from Britain and Germany.

CONDITION OF PARTICULAR TRADES.

Building trades.—All of these trades are well employed.

Metal, engineering and shipbuilding trades.—These trades were fully employed. Boilermakers and shipwrights were busy. Tools sharpeners, horseshoers, jewellers and watch case makers reported fair conditions.

Woodworking and furnishing trades.—Woodworkers, upholsterers and varnishers and polishers were fully employed; carriage and wagon makers were fairly well employed; car builders and pattern makers were active.

Printing and allied trades.—These trades were well employed.

Clothing trades.—Journeyman tailors, garment workers, hat makers and glove makers were busy; boot and shoe workers were fairly active.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters were fairly active; cigarmakers and tobacco workers were active.

Leather trades.—Tanners and curriers, leather workers and saddlers, were well employed.

Miscellaneous.—Barbers, clerks, stenographers and delivery employees were all well employed, and furriers, were very busy; hotel, restaurant and theatre employees were all active.

Transport.—All branches were well employed.

Unskilled labour was fully employed.

HULL, QUE., AND DISTRICT.

Mr. Rodolphe Laferriere, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour continues active in almost every department of industry, but principally from the lumber companies, builders and railways. The supply of men is larger than it was a few weeks ago, but is not nearly adequate. Wages for shanty-men had to be increased in order to induce them to leave before the elections, as high as \$40 a month being offered in some cases. Even at that price, however, the rate is still lower than last year. It may be that after the elections the supply of men for these particular operations will be better, though the scarcity of hands for other purposes will in that event be more accentuated. Builders cannot find enough men; carpenters, lathers, &c., are all busy and no men are available for odd jobs. Farm hands for winter work are also extremely scarce.

The usual fall shipments of lumber are somewhat decreased this year, as compared with last. There is a general depression in the lumber trade, which, however, is expected to be relieved by next spring.

There were no strikes, or lockouts or any other disturbances during the month just passed. Business is active and this fall is much more prosperous than last.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A large cattle dealer of Aylmer states that his business is not as good this year as usual and that shipments of cattle to the United States and Canadian seaports have fallen short of last year's. He assigns no particular cause for the depression. Farm hands are offered \$12 to \$18 per month for winter work, while common labourers are paid all the way from \$1.35 to \$2 per day, an exceptionally high rate.

Lumbering.—It is not expected either that the closing of sawmills will affect very materially the scarcity of men.

Manufacturing.—New factories are being erected at the Chaudière, which will give employment to all the spare hands of this locality. For instance, the new paper mills of J. R. Booth will be in operation by Christmas, and still another mica factory is being put up. A large foundry and machine shop is also being built, all of cement blocks, which will afford work to the building trades for a couple of months, while it will employ about one hundred hands permanently after. The paper and pulp mills are running full time and the production finds a ready sale, being always contracted for in advance. The usual force of men and girls are employed. Conditions of employment in those shops are the same.

Mining.—Mining seems to have revived since the market for mica has become more active.

Railroad construction and employment.—Although there is no railway construction going on in this district, yet there is a demand for railway labourers. They are offered \$1.50 to \$2 per day and very few are to be had here.

CONDITION OF PARTICULAR TRADES.

Building trades.—Carpenters and joiners are paid \$1.75 and \$2 per ten-hour day, with a half holiday on Saturday. Lathers are scarce at \$2.50, and they choose their work at that. Plasterers receive a union rate of \$2.75 and \$3 per day. Stone cutters receive \$4 a day. Painters get a union wage of \$2.50 per day. There is no unions in Hull, but the close proximity of Ottawa makes it possible for the workers of this side of the river to belong to the Ontario branches.

Unskilled labour.—Common labourers' average wages are \$1.35. Mill hands and corporation labourers are paid \$1.50.

OTTAWA, ONT., AND DISTRICT.

Mr. T. W. Quayle, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was abundance of employment in Ottawa during October for every one who

could work. In some respects the tendency was towards a stringency in the supply of labour. The advent of colder weather saw very little distress in the city, although there were a few cases reported. Investigation showed the cause as due to sickness and incapacity rather than lack of opportunity to work.

There was a partial cessation of work on civic improvements due to the advance of the season, but the unskilled labour affected had no trouble in finding employment elsewhere. November will see all civic work for the year completed.

Business was fairly active.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing among the farmers of the district was about completed. Reports as to the output varied considerably, but on the whole the yield averaged well. Some grains were reported short and not heading out satisfactorily. All report a very heavy crop of hay. The root crop was fair, excepting potatoes, which were affected with rot.

Lumbering.—Reports from the timber limits showed general activity in the cutting of logs despite the reduced staff and the reduction in wages. At the mills there was a rush to cut the available supply before the season ended. The past season has been exceptionnally quiet in lumber circles so far as the general market was concerned, but the local output was all disposed of, it is understood, early in the season.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were busy, there being a rush to finish work under way before the inclement weather set in.

Metal, engineering and shipbuilding trades.—The iron trades were more generally employed than during September. The strike of the moulders, which commenced two months ago, may be regarded as having ceased.

Woodworking and furnishing trades.—These trades were fairly active.

Printing and allied trades.—The printing trades were very busy. The holding of the general elections gave a decided impetus to these trades.

Clothing trades.—The clothing trades enjoyed a busy month, the autumn business being regarded as satisfactory.

Leather trades.—Saddlers and harness makers were busy, and some were taxed to the utmost capacity by contracts let for the government in connection with the railway survey parties.

Transport.—Railway men were well employed. The month saw the laying up of passenger boats, and a general hurry to finish the season's trade for freighters and lumber barges. Carters and teamsters had a busy month, the revival of the coal trade furnishing a lot of employment.

Unskilled labour.—Abundance of work was provided for unskilled labour. The Ottawa Improvement Commissioners employed a large number of men and teams in the work of improvement at Strathcona Park.

KINGSTON, ONT., AND DISTRICT.

Mr. William Kelly, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour generally was fully employed throughout the month, and the opportunities of all classes of labour were far in excess of the corresponding period last year. During the month, after a keen competition, the Canadian Locomotive Works Company secured a contract to build twenty-five new locomotives for the Grand Trunk Railway Company. These engines are to be completed within the next eighteen months.

The Kingston and Montreal Forwarding Company is getting in timber for repairs to its barges. The city and Portsmouth shipyards will be fully occupied during the winter months. The Davis dry dock is being enlarged to meet the demand upon its capacity. The steamer 'North King' will shortly enter this dock and remain there all winter to receive extensive repairs. The

steamer 'Rideau King' will be taken to Jones' Falls locks to undergo an extensive overhauling during the coming winter, as her owners could not secure a marine railway, or dock at Kingston in which to carry on the work, as all are fully occupied and engaged.

Brock Street Methodist Church is spending \$6,600 in improvements. The House of Providence is making very extensive additions to its capacity. During the month plans were gotten out for the new barracks for the R.C.A.; the tenders are to be awarded shortly. Extensive improvements to the city buildings are still going on. Large areas of granolithic walks are being constructed by the civic authorities. These and other operations are keeping the various lines in the building trades fully occupied.

The two piano factories here are kept very busy. At one of them over sixty hands are at work at wages totalling about \$800 per week. The instruments from this factory are being shipped to all parts of the Dominion.

Local railroads are handling much freight, and the transportation business generally is active. Wholesale and retail trade is reported as being excellent.

There were no changes in the rates of wages, and no strikes or lock-outs during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Agriculturists are busy fall ploughing, threshing, &c., and in general preparations for the winter. In this district the crop was in excess of previous years, and general satisfaction is expressed with returns and prices.

Fishing.—Fishing was quiet.

Lumbering.—Lumbermen are preparing for an active season during the winter months.

Manufacturing.—Manufacturers in general are fully employed.

Mining.—Mining was very active.

Other industries.—The population and valuation of real estate have advanced far in excess of recent years, according to the returns made by the assessor.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were exceptionally active. The tinsmithing, plumbing and hardware trades are very busy, and are extending their business throughout the district.

Metal, engineering and shipbuilding trades.—The metal, engineering and shipbuilding trades were fully employed and all branches have work for months ahead.

Woodworking and furnishing trades.—The woodworking and furnishing trades report the best season in many years.

Printing and allied trades.—Printers and allied trades report exceptional business.

Clothing trades.—Among clothiers and boot and shoe dealers a splendid fall trade was reported.

Food and tobacco preparation.—Bakers, butchers, &c., reported excellent trade. Cigarmakers were very busy.

Leather trades.—The various branches of the leather trades reported good business.

Miscellaneous.—Broom makers report the best season in many years. Furriers have increased in numbers, and the demands upon them and their help is very urgent. Hotels, &c., report good business. Laundries were rushed.

Transport.—All branches of the transport business were fully occupied.

Unskilled labour.—Unskilled labour was fully employed, no cases of idleness for want of work being reported.

DISTRICT NOTES.

There is much activity in *Renfrew county* in connection with the opening of the Corundum mines by the Corundum Refiners, Company, Limited. A new post office, to be known as *Tewellville*, was established. Already contracts have been let for the construction of thirty dwellings in the new village.

BELLEVILLE, ONT., AND DISTRICT.

Mr. H. C. MacDiarmid, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The demand for labour in this city and district during the month of October has been very active, although not quite so active as in September, due largely to the cessation of work on the permanent pavements being built by the city, which has given employment to a large number of men during the summer months.

The most important change in industrial activity noted was the closing down of the Iron and Steel Company's works, which has thrown out of employment a large number of skilled mechanics and labourers. The close-down resulted from the city authorities seizing all the manufactured iron belonging to the company on a distress warrant issued for unpaid taxes for the past three years, amounting to about \$3,000. It is thought that a new company will take over the works shortly.

The Belleville cement works plant is fast nearing completion, and a large number of all classes of labour is being employed. The power house is completed, having been built of cement blocks which were found to be much cheaper than bricks. All the buildings are under roof with the exception of the large kiln, which is expected to be completed early in November. A large coal dock has been built, as well as a coal distributing trestle, and next month a fleet of coal vessels are expected, and the mills will probably be running before the commencement of the new year.

The Donnelly Wrecking Co., made a very successful job of laying the new water main across the river. It has been covered with a concrete protection from the ice.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Threshing is almost over, and with good crops and good prices the farmers are in a very prosperous condition. Farm produce is commanding good prices and a ready market.

Fishing.—There promises to be a good season for fishermen in this district. White-fish are quite plentiful.

Lumbering.—The lumbering industry promises to be active; a large number of men have gone back to the woods this month, and wages were never better.

Manufacturing.—All manufacturing concerns were busy working full time.

Mining.—October has been an excellent month for this industry.

Railroad construction and employment.—The Grand Trunk Railway Company has completed its new coal chutes, which are said to be the most efficient in the province of Ontario; a large number of men were employed in their construction.

Other industries.—The Belleville Lock Works were very busy. This is a growing industry; it is proposed to extend the works shortly.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons, carpenters and joiners were not very busy, as building operations have not been very active here this season. Painters and decorators reported a very busy month. Plumbers were not very busy, but gas-fitters were all working. With builders' labourers work was rather slack.

Metal, engineering and shipbuilding.—Iron moulders were busy as well as machinists and engineers. Blacksmiths and horseshoers reported having a splendid month's work. Boilermakers were all working. Shipbuilders have a lot of work on hand, as most of the sailing vessels are now laid up for the season.

Woodworking and furnishing trades.—Nearly all the woodworking trades were busy. Upholsterers find trade active; this is generally their best month. Carriage and wagon makers were all working full time. Coopers were working over time this month to supply barrels for the packing of the large apple crop.

Printing and allied trades.—Printers were very busy with voters' lists and ballots. The fall fairs also caused an impetus in these lines. Pressmen and bookbinders were also busy.

Clothing trades.—Journeyman tailors were very active, as weather conditions increased the demand for heavier clothing. Some shops were working overtime to keep up with orders.

Food and tobacco preparation.—Bakers and confectioners were all doing a splendid trade. Bread still remains 10 cents a large loaf despite the raise in flour, and as yet no word has been heard of an intention to increase the price. Butchers were all busy. There was an ice famine during the month, as only one dealer had laid in sufficient to meet the demand.

Leather trades.—All engaged in these trades were busy.

Miscellaneous.—Barbers, clerks and stenographers were all busy. Furriers had a splendid month, as had hotel, restaurant and theatre employees. Both English and Chinese laundries had a busy month.

Transport.—The Grand Trunk Railway, including the Midland branch, had a very good month, and all employees were busy. Cab drivers, hackmen, carters and draymen had an exceptionally active month's work, as had also teamsters and expressmen.

Unskilled labour.—There was a good demand for this class of labour until the closing down of the rolling mills. Since then work has been rather slack.

DISTRICT NOTES.

The different *canning factories* throughout the district report a poor month, owing to poor weather for the ripening of tomatoes, corn, &c. A favourable report for the season as a whole, however, is presented. The price of cheese has been lower this season than for some time past, but the high prices for butter, eggs and grain act in compensation.

PETERBORO, ONT., AND DISTRICT.

Mr. W. J. Johnstone, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The month has been notable for continued activity in all outside trades. Sufficient

men could hardly be found to carry on the work in the building of houses.

The Matthews Company has added a large out-building to its premises for the sheltering of the large shipments of hogs which continue to pour into its establishment. This firm does a very extensive local and export trade. Extensive additions and alterations have been going on in and around St. Peter's Cathedral; about 2,000 feet of concrete walks have been laid to the several entrances, also improvements in the way of repainting, pointing stone work and new plumbing. The grounds around the edifice have also been rearranged.

A large amount of concrete work is being carried on at the locks dam, deepening the channel and making a permanent structure. A large concrete platform has been laid down all round the Grand Trunk Railway Company's station. Seventy-five carloads of gravel and 500 barrels of cement were used on the work.

Peterboro' is to have a new industry, called the Shovel and Tool Company, which has been incorporated with a capital of \$50,000.

The Canadian Machine Telephone Company is making good progress in putting its wires under ground in the business part of the town.

Transportation companies and banks reported business very active, and wholesale and retail trade was good in all branches.

The labour market was free from strikes or disturbances of any kind.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were very busy with fall ploughing and threshing. Markets were well patronized and farmers' produce plentiful, excepting potatoes, which, in some parts of the district, were rotting very badly.

Lumbering.—This industry was exceptionally busy. The lumber firms here are putting in their winter camps.

Manufacturing.—Manufacturing concerns in all metal departments (excepting the lock works) were very slack. The lock

works were very busy, and could scarcely fill orders quick enough to meet the demand.

Mining.—A rich deposit of corundum has been discovered in the township of Methuen; its value has been placed at \$390 per ton. Samples of it will be placed among the government exhibits at Ottawa.

Railroad construction and employment.—The overhauling of railway crossings, the putting in of new ties, and the putting of the several railroads in proper order before the frost sets in has been in progress for some time.

Other industries.—The Peterboro' Canoe Company was very busy. The Cordage Works were exceptionally active. The Central Milling Company was also very busy, and the Colonial Weaving Company received several large orders.

CONDITION OF PARTICULAR TRADES.

Building trades.—All of the building trades were very busy. During the past month it has been very difficult to secure sufficient men to carry on the several works.

Metal, engineering and shipbuilding trades.—Iron moulders experienced a slackness, the men working about 3 days a week in some shops. Iron workers and helpers, machinists and engineers, boilermakers, shipbuilders and bicycle workers were also experiencing dullness in trade. Steam engineers were fairly busy. Electrical workers and linemen, metal polishers, blacksmiths and sheet metal workers were busy, but tool sharpeners were not actively employed. Horseshoers were busily employed, and jewellers fairly so.

Woodworking and furnishing trades.—Woodworkers in all lines were actively employed. Upholsterers, varnishers and polishers, carriage workers and coopers were busy. Wood carvers, pattern makers and gilders experienced a slight depression in their lines.

Printing and allied trades.—Printing trades and allied workers in all branches were fairly busy, but not as busily employed as at this season last year.

Clothing trades.—Journeyman tailors were very slack, garment workers were fairly well employed, with hat makers active, and boot and shoe workers very busy.

Food and tobacco preparation.—Bakers were exceptionally busy, and on October 1 raised the price of bread to 13 cents for a 4 lb. loaf, and 10 cents for a 3 lb. one. The best flour is quoted here at \$5.70 per barrel. Butchers and meat cutters were also busily employed. Ice handlers experienced dullness. Cigarmakers' work here is principally exported.

Leather trades.—The leather trades had a slack period.

Miscellaneous.—Barbers did a good business, and broom makers, clerks and stenographers, hotel and restaurant employees, delivery employees and laundry workers were busy. Furriers were also busy, with some help wanted.

Transport.—Trainmen and telegraphers, switchmen, trackmen and freight handlers were fairly busy. Steamboat transportation was exceptionally active. Street railway employees, cab drivers, hackmen and expressmen were busily employed.

Unskilled labour.—Work was fairly plentiful.

DISTRICT NOTES.

October cheese sold at 9½ cents per lb. There was some 4,600 cheese put on the board for the month. Wood of all kinds continues to sell at very high prices, and coal at \$7.50 a ton.

The *Lakefield* cement works were exceptionally busy. Apples were a particularly good crop here, and were very plentiful.

The steamer '*Sovereign*' had a mishap, being overturned in a windstorm. It was bringing a cargo of 200 bushels of pease and 150 bushels of potatoes to Peterboro' market; the cargo was badly damaged.

TORONTO, ONT., AND DISTRICT.

Mr. Phillip Thompson, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There is no change to note in general conditions as compared with last month,

excepting as they were affected by the approach of cold weather. Nearly all classes are well employed and prospects for an active winter season are encouraging.

The assessment of the city has been completed, and the returns indicate that conditions are highly prosperous. The total value of assessed property has increased from \$141,817,497 last year, to \$149,272,094, the increase amounting to \$7,454,579. The increases under the different headings are as follows: Land, \$2,300,946; building, \$2,669,652; personalty, \$1,901,739, and income, \$582,260. Exemptions from taxation have increased from \$24,472,043 to \$25,176,061. The population has increased from 219,002 to 226,365. There are 38 per cent of the dwellings returned as being occupied by their owners, and the real proportion is believed to be much larger, as many occupants are entered as tenants when the houses are owned by their wives. A marked tendency is noted towards the purchase of house property in place of renting dwellings. The number of manufacturing establishments is given as 398, with 30,129 employees.

The receipts of the Canadian National Exhibition were \$172,838.66; expenses, \$132,630.10; balance of profit, \$40,208.56.

The shareholders of the Toronto Labour Temple, at a meeting held on October 4, elected the following board of directors; James Simpson, Alfred Raynor, Robert Glocking, D. A. Carey, J. H. Huddleston, James Wilson, William Boland, W. T. Thompson, D. W. Kennedy, Robert Hungerford, P. McCann, J. C. Fannon, John Armstrong and Thomas Walsh. The building is being exclusively altered and remodelled.

A factory for the Gutta Percha and Rubber Company is being erected on O'Hara avenue, 180 x 152 feet and four stories in height, to cost \$100,000.

The T. E. Brame Company, Limited, manufacturers of overalls, &c., are erecting a factory at the corner of King street west and Bathurst street, having 30,000 feet of floor space.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers are busy finishing up with threshing operations and preparing for winter. Fall ploughing has been somewhat interfered with by rainy and stormy weather, but the later portion of the month has been favourable. There is some demand on the part of those who have much livestock for men to engage for the winter season.

Manufacturing.—The factories and workshops are busy as a rule and the generally favourable report from the west, where the farmers are likely to have plenty of money on account of high prices for grain, has stimulated business and orders are coming in freely.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades find plenty of employment as contractors are anxious to push work before the frost sets in. Bricklayers, carpenters, lathers, plasterers and painters are practically all at work. A large number of bricklayers have arrived from England and have all found employment; there have also been many immigrants in connection with other branches of the building trade. Attention has been called by the District Labour Council to the insecurity of some of the scaffolding on a number of buildings now in course of construction, and the matter has been brought to the notice of the city council. Heavy issues of building permits were made by the assessment commissioner.

Metal, engineering and shipbuilding trades.—The ironworking trades were generally prosperous. Moulders find steady work. Machinists report some men idle. Shipbuilding is rather dull. Agricultural implement workers have not had a good month, some of the establishments having been temporarily closed down. Structural iron workers, sheet metal workers and brass finishers are all busy.

Woodworking and furnishing trades.—Furniture workers have found trade rather dull, but improving. Pattern makers report trade slack during the earlier part of

the month, but it has since been more active. Piano workers are busy. A small strike took place in this trade about the 6th of the month, when 12 or 14 men in the employ of the Palmer Piano Company demanded an increase of wages from 27 cents to 30 cents per hour, and, on the refusal of the employers to grant the increase, went out. Negotiations were entered into between the Piano Makers' Association and the Piano Workers' Union. The former agreed to support the company in resisting the demand and threatened a general lock-out if it was persisted in, with the result that the men returned to work on the former basis on the 22nd.

Printing and allied trades.—Printers had a busy month owing to the election. Bookbinders are all employed, and the other trades find business good.

Clothing trades.—Custom tailors benefited by the advance of the season, and were well employed, though trade was hardly so good as last year. The union has admitted a number of recently arrived English tailors. Garment workers, furriers and hat and cap workers had plenty of work.

Food and tobacco preparation.—These trades had generally steady work. The arbitration proceedings between the brewery workers and their employers are still in progress and are expected to be finished in a few days. The arbitrators have done a great deal of work, visiting the different breweries and investigating the conditions of labour, and have thus accumulated a great deal of evidence bearing on the questions submitted to them.

Miscellaneous.—The waiters and waitresses affiliated with the waiters, bartenders and waitresses' alliance are agitating for increased wages. The demand is more especially urged on behalf of the waitresses, of whom there are about 600 to 700 in the city, who work from nine to twelve hours daily. Waitresses at the present rate of wages, which averages \$15 per month, are in demand, but the more advantageous opportunities presented in other callings considerably reduced the number of those

engaged in this calling. The bartenders have perfected their organization until nearly all belonging to the trade have joined the union.

Transport.—Railway employees, street car workers, expressmen and others engaged in land transportation had a busy month.

Unskilled labour.—Owing to the large immigration and the close of the harvesting season, the supply of unskilled labour was considerably in excess of the demand.

NIAGARA FALLS, ONT., AND DISTRICT.

Mr. Ernest Green, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The prosperity which has prevailed in industrial and labour circles during the summer still continues. Workingmen of every class were fully employed, and the inception of new works of different kinds promises a continuation of this condition.

The building trades are still exceptionally busy. On October 18 there were vacancies for sixty first class carpenters. Contracts have been let for the erection of two very large transformer houses for the power companies and for the erection of the new Clifton hotel; the latter is estimated to cost about \$260,000. The building of houses is very active.

Railway traffic and wholesale trade were active, and retail merchants did a good business.

An increase of wages paid to carpenters on the Welland Canal and an increase in sailors' wages have had some effect in towns on the canal and lakes.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The grape crop was large and the harvest ended about October 22. Prices ranged from \$20 to \$25 a ton. The crop in the peninsula was worth \$30,000 to \$35,000. Apple-picking has given some employment, but pickers were scarce. The ap-

ple crop is a good one. Work on the farms is now slackening.

Manufacturing.—No factory reports lack of orders to keep it from running full time, and some are extremely busy.

Railroad construction and employment.—Railroad employment was active.

Other industries.—Good progress has been made on the power development works. The tunnel of the Canadian Niagara Power Company is finished, as is also the conduit of the Ontario Power Company. This conduit is of steel, eighteen feet in diameter, and over a mile long. Its construction employed many boilermakers, rivetters and men of allied crafts. Rock excavation in the Toronto and Niagara Power Company's wheel-pit and tunnel is progressing rapidly.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were all employed. Concrete construction for the foundations of dwellings and the walls of business blocks is coming into favour, many thousands of yards of concrete have been put in on the power works, in dams, walls, sub-foundations, &c. Carpenters were fully employed and good men have been asked for. Lathers and plasterers were all busy. Painters were well employed, with plumbers busy and gasfitters rushed. Stonecutters find business a little quiet, and builders' labourers were all working.

Metal and engineering trades.—Foundrymen and linemen were all busy. Machine shop men and boilermakers may find employment slack when the Jenckes Machine Company, having finished its work here, closes its shops. Electrical power transmission lines are being built. Sheet metal workers were all working.

Woodworking and furnishing trades.—Coopers had a rushing season, but it will soon be over. The Snelgrove Brothers' shop in this city was burned on October 22, causing a heavy loss.

Printing and allied trades.—Printers were fully employed throughout the district, and business in printing establishments is good.

Clothing trades.—Tailors were very busy.

Food and tobacco preparation.—There was no lack of employment in these trades.

Miscellaneous.—Summer hotels are closing, but regular travel was good, and other hotels and restaurants were employing full staffs.

Transport.—Freight traffic was steady, and employment on railways consequently was satisfactory. Summer steamboat lines have stopped running for the winter. Inter-urban electric railways have reduced their services to winter requirements.

Unskilled labour.—Employment for unskilled labour was fairly abundant. Big gangs of labourers were employed on extensions to the city's sewers.

DISTRICT NOTES.

Bridgeburg.—The International bridge has been painted. The new yard of the Pere Marquette Railway Company is finished, and the roundhouse and other buildings are nearing completion.

Fort Erie.—A large summer hotel is being erected here.

Fenwick.—Building operations were active.

Port Colborne.—The Welland Canal will be open on Sundays for the rest of the season. Improvements to the harbour are steadily progressing, and much has been done during the past month. The brass works were running overtime.

St. David's.—Fruit canneries have had a rush season, one establishment employing over 100 hands.

Welland.—Beatty's machine shops and ship yard were rushed with work. The Frost Wire Fence Company is moving to Hamilton.

ST. CATHARINES, ONT., AND DISTRICT.

Mr. Jas. A. Wylie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The satisfactory condition of the labour market still continues and October has

been if anything a busier month than September. All branches of labour have been well employed, with the exception of two or three factories which have been a little quiet, but now show signs of improvement.

The building trades were active, particularly carpenters, bricklayers and masons. Contractors have been paying bricklayers more than the union scale of wages in order to secure sufficient help to complete the work in hand before the cold weather sets in. The Packard Electric Company is extending its premises and will soon have in operation a factory for the manufacture of motor carriages.

Wholesale and retail trade continues in a healthy condition. Transportation has also been active, large shipments of fruit, especially apples and grapes, adding considerably to the railway and shipping trade.

The carpenters on the Welland canal had their wages increased as follows: Journey-men carpenters, from \$2 to \$2.25 per day; foremen carpenters, from \$2.50 to \$2.75 per day, and from \$2.75 to \$3 per day. This was in conformity with the rule of the government of paying the prevailing wages paid in the district.

There have been no strikes, lockouts or other disturbances.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers were busy harvesting crops of apples, grapes, &c., many additional hands being employed at fair wages.

Manufacturing.—Canning factories continued running to fullest capacity.

CONDITION OF PARTICULAR TRADES.

Building trades.—All branches of the allied building trades have been active, especially bricklayers, masons, carpenters, lathers, plasterers, painters and paper-hangers, plumbers and builders' labourers.

Metal, engineering and shipbuilding trades.—All engaged in these trades were fairly well employed. Electrical workers and linemen were busy.

Woodworking and furnishing trades.—Woodworkers, upholsterers, varnishers and

polishers, wood carvers, and carriage and wagon workers were well employed; so also were coopers.

Printing and allied trades.—Printers, pressmen, machine hands, and bookbinders were well employed, with plenty of work on hand.

Clothing trades.—Journeyman tailors are now in the midst of their busy season, and report trade fair. Boot and shoe workers were busily employed.

Food and tobacco preparation.—Bakers and confectioners, butchers and meat cutters, cigar and tobacco workers had steady work, with favourable conditions.

Leather trades.—Tanners and curriers, leather workers and saddlers reported trade satisfactory.

Miscellaneous.—Barbers, clerks, stenographers, delivery employees, hotel, restaurant and theatre employees, and laundry workers were well employed.

Transport.—Trainmen, trackmen, freight handlers, steamboat men and firemen, ship labourers, street railway employees, cab drivers, hackmen, teamsters and expressmen found steady employment.

Unskilled labour.—Employment for unskilled labour was fairly plentiful.

DISTRICT NOTES.

Port Dalhousie.—The labour market has been satisfactory. The building trades were busy, with plenty of work ahead. Railway and shipping transportation was active, furnishing employment for a number of hands.

Merritton.—Conditions were more favourable than in the preceding month. The strike in the Riordan paper mills is practically at an end; a large number of the old employees have been taken back, and the mills are now running.

The new mills of the Lincoln Paper Company will soon be in operation, which will give employment to about 200 hands.

Thorold.—Favourable conditions still prevail both in the labour market and in business generally; coopers, basket makers,

quarrymen and the building trades being notably active.

Power Glen.—A large staff of workmen are still employed on the works of the Cataract Power Company.

HAMILTON, ONT., AND DISTRICT.

Mr. S. Landers, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour during October was as well employed as in the previous month. Several manufacturing concerns are enlarging their plants, especially iron industries. Bank clearings, shipments and transportation have been on a par with the previous month.

The strike of the heaters and puddlers at the rolling mill has been compromised, the men accepting eight per cent cut instead of thirteen per cent. The warehousemen and dock owners have locked out the local longshoremen. The situation of the leather workers' strike is about the same, with the exception that several new comers have left the city.

Incorporation has been granted to the Cast Iron and Supply Company, Limited, of Hamilton, with a capital of \$100,000. Two fires occurred during the month with heavy loss, one at the interlocking switch of the Toronto, Hamilton and Buffalo Railway Company, in which several cars were burned; the loss is estimated at \$15,000. The other fire was at the Hamilton Biscuit and Confectionery Company's Works; loss about \$10,000.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers and fruit growers enjoyed a busy month.

Manufacturing.—The manufacturing industries were busy.

Railroad construction and employment.—There is a large amount of railway construction going on near Hamilton at present. The Grand Trunk Railway Company is building a double track between Dundas and Copetown, there being a large amount

of cutting and filling to be done; a large staff of Italian labourers are being employed.

Other industries.—The county road superintendent has about sixty men working on the Wentworth roads, improving them. Four crushers are at work, and a fifth will be put in commission. A grader gang is at work on the Ancaster road, near the Brant end, another grader gang is labouring on the Dundas and Waterloo road near Sheffield.

The Frost Wire Fence Company, which is building a factory in the east end of the city, is adding a room to be used for recreation purposes by the employees. All sorts of games will be provided, and the room comfortably furnished and made attractive to the men. The officials of the company anticipate that they will get a return for their expenditure in better service from the men. The company will also encourage out of door sports.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades were all well employed. Bricklayers and masons had plenty of work. Carpenters, joiners and bench hands in factories and building work were well employed. Painters were fairly busy. Sheet metal workers, electrical workers and builders' labourers enjoyed a good month.

Metal, engineering and shipbuilding trades.—In the iron trades work has been very good during the month. Iron moulders, both stove, plate and machinery, stove mounters, machinists and steam engineers were steadily employed. Blacksmiths employed at the several machine and implement industries were very busy, while carriage and wagon smiths enjoyed a good month. Boilermakers and structural iron workers were well employed. Horseshoers were a little slack. Jewellers were fairly busy with holiday stock.

Woodworking and furnishing trades.—All engaged in the woodworking trades have enjoyed a very good month. Furniture workers, upholsterers, wagon builders and pat-

tern makers, and coopers also had a good month.

Printing and allied trades.—The printing trades were busy during the month, many firms getting out their fall advertising. Bookbinders and engravers had fairly good employment.

Clothing trades.—Journeymen tailors, garment workers, hatters, boot and shoe workers had a fair month.

Food and tobacco workers.—Cigarmakers were all employed, as were tobacco workers.

Leather trades.—Several men have left the city during the month. Those in the shops that have made a settlement with the workmen since the recent strike were fairly busy.

Miscellaneous.—Work among the broom-makers has picked up a little. There is an agitation against prison made brooms.

Transport.—All employees of steam railways were well employed. Among street railway employees there are quite a number out of work owing to the company curtailing its service. The matters in dispute referred to last month have been adjusted; vestibules will be closed at both ends of car. The longshoremen were locked out by the dock owners, and other workmen secured in their places; the reason assigned was that the wages were too high. The men claim that they should have been notified, and given an opportunity to adjust matters. There was no settlement at the end of the month.

DISTRICT NOTES.

Dundas.—The Grand Trunk Railway Company's double tracking operations give the town quite a lot of business just now. The machine shop, clothing factory, glove works and axe factory have enjoyed a busy month.

BRANTFORD, ONT., AND DISTRICT.

Mr. J. C. Watt, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market during October was about the same as during

September. It will not compare favourably with the corresponding month of last year.

The Massey-Harris Company resumed operations on the first of the month, with a small force of men, but this gain was offset by the numbers laid off in the carriage and wagon making trades.

The building trades continue to be active, principally in the erection of private residences suitable for workingmen. A new skating rink is to be erected at once, at a cost of \$18,000. The Waterous Engine Company is extending its plant by erecting a large and well equipped testing department.

The population of Brantford, according to the assessor's report, is 19,455, and the value of property amounts to \$8,391,600, being substantial increases over last year's report.

Merchants reported a fair fall trade during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The root crop has been raised and a fair average crop has been realized.

There is some rot among the potatoes. Apples were plentiful and sold at \$1 per barrel. Grapes were scarce and the sample poor, having been touched by frost.

Manufacturing.—Manufacturing with the large concerns, with perhaps one exception, was slack.

Railroad construction and employment.—Railway construction and improvement still gives employment to a number of men.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters and plasterers had a busy month. Painters and decorators have been exceptionally busy. Plumbers, gas and steam-fitters were fully employed.

Metal, engineering and shipbuilding trades.—Stove-plate moulders have been extra busy. Other iron moulders, with only a few exceptions, have had a full month, with core makers much the same. A few machinists have been idle. Steam engineers

had steady employment. Electrical workers and linemen, particularly the former, have been busy, and buffers, polishers, and stove mounters report plenty of work. Carriage, machinery and general blacksmiths and horseshoers had steady employment. For boiler makers and sheet metal workers trade has been active.

Woodworking and furnishing trades.—Woodworkers generally upon outside work have been fully employed. Carriage and wagon builders have had a slack month. Pattern makers and millwrights report no rush, but all local men were employed. Coopers have been very busy.

Printing and allied trades.—Printers and pressmen report a good month.

Clothing trades.—Journeymen tailors reported an increase in trade over the month previous.

Food and tobacco preparation.—Bakers and confectioners have noticed a slight reduction in the volume of trade. With the return of cold weather many families do part of their own baking. Cigar makers and tobacco workers had a full month.

Leather trades.—Saddlers and leather workers report an average month.

Miscellaneous.—Barbers, clerks and delivery employees had steady employment. Hotel and restaurant employees have been in demand. Laundry workers had a fair month.

Transport.—Railroad trackmen and freight handlers, particularly the former, were extra busy. Street railway employees had an average month. Teamsters and draymen have been fully employed.

Unskilled labour.—There is no demand for unskilled labour, and there have been some idle men upon the market.

DISTRICT NOTES.

Paris.—The mills are busy and are advertising for 300 female operatives. Labour generally has been fairly well employed. The Grand Valley power house is completed, and the railway has now reached the suburbs of Galt.

GUELPH, ONT., AND DISTRICT.

Mr. O. R. Wallace, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

* Employment is active in nearly all lines, the conditions being generally about the same as in September. In out door lines there is a falling off of some classes of work, but factory workers have been generally fully employed. There is no noticeable demand for work-people, and any demand, especially if for unskilled labour, will be readily met by those who have worked outside during the summer. The erection of a new factory, 328 feet by 80 feet, and one story of 35 feet has been commenced for the Taylor-Forbes Company, for the manufacture of radiators, &c. It will give employment when completed to 100 men. The Bell Piano and Organ Company, who a year and a half ago changed their working hours from 59 to 56 a week, with no reduction of pay to day workers, has made a further change to 55 hours a week, and the pay is adapted to an hour basis instead of a day's basis. Formerly all days were paid for alike. There have been no other changes nor is there any noticeable unrest amongst the working classes.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades have had a fairly good month, and conditions were almost better than looked for at the beginning of the month. The season's operations will amount to about \$400,000, but the demand for houses, especially smaller houses, has not been met, and the scarcity is still very noticeable. Bricklayers had a good month, with improved prospects over the beginning of the month. Carpenters and joiners had also a good month. Painters only had a fair month, caused partly by changes in the employing painters. Stonecutters have had little to do. Plumbers and steamfitters had a very good month. Building permits will aggregate over \$300,000 this year.

Metal, engineering and shipbuilding trades.—Iron moulders report the same general conditions as last month, being busy in the stove foundries and only fairly busy in the other foundries. Machinists had a slightly better month than September. Tube mill workers were very busy, with night and day shifts at work.

Woodworking and furnishing trades.—The woodworking trades had a satisfactory month, employment generally being good. Woodworkers and upholsterers had a good month. Piano and organ workers have been fully employed. Carriage workers and trimmers are slack, but men are being taken on in the new shops.

Printing and allied trades.—Printers had a good month, but hardly equal to September.

Clothing trades.—Journeymen tailors report trade as good. The different firms who manufacture ladies' skirts and waterproof clothing were all busy, and have been taking on additional help.

Food and tobacco preparation.—Cigar-makers had a good month, and bakers and confectioners have been fully employed.

Miscellaneous.—Brussels carpet weavers lost a lot of time during the month waiting for yarn. Ingrain carpet weavers, however, had steady work. The miscellaneous trades generally had a good month, the season tending to help many of them.

Unskilled labour.—Unskilled labour was well employed. Those at outdoor work generally had steady work during the month.

DISTRICT NOTES.

Georgetown.—The corner stone of the new mill of the Canada Coating Mills Company was laid during October. The main building is to be 200 x 80 feet, with two wings 180 x 54½ feet, and is to be built of cement blocks made on the premises.

Preston.—A by-law to loan to the Metallic Shingle and Siding Company \$15,000, to assist the company to erect new buildings to replace its plant, which has twice been destroyed by fire this year, was carried by

a vote of 384 for and 6 against on October 24.

Waterloo.—By-laws were passed in favour of a grant to aid, by a loan of \$15,000 for 15 years, the Canada Furniture Manufacturers, whose factory was recently destroyed by fire, and to purchase and extend the present gas company's plant at a total cost of \$20,000.

STRATFORD, ONT., AND DISTRICT.

Mr. Jos. T. Carlin, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The general condition of the labour market was favourable, with the same activity in the building trades as the previous month.

The supply of workmen in most of the building trades is scarcely equal to the demand.

The large addition in course of erection to the Grand Trunk Railway shops is nearing completion, and is expected to be running in a few months. This will require more workmen.

There is as big a demand for houses at the present time as in the spring; the city's population has increased seven hundred during the year.

Trade is good. Retail merchants are very busy and wholesalers are doing well.

The milk dealers have decided to raise the price of milk from 5 to 6 cents per quart for the winter months, commencing November 1.

No change in the rates of wages or hours of labour and no trouble in the labour market were reported.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers are busy threshing. A number of men and boys are engaged picking and packing apples for the foreign markets.

Manufacturing.—All the industries are active, especially the clothing manufacturers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were busily engaged and expect to be while the weather is favourable. Carpenters, lathers and plasterers were fully employed. Painters and paperhangers were busy, and plumbers and tinsmiths were rushed with work. Builders' labourers were active.

Metal and engineering trades.—Machinists, ironworkers and foundry men were steadily engaged. Electrical workers were busy putting up heavier wire in a number of places throughout the city.

Woodworking and furnishing trades.—Woodworkers were about the same as in the previous month. Coopers were very busy.

Printing and allied trades.—Printers had a busy month and work is plentiful.

Clothing trades.—Journeyman tailors and garment workers were fully employed, and find business very satisfactory.

Food and tobacco preparation.—Bakers and confectioners had a busy month. Cigar-makers report steady employment.

Miscellaneous.—Barbers find business good. Clerks and delivery employees were busy.

Transport.—Railroad conductors, engineers and firemen had an active month. Cab drivers, hackmen, draymen and teamsters had plenty of work.

Unskilled labour.—This class of labour has been well employed during the month. Girls are wanted in factories and for housework.

DISTRICT NOTES.

Goderich.—Conditions of employment were active, the building trades having had an exceptionally busy season, over forty constructions being under way. Work has been begun at this end of the Guelph and Goderich Railway.

Woodstock.—A marked scarcity of labour prevails, hampering building operations. Bricklayers, carpenters and labourers were particularly scarce, although no unusual

activity in building trades prevails this season.

LONDON, ONT., AND DISTRICT.

Mr. A. Wootton, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Industrial activity continues unabated in this district, and labour is employed to its fullest capacity, and even to a greater degree than during the same period of last year. The manager of the McClary Manufacturing Company, the largest industry in this city, stated recently that the firm had increased its working force 40 to 45 per cent in the past 8 years, and now employs over 1,000 hands. The following statement covers only a few of the larger establishments located in London, and takes no account of the cigar industry and many other smaller concerns:—

Industry.	Number or hands employed.
White's Bolt Works.. . . .	65
London Rolling Mills.. . . .	90
Wortman & Ward.. . . .	90
Dyment-Baker Lumber Company.. . . .	52
Bennet Furnishing Co.....	92
Grand Trunk Railway Co., car shops.	350
Hyman's Tannery.. . . .	70
E. Leonard & Sons.. . . .	175
McCormick Mfg. Co...	400

In the building trades work has been more plentiful than was expected earlier in the season, the building of the Grand Trunk Railway Company's round-house providing abundance of work. The Battle Creek Health Food Company's factory was burned down in the early part of the month, the loss aggregating about \$10,000. The Builders' Supply Company's brickyard, which was burned out a short time ago, will be sold by auction as the company has decided to rebuild. At the present time exceptional activity prevails among the wholesale houses, and winter goods are being rushed out.

The assessment of the city for the present year amounts to nearly \$20,000,000, an increase of \$1,000,000 over that of last year.

A dispute arose in the early part of the month between some of the Bell Telephone Company's linemen and their foreman, who

were working a few miles from the city, and wanted to be brought in and out of the city in the company's time, each day; eight of the men quit work, but some of them went back, and the places of the others were filled. The trouble at the Grand Opera House remains unchanged from last month.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—About 50 young men from this city and district have left for the lumber camps in Northern Ontario.

Railroad construction and employment.—Trains are now running over the new Grand Trunk Railway double track between Woodstock and London. Work has begun on an interswitching track, which is to connect the different railways of the city; this has been long desired by the manufacturing concerns.

The one mile extension to the London street railway was finished during the month and is now in operation. The London and Southwestern Traction Company has finished laying its rails between London and St. Thomas, and the line is now being ballasted. The wiring of the line will not be undertaken until spring.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons were all at work, with good prospects for another month's work at least. Carpenters were in demand and expect to be busy all winter. Lathers, plasterers, stonecutters, builders' labourers and painters were busy. Plumbers and steamfitters were extra busy; almost all the new houses being built are being piped for gas.

Metal, engineering and shipbuilding trades.—Moulders reported trade extra busy; at the McClary's new shops the floor space is all occupied. Machinists are in demand in this city. Linemen were very busy putting up wires between here and Stratford and Brantford. The fire alarm system throughout the city is also being rewired. Metal polishers and stove mounters were rushed.

Woodworking and furnishing trades.—Woodworkers and upholsterers were busy. Carriage and wagon makers found trade only fair. At the Grand Trunk Railway Company's shops a lot of repair work is being done. Coopers were exceptionally busy. Owing to the increased price of barrels there is not nearly as many apples being shipped from this district this year.

Printing and allied trades.—Printers and pressment were rushed almost beyond their capacity, and 20 hours per week overtime was the rule with all employees in the job offices. The elections, calendar and novelty season is assigned as the cause. Bookbinders were very busy.

Clothing trades.—Journeyman tailors were working overtime. Garment workers were rushed with orders. Boot and shoe workers reported trade fair.

Food and tobacco preparation.—Biscuit and candy makers were working overtime. Cigarmakers reported trade good, and all hands working.

Miscellaneous.—Broom makers were very active, but brush makers are experiencing a slackness in work. Furriers were extra busy.

Transport.—On the railroads the crews reported a large amount of through freight moving, and a big month's pay for the men. Teamsters were all employed to their full capacity, and still there is work for more.

Unskilled labour.—Opportunities for work were never better for this class of labour, and indications are good.

ST. THOMAS, ONT., AND DISTRICT.

Mr. A. Roberts, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There was a considerable change in conditions in the labour market during the latter part of October, as compared with the summer months, as evidenced by an increase in the number of unemployed work-people, especially in unskilled lines. Quite a number of these are workpeople from the

British Isles, who came over in the spring and found employment for a time at farming and other work during the busy part of the season, but who now find the chances for work during the coming winter somewhat precarious. There was no noteworthy change in industrial activity from September, excepting the shortening of the day by one hour in the Michigan Central Railway Company's shops, commencing October 1. Regarding wages, the only change reported was from the journeymen tailors, who have arranged a new schedule of prices with their employers, eight per cent increase being granted on piece work. Peaceful conditions exist generally among the working classes, but there is a widespread feeling that the purchasing power of wages is lessening on account of the increased cost of living, notably on account of house rent and fuel.*

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy harvesting the apple, corn and root crops. Potatoes in this district are said to be badly affected by rot. An elevator for the storage of beans is being erected by a local firm; this will improve the market for beans.

Manufacturing.—The demand for manufactured wares continues fairly good. The supply of labour is more plentiful, and firms who use raw materials imported from the United States state that the supply is much more easily obtained than it was a year ago, materials, such as timber, being now freely offered which formerly had to be sought after. The local flour mills were very busy, and are reported behind on orders, although running twenty-four hours per day.

Railroad construction and employment.—Work on the Pere Marquette Railway Company's locomotive machine shops progressed well during October. The buildings are enclosed and machinery is being installed.

* A report of a meeting of employees of the M.C.R. Co. to discuss the establishment of a pension fund will be found on another page of the present issue of the *Labour Gazette*.

The car shop and round house will be built in the spring.

CONDITION OF PARTICULAR TRADES.

Building trades.—There are no changes in conditions to report in these trades. All building mechanics were very busy, and much building is under way. The new Carnegie public library is yet in the foundation stage, and will prolong the work of bricklayers until late in the season.

Metal, engineering and shipbuilding trades.—In these trades there was little change during the month. Foundry workers were busy.

Woodworking and furnishing trades.—The planing mill business was very busy, and one local firm was compelled to run its mill overtime during the entire month, so great was the demand for carpenters' furnishings.

Printing and allied trades.—Printers continue very busy.

Clothing trades.—Journeyman* tailors reported trade normal for the season of the year. Garment workers were a little slacker, as it is between seasons, and the work for next spring has scarcely got under way.

CHATHAM, ONT., AND DISTRICT.

Mr. John R. Snell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions show but little change from last month. The building trades continue active; a large block of stores and offices are being erected, and several large warehouses and stores are under construction in different parts of the city. The only sign of slackness is in the laying of cement sidewalks, caused by unfavourable weather conditions. There were few idle men to be found in any trade. Railway transportation was active, and wholesale and retail trade very good. No changes in the rates of wages or hours of labour were reported, and no trouble in the labour market occurred.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers who raised sugar beets this year say that the crop has been an excellent one. One farmer reported that he had shipped fifty tons and eleven car loads of beets to the factory at Wallaceburg, for which he realized \$1,500. They were raised from twenty-five acres of land.

Manufacturing.—All local factories were running full time with all hands employed.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers, masons, carpenters, lathers, plasterers, painters and paperhangers, gas and steamfitters, plumbers, stonecutters and builders' labourers were all fully employed.

Metal, engineering and shipbuilding trades.—Conditions in the metal and engineering trades were satisfactory, work being fairly plentiful.

Woodworking and furnishing trades.—Those engaged in the woodworking and furnishing trades were fully employed.

Printing and allied trades.—Printers, pressmen and bookbinders reported trade very good.

Clothing trades.—Journeyman tailors and boot and shoe workers were busy.

Food and tobacco preparation.—Bakers, confectioners, butchers, cigar and tobacco workers had steady employment.

Leather trades.—Harness makers and saddlers were all busy.

Miscellaneous.—Barbers, clerks, delivery employees, hotel and theatre employees were fully employed.

Transport.—All classes of railroad men, teamsters and express men were well employed.

Unskilled labour.—Employment was fairly satisfactory.

WINDSOR, ONT., AND DISTRICT.

Mr. D. Mitchell, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

October was a month of general activity, and all classes of labour were well em-

ployed. In the case of carpenters, the supply has not been equal to the demand, as a large number of buildings have yet to be completed and others are being started. A company from Detroit, Mich., is erecting a building 140 x 35 feet, in which to manufacture masonry supplies; it will employ about 25 workmen. The Canadian Pacific Railway Company has a large gang of men employed building new warehouses and docks and repairing the old one. It is expected that these improvements will be complete in about two months. Pavement and sidewalk construction work still furnishes employment for a large number of men and will continue to do so as long as the weather remains favourable. The railroads reported increased shipments during the month. Retail merchants had an excellent month, but wholesale business appeared to be slightly depressed, a fact attributed to the interest taken in the approaching general election.

Street car employees, to the number of 50, have received an increase of $\frac{1}{2}$ a cent an hour, making their present rate of pay 17 $\frac{1}{2}$ cents an hour.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers were all busy husking corn, picking apples, and at fall ploughing. The corn crop was fair throughout the county, and a good deal better than was expected. Prices for farm produce were good, potatoes fetching 50 cents a bushel, butter 20 cents a pound, eggs 25 cents a dozen, and chickens 13 to 15 cents a pound.

Manufacturing.—Manufactories were running full time, with full staffs.

Railroad construction and employment.—The work of rebuilding 42 cabooses for the Buffalo division of the Wabash Railway was actively under way, the cars being made more comfortable for the employees.

CONDITION OF PARTICULAR TRADES.

Building trades.—The building trades are still rushed. Bricklayers, stone masons and builders' labourers were busy. Carpenters were all employed, and additional

good workmen are wanted. Lathers and plasterers were all working, and painters were busy. Gas and steamfitters and plumbers had all the work they could handle.

Metal, engineering and shipbuilding trades.—Conditions still continue satisfactory in nearly all of these trades. The malleable moulders were busy. Machinists, electrical workers, steam engineers and linemen were well employed. Blacksmiths, sheet metal workers and horseshoers had plenty of work.

Woodworking and furnishing trades.—There is plenty of work in the furnishing trades. Planing mills, carriage and wagon shops were running to their full capacity.

Printing and allied trades.—Printers and pressmen were very busy, in some instances working overtime.

Clothing trades.—Tailors report trade fairly good, and rapidly improving.

Food and tobacco preparation.—Bakers, butchers and meat cutters reported a good month's business. Cigarmakers and tobacco workers were all busy. The tobacco trade has greatly increased here during the past year.

Leather trades.—Leather workers were all employed.

Miscellaneous.—Barbers, clerks, stenographers, delivery and hotel employees, and laundry workers were all busy.

Transport.—Railroad workers in all lines were busy in consequence of the exceptionally heavy transportation business. Steamboat employees up to the present time have been very busy. Teamsters and expressmen were fully employed.

Unskilled labour.—Work for unskilled labour was fairly plentiful, and labourers were in demand.

SAULT STE. MARIE, ONT., AND DISTRICT.

Mr. E. Barry, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour conditions were never so favourable in this locality as at the present time.

There is not a man idle in the vicinity, though there is little demand for extra labour, excepting in the lumbering industry, the present supply appearing fully equal to the demand.

All the *lumber firms* were apparently as busy as last year, and the Lake Superior Company much more so. The latter company has now about 14 camps in operation, a decided advance on last year. The company's saw mill has been shut down for about three weeks for lack of material, with not much prospect of it resuming operations until next May. On the other hand the charcoal plant has again started up; this comprises a plant for the distillation of wood alcohol with acetate as a by-product. The plant has a capacity of about 900 barrels of alcohol per month, and employs in all about 500 men. The charcoal resulting will be used in a special blast furnace, which will be blown in as soon as the supply of charcoal is sufficient for continuous operation. The coke furnace is now in operation, and is exceeding expectations, its normal capacity is 150 tons of pig iron every 24 hours, but it has actually produced as high as 171 tons. The steel plant is also doing exceptionally well, making its record output on the 25th instant. The quality of the rails turned out is considered by experts to be equal to any made on the continent. At the present time American workmen are being employed in the positions requiring technical knowledge, that particular class of labour not being available here, but, judging from the number of applications for citizenship made at the last court of assize, by far the larger number of these will become Canadians. In the town empty houses are becoming scarce, and some building is going on. Real estate has again begun to move, and the outlook is generally bright.

The sudden death of General Manager Shields has thrown a gloom over the town, which is hard for an outsider to estimate. His work in effecting the re-organization of the company was much appreciated, and the district feels that it has lost, from a

material point of view, one of its most valuable friends.

Cost of living here is somewhat higher than in the East. Potatoes cost 60 cents per bushel; hardwood, \$5 to \$5.50 per cord; coal, \$8 per ton; meat, from 8 to 15 cents per lb., with everything else in proportion. House rent is not so high as it was, as the houses are not all filled up, although they are being rapidly rented. A good house can be secured for from about \$8 to \$10 per month.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—Most of the saw mills were working, but will shut down for the winter very soon. The men employed around the mills in the summer work for the most part for the same companies in the woods during the winter, so that practically the workmen experience no cessation of employment.

Mining.—The mining industry is very active in the district, both for gold, iron and copper. It is expected that Bessemer ore will be discovered in large quantities both in the Rainy River district and Algoma.

CONDITION OF PARTICULAR TRADES.

Building trades.—These trades were exceptionally busy.

Food and tobacco preparation.—Bakers and confectioners reported trade excellent, one-and-a-half pound loaf selling at 7½ cents. Butchers and meat cutters reported trade good. There is but one cigarmaker in town, and he is doing very well.

Miscellaneous.—The miscellaneous trades had plenty of work, with wages slightly above the average. A good man can find work here at any time.

Transport.—All engaged in the transportation business were employed, but there does not seem to be room for any more at present. Street railway employees were all working. Carters and draymen had plenty to do.

Unskilled labour.—The demand seems to be well filled, excepting in the woods.

DISTRICT NOTES.

Fort William.—A new mill will be erected by the Ogilvie Flour Mills, to cost in round figures \$200,000, and to have a capacity of three thousand barrels of flour per day. The mill will be fifty by one hundred feet and five stories high, and is to be ready for grinding next year's crop.

WINNIPEG, MAN., AND DISTRICT.

Mr. John Appleton, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

During October the supply of labour generally has been fully absorbed. The weather was very favourable for outdoor work and great progress was made. Towards the latter part of the month there was an immigration into the city of farm help and others who are now on the look out for occupations that will keep them employed during the winter months. The large number of men employed on the many public works in progress, it is anticipated, will have some difficulty in placing themselves in employment during the winter months. The number is much greater than in previous years and there does not appear to be a corresponding increase in the sources of employment during the months of December, January and February. It is pointed out by contractors and others that men for the taking out of ties will not be required in larger numbers than last year. The reason for this is not that the demand is any less but that the cost of getting them out has increased without a corresponding advance in the contractors' prices. An adjustment of prices is looked for. Contractors, however, are hesitating, and so far the preparations for the usual winter work are late. The immense output of ties and firewood during the last few years has practically cleared the territory adjacent to the railways, consequently the extra teaming has enhanced the cost of getting out the ties and the wood. In addition to this the wages, feed and teams have all become more costly to the contractor. Until these expenses are met by

the construction of spurs and branch lines into the timber districts there is every appearance of a labour congestion in the winter months. The conditions are such at present that it will take some time for adjustment in order that the large numbers of labourers on construction work in the summer can be absorbed during the winter. Industrial activity has been somewhat accelerated by the promising harvest returns and receipts of grain. A casket factory employing several hands was burned down causing temporary disemployment; an extensive sheet metal and tinworking factory, and lithographing factory were burnt to the ground. Business activity is general and the volume of trade is increasing steadily. Bank clearings, grain receipts, custom returns all point towards a continuation of the remarkable growth of Winnipeg.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—The farmers have got through most of their threshing. At some points the machines have been stored away until the next season. The yield has been somewhat better than was generally estimated. A return published by the Canadian Pacific Railway Company shows the movement of the grain to have been about two weeks later than it was last year. Up to the end of October, however, the total amount of grain marketed at C.P.R. points is slightly greater this year than it was last.

Railroad construction and employment.—The railroad construction contractors are having great difficulty in keeping their gangs together for the completion of the season's work. All employment agents report their inability to get men to go out at this season of the year. They prefer to either go into the bush or stay in the city for the winter.

CONDITION OF PARTICULAR TRADES.

Building trades.—Building continues with unabated activity. Not only are many structures approaching completion but others are being commenced. Foundations are being put down ready to receive the

superstructure in the spring. The new depot for the C.P.R. and the large subway across Main Street are rapidly nearing completion. All over the city equally large undertakings are in progress. In no case, however, is there any dearth of men.

Metal, engineering and shipbuilding trades.—The engineering establishments are all busy and their works are gradually extending.

Woodworking and furnishing trades.—Woodworking factories are struggling with very large demands for finishing work.

Printing and allied trades.—The printing trades were busy. A small strike took place which affected about twelve members of the typographical union. The firm concerned was the Moore Printing Co. The point in dispute was as to whether a stockholder of the firm should be regarded as an employer or an employee. It appears the Moore Co. installed a Lanston Monotype machine and that it was operated by a partner in the firm. The union contends that this partner lives on the salary he gets and not from dividends, therefore if he operates the machine he must be regarded as a non-union man with whom members of the union cannot work. In consequence twelve members of the printers' union left work on the morning of October 26. The strike still continues.

In the *clothing, leather, and miscellaneous* trades, activity and prosperity prevail. A large bakery, employing about 30 hands, was burnt, but temporary quarters immediately erected obviated any loss from disemployment.

DISTRICT NOTES.

The C.P.R. boilermakers were in session with William Cross, assistant to second vice-president Whyte, all afternoon of Thursday, October 6, and a satisfactory settlement of their differences was arrived at. A month ago an increase of one cent per hour was granted, and the men returned to work after a strike of a few hours' duration, the understanding being that a further increase was to be made, and yester-

day this increase, amounting to one-half cent per hour, was decided upon and adopted. On the morning of the same day the boilermakers' helpers met Mr. Cross to discuss the settlement of their portion of the schedule. The new wage scale places the C.P.R. men on the same basis as the G.N. R., and applies as far west as Swift Current.

BRANDON, MAN., AND DISTRICT.

Mr. S. P. Stringer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

All classes of labour at the present time are fully employed, both skilled and unskilled. A large number of new comers arrived during the latter part of the month, but they seem to have found employment principally with farmers and with threshing gangs.

There has been no new industry started and none closed.

Building contractors report a large amount of additional work, owing to the number of constructions to be completed before winter sets in, viz., the new water works, hotels, the public school, the Young Men's Christian Association building, and several private residences and business places. The Canadian Pacific Railway Company is erecting a large new freight shed, seven hundred feet long, in a central locality.

Unusual activity prevailed on both the Canadian Pacific Railway and the Canadian Northern Railway, heavy shipments of grain passing through for the east every day. Trains from the east bring large quantities of merchandise for this city, and also for the branch lines.

Wholesale and retail merchants report trade exceptionally good, and there has been no unrest in the labour market.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—About eighty per cent of the threshing is completed in Manitoba and the Territories and the balance is expected to be completed by the end of November. Threshing returns continue to

demonstrate that the general yield of all kinds of grains has been large. The average yield of wheat in this district is 18 to 20 bushels; and of oats, 45 bushels per acre.

Manufacturing.—The manufacture of building supplies is very active, this being the principal manufacturing industry of the city. Flour mills report business very active, and staffs and premises are being increased. One of the principal firms stated that it had made more profits last year than in any previous year since the mill had been in operation.

Railroad construction and employment.—The Canadian Pacific Railway Company's branch from Arcola to Regina is expected to be opened and in operation this month. The company has built substantial stations along the line. A number of gangs employed on construction work have been withdrawn from the Kirkella extension to assist in the transportation of grain.

CONDITION OF PARTICULAR TRADES.

Building trades.—With bricklayers, masons, carpenters and joiners trade was exceptionally busy and there are openings in this line. Among lathers and plasterers also the supply was not equal to the demand. Painters and builders' labourers had a good month, and plumbers were fully employed. Gas and steamfitters and stone cutters were busy.

Metal and engineering trades.—Trade was fairly good with iron moulders and machinists. Boiler makers and sheet metal workers were busy. Blacksmiths had a good month, but horseshoers were not very busy. Jewellers had a fair month.

Woodworking and furnishing trades.—Woodworkers were very busy and upholsterers active. Pattern makers also had a good month.

Printing and allied trades.—Printers and pressmen had an exceptionally good month.

Clothing trades.—Journeymen tailors were exceptionally busy. Garment workers and boot and shoe workers report trade good.

Food and tobacco preparation.—Bakers and confectioners report an active month. Butchers and cigarmakers were also well employed, but icecutters and drivers were slack.

Leather trades.—Tanners and curriers were quiet, but leather workers had a good month.

Miscellaneous.—Barbers were busy and delivery employees very busy. Hotel and restaurant employees had a very active month, and laundry workers and clerks were well employed.

Transport.—All employed with transportation were busy, a number of engineers having been brought from eastern portions of the Canadian Pacific Railway system to assist in handling the crop. Freight handlers, teamsters and expressmen were very busy.

Unskilled labour.—The threshing gangs have employed all the unskilled labourers, and there are very few idle men of this class in the city.

CALGARY, N.W.T., AND DISTRICT.

Mr. John Gillespie, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The present has been a very busy season throughout this section, a great amount of work having been done and much remaining to be done before the close of the year.

The influx of immigrants on a heavy scale created a demand for housing accommodation, and the consequence has been an exceptionally busy season in the building trades.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—A good season is reported, most of those who put in crops having reaped a good harvest.

Mining.—The stone quarries in this district have been very busy getting out building stone for Calgary and other towns throughout the neighbourhood.

CONDITION OF PARTICULAR TRADES.

Building trades.—Masons, bricklayers, stonecutters, carpenters, plasterers, painters and roofers have had a good season. A number of the larger jobs, however, are nearing completion, and the end of the season for outside workers is in sight. The inside trades, on the other hand, are anticipating active conditions throughout the winter.

Woodworking and furnishing trades.—Woodworking mills have been very busy, a number working overtime in order to keep up with the demand for builders' supplies.

Printing and allied trades.—Printers were busy.

Leather trades.—Leather workers were all well employed, and the outlook is favourable at present.

Unskilled labour.—The supply and demand for labour of this class has been about evenly balanced for some time. Early in the summer incomers found some difficulty in obtaining work. After the beginning of the irrigation canal, however, employment was offered for most of those who desired it. The construction of sidewalks and sewers, and other municipal improvements, also offered employment to many.

DISTRICT NOTES.

Red Deer.—The building trades have been busy throughout the season, and considerable work remains to be done. A water works system is being installed.

Lacombe.—The construction of a short branch by the Canadian Pacific Railway from this point has given employment to a good many during the season. Building also has been active.

NEW WESTMINSTER, B.C., AND DISTRICT.

Mr. Geo. Hargreaves, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

There has been little change in the labour market during October. Labour was gen-

erally well employed, and there was a demand for carpenters and railroad construction men. There is no demand for painters and plumbers, as was the case last month, owing to the fact that no contracts were made for outside work. The Great Northwest Telegraph Company has a large force of men stringing a new Western Union wire between Seattle and Vancouver; the wire will be used for brokerage and Associated Press purposes. General business activity prevailed, especially during the holding of the annual exhibition, which a large number of people attended from all parts of the province, adding largely to local trade.

Wholesale and retail trade was very fair, and no changes were reported in the rates of wages or hours of labour during the month.

CONDITION OF LOCAL INDUSTRIES.

Agriculture.—Farmers were busy marketing crops of fruit. Apples were quoted at from 75 cents to \$1 per box of 50 lbs.; pears at \$1 to \$1.25 per box. All kinds of roots were plentiful and sold at low prices.

Fishing.—The cohoes are still running and are fairly plentiful. A rate of 15 cents a fish is being paid, dog salmon bring 5 cents per fish.

Lumbering.—A large trade is still being carried on by the mills, both local and export.

Manufacturing.—The local manufacturing industries have all been very busy, and prospects are exceptionally bright for some time.

Railway construction and employment.—Several parties of surveyors were employed laying out rights of way for several railway companies, and a large amount of construction work will be carried out during the winter months.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work in the building trades continues good, in consequence of a large number of small dwellings being rush-

ed to completion before the rainy season commences. Carpenters report the demand equal to the supply. Bricklayers and masons were steadily employed, and plasterers reported work very plentiful, with some demand for additional help. Painters were fully employed, with prospects for work good for some time. Plumbers and steamfitters reported work plentiful, all men employed and a slight demand for help. Machinists and iron workers were fully employed, with orders ahead for some time. Shipbuilders and caulkers report work scarce, with poor prospects.

Woodworking and furnishing trades.—Carriage and wagon makers were busy on new and repair work. Car builders were still employed replacing the work destroyed by fire, and have orders on hand sufficient to provide work for the next twelve months. Shingle weavers report all hands employed.

Printing and allied trades.—Printers reported all members of the craft fully employed, both on job and newspaper work.

Clothing trades.—Tailors were busy. Boot and shoe workers, both on new and repair work, reported work plentiful.

Food and tobacco preparation.—Cigar-makers were all employed, with prospects favourable.

Transport.—Steamboat employees were very busy, a good passenger and freight business being carried on. Street railway employees reported all members employed and prospects very encouraging.

Unskilled labour.—A large amount of work is under way, and a demand is still being made for men of this class, both for farm and general work.

DISTRICT NOTES.

Kamloops.—Building operations have again become active, and carpenters, stonemasons and bricklayers are taking every advantage of the splendid weather for outdoor work. Principal building under construction is the new premises of the Canadian Bank of Commerce, a two story solid brick and stone building, to cost about \$15,-

000. A three story brick veneer addition to a hotel, at a cost of about \$7,000, was also under way. Another hotel has been enlarged by the addition of twenty rooms. The Board of Managers of the Royal Inland Hospital will shortly take up the matter of enlarging the hospitals, as, for some months past, this institution has been taxed to its full capacity. A warehouse and a number of new residences have been completed, but the demand for homes is by no means diminished, consequent upon the influx of people who have come to Kamloops to reside.

VANCOUVER, B.C., AND DISTRICT.

Mr. Geo. Bartley, correspondent, reports as follows :—

GENERAL CONDITION OF THE LABOUR MARKET.

Labour has been well employed during the month, considering the lateness of the season for building. Unskilled labour has not been in demand, nor is likely to be till next spring. During the first half of the month the fishing crews of the New England Fish Company on its three steamers, the *New England*, *King Fisher* and *Columbia*, went on strike. These men, numbering about 70, are deep sea fishermen who catch halibut. The men had a conference with the manager and laid before him the following proposition for settlement :—

During the next six months the company to pay the fishermen at the rate of $1\frac{1}{2}$ cent per pound for fish ; at the expiration of six months to pay 1 cent per pound for the next six months, or as an alternative to pay a straight $1\frac{1}{2}$ cent per pound for a period of twelve months.

In reply to this offer the manager said that the company would agree to pay \$1.15 per 100 lbs. for the next 4 months, fish under 10 lbs. weight and scarred fish to be half-price, and for 8 months next following, to pay 1 cent a lb. under same restrictions respecting small and scarred fish. The men declined this and consequently no settlement of the difficulty has been arrived at. The boats are being manned by non-union crews.

The building inspector reports that the increase in assessment valuations will, this

year, be the largest in the history of Vancouver. Several blocks of new houses have been built. It is a fact that there is hardly a vacant house for rent in the entire city.

CONDITION OF PARTICULAR TRADES.

Building trades.—Lathers and plasterers, masons, bricklayers, carpenters and joiners, were fairly busy during October, with a slight demand for extra good men. Painters and decorators and paperhangers report a surplus of men. Plumbers and steam-fitters were well employed.

Metal, engineering and shipbuilding trades.—Sheet metal workers, steam engineers, blacksmiths, moulders and boiler-makers were fully employed. Machinists report a few idle men. Jewellers say trade is picking up and look forward to a busy season. Electrical workers report trade good, with all well employed. There are about 60 journeymen in Vancouver and a dozen helpers.

Woodworking and furnishing trades.—Woodworkers, upholsterers and pattern-makers report all hands at work, with prospects encouraging.

Printing and allied trades.—Job offices are running with reduced forces, but a good holiday trade is expected. With the newspapers there is no demand for operators.

Clothing trades.—The tailors report that they are fully employed, with prospects very encouraging. Garment workers are busy.

Food and tobacco preparation.—Bakers and confectioners report plenty of work, but with a few idle men. Butchers and meat cutters are fully employed. Cigar-makers report a number of hands out of employment, with prospects uncertain.

Leather trades.—Workers on horse goods were very busy.

Miscellaneous.—Barbers and delivery employees were well employed during the month. Clerks and stenographers are not in demand, several being idle and advertising for positions. Hotel and restaurant em-

ployees, steam and Chinese laundries had an active month.

Transport.—The transportation companies are worked to their full capacity, the boats being exceptionally busy. Carters, hack drivers and draymen report business only fair.

Unskilled labour.—There are a large number of this class out of work, chiefly on account of the lateness of the season.

VICTORIA, B. C., AND DISTRICT.

Mr. J. D. McNiven, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

Fair conditions of employment prevailed throughout the month of October, without marked activity in any particular branch of trade. The most noticeable feature of the month was the large extent to which unskilled labour was employed. The exceptionally fine weather which prevailed being favourable for outdoor work. The metal and shipbuilding trades are quiet, but the building trades remain unusually active. Compared with last month conditions generally are unchanged. Harmony prevails between employers and employed.

Work has been commenced on the freight sheds to be constructed on the new wharf of the Canadian Pacific Railway Company. The sheds will be 255 x 61 feet, and the contractor expects to finish the work by the middle of November. Tenders are also invited for the erection of a seven-story stone and brick hotel, which the railway company intends putting up here.

The telephone cable connecting the island with the mainland has been laid, and communication will be established between Victoria and Vancouver about the first week in November. The toll for conversation between these points will be 50 cents per minute.

CONDITION OF LOCAL INDUSTRIES.

Lumbering.—All mills in the city and district are running full time and shipping the usual amount of lumber.

Manufacturing.—Business generally is quiet, and employment is not as steady as throughout the summer.

Other industries.—Several vessels of the sealing fleet have returned from Behring sea and report a small catch.

CONDITION OF PARTICULAR TRADES.

Building trades.—Work generally was plentiful. Bricklayers and masons, builders' labourers, carpenters and joiners and lathers and plasterers were fully employed. Painters were fairly well employed and plumbers were busy. With stonecutters work is dull.

Metal, engineering and shipbuilding trades.—Iron moulders, machinists and steam engineers reported trade dull. Electrical workers and linemen were well employed, and carriage blacksmiths were busy. In the machine shops employment was fair. Boiler makers and iron shipbuilders and shipwrights and caulkers report trade as being very dull. Sheet metal workers and horseshoers were fully employed.

Woodworking and furnishing trades.—Woodworkers, upholsterers, and carriage and wagon makers were fairly well employed.

Printing and allied trades.—Printers, pressmen and bookbinders have been exceptionally well employed throughout the month.

Clothing trades.—Journeymen tailors report an improvement in trade and all were well employed. Garment workers were busy.

Food and tobacco preparation.—Bakers, butchers and cigarmakers reported fair conditions.

Leather trades.—Harness makers and saddlers were well employed.

Miscellaneous.—Barbers, clerks and delivery employees report conditions favourable. Laundry workers were well employed.

Transport.—Steamboat men, steamboat firemen, ship labourers, longshoremen and street railway employees were all fully employed. Hack drivers, teamsters and expressmen reported business active.

Unskilled labour.—Work was unusually active and employment plentiful, with no idle men on the market. These favourable conditions, however, are not expected to continue during November.

NANAIMO, B.C., AND DISTRICT.

Mr. A. E. H. Spencer, correspondent, reports as follows:—

GENERAL CONDITION OF THE LABOUR MARKET.

The condition of the labour market in this district during the month has been varied; while some classes of labour have been well employed there have been a great many unemployed in the mining industry, though an improvement is expected before long.

In commercial circles business is not very active, owing to so many men being out of work and on short time.

There has been no changes made in the rate of wages, but there have been several concessions made to the coal company, which will amount to a reduction.

There is no evidence of any labour unrest in this district.

CONDITION OF LOCAL INDUSTRIES.

Fishing.—There is hardly anything doing in the fishing industry at the present time.

Lumbering.—In the lumber industry work is quiet for the season of the year.

Mining.—In quartz-mining there is little activity, and, although in some parts of the district work is steady, on the west coast of the island there is very little doing. In the coal mining industry, while the mines in the district are working there are large numbers of men out of work.

The Western Fuel Company, after rebuilding the pit-head on its principal shaft, but only on a single shaft basis, started up again. The mines are working week about until such times as fresh places are opened up, and there are a good many day hands idle. About four hundred men went to work in the mines on September 26 for the first time since the fire several weeks ago.

As about five hundred men were employed underground at the time of the fire, about one hundred men are still out of work by reason of the fire. In addition several miners employed at Harewood, which closed down three months ago, are still out of work. The Western Fuel Company announced that old employees would be taken on at the mines in preference to new comers.

CONDITION OF PARTICULAR TRADES.

Building trades.—Bricklayers and masons have been fairly well employed, and carpenters and joiners were well employed during the month. Among painters there has been the usual fall work. Plumbers reported business fair.

Metal, engineering and shipbuilding trades.—Blacksmiths have been fairly well employed during the month.

Printing and allied trades.—Printers report work as good.

Clothing trades.—Tailors report business as quiet for the time of year.

Food and tobacco preparation.—Cigar-makers were only fairly well employed.

Transport.—With teamsters and expressmen business was good.

Unskilled labour.—Unskilled labourers, while fairly well employed during the fall, report work as getting scarce.

DISTRICT NOTES.

At *Ladysmith* the smelter is running steadily, and a large force of men is employed at the Extension coal mines, which are working fairly steadily; there are plenty of men to fill all requirements.

At the *Cumberland coal mines* work is reported active.

INSPECTION OF INDUSTRIAL ESTABLISHMENTS AND CONDITIONS OF EMPLOYMENT IN FACTORIES IN CANADA.

FOR the more effective enforcement of the laws enacted in the different provinces of the Dominion for the protection of persons employed in factories, provision is made in most of such Acts for the appointment of officers whose duty it is to visit periodically the establishments of which the several Acts take cognizance, to secure a proper observance of the provisions of the statutes, and of such additional regulations as may be issued from time to time by the Lieutenant-Governors in Council of the provinces under statutory authority. The reports published from time to time by the inspectors so appointed, setting forth the results of their investigations and recommendations, throw much light, not only on the practical application of the legislation itself, but also on the general industrial situation and the condition of factory labour. In the present article a resume is given, in brief and readily accessible form, of the work and

results of factory inspection in Canada, based upon the various reports of inspectors that have appeared, numbering over one hundred separate documents, and, by a careful collection and rearrangement of the material certain of the more characteristic features of employment in factories in Canada, the working methods under which the different factories Acts have been enforced, is illustrated, as well as some of the practical improvements in the condition of labour and industry that have resulted from their application.

Factory Legislation and Reports.

The first Factories Act in Canada was that passed by the province of Ontario in the year 1884. The province of Quebec followed with a similar Act in 1885, Manitoba in 1900, and Nova Scotia in 1902. In New Brunswick an Act for the protection of persons employed in factories was introduced during the session of the legislature

of the present year, but was subsequently withdrawn. Prince Edward Island has no statute on the subject, and in the North-west Territories, also, there has been little demand for legislation of this kind. In British Columbia an Act requiring the systematic inspection of steam boilers was passed in 1901, but the inspection of industrial establishments has not as yet been provided for.*

Only three of the provinces have appointed inspectors to aid in the enforcement of the provision of the Factory Acts, viz., Ontario, Quebec and Manitoba. In the first named three inspectors were appointed and entered upon their duties in July, 1887, in Quebec three inspectors were appointed in May, 1888. In both provinces these numbers were increased subsequently. In Manitoba the first inspector was appointed in May, 1901.

In Ontario and Quebec annual reports have been presented to the legislatures by the factory inspectors without intermission since the dates of their appointments. In Manitoba, though the work of inspection has been begun, no formal report or return has as yet been issued. In what follows, accordingly, reference is made to conditions prevailing in Quebec and Ontario alone.

Provisions Governing Appointment and Duties of Factory Inspectors.

The following is a brief summary of the provisions of the Factories' Acts passed in the several provinces in so far as they relate to the appointment and duties of factory inspectors :—

NOVA SCOTIA.—Provision is made (1) for the appointment of one or more in-

spectors, at a salary to be determined by the Lieutenant Governor in Council, who has also the power to assign the locality in which the inspector is to act. Provision is also made for the appointment of a female inspector.² The general powers of the inspector are to enter and inspect all factories, if necessary, under the protection of a constable, for the general purpose of ascertaining whether the provisions of the Act are being complied with.³ In this connection he may require the production of any register or document,⁴ and examine, either alone or in the presence of witnesses, and, if he so determines, under oath, any person in the factory, whom he has reasonable cause to believe to have been within the two preceding months employed in the factory.⁵ Employers and agents must furnish the means required by the inspector for the exercise of his powers,⁶ though the inspector must obtain written authority from the Governor in Council or a warrant under the hand of the justice of the peace before he may enter a room or a place used as a dwelling place as well as a factory without the consent of the occupier, and must at all times, if required, on applying for admission to a factory, produce the formal certificate of his appointment.⁸ The delaying of an inspector, the failure to comply with the summons of the inspector, or to produce a certificate or document required by the inspector, the concealing or attempting to conceal, children, young girls or women from appearing before the inspector, shall be liable to a penalty not exceeding \$100, with the alternative of a term of imprisonment not to exceed three months.⁹ The inspector is required to report annually or as the Governor in Council directs to the legislature.¹⁰ Other provisions of the Act which have a bearing on the powers and duties of

* A special article describing in detail the legislation that has been passed in Canada for the protection of persons employed in factories, was published in Vol. 1 of the *Labour Gazette*, at pages 104 and 182. The reader is referred to this article for a statement of the nature of this legislation, the various prescriptions and restrictions regarding employment which it introduced, and such other details as the appointment and duties of inspectors, punishment for infringements, &c.

inspectors are as follows : For the purpose of insuring that certain provisions of the Act relating to the employment of children, young girls or women, are being observed, the inspector may take with him into any factory a physician, health officer or other officer of the local sanitary authority.¹¹ In further reference to the same class of employees the inspector may, by so directing in writing, forbid an employer to allow any child, young girl or woman to take meals in any room wherein any manufacturing process is then being carried on, and he may also ask the employer to provide at his own expense a suitable place in the factory or in connection therewith for the purpose of a dining room for the employees.¹² The inspector is also given certain general powers exempting employers, in the case of an accident to the machinery from the observance of the provisions of the Act with regard to the hours of labour of these classes, in order that the loss of time from the accident may be made up sufficiently to meet the requirements of the trade.¹³ The extent, however, to which an inspector may perform this exemption is strictly limited to a notice of the hours between which young girls and women are to be employed during the period of the exemption, and must be signed by the inspector and hung up in a conspicuous place in the factory.¹⁴ The inspector may also direct, by a written notice, that no machinery other than steam engines may be cleaned while in motion.¹⁵ He is also given discretion as to the guarding of elevators, trap doors, &c.¹⁶ The providing of ropes from the windows of rooms above the ground floor in factories over two stories in height is also left to the discretion of the inspector as well as the general provisions of fire escapes in factories three or more stories in height.¹⁷ The inspector must be notified of any fire or

accident in a factory occasioning bodily injury to any person employed therein whereby he is prevented from working for more than six days after an accident and of explosions whether any person is injured thereby or not within twenty-four hours.¹⁸ A fatal accident must also be reported to an inspector within twenty-four hours of its occurrence. Every person occupying a factory must serve on the inspector within one month a written notice of the name, location, and other particulars relating to the factory, in the form of a schedule appended to the Act.¹⁹ Matters of the posting of notices are also largely left to the discretion of the inspectors.²⁰ The inspector is also given considerable latitude in determining against whom proceedings are to be brought in cases of offences against the Act.²¹ In summary proceedings for penalties under the Act the information must be laid at the most within three months after the offence has come to the knowledge of the inspector.²²

QUEBEC.—The appointment of inspectors and sanitary physicians for the carrying out of the Quebec Act providing for the 'safety of persons employed in, and sanitary conditions of industrial establishments' are duly provided for in the Quebec Act, the term 'Industrial Establishment' being defined as meaning 'manufactories, works, work shops, work yards, mills, and all kinds of other dependencies,' though any part of such establishment used as a dwelling house is not to be regarded as a part of the establishment.¹ As in the case of Nova Scotia, the remuneration of these officers is in the hands of the Lieutenant Governor in Council.² The Quebec Act provides also for the appointment of more than one inspector, and of a chief inspector, while the number of sanitary physicians may be one or more, the latter being given

special authority to supervise, under the board of health of the province, the sanitary conditions of industrial establishments and the execution of sanitary regulations made by the board.³ Both classes of officers are under the control and direction of the Minister of Public Works, to whom they are required to present an annual report. On entering into office a duly prescribed oath is to be taken.⁴

The powers and duties of these officers are as follows :⁵ They may enter at all reasonable times, day or night, the establishments over which they have jurisdiction; they may require the production of registers and documents, and examine and take copies of the same if they wish, and hold inquiries whenever they deem proper, examining witnesses under oath and at the expense of the employers where the latter are in default. In the general work of inspection they may get a constable to accompany them if they fear they may be molested in the execution of their duty. They may also be present at inquests held by coroners and at inquiries held by fire commissioners at Quebec and Montreal, in cases of fire and accidents in an industrial establishment, and examine a witness with the view of ascertaining the cause of such fire or accident. They have, further, the right to make any suggestion they may think advisable to the proper authorities in the interest of the health and safety of employees in industrial establishments. Any one who wilfully delays one of these officers or fails to comply with an order or summons received, or concealing or attempting to conceal a child, young girl or woman from appearing to be examined, shall be liable to a fine not exceeding \$30 and costs and imprisonment not exceeding three months in default of payment, or if the offence occurred in the night time, to a fine not exceeding \$100 and costs, or to imprisonment not exceeding six months in default of payment. Further re-

ference to the duties of inspectors contained within the provisions of the Act are as follows: The inspector may require the exhibition of a certificate to be signed by the parents, tutor or other person having the custody of a child, or young girl employed in the factory or the written opinion of a physician on the subject. An inspector may also order a new examination of children or girls already required to work in the factory by one of the sanitary physicians, and may, upon the advice of such physician, order the discharge of the employee examined as being under age or physically unfit.⁶ In further reference to the employment of these classes, the inspector may extend the hours of employment to twelve hours a day for a period not exceeding six weeks in order to make up lost time resulting from an accident to motive power or machinery.⁷ An employer must also notify the inspector within thirty days of the opening of a new establishment of his name and address, the name and location of the factory, the nature of the work, and the nature and amount of motive power therein. He must also notify the inspector in writing within forty-eight hours of any accident whereby a workman has been killed or has suffered serious bodily injury. He must, moreover, afford the inspector every means necessary for facilitating a thorough inspection of his establishment, carrying out the inspector's instructions with regard to the hanging up of notices, and furnish him with the necessary certificates from health officers and boiler inspectors.⁸ The dimensions and form of fire escapes must be approved by the inspector.⁹ The inspectors are also given instructions to prepare such notice of the provisions of the Act and of the regulations made under it as he may consider necessary to enable employers and employees in any establishment to become acquainted with their responsibilities and duties, adding his name and address to such notices.¹⁰ In-

spectors are also given discretion whether proceedings in cases of contravention of the Act shall be brought against the employer or the latter's agent, who may have been the actual offender, and who is held liable under the law to the same penalty as the employer. The prosecutions under the Act are instituted by the inspector and proceedings must be begun within three months after the offence has come to the knowledge of the inspector.¹¹

ONTARIO.—The Factories Act of the Revised Statutes provides for the appointment of an inspector to be paid such salary as may be appropriated for the purpose by the legislature and whose district is to be fixed by the Governor in Council.¹ The appointment of a female inspector is also provided for.² Such inspectors may, for the purpose of carrying out the Act, enter into and examine at all reasonable times by day or night, if they have reason to believe that any person is employed, any place which they have reason to believe is a factory. They may require the production of any register or document, taking with them a constable if serious obstruction in the execution of this duty is anticipated, their general duties being to ascertain whether or not the provisions of the Act are being complied with. Any person found in a factory or employed in a factory within the two preceding months may be examined by the inspectors and required to sign a declaration of the matters respecting which he was examined. Inspectors may also administer an oath to and summon any person to give evidence.³ Any person who wilfully delays an inspector or fails to comply with his requests or summonses, or to produce any certificate or document required by the inspector, or who conceals, attempts to conceal or prevents a child or any person from appearing or being examined by the inspector, is liable to a fine of \$30; the employer being liable also to a fine of

\$30 where the offence is committed in the factory. When the offence is committed at night the penalty is \$100.⁴ An inspector before entering a dwelling, however, without the consent of the occupier, must obtain authority to do so from the Lieutenant Governor in Council, or a warrant from a justice of the peace or police magistrate. In any case, moreover, the inspector must, if required, produce to an employer the formal certificate of his appointment.⁵

Other powers and duties of inspectors, expressed and implied, under the Ontario Act, are as follows:—

If the inspector so directs in writing, an employer must not allow any child, or girl or woman to take meals in any room wherein any manufacturing process is then being carried on, but must at his own expense provide suitable room in the factory or in connection therewith for the purposes of a dining room for persons employed in it.⁶ An inspector may also grant exemptions from the provisions of the law relating to hours of labour of children, young girls and women in cases where an accident to motive power or machinery, or certain trade exigencies requiring the making up of the amount of employment, though such exemption must not comprise more than 36 days on the whole in each twelve months, and certain added stipulations as to allowances for meal time.⁷ Inspectors may also direct places at which notices relating to hours of labour of children, young girls and women may be hung up, being signed by the inspector and employer.⁸ The employer, moreover, is subject also to the ruling of the inspector in matters relating to the health of the employees, the inspector being given the privilege of taking with him into any factory a physician, a health officer or other officers of the local sanitary authority.⁹

With regard to the safety of employees the inspector is likewise empowered to recommend the guarding of dangerous places, the forbidding the cleaning of machinery, other than steam engines, while in motion and to generally recommend such precautions as he may think necessary to guard against accidents.¹⁰ He is also expressly empowered to direct in writing any regulations made in that behalf, what means of extinguishing fire shall be provided and what appliances in the way of fire escapes, &c., are to be provided for the safety of the employees. The provision with regard to the providing of fire escapes is practically identical with that noted above, under Nova Scotia.¹¹ Similarly, the inspector must be notified of accidents, fatal or otherwise, explosions, &c., under a set plan. A notice must be sent to the inspector by any person beginning to occupy a factory, within one month, the notice containing the name of the factory, its location, the nature of the work and other particulars.¹² The putting up of notices in factories is also largely at the discretion of the inspector, it being obligatory that a notice with the name and address of the inspector shall be posted up in every factory.¹³ The inspector may also, in cases of contravention of the Act, decide as to whether the offence was committed with or without the knowledge of the employer and may proceed against the person whom he believes to be the actual offender.¹⁴ An annual or other report of the inspector must be laid before the legislature of the province.¹⁵

MANITOBA.—The Manitoba Factories Act¹, under the sections defining the appointment and powers of inspectors, is identical in form with the Ontario measure and in all but a few minor particulars is the same throughout, the Ontario Act being somewhat more inclusive, to meet the more varied in-

dustrial conditions falling within its jurisdiction.

Features of the Work of Factory Inspection.

The *extent of the field* to be covered made the work of inspection in its initial stages one of considerable difficulty. Moreover, a general ignorance of the character and significance of existing factory legislation prevailed both among employers and employees, and made it almost impossible, during the preliminary stages of the work, for the inspectors to do more than attempt an educational propaganda, bringing the provisions of the Act for the first time to the attention of those who were immediately affected by it.

Some hesitation was at first felt by the Quebec inspectors as to the *method* to be pursued in *apportioning the work* between them. Two of the inspectors were led in the opening year to make trial of a division of establishments on the basis of the class of manufactures therein carried on, in conjunction with a territorial division of functions, one inspector taking the textile industries in Montreal under his supervision and the other the cigar and tobacco factories, on account of individual acquaintance with these branches of manufacture. This arrangement, however, was not continued, the division by districts alone being found the most practicable. The territorial division adopted was, in the case of Ontario, a division into districts known as the western, central and eastern districts, and in the case of Quebec, into a Quebec, a Montreal West and a Montreal East division.

In Ontario the *number of inspectors* remained fixed for some time. In 1894, however, the addition of a female inspector was made, and in June of the present year a second female officer was added. Beyond a few slight changes in the boundaries, the divisions remained as originally determined. In Quebec a hygienic physician was added to the staff in 1891, and an inspector for the district of Three Rivers in the same year. The latter district, however, was not long

maintained. In 1886 the Eastern Townships division was added, and a final revision of the service by Order in Council, dated December 28, 1900, divided the province into the Quebec, Eastern Townships and Montreal divisions. In 1897 the two inspectors were added to the staff. The office of chief inspector for Quebec was created in 1893, being in the nature of the elevation of a member of the board of inspectors to the office of chairman and director of the proceedings of the staff. With regard to the number of inspectors at present employed, accordingly, Quebec ranks first with a total at the present time of six officers, two of whom are females, two inspectors covering the Montreal division, one the Quebec division and one the Eastern Townships division. Ontario has four inspectors covering the western, central and eastern sections of the province, with two female inspectors, who visit all factories in which female labour is employed. In Manitoba a single inspector, residing in Winnipeg, covers the field for the entire province.

The number of establishments visited by inspectors has varied considerably from year to year, and full returns are not always contained in the reports. In the opening year of inspection the officer for the western district of Ontario visited establishments employing 25,952 workpeople, while a total of 354 visits affecting 17,277 employees were paid by one of the Montreal inspectors. A year later the officer for western Ontario visited establishments employing 43,432 workpeople, of whom 35,685 were males. The number of annual visits subsequently paid was considerably greater as the administration of the law passed beyond the experimental stage. The negligence of the proprietors of new establishments in notifying inspectors of having started operations was general at first, but materially improved as the manufacturing public became familiarized with the legislation on this subject.

With the more rigid enforcement of the Acts much of the inspectors' time was consumed in attending courts to give expert

evidence in cases of suits brought for damages under the Act. Lawyers were often blamed, however, for instigating many of the suits that were brought in this way, and a method of arbitration was advised as a means of settling differences of this nature in a way satisfactory to all parties concerned.

In the case of Quebec the failure of the regulations to provide adequately for the travelling expenses of inspectors somewhat hampered the work in its initial stages, preventing many establishments in outlying sections of the country from being visited. The first appointment of the hygienic physician being without salary also confined this officer's operations within a comparatively narrow circuit. The failure to provide for travelling expenses was particularly felt at first in the Quebec district, which in the early years covered the entire easterly half of the province. The result was that outside of the city of Quebec, in which the inspector was located, few establishments were visited. The Montreal inspectors were also largely confined to the city limits owing to the insufficient funds for travelling. For several years this difficulty was the subject of repeated complaints by the inspectors. With a better subdivision of authority, however, and the enlargement of the staff of inspectors, conditions were considerably improved in this respect.

The enlargement of the scope of the *Factories Acts* from time to time, largely as a result of the suggestions of the inspectors, has considerably increased the duties of these officers. In Quebec, for example, the inspection of public buildings, under separate regulations, was added to the duties of inspectors in 1895. In the same year a Bake-shops Act was passed by the legislature of Ontario, handing over to the inspectors under the *Factory Act* the duty of enforcing it. The Ontario Shops Act, passed also in 1895, 'respecting establishments and places other than factories,' was originally left to the different municipalities to enforce. This did not work satisfactorily, however, and during 1896 the

legislature amended the Act so as to place its enforcement in the hands of the factory inspectors, an action which greatly enlarged the scope of the inspectors' duties. Previously, in 1889, an amendment to the Ontario Factories Act, by reducing the number of employees to six in the definition of the term 'factory,' added considerably to the number of establishments to be inspected. In Quebec the inspectors repeatedly advocated the passing of a shops regulation Act, but no measure similar in scope to the statutes of Ontario and Manitoba on the subject has as yet been put into force.

A feature of the work of inspection, to which attention is repeatedly drawn by the inspectors, is the almost universal courtesy which from the first inspectors have received at the hands of the manufacturers; the co-operation of employers has proved of the greatest assistance not only in furthering the carrying out of recommendations but also in the way of initiating reforms. Inspectors, in addition to the ordinary method of periodical visiting days, in many cases had their attention directed to the existence of abuses by communications from employees, a source of information which has been found in the main to be reliable, though in some cases complaints on investigation proved to be unfounded or frivolous.

General Results of Factory Inspection.

Several important phases of factory employment in Canada have been made known as the result of the information which the inspectors have been enabled to place before the public from their personal investigations, as, for example, the general tendency for conditions of employment to be on a better level in the large establishments situated in important centres of population than in small factories located in towns and villages; and the tendency of particular trades and industries to generate particular abuses.

More particular results of factory inspection may be briefly referred to as follows:

Personal Safety of Employees,—Protection about Machinery.

An explicit body of regulations are in existence both in Ontario and in Quebec relating to the subject of personal safety of employees in factories and the investigation of accidents reported as occurring to workmen in the course of their occupation. The results of enforcing these regulations have been embodied by the inspectors in their annual reports in the form of tables of accidents with comments and suggestions thereon.

In both provinces the total number of accidents reported from year to year has varied. Thus in 1889, the first year of inspection in Quebec, thirty-five accidents, of which five were fatal, were all that were reported, whereas in 1898, twenty-five fatal accidents were reported out of a total of 453 accidents in that province. In the reports for 1903, published during the month of March last, a total of 500 accidents was given, of which twenty were fatal. In Ontario, in 1888, only 11 accidents, of which 2 were fatal, were reported, though 50 or more in addition were heard of by the inspectors. In 1891, the reported number had increased to 204, of which 8 were fatal. In 1900, the highest total was reached, namely, 394 accidents, of which 16 were fatal. A considerable portion of this increase is to be attributed to the improvement in the system of reporting accidents by manufacturers, which in the opening years of factory inspection were attended to in a desultory way, but which, under the repeated admonitions of the inspectors, has shown an improvement.

Varying trade conditions and consequent increase or decrease in industrial activity are shown to have had a direct and marked effect on the number of industrial accidents. Thus, in Ontario, in 1893-94, the prevailing industrial depression was held by the inspectors to account, in part, for the decreased number of accidents, the total number of employees being largely diminished and the decrease being particularly noticeable

in the number of young and less efficient workmen who are the more liable to meet with accident. Again in 1901 the increased number of accidents occurring in Quebec was attributed very largely to the exceptional activity then prevailing in the manufacturing industry, heavy staffs of workmen being employed and the work of production being carried on under extreme pressure.

With regard to the general effect of inspection in diminishing the dangers inherent to employment in factories, the reports aver that it has been most beneficial. Not only has the work of inspection led to the gradual installation of safety appliances on certain machinery, which under former conditions was responsible for the largest number of accidents, but it has rendered possible to a greater degree an intelligent and comprehensive understanding of the whole question of protection of life and limb about machinery. The inspectors have been enabled to repeatedly point out the increasing care with which machinery is being guarded and the almost continuous decrease, other things being equal, in the number and severity of accidents, especially in the larger and better regulated establishments where inspections were more frequent and the suggestions of inspectors more readily complied with. The law also has received important alterations and additions as a direct result of the personal observation and suggestions of inspectors. It has been shown, for example, that the machinery in saw-mills and other woodworking establishments is particularly dangerous; the more dangerous features, such as belting, shafting, gearing, &c., of manufacturing establishments generally have been noted, and the fact demonstrated that by the employment of proper precautions the element of danger can be largely eliminated. The carelessness of employees themselves as a factor in the problem is also illustrated, the inspectors reporting in several instances that the accidents coming under their attention were due directly to the victims' negligence. The wearing of loose clothing and long hair

by females is particularly shown to be a fruitful cause of danger. The inspectors found that in many other cases accidents had happened through the failure of employees to replace safety appliances which had been removed for the purpose of repairing or oiling machinery, and it was necessary in several instances to draw particular attention to this neglect by factory employees. The danger of employing young children about machinery is also emphasized. On the entire subject of machinery protection, it is repeatedly insisted upon that employers are serving their own best interests in installing safety appliances, in spite of the fact that these appliances are sometimes expensive and that they sometimes lessen the productive power of machinery. The importance of constructing factory buildings in accordance with definite and modern standards has also been drawn attention to, and the practice of submitting plans of new factories to the inspectors for advice in this connection has become general. A better definition of responsibility in this connection, as between owners and tenants of buildings, has resulted. One recent suggestion of an inspector is to the effect that some permanent scheme of arbitration should be determined upon for the fixing of employers' liability and workmen's compensation for injuries received in factories. An example of a way in which inspectors have sought to educate the public on the importance of safeguarding machinery is the exhibition, under the auspices of the Quebec Board of Inspectors, at Montreal, in 1902, of a very complete set of apparatus brought from Paris, France, designed to prevent the occurrence of accidents in industrial establishments.

Boiler Inspection.

The work of inspecting boilers is at present distinct from factory inspection, but the law in this respect was on a much less definite and satisfactory footing at the time of the first appointment of factory inspectors in Ontario and Quebec. A good

deal of the time of inspectors, during the opening years of their duties, was devoted to the supervision of boilers, and considerable space is given in their reports to their observations and suggestions with regard to this matter. In both of the provinces the need of a proper system of boiler inspection and a proper set of regulations with regard to the location of boilers and engines is repeatedly emphasized, and some of the subsequent reforms carried out were due in the first place to the work of the inspectors of factories. General carelessness was found in 1888 and 1889 to be prevalent both in Ontario and Quebec as to the location and periodical inspection of boilers, many of them being situated in basements of factories immediately underneath crowded workrooms, where an explosion would have occasioned and in some instances did cause heavy losses of life. Inspectors drew special attention to both of these features in the opening year of inspection in Ontario, while in Quebec the appointment of government inspectors and the passing of a regulation permitting boilers and engines to be in charge only of duly certified persons was urged in the first annual reports of the inspectors. There was a system of inspection in operation in the cities of the province of Quebec, mainly under the supervision of the insurance companies, but for several years the inspectors were compelled to report a lack of proper precautions against possible disaster, proved by the occurrence of several catastrophes. An improvement was noted in 1891, when the inspector was given the right, by Order in Council, to decide as to the competency of boiler inspectors under the Act. In 1893 the law with regard to boiler inspection was first placed in operation in Quebec, and thenceforward a marked improvement in conditions was noted, the number of explosions diminishing materially, in spite of the unwillingness of employers in the country districts to incur the expense of inspections. Whereas prior to the passing of the Act there was an average of from 6 to 10 boiler explosions, causing about 15 deaths annually, the chief inspector of the

province of Quebec reported in 1897 that only two explosions and one fatality had occurred in the province during the four years preceding, whereas in Ontario, which was at that time still without such organization, 11 explosions and 16 deaths had been reported during the previous year alone. The Quebec inspectors continued to make suggestions with regard to the improvement of the Act. It was recommended, for example, that boiler inspection should be compulsory in creameries and cheese factories, these having been removed from the reference of the Act by Order in Council of July 19, 1894, also that division of districts among inspectors should be made more definite; that the number of examiners for competency of inspectors should be increased, and other changes made in administration. Some difficulty was experienced in compelling the employment only of qualified engineers and firemen, owing to the absence of schools in which the necessary training could be obtained, and in 1898 the inspector for the Eastern Townships found only a few properly qualified engineers and firemen in employment. The system of inspection inaugurated under the law, by which any holder of a certificate of competency might act irrespective of locality as an inspector, the employer having a choice among those on the lists of holders of certificates and being responsible for periodical inspection to the factory inspector, was not found to work without friction, each inspector being thereby granted a roving commission which rendered thorough and systematic work very difficult. The fee of \$5 charged for the inspection of a boiler was also objected to as being excessive, and, inasmuch as boilers situated in remote districts could only be reached at considerable expense to inspectors, to whom fees formed the only remuneration, the work in these sections was very often neglected. In Montreal steam boilers to the number of over 760 were reported in 1901 to be exclusively under the control of municipal inspectors, being annually visited. In addition there were inspections instituted by insurance

companies. New regulations were promulgated by Order in Council in 1902 which were found to meet many of these defects. The inspectors have reported vast improvements on the whole in the methods and results of boiler inspection since inspections were instituted, a chief result being the growing acquiescence of employers as to the necessity of frequent and rigid inspections. In the report of the chief inspector of Quebec for 1903 the total number of boiler inspections for the year is placed at 1,383.

In the case of Ontario considerable space is given in the early reports of inspectors to accounts of disastrous boiler explosions occurring within their districts and to the necessity for some system of regular inspection. Conditions continued with little change from year to year until 1900, when the Factories Act was amended so as to ensure a proper system of inspection. The locating of boilers and engines in separate buildings, as well as the necessity of frequent inspections, have been of late years accepted as a governing principle.

Inspection of Elevators.

A special feature has been made by the Ontario and Quebec factory inspectors of the inspection of elevators in industrial establishments. In 1889 there appears to have been general carelessness in both provinces in safeguarding these appliances. Many elevators were found devoid of safety catches or automatic doors, and other vital defects in construction were widely noted. Within a short time a general process of improvement was initiated. In 1890 it was reported from Quebec that automatic doors and suitable catches would soon be in general use. In Montreal, in 1894, elevators were reported as generally provided with safety catches, though periodical inspection was still deemed necessary for the maintenance of the standard. A great difficulty in this connection was found in the fact that many hoists built without regard to safety previous to the passing of the Act, were still in use and somewhat delayed the progress of improvement. The confiding of

elevators to inexperienced persons was also found to be a common source of danger. In these and other important particulars the inspectors succeeded in carrying many improvements into effect, and general satisfaction is expressed in the majority of the reports with the result of this branch of inspection,* though it is pointed out that, from the nature of things, the inspection of elevators constitutes a separate branch of work owing to the exceptional nature of the machinery connected therewith.

Protection Against Fire.

A difficulty in the work of securing sufficient means of protection against fire in factories was at the outset the question of the responsibility for the installation of fire escapes as between the owners and tenants of buildings occupied as factories, in cases in which the proprietor of the establishment did not own the building in which manufacturing was carried on. This, in the opening year of inspection in Quebec, was found to be the most prevalent cause of neglect to install proper fire escapes, and the almost immediate result was an amendment to the Act of that province placing the responsibility for providing escapes upon the proprietors of factory buildings. This had an immediate beneficial effect, and in Montreal a scheme for the building of these apparatus on a uniform plan was adopted, under special regulations by the city. Thereafter the work of inspection and the ordering of new fire escapes was unhampered by considerations as to what persons were primarily responsible for the change, with the result that the instructions of the inspectors were much more promptly and satisfactorily carried out.

In Ontario a similar defect in the law was encountered, the inspector for the western district definitely recommending in 1891 that the expense of fire escapes should be made to fall on the owners of factory

* A particularly full discussion of the problem of elevator protection is contained in the report of Mr. Robert Barber, inspector for the western district of Ontario, in his report for 1899.

buildings, especially where more than one employer was carrying on business in the same building. This suggestion was again repeated in 1899 and in 1900. In 1895 the municipality of Toronto ordered the installation of fire escapes in factories and public buildings, placing the responsibility of providing them on the owners of the buildings in question. Under this arrangement the inspectors left the matter of dealing with the construction of fire escapes in Toronto entirely to the municipal authorities. Later, however, the by-law was amended so as to apply only to buildings over three stories in height. The inspectors, thereupon, resumed jurisdiction over the construction of fire escapes in Toronto, being greatly assisted in the work by the passing of a statute in 1900 under which the owners of buildings were specifically rendered responsible for the erection of fire escapes, the Landlord and Tenant Act not allowing tenants to make alterations on property rented by them. By the year 1902 the inspectors were in a position to report that the factories were generally well equipped with fire escapes, though the contrivances were not in all cases of the most approved pattern. As a still further improvement of the law in this respect it was suggested by one inspector that in the case of mortgaged properties tenants should be allowed to erect fire escapes and deduct the amount therefor from the rent. A record of the number of fire escapes constructed at the suggestion of inspectors is contained in some of the reports. Much information as to the most efficient kind of fire escapes is contained in the inspectors' reports. The disadvantages of the system of outside balconies and stairways built of iron, especially during the season of frost and snow, are pointed out. The alternative plan of providing stairs in towers on opposite sides of buildings and separated from the main building by fire proof walls is also discussed, the additional cost of these appliances being regarded as the chief objection to their use.

The means for extinguishing fire in

factories were found generally ample and satisfactory at the outset, a condition that was maintained throughout the several years covered by the reports. The adoption of gas and electricity for lighting and heating purposes is considered as having diminished fire risks very materially. The insurance companies, whose interests are directly involved, are found to attend carefully to having the means always at hand for the extinguishing of fires in factories. In some cases in Quebec, however, it was found that establishments did not always keep on hand the axes and other tools required by the law for fire emergencies.

Sanitary Conditions.

A marked improvement in the sanitary conditions prevailing in factories is indicated as a result of factory inspection in Ontario and Quebec. When the work was first undertaken a generally unsatisfactory state of affairs was found to be in existence, except in the larger and more modern establishments. Many buildings, which were not originally intended for factories and in which, in consequence, hygienic protection was inefficient, were being used for manufacturing purposes with unsatisfactory results. In the smaller factories closets in particular did not receive the attention required, especially where not dealt with by the local municipal laws. In Montreal, in spite of the fact that a waterworks system had been installed, there were 12,000 pit closets in the year 1889, and these were found difficult to suppress. Ventilation was also poorly attended to and overcrowding was common, the latter being especially difficult to deal with inasmuch as the law did not specify any fixed amount of space for a workman. Especially in winter were these evils emphasized, the workmen themselves being largely to blame. Fans for the removal of metallic dust, steam and gases, existed in the largest and best equipped establishments, being practically non-existent except in the larger cities. Under the continuous supervision of the inspectors these conditions have been brought gradually into a

much more satisfactory state. Closet accommodation has increased and improved, closets with separate approaches for the classes being required, though the uncertainty as to who should be responsible for the expense of carrying out many of these reforms, especially where they involved considerable alterations in buildings, has been, as in the case of the installation of fire escapes noted above, a source of difficulty and hinderance. Closet accommodation for females in stores has also been improved. Drainage has received much attention, and the location of factories is now taken much more into consideration than formerly. The increase in the number of employees caused by the stimulus to industrial activity observed in Ontario in 1898 was the cause of some complaints of inefficient closet accommodation. Generally speaking, however, this feature of factory inspection was placed on a comparatively satisfactory footing within a few years after the beginning of the work of inspection, though isolated instances of infractions of the rules were periodically discovered. The general cleanliness of factories has also shown improvement, scrubbing and whitewashing becoming more frequent. Especially marked has been the improvement in the cleanliness in fruit-canning factories, confectioneries and cigar factories in Ontario in 1894 and in 1900. Some cases, however, were reported in which the employees were largely responsible for the lack of cleanliness, though the majority of reports in later years are to the effect that factories were generally in a clean and healthy condition. The improvements in the hygienic conditions of factories in which females are employed, has been particularly noticeable as a result of inspection.

The problem of ventilating factories has, as above stated, received much attention from the factory inspectors, with the result that the question of a proper supply of pure air to operatives is now usually considered in factory construction; the method depended upon in several of the older factories of ventilation by means of windows,

without any proper accommodation of the heating of work rooms to the ventilating system, being now held generally inefficient. The substitution of electric light for gas and coal oil has been of great benefit in this connection. Ventilation in the smaller dressmaking and tailoring establishments has been found particularly bad. It is in cases where the removal of metallic dusts, gasses, &c., in foundries, dye works, laundries, shoemaking establishments, polishing and buffing factories, cotton mills, &c., necessitated the employment of large suction fans, that the problem has been most difficult. The expense of installing these fans is very heavy, especially in old established factories, built without reference to this class of machinery, where it amounts to from \$100 to \$600, and is particularly burdensome in the cases of smaller establishments, while the amount of power required to keep them in operation is also an added consideration. Ventilation by mechanical contrivances, however, is being gradually improved and new and modern systems of dust expulsion are being widely adopted. By an extension of the Act of 1901, fans must be provided for the removal of dust in small as well as in large establishments where grinding, polishing and buffing are carried on.

Sweating.

Closely associated with the question of sanitation and overcrowding, as well as coming under the cognizance of the law in respect to the hours of labour worked by women and children, is the so-called sweating evil, much information as to which, as it exists in Canada, is contained in the reports of the factory inspectors. For a time the attention of the inspectors was necessarily chiefly occupied with the larger and more important manufacturing establishments, and in the earlier reports little mention is made of the class of workshop in which this evil is most apt to declare itself. In 1893, however, the Montreal inspectors drew attention to the rapidly increasing number of sweat shops, a result attributed to the fact that a large number of Russian

and Polish Jews had settled in the city during the previous few years and had engaged in the making of readymade clothing cut at warehouses and wholesale clothiers and sent for completion to dwellings where work was done at excessively low prices, owing to keen competition. Up to that date it was impossible to reach these establishments by the law, in spite of the fact that filth and squalor abounded in such places, that the vitiation of clothing manufactured in this manner constituted a serious menace to public health, and that whole families, under this regime, were often found toiling early and late for a mere pittance. It was suggested in that year by one of the inspectors that clothiers should be compelled to give out work only to those who might hold licenses, obtained at a nominal fee and insuring proper sanitary conditions, from the factory inspector. In 1895 little improvement had taken place, the chief inspector for Quebec reporting that he found many young girls working from 75 to 80 hours per week, including Sunday labour, at wages ranging from 50 cents to \$3. In the fall of 1895 an investigation into the evil was instituted by the Federal Government, but led to no tangible improvement. The appointment of female inspectors was a chief means of drawing attention to the prevalence of the evil and of securing measures for its removal. In Montreal the two inspectresses, almost immediately on their appointment, made a special investigation into the matter. The locating of the sweating shops in the first instance was found difficult. It was reported in 1898, however, that nearly 10,000 Jews and French Canadian women in Montreal were engaged in the manufacture of clothing under sweating conditions in small unhygienic establishments, at low wages and excessive hours. The system of contract garment making, inasmuch as it afforded cheap clothing for the poor and did not transgress, except in its accompaniments, the letter of the law, proved very difficult to deal with, and the efforts of the inspec-

tors were confined almost wholly to the betterment of the sanitary conditions existing in these establishments. In Ontario, the female inspector, on her appointment, found many sweat shops in existence, though the system was not nearly so developed as in many of the States of the American Union. The tendency in the clothing trades appears on this authority to be against the establishment of large sanitary workshops, and it was found very difficult to do more than reach the surface conditions or to locate shops in which clothing was made under contract. In 1899 a marked improvement was reported over previous years, though a number of workshops remained which were still wholly unfitted for occupation. The fashion of tailor-made garments in this year had the effect of driving many women out of this business. A feature of 1901 was a joint inspection made by the Ontario female inspector and the chief inspector of factories for the province of Quebec into conditions existing in the clothing trade in Ottawa and Hull, about which many complaints had been received and concerning which joint action was advisable owing to the proximity of the two cities. It was shown as a result of the inspection that the sanitary conditions were in the main satisfactory, though wages in Hull were found on an exceedingly low level. A result of the publicity of the inspection was that wages were almost immediately increased by from 100 to 150 per cent. In the same year an amendment of the Ontario Shops Act, requiring a written register of names and addresses to be kept of persons to whom certain specified work was given out, rendered inspection more assured. The frequent moving of these small establishments and their habit of installing themselves as cheaply as possible without regard to light and sanitation, made the work of inspection difficult. Though much improvement was reported as still possible and many features of the system remained a source of constant irritation to the inspectors. The female inspector for Ontario reported in

1902 that 'in no state is clothing manufactured under better or healthier conditions than in Ontario.'

Female Labour.

A most important step taken in connection with the enforcement of the clauses of the factories Acts relating to female labour was the appointment of female inspectors for the express purpose of visiting the establishments in which women were employed, and reporting on conditions found therein as particularly affecting female labour. The province of Ontario was the first to act in this matter, Miss Margaret Carlyle being appointed as inspectress for the province in 1895, under a special amendment to the Act. Two years later Mrs. King and Mrs. Provencher were appointed in Quebec, their field at first being limited to the smaller establishments situated in the city of Montreal. Since the initiation of this system much progress has been reported in the amelioration of the conditions of employment for women in industrial establishments. The inspectresses report that, with few instances to the contrary, they have been well received and have been able to initiate many reforms. In Ontario, progress was slow, though substantial and continuous, and was much assisted by the co-operation of employers. The Quebec, as also the Ontario, inspectors found in the opening year of their work, the worst cases of insanitation and other violations of the Act in the smaller clothing workshops, a situation which was found somewhat difficult to combat, though much alleviation is alleged to have been accomplished after repeated inspections. After two or three years a marked improvement was reported, especially in the tendency of employers to work in harmony with the regulations. The installation of separate closets with separate approaches has been especially insisted upon, and a different hour of arrival and departure from work for male and female operatives recommended wherever possible. In 1901

the inspectresses reported the moral atmosphere in factories as uniformly excellent, foremen in particular recognizing the responsibility of their position. The comfort and healthfulness of female employment has also constantly improved by the addition of cloak rooms, dining rooms, &c., to factories. Many of these reforms have also extended to shops, the number of establishments inspected increasing constantly, until in 1903, 810 factories were visited in Quebec, while in the year 1902, 1,835 shops were inspected in Ontario. In 1900 the female inspector of Ontario estimated that there were over 50,000 females employed in the province.

Considerable attention was given to the conditions of female employment in factories prior to the appointment of special officers for this branch of the work, and it was largely as a result of the attention directed to it by the first inspectors that the necessity of special inspectresses was recognized. Thus, in 1888, the inspector for the western district of Ontario reported 180 factories in operation in his district employing women or children, or both. Of these all but 70 worked less than 60 hours per week. In 1891 the same officer found the hours of labour for women relaxed owing to trade depression, though the number of occupations in which females were employed was being gradually enlarged. An investigation was also made into the wages of females in a number of trades in Toronto and embodied in the annual report of the inspector for 1891. Complaints regarding hours of work by females were received and investigated from time to time, and the danger of wearing loose hair and garments about machinery repeatedly pointed out. Similarly in Quebec frequent references to the employment of female labour were made by the inspectors and steps often taken to remedy grievances that were found to exist.

The Women's National Council in exercising supervision over the condition of female operatives of factories has been a useful influence.

Child Labour.

The difficulty of ascertaining the actual age of children employed in factories, owing to the deliberate falsification of age certificates, more particularly in the cases where births have not been registered, has proved from first to last the most perplexing problem confronting the inspectors in the enforcement of the provisions of the law placing an age limit on the employment of children in factories.* For this employers have been found in a measure to blame, especially during the early years of inspection, when a considerable number of children were employed particularly in the cotton mills of Quebec. In the vast majority of cases, however, responsibility for the employment of children under age has rested primarily with the parents who have been found, again and again, to employ misrepresentation with regard to the age of children for whom they were seeking to obtain employment. There were cases in which the poverty of the parents, under exceptional circumstances, inclined the inspectors to take a lenient view of violations of the law of this kind, though as a rule the Act was enforced as rigorously as possible. Undoubtedly the effect of regular inspection has caused increasing care to be exercised among employers in rejecting children of doubtful age and in employing child labour in any case where it was not found to be absolutely necessary under the existing circumstances. The suggestion of an educational test, in conjunction with the regulation as to age, children being required to have a teacher's certificate of their ability to read and write before being allowed to seek employment, was frequently made by inspectors as a means of meeting the difficulty. The whole subject of the necessity of education, is dealt with repeatedly in the reports. In Ontario a truancy and compulsory school

attendance Act, passed in 1890, compelling all children, with certain exceptions, under 14 years of age to be sent to school, caused some interlapping of jurisdiction by the officers of this and the Factories Act which set the limit for the employment of boys at 12, the truant officers under the School Act being given power to visit factories for the purpose of enforcing the Act. Some of the inspectors accordingly advised the raising of the age limit under the Factories Act to conformity with the Truancy Act. In Quebec on the other hand the absence of a compulsory education law rather inclined the inspectors to advise against any raising of the age limit in factories, it being thought better that children should be employed in this work than be in idleness. Moreover it was stated that in some industries children over a certain age do not acquire the necessary dexterity. The tendency to employ young children was found to depend to a certain degree on trade conditions, the number of children found in factories during years of depression, such as 1893 and 1894 in Ontario, being much decreased, whereas in busy years more frequent violations of the law were encountered. The introduction of machinery also lessened the extent to which children were employed, especially in canning and dextricating factories in Ontario and in match factories in Quebec. On the whole the work of this branch of inspection may be said to have had the effect of lessening where it did not wholly put a stop to the employment of children about dangerous plants and machinery, particularly in saw mills, and to have emphasized the importance of education and elevating surroundings. The bad effect of placing young children continuously among grown up persons and in irksome employments during the formative period of life, when the physical, intellectual and moral nature is in process of development, is repeatedly set forth. The inspectors' recommendations are mostly in the direction of raising the age limit. The fact that employers have come more and more to depreciate the employment of young children and to in-

* In Ontario the age limit is 14 years, and in dangerous or unwholesome factory employment, 16 for boys and 18 for girls. In Quebec the general limit is 12 for boys and 14 for girls with the same provisions as in Ontario in 'dangerous, unwholesome or inconvenient establishments.'

sist on a more rigid following of the law in cases where child labour is expedient, is noted as a most important achievement of the work of inspection in directing careful and intelligent attention to this subject.

Hours of Labour.

The Factory Acts in Canada deal with the subject of hours of labour only in reference to the employment of women, young girls and children. The reports of the inspectors in this connection refer accordingly only to establishments in which female or child labour is employed, though information of a more general nature is sometimes included.

The ten-hour day is reported as seldom exceeded in *Quebec* factories except in saw and pulp mills, where eleven and twelve hours are frequently worked. Fifty-seven hours per week, however, is stated as the average duration of employment.

In *Montreal* in 1889 no cases were found of over 60 hours per week being exceeded in factories, the average week for men being 59 hours and for girls and women 57 hours. In the country, however, instances were found of factories running 12 hours per day. In order to provide a shorter working day on Saturdays, the *Quebec* inspectors frequently allowed a reduction of the midday meal interval, after consultation with the workmen. In other cases, as was reported in *Montreal* in 1898, women and children were found beginning work at 6.30 in the mornings in order to shorten the working day on Saturdays. The fact that the half holiday on Saturdays was almost universally recognized as of great benefit led the inspectors to recommend, in some instances, that it be made statutory owing to the injurious tendency of the expedients adopted to secure it.

In *Ontario* factories the weekly hours as a rule did not exceed 60 in 1888, and in the majority of establishments ranged from 54 to 59. The hours of labour of females in millinery shops and dressmaking establishments were frequently reported excessive, and it was found exceedingly difficult to compel these establishments to

conform strictly with the law, especially during their busy season. In cotton, woollen and other textile factories, comparatively long hours were worked, amounting frequently to 10½ and 10¾ per day, with a short day on Saturdays. These industries, also were among the last to react to influences which in other cases caused a shortening of hours. The long hours of men in saw mills was also a matter of complaint, the majority of such establishments working eleven hours and upwards in 1893, at wages of from \$20 to \$22 per month and board. The enactment of legislation in 1895 limiting the hours of labour of employees in bake shops in any one week was found in 1896 to improve conditions in this class of employment, and to have an indirect result in the way of added cleanliness and carefulness of manufacture. As in *Quebec*, longer hours were worked in villages and small towns than in cities. The law with regard to the hours of female and child labour was reported on the whole well observed, overtime employment being regarded as poor economy and employees showing a waning inclination to seize every opportunity of making extra wages. The shortening of hours was also recommended as a potent means of preventing accidents around machinery.

Sunday Labour.

The periodical visits of the inspectors did much to insure a stricter enforcement of the law prohibiting Sunday labour. In 1894 the chief inspector for *Quebec* found that there were a large number of Jews in the province, carrying on the trades of tailors, furriers, &c., employing Catholic Canadian workmen whom they frequently obliged to work on Sundays. In *England*, it was pointed out, establishments belonging to Jews are closed on Saturdays, the law allowing them as compensation to work on Sundays, though they are not permitted to make any man work more than 60 hours per week. The Canadian law, it was recommended, should provide better protection for workmen under such circumstances. In *Ontario* the question of Sunday labour

arose chiefly in connection with employment in bake shops. In 1896 employees were found generally objecting not to the necessary work that fell to be done on Sundays, but to the extra employment that was involved in supplying hot bread on Monday mornings. In the same year the Act relating to employment in bake shops was passed, which, while prohibiting Sunday labour in bake shops, did not prevent an employing baker setting his sponge on Sunday nights. Some complaints to the effect that small bake shops were operating their bake ovens on Sundays were also received, and were found difficult to deal with under the law.

Industrial and Trade Conditions.

As already noted incidentally, the reports of factory inspectors contain many references to contemporary industrial and trade conditions. These have been mentioned in so far as they have reacted directly on certain phases of employment. Reference may be added to the effect of general trade conditions upon the quantity of employment, and what is implied therein, for the material welfare of wage earners.

In *Ontario*, during 1889, it was noticed by the inspectors that dullness of trade and financial stringency were causing a number of factories to run on short time or to close down completely. Canning and desiccating factories, in particular, were limiting their product, both because of a scarcity of fruit and as the result of over-production in 1888. The same conditions were noted in an intensified state two years later when the number of employees in factories had very noticeably diminished; in the piano and coffin making trades alone was there noted anything approaching activity in 1891 in Western Ontario. The hours of labour, especially of female labour, were diminished and many factories shut down from two to ten weeks during the ensuing winter. Bad harvests and low prices for farm produce were held chiefly responsible. This depression continued without material alleviation through 1893, reaching its climax in 1894 when staffs had been still fur-

ther reduced by 30 or 40 per cent than in the previous two years. Cotton, woollen and steel factories and foundries were particularly affected. Boot and shoe workers, glass cutters and garment workers were also mentioned as suffering intensely from dull times. In the year 1895, though the majority of manufacturers still reported depression, signs of improvement in the general situation were noted. A number of new factories were started, among which four were for the manufacture of bicycles. In 1896, the depression was again reported as general and intense, nearly every factory working short time with reduced forces, with the exception of bicycle manufacturers and agricultural implement makers, who were busy. Towards the close of 1897, a marked improvement began both in the number of persons employed and of plants in operation. By 1898 business was reported more active than for several years; extensions to buildings were being made and there was a general increase in manufactures, in the number of workmen employed and the hours of labour worked, these conditions having extended to all branches of industry. In 1899 factories were working night and day, wages were increasing and employees were difficult to obtain. Still further improvements were noted in 1900; the demand for labour had greatly increased, wages being universally higher; new factories were being established on all sides, manufacturing jewellers being particularly prosperous; the bent-wood trade alone was mentioned as stagnant. In 1902, similarly, heavy investments of capital in manufacturing establishments were reported; the output of factories was on a scale never before known; and the number of employees and wages advanced. In the last report received, for the year 1903, extremely busy conditions were reported as in continuance.

In *Quebec* the activity of industry followed much the same lines as in Ontario, the years from 1891 to 1896 inclusive being characterized by general dullness, factories running on short time and with reduced staffs. In 1898, however, manufacturing in Montreal was reported more active than

in the past 10 years, especially among cotton and woollen mills. Similarly, in 1901 the expansion of manufactures and a plentiful amount of employment were prominent features of the year. In the last report of the inspectors unexampled activity in all lines was recorded, mention made of new factories going up, old factories being extended and employment generally plentiful.

Some index to the activity of employment prevailing in any given year is afforded by the number of overtime permits granted by factory inspectors allowing women and children, under certain exceptional circumstances, to be employed during a limited period for longer hours than are specified in the statute as of usual application. According to this record the highest total was reached in Ontario in 1902 when 81 overtime permits were granted. The next highest number was 41 in 1901 in Ontario there being 28 such permits issued in 1898 and 32 in 1889. In Quebec the highest totals were 26 in 1898 and 24 in 1900. Inasmuch, however, as a systematic record was not kept of these returns and as the permits in many cases were designed to meet other contingencies than those attending an exceptional rush of orders, much significance is not to be attached to these returns.

Directory of Factory Inspectors.

The following is a list of the names, addresses and districts of the factory inspectors at present holding office in Canada:—

Quebec—

Montreal—Western division, Louis Guyon, 20 St. James street, Montreal, Que.

Montreal—Eastern division, James Mitchell, St. James street, Montreal, Que.

Quebec division—P. J. Jobin, Government Buildings, Quebec, Que.

Eastern Townships division—Dr. E. N. Stevenson, Coaticook, Que.

Female inspector for the eastern division of Montreal, for Quebec, &c.—Mrs. L. D. Provencher, 20 St. James street, Montreal, Que.

Female inspector for the western division of Montreal—Mrs. Louisa King, 20 St. James street, Montreal, Que.

Chief inspector—Louis Guyon, 20 St. James street, Montreal, Que.

Ontario—

Western district—Jas. T. Burke, Parliament Buildings, Toronto, Ont.

Central district—O. A. Rocque, Orleans, Ont.

Eastern district—Thos. Keilty, Parliament Buildings, Toronto, Ont.

Female inspectors for factories in which female labour is employed—Miss Margaret Carlyle, Parliament Buildings, Toronto, Ont.

Mrs. James R. Brown, Parliament Buildings, Toronto, Ont.

Mr. Arthur W. H. Holmes, Parliament Buildings, Toronto, Ont.

Manitoba—

For the province—W. Smith, 248 Smith street, Winnipeg, Man.

PROCEEDINGS OF ARBITRATION BOARD IN DISPUTE BETWEEN G. T. R. Co. AND TELE- GRAPHERS.

SITTINGS of the Board of Arbitrators appointed by the Honourable the Minister of Labour in the matter of the dispute between the Grand Trunk Railway Company and certain of its telegraphers, were continued during October in the city hall, Toronto, on the 14th, 15th, 21st and 22nd of the month.*

* An account of the origin of the dispute and of its reference by the honourable the Minister of Labour, under the Railway Labour Disputes Act, 1903, was published in the *Labour Gazette* for August, page 168. The proceedings of the Conciliation Committee and of the Board of Arbitration under the Act during August and September were reported in the issues of the *Labour Gazette* for September and October at pages 266 and 366 respectively.

There were present at the meetings the following arbitrators and principals:—

Hon. Mr. Justice Teetzel, Chairman.
G. F., Shepley, Esq., K.C., for G. T. Ry., Arbitrator.
J. H. Hall, Esq., for Telegraphers, Arbitrator.
D. Campbell, Esq., 3rd Vice Pres., Order of Railroad Telegraphers.
W. Faskin, Esq., General Chairman, Order of Railroad Telegraphers.
D. M. Kennedy, Esq., Secretary, Order of Railroad Telegraphers.
F. H. McGuigan, Esq., Manager G. T. R.
W. W. Pope, Clerk G. T. R. Co.
W. R. Tiffin, Esq., Supt. Northern Division G. T. R.
M. S. Blaiklock, Esq., Supt. Eastern Division G. T. R.
G. C. Jones, Esq., Supt. Middle Division G. T. R.
G. R. McLeod, Esq., Secretary to Mr. McGuigan.

At the meeting of the board held on October 14 it was decided that proceedings should not be conducted in public, the statement made by His Honour Judge Teetzel on the opening of the session being as follows:—

Section 16 of the Railway Labour Disputes Act expressly prohibits the making public of any books, papers and other documents used by this board or any information obtained therefrom. As a good deal of this inquiry will involve the use of books, papers and documents prohibited by this section from being made public, and for other reasons, the majority of the board have decided that, under the provisions of the Act, and the prohibitory section as to a certain portion of the information being kept private, it is better to have all private, so that reporters will please not join with us. When the award is made it will be complete and consist of all the necessary facts from which the public will be able to judge whether the award is reasonable or not, and the information will be given in a more concrete form and permanent way than it would be otherwise.

The scope of the arbitration was then taken into consideration, and it was decided that, for the present, only sections 13, 22 and 23 in the schedule of demands presented by the telegraphers, would be dealt with, it having been intimated that the other sections of the schedule had been so amended as to be acceptable to both parties. Article No. 13 is to the effect that telegraphers be not required to work on Sundays and the following legal holidays, namely, New Year's Day, Dominion Day in Canada, 4th of July in the United States, Labour Day or Christmas Day, except when absolutely necessary to protect the Com-

pany's interests, Sunday labour to be paid at overtime rates. Article 22 is to the effect that two consecutive weeks' leave of absence annually with full pay and free transportation be given to telegraphers for themselves and families to any point on the system. Article 23 relates to minimum salaries.*

In proceeding upon this basis the right was reserved by the telegraphers to present later an argument with regard to their demands as a whole.

The remaining sessions of the board during October were devoted to the examination of witnesses produced by the telegraphers, the filing of exhibits, &c. There were two additional witnesses still to be heard on behalf of the telegraphers at the close of the proceedings on the 22nd.

The next meeting of the board will be held at Toronto, on November 16.

CANADIAN CONFERENCE OF CHARITIES AND CORRECTION—ANNUAL CONVENTION.

The seventh annual convention of the Canadian Conference of Charities and Correction held its opening meeting in the City Hall, London, Ont., on Wednesday, October 5. A large representation of delegates from different cities in Ontario and Quebec was present throughout the meetings. The conference adjourned on October 7.

A subject prominently under discussion at the meetings of the conference was the most effective method of dealing with wayward children of both sexes. In a paper read by Col. Farewell, County Crown Attorney of Ontario, on the opening day of the convention, entitled 'The Question of Crime,' the writer expressed approval of the use of corporeal punishment. The chief feature of the evening session of the opening day, however, was a lecture by In-

* See *Labour Gazette* for October, 1904, page 366, for a statement of the minimum rates demanded.

spector Hughes, of Toronto, on 'The Bad Boy,' in which strong opposition to flogging was expressed, the causes of a boy's misbehaviour being classed under three headings, viz.: hereditary, physical causes and bad training. Kind treatment, proper food and an absence of coercive training were urged as the chief essentials in dealing with wayward children. The subject was continued on the second day's session in an address by Mr. J. J. Kelso, Superintendent of the Ontario Department of Neglected and Dependent Children, who emphasized the importance of kindness and moderation. Mr. C. Furier, Superintendent of the Industrial School at Mimico, also spoke, referring to the necessity of making schools attractive in order to prevent truancy. Police Magistrate Love, of London, differed from the preceding speakers in advocating the flogging of boys. A paper prepared by Mrs. Yarker, entitled 'Girls Requiring Special Supervision,' was also read, the class of girls dealt with being those who are not wholly degenerate, but who are wayward, though not bad enough to be sent to the Mercer Reformatory. The suggestion was made that homes should be established in the larger cities to which girls of this class might be sent, and from which they might go out to perform domestic service under supervision. A paper of interest was read by Dr. Roseburgh, of Toronto, on the treatment of inebriates, drunkenness being described as the principle cause of parental neglect, and of the work which now falls on children's aid societies, charity organizations, &c. A system of government aid to voluntary hospitals for the treatment of drunkards was advocated. A resolution was subsequently passed by the conference referring the question of the treatment of inebriates to the executive committee to take such action as it might see fit.

Other addresses delivered were by Mr. Sheriff Cameron, on the subject of women and girls who had lost their self-respect through drink. Mrs. O'Sullivan and Mrs. Lugsden, of the Mercer Reformatory and the Alexander Girls' Industrial School,

respectively, spoke of the classes of girls dealt with in these institutions. The work of the charity organizations of different cities was also discussed. Mr. Frank Walsh, of Toronto, delivered an interesting address on the 'Housing of the Poor,' describing the organization of a building society to furnish houses at a small rental, the society to be content with a five per cent profit. A charter for such a society, it was stated, would be applied for at once. Other addresses were by Dr. Lulon, of St. Thomas, on 'Houses of Industry,' and by Rev. D. G. MacBeth, on the 'Social Problems of the Canadian West.'

Officers Elected.

The election of officers resulted as follows :—

President—Col. F. E. Farewell, K.C., Whitby.
Vice-presidents—Mayor Beck, London; J. J. Kelso, Toronto; Alex. Shaw, K.C., Walkerton.
Treasurer—Rev. James Ledlard, Owen Sound.
Honorary Secretary—Dr. A. M. Roseburg, Toronto.

Secretary—Mr. Frank Walsh, Toronto.
Executive Committee—Dr. R. B. Bray, Chatham; R. H. Lane, Montreal; S. M. Thompson, Brantford; John Keane, Ottawa; R. Massie, Toronto; O. Labelle, London; C. Ferrier, Toronto; A. McMurchy, Toronto; Mrs. E. Yarker, London; Mrs. J. Urquhart, Hamilton; Mrs. O'Sullivan, Toronto.

The conference decided to hold its next meeting in Toronto on Sept. 27, 28 and 29, 1905.

Charities & Correction,
Oct 5*

PROPOSED PENSION FUND FOR M. C. R. CO'S. EMPLOYEES.*

DURING October the establishment of a pension fund was discussed by certain employees of the Michigan Central Railway Company at a special meeting held in the city of St. Thomas during the second week of the month.

In the course of the discussion it was stated that similar institutions in the United States had met with the approval

* Information contained in this statement was supplied by Mr. A. Roberts, correspondent to the *Labour Gazette* for St. Thomas, Ont., and district.

of the employees of different railway companies ; that the general manager of the Michigan Central Railway had expressed the willingness of the company to co-operate in a pension fund scheme, the company to provide half of the money necessary ; and that in order to make the scheme practical it would be necessary that contributions to it should be made compulsory.

Resolutions were passed expressing a desire to adopt some system of superannuation for the Michigan Central Railway Company's employees, and recommending

the appointment of a representative committee to confer with other organizations and the officers of other railroads where such systems are in operation. The committee to formulate the details and workings of such scheme, and to submit it for sanction to another meeting of the employees to be held in St. Thomas.

A committee consisting of a representative from each department of the railway service was appointed in pursuance of this resolution.

THE IMMIGRATION AND COLONIZATION MOVEMENT.

FEW arrivals of immigrants were reported during October, the active season having closed during the preceding month.

The number of immigrants for Canada entered at British ports during September, according to nationality, was as follows:—

English.....	6,050
Irish.....	369
Scotch.....	167
Foreign.....	1,995

A number of mechanics were included in the arrivals from England during October, several bricklayers reporting at Toronto and Winnipeg. Sixty English bricklayers arrived at Toronto on October 14. They were met by a local representative of the bricklayers' union, with whose assistance accommodation was secured, and the party obtained work immediately.

The report of the Montreal Colonization Society for the month of September showed that 289 new settlers had registered, an increase of 142 over last year.

The Movement During the Coming Season.

Among the more important projects discussed with reference to the season of 1905 was the proposal of the Toronto branch of the Canadian Manufacturers' Association, looking to the immigration of a large number of British female factory operators, and the establishment of a receiving home in connection with the movement by the Women's Christian Temperance Union. In

Great Britain the movement will be under the auspices of the British Women's Emigration Association, which recently sent a special representative to report on the outlook for female labour in Canada.

It was stated that immigration work will be continued on an extensive scale next year by the Salvation Army. The maritime provinces will be the field to which its chief attention will be turned during the coming winter.

C. P. R. Land Sales.

During the nine months of the present year, from January 1 to September 30, the Canadian Pacific Railway Company disposed of 431,282'82 acres of land in Manitoba and the North-west Territories, for which the sum of \$1,879,841.05 was realized. The number of acres sold and amounts realized per month were as follows:—

Month.	Acres.	Amount.
		\$ cts.
January.....	116,840'79	386,649 88
February.....	14,729'69	73,428 94
March.....	12,992'06	59,660 03
April.....	24,064'24	116,349 19
May.....	51,477'16	203,768 02
June.....	155,973'24	712,812 21
July.....	36,425'73	177,473 94
August.....	15,669'90	88,735 88
September.....	13,110'02	61,962 96
Total.....	431,282'82	1,879,841 05

Homestead Entries during the Month of September, 1904.

The following table, furnished by courtesy of the Department of the Interior, Canada, shows the number of homestead entries during the month of September, 1904, as compared with September, 1903 :

TABLE OF HOMESTEAD ENTRIES DURING THE MONTH OF SEPTEMBER, 1904.

Agency.	1904.	1903.	Increase.	Decrease.
Alameda.....	131	162	31
Battleford.....	156	42	114
Brandon.....	24	41	17
Calgary.....	241	206	35
Dauphin.....	35	26	9
Edmonton.....	221	252	31
Kamloops.....	13	7	6
Lethbridge.....	145	126	19
Minnedosa.....	15	21	6
New Westminster.	2	1	1
Prince Albert.....	141	124	17
Regina.....	441	462	21
Red Deer.....	143	99	44
Winnipeg.....	45	62	17
Yorkton.....	262	214	48
Total. . .	2,015	1,845	293	123

It will be seen that there has been a net increase in the number of homestead entries made during the year of 170.

A statement of the homestead entries made during July, August and September, 1904, is as follows :—

TABLE OF HOMESTEAD ENTRIES, JULY-SEPTEMBER.

Month.	1904.	1903.	Increase.	Decrease.
July.....	3,011	3,438	427
August.....	2,360	2,288	72
September....	2,015	1,845	170
Total....	7,386	7,571	242	427

It will be seen that the net decrease for the last two months amounted to 185.

Nationalities of Homesteaders.

The nationalities of homesteaders, as reported by the several agencies of the De-

partment of the Interior in Manitoba, the North-west Territories and British Columbia, during the month of September, 1904, were as follows :—

TABLE SHOWING NATIONALITIES OF HOMESTEADERS DURING SEPTEMBER.

Nationalities.	Number of Entries.
Canadians from Ontario.....	275
" Quebec.....	45
" Nova Scotia.....	10
" New Brunswick.....	11
" Prince Edward Island.....	6
" Manitoba.....	79
" North-west Territories.....	34
" British Columbia.....	2
Persons who had previous entry.....	255
Canadians returned from United States.....	39
Americans.....	583
Newfoundlanders.....
English.....	240
Scotch.....	74
Irish.....	30
French.....	25
Belgians.....	6
Swiss.....	1
Italians.....	1
Roumanians.....	8
Greeks.....
Syrians.....
Germans.....	89
Austro-Hungarians.....	97
Hollanders.....	3
Danes (other than Icelanders).....	2
Icelanders.....	10
Swedo-Norwegians.....	60
Russians (other than Mennonites and Doukhobors).....	27
Mennonites.....	2
Doukhobors.....
Chinese.....	1
Total.....	2,015
Representing 5,370 souls.

Of a total number of 622 entries made during September by persons coming from the United States to Canada, 129 were from Dakota, 114 from Minnesota, 45 from Washington, 41 from Wisconsin, 39 from Iowa, and 28 from Montana.

Lands Patented in September, 1904.

An abstract of letters patent covering Dominion lands situated in Manitoba, the North-west Territories, British Columbia and the Yukon Territory, issued from the Department of the Interior during the month of September, 1904, is as follows :—

TABLE OF LANDS PATENTED IN SEPTEMBER, 1904.

ENFORCEMENT OF THE FAIR WAGES RESOLUTION BY THE POST OFFICE DEPARTMENT, OCTOBER, 1904.

During the month of October the following orders were given by the Post Office Department for the supplies below mentioned. All were given subject to the regulations for the suppression of the sweating system and securing employment to working men and women of fair wages, and the performance of the work under proper sanitary conditions :—

Nature of Order.	Amount of Order.
	\$ cts.
Making and repairing metal dating and other hand stamps and type and brass crown seals.	872 55
Making and repairing rubber dating and other hand stamps and type.	30 35
Supplying stamping material, inclusive of making and repairing pads, also wooden boxes and post marking and cancelling ink.	435 24
Making and repairing post office scales.	142 00
Supplying mail bags.	2,012 50
Repairing mail bags.	1,100 28
Repairing mail locks and supplying mail bag fittings.	333 65
Supplying street letter boxes and railway mail clerks' tin boxes, and repairing street letter boxes and railway mail clerks' tin boxes.	202 93
Miscellaneous orders for making and repairing postal stores.	5 00
Making up and supplying articles of official uniform.	1,779 45

CANADIAN TRADE AND REVENUE DURING OCTOBER, 1904.

THE general business situation throughout Canada during October was reported satisfactory, though both foreign and domestic trade were on a somewhat lower level of activity than a year ago. The revenue of the country, however, was well maintained, and trade with other members of the Empire shows fair prospects. On the whole, the outlook for the winter season is favourably regarded, a moderate and safe movement of products being considered as now practically assured by the satisfactory statements with regard to the crops. A more detailed account of the important de-

velopments of the past month is given under the following headings, relating respectively to foreign, domestic and imperial trade, and to Canadian revenue and expenditure.

Canadian Foreign Trade.

There was a slight decline in foreign trade during September, as will be seen from the accompanying tables, furnished by the Department of Customs, Canada. The decline was wholly in exports, imports showing a slight increase. For the three months ending September 30, also, declines are shown amounting to about \$100,000 in

imports and about \$5,300,000 in exports. During September the chief decline noted was in products of the forest, amounting to about \$1,000,000. Animals and their products, and agricultural products also, showed a slight falling off. Products of the mine and fisheries, on the other hand, showed increases.

By Order in Council passed during October, the duty on steel rails of \$7 per ton which went into effect on October 1, is not

to apply to rails actually contracted for abroad prior to August 28, if imported into Canada not later than November 30, 1904, and laid on the track in Canada not later than February 28, 1905.

Openings for Canadian apples, hay and wood pulp were reported in Norway and Sweden by the Commercial Agent of the Department of Trade and Commerce, Canada.

Imperial Trade.

The September statement of the London, Eng., Board of Trade, shows a decrease of £11,886,000 in imports into the United Kingdom, and an increase of £13,064,500 in exports. Imports from Canada for the month of September were as follows:—

—	Amount.	Value.
		£

The weekly reports issued by the Department of Trade and Commerce, Canada, during October, showed that much of the future success of Canadian trade with *Great Britain* depended on the securing of cheap freight routes and the proper description and invoicing of goods. The market for Canadian breadstuffs, grains and fruits was reported as at present particularly promising. An opening for Canadian leather and cider was also reported from Bristol. In the *British West Indies*, in reply to a circular letter from the department asking particular information with regard to the market for Canadian flour and the prospects for increasing the trade, conditions were generally reported favourably, though this product has been regarded with prejudice in a few of the islands. Several practical suggestions were added as to the best method of packing and shipping. In *Australasia*, Canadian wheat, agricultural machinery, carbide of calcium, furniture and timber were reported to be meeting on the whole a good market, though in *New Zealand* some contraction in the demand for imported goods is anticipated. In *South Africa* a general shrinkage in imports was reported, though prospects are stated to be improving.

The Canadian cattle trade with Great Britain suffered somewhat in activity dur-

ing October, from the large proportion of medium and poor grade animals offering, for which only a moderate demand was reported. Good lots, however, found a ready sale, though the entire export trade for live stock was quiet.

The Canadian agent for the Department of Agriculture at Liverpool, England, stated that \$5,846,997 worth of poultry and game was imported into Great Britain during the last calendar year, of which \$132,000 worth came from Canada. The shipment of regular supplies over as long a period as possible was advised in order to avoid the glut in the markets during the Christmas season.

Domestic Trade.

Though the month of October was on the whole somewhat less active than the corresponding period of 1903, very fair conditions were reported from the wholesale and retail points of distribution. In Manitoba, the Territories and British Columbia, domestic trade was particularly active. The mildness of the weather in Eastern Canada somewhat interfered with sales of winter dry goods stocks, though the sorting trade was reported to be of the usual volume of the season, with an improvement in payments. With the assurance of a good western harvest the general outlook is regarded as satisfactory, though buying is characterized by a spirit of moderation. The approaching close of navigation gave a stimulus to the movement of goods into localities depending on water transportation.

The 49th annual report of the Molsons Bank for the year ended September 30, 1904, showed a net profit of \$457,290, out of which \$150,000 were added to the reserve fund, which now equals the paid up capital, namely, \$3,000,000. An additional branch was opened during the year, and the expectation expressed that the dividends of the bank might be substantially increased next year.

According to Dun's Review there were 910 business failures in Canada during the first nine months of the present year, of which 366 were in Quebec and 317 in On-

tario, liabilities aggregating \$8,988,140 as against \$5,332,611 last year, when there were 721 failures. Manufacturing failures were 225 in number as against 167 last year.

Revenue and Expenditure.

Official returns show a total of \$70,657,-078.18 revenue for the present fiscal year up to September 30, as against \$66,037,-065.93 last year. On capital account during

the same period, \$11,035,970.58 have been expended as against \$10,051,628.62, last year. The chief items of this expenditure were as follows:—

	1903.	1904.
Public Works, Railways and Canals.. ..	\$6,174,958 98	\$5,817,773 65
Militia capital....	428,223 40	1,299,910 11
Railway subsidies..	1,463,222 34	2,046,878 45
Bounty on iron and steel.. ..	1,408,252 60	1,130,041 29

N. W. T. LEGISLATION AFFECTING LABOUR, 1904.

ON October 8 assent was given by the Lieutenant Governor of the North-west Territories to an Ordinance 'Respecting Master and Servant,' passed by the Legislative Assembly of the Territories. The Ordinance constituted the only measure introduced during the session which directly affected the condition of labour.

The Ordinance provides that every contract for personal service is to be subject to its provisions, a contract for any period longer than one year to be in writing and signed by the contracting parties.¹

Misconduct of Servants.

The relations of master and servant are dealt with from two points of view according as the offender is an employee or an employer of labour. Drunkenness on the part of an employee, the absenting from employment without leave, or the dissipating of employer's property, is made punishable by a maximum fine of \$30, together with the cost of prosecution, imprisonment for a period not exceeding one month being prescribed in default of payment of the fine.²

Recovery of Wages, Improper Dismissal, &c.

The Ordinance also provides, in protection of the interests of labour, for the pun-

ishment of masters (under which term corporations, as well as individuals or partnerships are included)³ for non-payment of wages, and the ill-usage or improper dismissal of servants. Employers guilty of any of these offences may be summoned by a justice upon oath of the employee, and upon due proof of the cause of complaint appearing, the justice may discharge the employee from service of his master and direct the payment to him of any wages found due. Action, however, cannot be brought for a greater sum than two months' wages. Damages for improper dismissal may also be assessed against the master up to the amount of four weeks' wages. Counter claims by an employer may be dealt with by a judge.³ Proceedings under the Ordinance may be taken within three months after the engagement or employment has ceased, or within three months after the last installment of wages has become due, whichever may last happen.⁴ The Ordinance in no way curtails other remedies for the recovery of wages or for damages which employers may have against servants.⁵

The Ordinance repeals all previous legislation on the subject of master and servant.

TRADE DISPUTES DURING THE MONTH OF OCTOBER.

THE month of October was free from serious industrial disturbances, no disputes of great magnitude having taken place in the Dominion. The only places where new strikes took place were Sydney, N.S., Montreal, Que., Toronto and Goderich, Ont., and Vancouver, B.C., only one of which affected more than 100 work-people.

Analysis of Trade Disputes during the Month.

Number and magnitude.—There were 10 disputes in existence during the month, of which two began prior to October 1 and eight after. This was the same number as in the previous month, and a decrease of one compared with October, 1903. About 14 firms and 457 employees were affected by trade disputes during the month.

The magnitude of the new disputes, according to the number of working people involved, was as follows:—

Magnitude.	Number of Disputes.
From 100 to 200.. . . .	1
From 50 to 100.. . . .	3
From 25 to 50.. . . .	2
From 6 to 25.. . . .	2

Loss of time in working days.—The loss of time to employees through trade disputes during October was approximately 5,250 working days, a decrease of about 37,000 days compared with September and of 8,750 days compared with October, 1903.

Trades affected by new disputes.—The following trades were affected by the new disputes of the month.

Trades.	Number of Disputes.
Fishing.. . . .	1
Metal trades.. . . .	1
Woodworking.. . . .	1
Printing.. . . .	3
Clothing.. . . .	1
Unskilled labour.. . . .	1

Causes of new disputes.—Six of the new disputes were due to the refusal of the employers to grant increased wages; one was due to the employment of unskilled labour

to operate machines which the strikers claimed required skilled mechanics or apprentices, and one was due to the employment of a shareholder in a firm to operate a machine, the strikers claiming that he was a non-unionist employee.

Methods of settlement.—Of the 10 disputes in existence during the month, definite settlements were reached in 4 cases, and in 2 others conditions ceased to be affected, leaving 4 still in existence at the end of the month. Two disputes were settled by negotiations between the parties concerned, and the remaining four came to an end without any negotiations.

Results of disputes.—The employers were successful in three disputes which were terminated, the employees were successful in one, and a compromise was reached in two cases, in one of which a reduction of wages was accepted by the men and in the other an increase in wages was granted.

Disputes commenced prior to the beginning of the month.

The only disputes which began before October and were in continuance during the month were a strike of saw-smiths at St. Catharines, Ont., and a strike of iron moulders at Hamilton, Ont.

The dispute of saw-smiths of the Welland Vale Saw Works at St. Catharines, Ont., which began on June 30, ceased to affect the industry in the course of the month, the factory having been declared an 'open shop,' in September.

A strike affecting about 50 iron puddlers and rollers of the Ontario Rolling Mills at Hamilton, Ont., which began on September 26, was settled on October 5. The dispute was due to a reduction in wages of 13 per cent, which the company had proposed to put into effect. After negotiations between the parties concerned an agreement was reached, the men consenting to accept a reduction in wages of 8 per cent.

TABLE OF TRADE DISPUTES OF THE MONTH OF OCTOBER. DEPARTMENT OF LABOUR, CANADA.
STATISTICAL TABLES, SERIES C, No. 46.

Province.	Locality.	Occupation.	Alleged Cause or Object.	No. of Firms or Establishments affected.	Approximate No. of Employees affected.		Date of commencement.	Date of termination.	Result.
					Directly.	Indirectly.			
DISPUTES WHICH BEGAN PRIOR TO THE BEGINNING OF THE MONTH.									
Ontario.....	St. Catharines	Saw smiths	Objection to employment of an extra apprentice.	1	5	15	June 30	Factory declared an open shop, conditions ceased to be affected.
"	Hamilton	Iron moulders	Objection to reduction in wages of 13 per cent.	1	50	Sept. 26	Oct. 5	Men agreed to a reduction in wages of 8 per cent.
DISPUTES WHICH BEGAN DURING THE MONTH.									
B. Columbia	Vancouver..	Habitat fishermen.	Demand for increase in wages .	1	70	Oct. 1	No settlement reported at end of month but company named two ships with others.

"	Toronto.....	Piano workers....	For increase of finishing department from 27, 28 to 30c. an hour.	1	16	96	" 6	Oct. 21	Two men were given 2c. per hour increase, the others returned for same rate.
Quebec.....	Montreal....	Silk waist makers (female).	Demand for increased price on new style of silk waist.	1	50	" 20	" 24	Company granted an increased price.
Nova Scotia.	Sydney.....	Machinists.....	A protest by strikers against employment of unskilled labour to operate machines which they claimed required skilled mechanics or apprentices.	1	28	" 22	" 24	Strikers withdrew protest and returned to work.
Quebec.....	Montreal....	Printers.....	Discharge of 4 men for refusing to work at night for a less rate than time and a-half.	1	26	" 25	" " "
Manitoba...	Winnipeg....	"	Objection of men to partner of firm working on a machine.	1	12	" 26	" " "

*Considerable difficulty has been experienced by the Department of Labour in making an exact classification of existing trade disputes, particularly in cases where, after the declaration of a strike, some of the original strikers have returned to work, or have had their places filled with new hands, or where the establishments affected have found that for either of these reasons, or both, or for other causes, their business is no longer seriously affected. In such cases while, in one sense it may be true, that a strike may be regarded as still in existence because of no formal declaration by either of the parties of its termination, yet so far as the actual effect upon the business interest of the community is concerned a record of the continuance of such a dispute might be misleading. The list of trade disputes published in the present table, therefore, includes mention only of such disputes as during the month or at its termination affected to an appreciable degree the carrying on of the industrial or business operations of the firms or establishments concerned, mention, moreover, is not made of disputes involving less than six employees or of less duration than 24 hours.

New Disputes.

None of the new disputes of the month, of which there were eight, were of sufficient importance to require more than a brief mention.

A strike occurred at Vancouver, B.C., early in the month, affecting about 70 deep-sea fishermen employed in halibut fishing, owing to the failure of employees of the New England Fish Company to reach an agreement with the company with regard to the rate of payment for the season. At a conference the men proposed that they should be paid at the rate of $1\frac{1}{4}$ cents per pound for fish during the first six months, and 1 cent per pound during the following six months, or $1\frac{3}{8}$ cents per pound for a year. The company refused this and offered \$1.15 per 100 pounds for four months, and 1 cent a pound for the next eight months, fish under 10 pounds and scarred fish to be half price. This offer was rejected by the men. No settlement was reached during the month, but the company succeeded in manning two ships, one of which sailed on October 8th, and the other on the 11th.

On October 10th a strike took place at Montreal, affecting about 69 printers and bookbinders, employees of 5 firms. The cause of the dispute was the refusal of these establishments to grant the demand for an increase in wages from \$12.50 to \$14 per week of 54 hours. No settlement of the dispute was reached during the month. The other printing houses of Montreal had granted this increase.

On October 6 16 piano workers in the finishing department of the Palmer Piano Company, Toronto, declared a strike, owing to the refusal of the company to grant them an increase in wages from 27 and 28 cents to 30 cents per hour. The strike lasted until October 21, and affected 96 other employees indirectly. The company reported that the executive committee of the Piano Workers' Union ordered the men to return to work, after they had looked over the pay roll and ascertained their earnings. The strikers accordingly did so on the 21st, two of their number having been granted an increase of 2 cents per hour.

On October 20, about 50 female employees of the American Silk Waist Company of Montreal, stopped work, owing to a refusal of the company to grant them higher prices for piece-work on a new style of waist than they had been receiving for work done on a former pattern. The strikers claimed that the new style was such that they would be unable to earn sufficient to live on at the old rate. The company, however, stated that they were unable to grant higher rates owing to increased competition, but a few days later an increase was granted and the employees returned to work on October 24. Exact particulars of the change in prices were not reported to the department.

On October 22, about 8 employees in the machine shops of the Dominion Iron and Steel Company, at Sydney, N.S., engaged on the night shift, stopped work owing to the employment of a handy man to operate machines, which they claimed required a skilled mechanic or apprentice to operate. The company reported that two days later the men agreed to return and to raise no further objection to a handy man doing this class of work.

On October 15 about 40 labourers employed by Messrs. M. A. Pigott & Co., on construction work for the Canadian Pacific Railway Company at Goderich, Ont., went on strike, owing to the refusal of the firm to increase their wages from \$1.50 to \$2 per day. The strikers were offered \$1.75 per day but refused to accept it, and no settlement of the dispute was reported at the end of the month.

On October 25, a strike of printers of the Gazette Printing Company, of Montreal took place. The cause of the dispute was the discharge of four employees who refused to work at night at a rate of wages less than time and a half. No settlement was reached by the end of the month.

A strike of 16 printers was declared at Winnipeg on October 26, which affected 12 men, and was in continuance at the close of the month. The question in dispute was as to whether a shareholder should be regarded as an employer or an employee. The

Moore Printing Company had installed a Lanston Monotype machine, which was operated by a partner in the firm. The printer's union claimed that this partner lived on his salary and not on dividends from the firm, and he should, therefore, be regarded as an employee, and the printers refused to work with him on the ground that he was not a member of their union.

On October 10th, a dispute occurred at Hamilton, Ont., which partook of the nature of a lockout. Four vessel owners discharged 23 members of the Longshoremen's Union No. 120, on the ground that their wages were too high and their work unsatisfactory,

and other men were engaged in their places. The discharged employees placed the matter in the hands of the International Executive Committee of their Union, but no settlement of the case was reached by the end of the month. As this dispute does not appear to have caused any interruption to industry, it has not been included among the disputes of the month.

The table published herewith is a compilation of the trade disputes in the Dominion of Canada which began or were in continuance during the month of October, and which have been reported to the department.

GOVERNMENT CONTRACTS FOR THE MONTH OF OCTOBER.

(Information supplied by the Department of Public Works.)

The following is a list of the contracts awarded by the Department of Public Works, which received the signature of both parties to them during the past four months, together with a minimum rate of wages to be paid to the labourers engaged upon the work, as set forth in the 'Fair Wages' schedule inserted in each contract :—

Crib wharf—Bracebridge, Ont., Contractor, John Baker, Bracebridge, Ont. Date of contract, October 31, 1904 ; Amount of contract, \$8,200.

FAIR WAGES SCHEDULE.

Trade or Class of Labour.	Rate of Wages.	
	Not less than the following rate:	
Carpenters	\$2.00	per day of 10 hours.

INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER, 1904.

Under this heading account is taken of such accidents only as were sustained by workmen in the course of their employment and resulted in the loss of life or limb or other serious impairment to industrial efficiency. The accidents reported are such as have come to the notice of the department through the press of the country or correspondents of the *Labour Gazette*. The department is also indebted to the Bureaus of Mines of Ontario and British Columbia, to the office of the factories inspectors of the province of Ontario, to one of the factory inspectors of Nova Scotia, and to the Department of Railways and Canals, Ottawa, for their kind assistance in furnishing the department with the statement of returns of accidents reported to them.

The Department of Labour received notice of industrial accidents to 201 individual workpeople, which took place in Canada during October, involving a loss of 70 lives, and serious injuries to 130 other persons. Compared with September, this was a decrease of 29 in the total number of persons meeting with accidents, and a decrease of 6 in the number of lives lost.

The following is the record of the month by industries and groups of trades:—

Trade or Industry.	Killed.	Injured.	Total.
Agriculture.....	3	16	19
Fishing	12	12
Lumbering	4	6	10
Mining.....	7	14	21
Building trades	3	9	12
Metal trades.....	2	16	18
Woodworking trades.....	1	3	4
Printing trades.....	1	1
Textile trades	2	2
Food and tobacco preparation.....	3	3
Leather trades.....	1	1
Railway service.....	14	25	39
General transport.....	14	13	27
Miscellaneous trades.....	3	10	13
Unskilled labour.....	7	11	18
Total	70	130	200

In addition to the above, there were reported to the department 10 accidents, in-

volving the loss of 4 lives, which took place prior to October 1, information of which had not been previously received.

Nature of Fatalities and Accidents.

The greatest loss of life from any single accident during the month was due to the wrecking of a steamship in the Gulf of St. Lawrence during a heavy gale on October 8, when all on board, to the number of 19 people, were drowned. About 12 of these were fishermen, and the crew of the vessel numbered 5 persons. While the number of accidents to railway employees was much less than in the previous month, one serious disaster occurred which caused the loss of 6 lives, nearly half of all who were killed in this industry during the month. This disaster, an account of which is given below, occurred at the St. Clair Tunnel on October 9th, another accident causing injuries to a number of persons, a description of which is also given below, was due to a boiler explosion in Beverley township, Ont., on October 8.

Disaster in the St. Clair Tunnel, Ont.

On October 9, six men were suffocated by carbonic gas in the St. Clair submarine tunnel, which connects Sarnia with Port Huron. The following is the official statement of the accident given by the Grand Trunk Railway Company, whose train was being taken through the tunnel. The victims, however, were employees of the St. Clair Tunnel Company.

Run No. 40, engineer John Coleman, conductor J. B. Simpson, seventeen cars, left West Summit 5.25 a.m., broke apart in tunnel; took three cars out at 5.35 a.m.; went back and brought out one car chained up at 6.10 a.m.; returned and brought out three cars at 6.35 a.m.; returned for remainder of train and pushed it out through American portal, when engineer Coleman was overcome and train stalled. Brakeman Short ran out to American portal and called for help. Mr. Begg, with engineer Morden and pumpman Millen, started to assist conductor Simpson and Tinsley, who were in the caboose, but Mr. Begg was overcome, and, while trying to carry him out, engineer Morden was overcome, but pumpman Millen managed to get out at 7 a.m. Engine went in from Sarnia in charge of yardmaster McKee, conductor Fisher and brakemen Hamilton, Hann, McGrath and Cameron. They found trackwalker overcome and got him out. While trying to get train out brakemen were all overcome, but were taken

out and revived, except McGrath, who was dead. They finally got train out at 10 a.m. and cleared tunnel.

Following is the list of dead :

Engineer J. Coleman.
Conductor J. B. Simpson.
Conductor R. Tinsley.
Brakeman McGrath.
Brakeman D. A. Gillies.
A. S. Begg.

Fireman of engine 1301 saved himself by getting in tank of engine. There was a heavy fog and atmosphere very heavy. Only slight air stirring and gas and smoke came through tunnel from east end, making it almost impossible to do anything from west end. Mr. Begg's body was taken to undertaker's at Port Huron, and the others in charge of the Canadian authorities. Mr. Begg's body was found about half-way between the portal and the flat, and was recovered by engineer Cook, fireman, and yardmaster Bowen.

(Signed) W. G. BROWNLEY,
Superintendent.

A coroner's jury, which conducted an inquiry into the death of J. Gillies, one of the victims, rendered the following verdict after an examination of over twenty witnesses :

J. Gillies came to his death by suffocation from gas in the St. Clair tunnel on October 9, 1904, while in the discharge of his duty as a tunnel brakeman for the St. Clair Tunnel Company. The jury also are of the opinion that if the St. Clair Tunnel Company had better equipment for ventilation it would, in a measure, have prevented the accidents that have occurred since the opening of the tunnel for traffic. And we strongly urge that the railway commission appointed by the government investigate what means the St. Clair Tunnel Company should adopt to prevent loss of life in the future.

(Signed) DAVID STOKES.
Foreman.

Fatal Boiler Explosion in Beverley Township.

The death of two workpeople resulted from the explosion of the boiler in a portable saw-mill in Beverley township, Ont., on October 8. One of the victims was thrown under the saw and died two hours later; the other was a boy fifteen years old who was acting as fireman and engineer. The mill was wrecked by the explosion and two other hands slightly injured. A Dundas coroner was notified and an inquest held.

Accident to Farm Labourers at Clearville, Ont.

On October 24 four farm labourers at Clearville, Ont., received serious injuries

when sawing rails. A pile of rails, standing on end near the sawing machine, fell over, burying the men beneath them. When the rails were removed, it was found that all of them had received deep cuts on the head, and one had his arms and shoulders almost crushed to a pulp. Another had a broken leg, and a third was also injured on the shoulder and back. None of the injuries, however, proved fatal.

The Records by Trades and Industries.

Agriculture.—In addition to the accident noted under a separate heading above, by which four men were severely injured, the record for the month shows 15 additional instances of severe injuries received, three of which proved fatal, and two others, namely, that of a farmer at Portage Creek, Man., who was gored by a bull, and that of a farmer at St. Isidore, Que., whose back was broken by being jammed between a load of hay and the barn door, will probably prove fatal. Other injuries reported were suffered by two farmers, one of whom fell from a silo and the other from a wagon while loading hay; an apple picker who fell from a ladder while picking apples, and a farm hand who fell into a cylinder of a threshing machine and had one leg torn off and the other badly crushed. The fatal accidents happened to a farmer at Eaton Corner, Que., who was run over by a train; a farmer at Gaspé, Que., who was struck by a broken wheel of a threshing machine on October 25, and a farmer's son, who fell off a loaded wagon and was run over near Dutton, Ont., on October 19.

Fishing.—There was only one disaster reported to the department during the month in the fishing industry, but it caused the death of about 12 fishermen. On October 8, the steamship *Call*, of about 300 tons burden, was sunk in a gale near New London, P.E.I., with all on board. There were 14 passengers, nearly all of whom were fishermen. No particulars of the wreck could be obtained.

Lumbering.—In addition to the accident to saw-millers in Beverley township, Ont.,

noted in a special paragraph above, there were two fatal accidents and five involving serious injury to workpeople under this heading. One fatal accident was the drowning of a lumberman at St. Martins, Que., by the overturning of a boat while working at a log jam, and the other happened to a saw-mill hand at Parry Sound, Ont., on October 25, whose face was pierced to the brain by a piece of wood which flew off from a gang edger. Other accidents were to a lumberman at Sudbury, Ont., whose leg was broken by the shifting of a log, and to a boy employed in a saw-mill at Gaspé, Que., whose clothing was caught in the shafting while he was adjusting a belt, and whose leg and arm were broken before the machinery could be stopped.

Mining.—Seven fatal accidents were reported, one occurring in the case of a boy who fell from a moving coal box at North Sydney, N.S., and one in the instance of a drill operator at Amherstburg, Ont., who was thrown into the water by an explosion of dynamite and drowned while unconscious, before rescue was possible. One miner was killed by falling rock, another by falling into an old pit, a miner and a quarryman were run over by cars, and a miner was killed at Alamo, B.C., when engaged in work, but particulars of his death were not received. Five miners at Glace Bay were burned about the head by an explosion of gas in Reserve Colliery, which followed the falling of coal, the gas becoming ignited from the miners' lamps. Two quarrymen had their limbs crushed while moving large stones, amputation being necessary in one case.

Building trades.—There were three fatal accidents in the building trades, and nine not fatal. A painter was killed by falling 60 feet, owing to the breaking of a scaffold. A builder's labourer fell from a third story window, and died from his injuries on the following day, and another labourer met his death by being struck on the head by a brick which fell from a chimney. Two serious accidents were caused by scaffolding giving way, and all the other accidents, except one, were caused by falls, the exception

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF SEPTEMBER.

DEPARTMENT OF LABOUR, CANADA,
STATISTICAL TABLES, SERIES F. No. 11

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Agriculture—</i>						
Farmer	St. Isidore, Que.	Oct. 11	1	1	Back broken.	Jammed between load of hay and door.
"	Middlemarch, Ont.	" 4	1	1	Rib broken and internally injured.	Fell from top of silo.
"	Portage Creek, Man.	" 24	1	1	Ribs broken and probably fatally injured.	Gored by a bull.
"	Centreville, Ont.	" 8	1	1	Leg broken.	Thrown from wagon while loading hay.
Farm hand	Carletonville, N. W. T.	" 1	1	1	One leg torn off; the other crushed.	Fell into cylinder of threshing machine.
Apple picker.	Bowmanville, Ont.	" 1	1	1	Sciatic nerve injured.	Fell from ladder while picking apples.
Farm hands	Clearville, Ont.	" 24	1	4	One man's leg was broken, others had severe cuts and bruises.	By overturning of a pile of rails.
Farmer	Quebec	" 8	1	1	Leg broken.	By a fall.
"	Erin, Ont.	" 20	1	1	Jaw broken.	Kicked by a colt.
"	Guelph, Ont.	" 23	1	1	Two ribs broken.	Attacked by a bull.
"	Riceburg, Que.	" 7	1	1	Lost a finger.	Blown off by a stick of dynamite.
"	Eaton Corner, Que.	" 25	1	1	Struck by a train when crossing a track.
Farmer's son	Gaspé, Que.	" 19	1	1	Wheel of threshing machine broke and struck his head.
Thresher	Near Dutton, Ont.	" 23	1	1	Jaw broken.	Fell off a loaded wagon and was run over.
Farm hand	Mackenzieville, Man.	" 17	1	1	Arm broken.	A cylinder head blew out.
Fishing—	Moosemin, N. W. T.	" 17	1	1	Arm broken.	Caught in the wheel of a threshing.
Fishermen.	Gulf of St. Lawrence.	" 8	12	1	Drowned.	Steamer sank in gale.
Lumberman	St. Martin, Que.	" 13	1	1	Boat overturned while working at a log jam.
Saw-millers	Sudbury, Ont.	" 8	2	1	Leg broken.	Log rolled on leg.
Saw-mill hand (aged 15).	Beverly Township, Ont.	" 12	1	1	Arm and leg broken, with other injuries.	By explosion of boiler of portable saw-mill.
"	Gaspé, Que.	" 10	1	1	Arm broken.	Clothing caught while adjusting belt operating a circular saw.
"	Gaspé Basin, Que.	" 25	1	1	Caught between belt and pulley.
"	Parry Sound, Ont.	" 21	1	1	Leg broken.	Face and brain pierced by a piece of wood, when working a gang edger.
"	Montreal, Que.	" 4	1	1	Lost two fingers.	Caught in a wheel.
"	Fredricton, N. B.	" 18	1	1	Lost two fingers.	Caught by a circular saw.
"	Winnipeg, Man.	" 18	1	1	Fingers badly cut.	Hand caught in machinery.
Miner hand (14 yrs. old).	North Sydney, N.S.	" 18	1	1	Fell from a coal box and 20 boxes passed over him.

Drill operator	Amherstburg, Ont.	Oct.	12	1	Drowned	Thrown into water by explosion of dynamite.
Miners	Glouce Bay, N.B.	"	14	5	Burned about head	By an explosion of gas in Reserve colliery.
Miner (coal)	Nanaimo, B.C.	"	11	1	Small bone of leg broken	Struck by falling coal.
"	"	"	12	1	Head cut and leg broken	"
Miner (gold)	Roseland, B.C.	"	3	1	Lost little finger	Killed when working in a mine.
"	Alamo, B.C.	"	11	1	Collar bone fractured	
Miner	Roseland, B.C.	"	13	7	"	Fell into an old pit.
"	Thetford Mines, Que.	"	13	1	"	Killed by falling rock.
" (coal)	Sydney, N.S.	"	13	1	Seriously injured	Struck by falling coal.
"	"	"	13	1	"	Injured by a gas explosion in a mine.
"	Reserve Mines, N.S.	"	14	2	"	Fell off the trip in a coal mine and was run over.
"	Sydney, N.S.	"	18	1	Leg crushed, requiring amputation.	By a 500 ton stone which was being raised.
Quarryman	Shediac, N.B.	"	14	1	"	
"	Spoon Island, N.B.	"	1	1	Leg broken	By fall of a stone.
"	Stony Mountain, Man.	"	4	1	"	Fell beneath a loaded stone car.
<i>Building Trades—</i>						
Carpenter	Port Colborne, Ont.	"	4	1	Face badly cut	Fell from a crib.
"	Toronto, Ont.	"	19	1	Arm broken	By fall from scaffolding.
"	Stratford, Ont.	"	6	1	Face cut and bruised, and small bones of foot broken.	Fell 30 feet from a roof.
"	St. Thomas, Ont.	"	7	1	Back severely injured	Fell 12 feet from scaffold.
Painter	Montreal, Que.	"	14	1	Leg broken	Fell 15 feet off a ladder.
"	Brockville, Ont.	"	17	1	Head badly cut	By fall of scaffolding.
"	Winnipeg, Man.	"	18	1	"	Scaffold broke and he fell 60 feet.
Bricklayer	London, Ont.	"	1	1	Leg broken and back injured	Fell 20 feet from a scaffold.
Builders' labourer	Toronto, Ont.	"	14	1	Arm and hip broken and injured internally.	Fell from a 3rd story window; died next day.
"	Quebec, Que.	"	27	1	Head badly cut	Struck by a falling block and pulley.
"	Stratford, Ont.	"	18	1	Rib and arm broken	Scaffold gave way.
"	Hamilton, Ont.	"	4	1	Head crushed	Struck by a brick falling from a chimney.
<i>Metal Trades—</i>						
Steel worker	Niagara Falls, Ont.	"	13	1	Seriously injured internally	Fell from a building.
Moulder	London, Ont.	"	18	1	Head cut	Piece of metal flew up.
"	Guelph, Ont.	"	19	1	Right foot burnt	Spilled molten iron on his foot.
Tube mill hand	"	"	29	1	Neck and back burnt	Molten metal fell on him.
Lineman	St. Catharines, Ont.	"	7	1	Shocked and badly shaken by fall.	Came in contact with live wire and was thrown from 30-foot pole.
"	"	"	4	1	Skull slightly fractured	Fell 10 feet off some false work.
"	Hamilton, Ont.	"	18	1	Badly burned about hands.	With boiling pitch.
Machinist	Montreal, Que.	"	17	1	Neck broken	By fall of a piece of iron.
Employee of electric machine factory.	Hamilton, Ont.	"	12	1	Badly cut on head	Struck by a piece of iron.
Employee of locomotive works	Welland, Ont.	"	8	1	Eye injured, may lose it.	Struck by a piece of flying steel.
"	Montreal, Que.	"	20	1	Had a severe scalp wound.	Struck by machinery when moving it.
"	"	"	23	1	Hand injured	Caught in a cog-wheel.
"	Woodstock, Ont.	"	18	1	Skull crushed	Struck by an iron bar.
"	Hamilton, Ont.	"	13	1	Hand badly cut	Caught in a lathe.
Machine shop hand	Hamilton, Ont.	"	15	1	Hand injured	Crushed by a drop press.
Tinsmith	Niagara Falls, Ont.	"	6	1	Lost part of a finger.	Cut in a tin cutting machine.
Blacksmith	Montreal, Que.	"	22	1	Face seriously burnt	By a burst of flame.
Stationary engineer	"	"	18	1	Legs scalded	By a jet of hot water.

TABLE OF INDUSTRIAL ACCIDENTS DURING THE MONTH OF OCTOBER—Continued.

Trade or Industry.	Locality.	Date.	Killed.	Injured.	Nature of Injury.	Remarks.
<i>Woodworking Trades—</i>						
Mill hand.....	Owen Sound, Ont.....	Oct. 17	1			Pulley in a moulding machine flew in pieces, striking him on head.
"	London, Ont.....	" 17		1	Hand lacerated.....	Caught by a saw.
Pattern maker.....	Walkerville, Ont.....	" 21		1	Lost a thumb.....	Cut off by a buzz saw.
Handle factory hand.....	London, Ont.....	" 17		1	Hand badly lacerated.....	Caught by a saw.
<i>Printing</i>						
Lino type operator.....	Hamilton, Ont.....	" 17		1	Lost a thumb.....	When operating a lino type machine.
<i>Textile Trades—</i>						
Knitting mill hand (female).....	Rockwood, Ont.....	" 25		1	Scalp torn.....	Hair caught by a revolving shaft.
Cotton mill hand.....	Montmorency, Que.....	" 11		1	Face and head cut and arm bruised.	Caught by belt and thrown down.
<i>Food and Tobacco Preparation—</i>						
Butcher.....	Hamilton, Ont.....	" 25		1	Leg broken and body badly bruised.	Fell 60 feet down an elevator shaft.
Employee in a jam factory.....	Sherrbrooke, Que.....	" 7		1	Hand badly injured.....	Caught in machinery.
Ice man.....	Hamilton, Ont.....	" 18		1	Head cut.....	Piece of ice fell.
<i>Leather Trades</i>						
Tanner.....	Quebec.....	" 3		1	Leg broken.....	Fell down stairs in a tannery.
<i>Railway Service—</i>						
Superintendent of terminals.....	Sarnia, Ont.....	" 9	1			Suffocated in a tunnel.
Conductor.....	Burlington, Ont.....	" 4		1	Knee-cap torn off.....	Fell between train and platform.
"	Sarnia, Ont.....	" 9	2			Suffocated in a tunnel.
Engineer.....	Near Sapperton, B.C.....	" 5	1		Fatally scalded; died Oct. 11	Engine valve broke in a collision.
"	Near Westmount, Que.....	" 19		1	Leg broken.....	Hurt in a collision.
"	"	" 19		1	Hand crushed.....	"
"	McKinnon's Harbour, N.S.....	" 15		1	Arm and leg broken.....	"
"	Sarnia, Ont.....	" 9	1			Suffocated in a tunnel.
Fireman.....	Near Westmount, Que.....	" 18		2	Legs broken.....	Hurt in a collision.
"	Murillo, Ont.....	" 15		1	"	Jumped from engine to escape a collision.
"	Walkerville, Ont.....	" 12		1	Badly cut on forehead.....	Fell out of engine cab.
Brakeman.....	Hamilton, Ont.....	" 1		1	Lost an arm.....	Fell under moving train and two cars passed over him.
"	"	" 4		1	Knee injured.....	Hurt by a fall.
"	Woodstock, Ont.....	" 8		1	Foot crushed.....	When trying to adjust a coupling with his foot cars came together and crushed it.
"	Sedroey, N.S.....	" 17		1	Legs and an arm badly crushed; may lose them.	Foot caught in a frog and he was run over.
"	Chamboard, Que.....	" 28		1		Crushed between cars when coupling them.

"	Sarnia, Ont.	"	9	2	1	Hand crushed and legs bruised.	Suffocated in a tunnel.
"	Near Westmount, Que.	"	19	1	"	"	Hurt in a collision.
"	"	"	19	1	"	"	Killed in a collision.
"	McKinnon's Harbour, N.S.	"	15	1	"	"	"
"	Murillo, Ont.	"	15	1	1	Badly scalded and injured internally by inhaling steam.	Hurt in a collision.
"	Quebec, Que.	"	9	1	1	Badly injured internally.	Fell from the top of a car.
"	St. Thomas, Ont.	"	14	1	1	Side injured.	Fell off a car.
"	Bowmanville, Ont.	"	20	1	1	Lost both feet.	Fell when boarding a train and was run over.
"	Winnipeg, Man.	"	3	1	"	"	Crushed between two engines.
"	Fort William, Ont.	"	16	1	"	"	Run over by a switch engine.
"	"	"	21	1	"	Skull fractured.	Fell off a tender.
"	Montreal, Que.	"	14	1	1	Almost suffocated.	Overcome by coal gas.
"	Peterboro', Ont.	"	16	4	1	Ribs broken.	Struck by a train.
"	Niagara Falls, Ont.	"	29	1	1	Head cut and hip and back injured.	Struck by an engine.
"	St. Thomas, Ont.	"	20	1	1	Legs badly crushed.	Fell between cars and was run over.
"	Bowmanville, Ont.	"	17	1	"	Neck broken.	Struck by a train.
"	Montreal, Que.	"	16	1	"	Injured internally.	Crushed between an electric car and a vehicle.
"	"	"	17	1	"	Hand badly smashed.	When clearing away wrecked cars.
"	Stratford, Ont.	"	19	1	1	Legs badly injured.	Struck by a large piece of iron.
"	Preston, Ont.	"	17	1	1	Lost left foot and had other severe injuries.	Hurt in a collision.
<i>General Transport—</i>							
"	Halifax, N.S.	"	8	5	"	"	Swept overboard and drowned.
"	Northumberland Strait	"	21	1	"	"	In sinking of ss. <i>Call</i> in a gale.
"	Seaman.	"	24	1	"	"	Fell out of a stiff.
"	Port Colborne, Ont.	"	21	1	"	"	Fell into a ship's hold.
"	Longshoreman.	"	18	1	"	"	Caught in shafting.
"	Winnipeg, Man.	"	28	1	"	"	Horses ran away and he was thrown out of cart.
"	Peterboro', Ont.	"	8	1	"	"	Fell under wheels of a cart.
"	Quebec, Ont.	"	22	1	"	"	By slipping of timbers.
